Dedication

In gratitude and
admiration for their
unceasing efforts
in making the first
footsteps for
The Technical Institute,
we proudly dedicate
THE TECHNICIAN'S LOG
of 1949 to
The First Graduating Class.

to:

The First

Graduating Class

Kneeling: T. T. Wells, C. E. Sandefur, C. L. Stewart, J. E. Butler, J. I. Eargle, W. C. Henry, P. A. Ludwick and W. R. Richardson. . . . *Standing:* R. C. Bynum, W. T. Duffey, C. E. Ethridge, L. J. Ingram, J. S. Charles, J. G. Smith, H. A. Dale, J. E. Stewart, W. E. Nail, B. E. Alexander, J. S. Adams, W. E. Tyndale, J. F. Morison, R. H. Kines, W. L. Bost, R. A. Spitler, R. L. Hall, F. R. Tiencken, W. H. Dillard, J. E. Lee, N. R. Anderson, W. O. Walton, J. B. Thompson, Jack Byrd, B. D. Hobbs, J. H. Tyler, H. H. Dekle, C. J. McLendon, L. H. Beck, J. C. Withers, S. R. Pitts, J. B. Stanley, C. S. Roberts, A. B. Mallett, W. C. Layton, R. O. Murrah, and W. S. Frierson.

The Challenge

The Technical Institute had a very interesting origin. President Van Leer, in addressing the annual meeting of the joint committee of the Associated Industries of Georgia and Georgia Tech three years ago, challenged Georgia industry to set up clinics and training courses essential to the state's industrial program. As a result, last year the Associated Industries recommended to the Board of Regents that Georgia Tech's proposal for the establishment of The Technical Institute be approved. The Regents granted the authority requested.

The Technical Institute, established by the Board of Regents of the University System of Georgia and operated under the supervision and control of the Georgia Institute of Technology, occupies a \$1,500,000 campus at the Atlanta Naval Air Station. Although there is no educational connection with the Navy, the services rendered by the Navy have been invaluable. The facilities include two fine dormitories, four large laboratory and shop buildings, a maintenance building, a fine gymnasium and, in fact, everything needed by a modern college.

The rapid progress of The Technical Institute has been due to the patient and unceasing efforts of the able and efficient faculty and staff. The staff is headed by Mr. L. V. Johnson, director, Mr. J. D. Sewell, assistant director, and Mr. L. Y. Bryant, registrar.

The Building and Construction Department, under the direction of Mr. C. R. Orvold and his assistants, Mr. E. J. Muller and Mr. O. K. Houstoun, Jr., provides excellent training in drawing and architecture. The Electrical Department, under Mr. Hornstein, accomplished a great deal, but Mr. Hornstein stayed with The Technical Institute only a short while. Heading this department now is Mr. L. L. Horner, assisted by the recently acquired electrical experts, Mr. S. T. Mayo and Mr. W. C. Chamberlain. These men are making this course very profitable. The Electronics and Radio Department is headed by Mr. F. A. Stovall, who has made this course very outstanding. Heading the Department of Civil Technology is Mr. C. T. Holladay, who, with a background of practical experience, combined with technical knowledge, is producing some highly desired civil technicians. In charge of the Mechanical Technology Department is Mr. C. A. Arntson, who, with his capable assistants, Mr. M. Y. Matthews, Mr. P. A. Ringsmith, and Mr. J. E. Lockwood, is making this department a great success.

The Department of Heating, Ventilating and Air-Conditioning, which prepares students to enter a promising and advancing field in industry, is led by Mr. L. H. Taylor. Under the leadership of the department head, Mr. F. J. Johnson, and his assistants, Mr. V. J. Baran and Mr. J. L. Davis, students in Industrial Management are training for supervisory positions in factories and engineering offices.

The underlying principles of advanced technology are based upon the facts and experience gained in three service courses. These three courses are mathematics, which is directed by Mr. C. V. Maddox, assisted by Mr. P. R. Lewis and Mr. R. L. Wilkinson; English, directed by Mr. G. L. Carroll, assisted by Mr. T. E. Greene and Mr. L. Y. Bryant; and physics, directed by Mr. G. L. Crawford, assisted by Mr. J. C. Clark, Mr. J. D. Defore, and Mr. C. E. Taylor. These men provide the background that the student must gain before entering into advanced technology.

Never has there been a more efficient office staff than Mrs. Helena Patillo, secretary to the director; Mrs. H. E. Henslee, secretary to the assistant director; Miss Doris Westbrook, secretary to the registrar, and Mrs. M. N. Mavity, treasurer, who took over the important position formerly filled by Miss Aileen Dempsey.

The rapidly increasing student activities at The Technical Institute are made possible by the cooperation of the instructors and the athletic director, Mr. F. J. Johnson. The sports this year have been confined to basketball, track and intramural sports. A temporary student council, elected by the student body, drew up a constitution for The Technical Institute. Many clubs have already been formed and more are under way.

The staff of the newspaper, *The Technician*, with the able help of Mr. L. Y. Bryant, Mr. C. R. Orvold, Mr. F. J. Johnson, and Mr. P. R. Lewis, has produced an outstanding periodical since September, 1948. The yearbook, *TECHNICIAN'S LOG*, has been planned and produced by a student staff, with Mr. G. L. Carroll, Mr. Orvold, Mr. Johnson, and Mr. Lewis as advisors.

Within the first year of its existence The Technical Institute has met the challenge of its sponsors. It has become a valuable and permanent unit in the educational system of the state.

Administration

Bell Officials On Visit Here Offer Students Counsel

What do you consider to be the most important subjects in the training of a technician who is applying for work with the Telephone Company?

This question was recently asked of Mr. M. H. Markwood, general personnel supervisor of the Southern Bell Telephone Company, who, with Mr. R. B. Dawson, district plant manager, had just completed a tour of The Technical Institute campus. Mr. Markwood's reply should be of interest to every student of The Technical Institute.

"The three most important subjects in a technician's study program," he said, "are, in my opinion, general physics, mathematics, and English. You can add fundamental psychology to that list. At the Telephone Company we are more interested in a prospective employee's grasp of the fundamental sciences, in his ability to express himself, and in his ability to get along with people. In his advanced technical training, we want that specialized technical training which is valuable, provided it is based on thorough fundamental knowledge of the subjects he is learning."

Mr. Markwood expressed his appreciation of the school of training at The Technical Institute. He told the laboratory staff that their service to the community is a very important job."

A FRONT PAGE EDITORIAL

As students and instructors were leaving Building 8 immediately after the assembly on January 13, Mr. J. D. Sewell, assistant director was heard to remark, "That was an excellent meeting. I've never seen a more attentive, courteous, better-behaved group of students."

Editors of The Technician echo Mr. Sewell and confirm his statement. The conduct of our students in every assembly has been above reproach and deserving of the highest praise. When over 300 men come together as orderly as ours have done on several occasions, listen courteously and attentively, dispatch their business in an enthusiastic, democratic spirit, and act like gentlemen all the while, they reflect much credit upon themselves and their school.

Men, we have something here which many, many schools over the country would give much to possess. Let's perpetuate this admirable precedent for the continued betterment of all concerned.

42 Students Make Honor Roll; Herms Heads List Again

Forty-two Technical Institute students made the fall quarter's official Honor Roll by having no failures, carrying at least 15 hours of college credit work, and achieving a 3.0 average or better.

Billie B. Herms, of Miami, Fla., led this list of outstanding students for the second successive quarter, with a 4.47 average. Candler E. Westorook, of Tucker, Ga., was not far behind with a 4.26 record. Only one more student, William O. Walton, of McCalysville, Ga., with a 4.0 average, did work of the all-"A" grade.

Coad Makes List
Miss Barbara Hudson, The Institute's only coed, continues to prove her ability to compete successfully with male students in technical subjects. Her quarter's average was 3.1, higher than many, lower than a few.

The other 39 students and their points averages follow: James S. Adams, 3.2; Richard F. Aldred, 3.3; Blanton E. Alexander, 3.2; Norman R. Andersen, 3.47; Lewis H. Bowen, 3.68; O. Bowen, 3.2; James S. Chaney, 3.2; J. C. Chubb, 3.55; W. G. Rankin, 3.2; Bert H. ...

Students Ratify Constitution; Choose Council Members Next

Permanent Organization Gradually Being Perfected by Hard Work, Sane Thinking

Ratification of the Constitution and By-Laws of the Student Government of The Technical Institute was effected by a two-thirds vote of the student body in assembly on Friday, January 14.

With this essential action achieved, the next step in perfecting a permanent student government will be the election of two representatives by each scholastic department in The Institute. When the representatives have been installed, they then will elect their own officers. The election will be held at that time by ballot as the governing body of the Student Government.

Natural outgrowth of the ratification of the Constitution and By-Laws of the Student Government of The Technical Institute was the election of a permanent organization to carry on the work of the temporary committee which drew up the Constitution and the faculty advisers who assisted them in their work.

visions for a referendum, several important standing committees, and a Trial Board to try cases of students who are accused of offensive or excessive drinking, stealing, gambling, destruction of property, sexual offenses, and illegal use of firearms or explosives.

Amendments Provided For
One of the most important sections of the Constitution is Article XI, which provides for amendments, how they may be proposed, and under what conditions adopted. Assistant Director J. D. Sewell, on behalf of faculty and students, expressed sincere appreciation to the temporary committee which drew up the Constitution and the faculty advisers who assisted them in their work.

Institute Enrolls 340 Students; Six Instructors Added

The Technical Institute began this year and the new changes in the way of conducting its instruction. Six of the new instructors bring the total number of the faculty to 27. The Board of Regents has approved the student activities program. The Constitution of the Student Government of The Technical Institute was ratified.

Honor Society Elects B. B. Herms President

Members of The Technical Institute's honor society, Tau Alpha Pi, met on Thursday, January 13, and elected their permanent officers for the coming year.

B. B. Herms, who has been chairman and who did most of the organization work last quarter, was elected president of the society. W. G. Rankin was elected treasurer. Both officers have served in the past.

Advanced Subjects Taught
The schedules are showing several new subjects this quarter, and the students are coming face to face with advanced work in their studies. As the work becomes more advanced, the interest in the subject grows, which fact is a good sign. As much as there is anyone to work with in subjects in the field rather than in the laboratory, he must take to the field. For this quarter, the chance to do what they wish to

Tyler and Murrah Win Slide Rules

Prizes in the contests to name the annual and to design the cover for it were awarded during a recent meeting of the student body. Winner in the name contest was Robert Murrah, student in the Industrial Management department. The cover designing contest was won by Jack Tyler, fourth quarter architecture student. Prizes were Kouffel and Esser slide rules. In making the presentations Mr. J. D. Sewell expressed his appreciation for the interest shown by the student body in the contests.

Dep't Committee Study Change of Credits

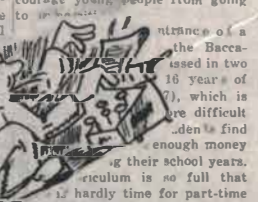

The committee due to study the change of credits between a technical institute and another and between a technical institute and an engineering school offering similar courses, and the problem of granting a semi-professional degree instead of a technician's diploma or certificate. The number of technical institutes, Mr. Johnson says, is rapidly increasing, as their many advantages are being realized more and more each day. California has about sixty technical institutes—some as two additional years to high school—and New York has twelve. It is believed that ninety per cent of the jobs in the engineering fields can be handled by "technicians."

Editors Hands American Colleges Prepare for Life; French, for Exams

I remember having read in a French novel several years ago a phrase that struck my curiosity: "gay as an American College." I wondered how a college could be gay. All the ones I had known were dark and old looking. And as for gaiety, they all seemed to have had the appearance of a prison gate. So, on my arrival in America, imagine how anxious I was to know if this statement was correct. So far, I have known two colleges in this country—one in the North and this one (The Technical Institute) in the deep South. These have given me some idea of

American colleges in general. Now I see that the comparison mentioned above was correct, and if I were an American I would do everything I could to go to college. There are many differences between French and American colleges; in fact, almost everything is different. First, our government believes in giving higher education to as many people as possible. If Marianne were as good as her friend Uncle Sam, she would have created a G.I. Bill of Rights. On the contrary, it seems that now our gov-

ernment is doing all it can to discourage young people from going to college. The Baccalaureate is issued in two years between French and American colleges, which is more difficult for our students to find enough money to pay for their school years. The curriculum is so full that it is hardly time for part-time jobs. Also, let us not forget that you can hardly find a part-time job

The South— A Proving Ground for Democracy

Without benefit of the ballot, or without taking national polls, it is possible, on the basis of present-day trends, to make some hopeful predictions for the South in 1949.

The economic progress of the South will undoubtedly continue to be greater, in a relative sense, than that in any other part of the country.

There will be more men in the South at the end of the year than there were at the beginning of the year. More men will find work at home in the South than in any other part of the country.

The South's per capita income will be higher at the end of the year than at the beginning of the year.

Through federal aid, the coming year will see a large sum for education in the South. This will mean a reduction in pay scales for teachers.

These are hopeful possibilities for good or ill among the new demagogues to reinforce a diminishing number of spokesmen who have misrepresented us?

Will we be able to match, or better, to improve upon 1948's record of mob violence?

There are no positive answers to such questions. But this is certain. Nowhere is there a regional with as much promise as the South, and nowhere is there a more vital proving ground for democracy.

A Sound Message for All

Mr. Don T. Joyce recently wrote the following essay as an assignment in English 21, under the title "The Successes and Failures of Life." Its message is so timely and worth while that The Technician passes it on for the benefit of all.

The successes of life are easy to take; the failures are a little more difficult. Every person meets with an abundance of both success and failure.

My opinion of how to take a failure is to approach the task again and with a renewed effort. It is also wise to analyze the task failed. By an analysis one can possibly discover the faults he could avoid in his next effort to accomplish the task. A different approach can mean the difference between success and failure.

It was failure that brought me to

school. I was struggling along on my job as an assembly-line transformer builder. I worked hard at this job. I received some substantial wage increases. I failed to succeed in getting what I wanted from this hard work. I wanted a more responsible position and a job with a future to it. By an analysis of the situation I discovered I lacked a few essentials required for a better position. That is why I am in school again trying to acquire some of the knowledge that will lead to success with a new job and a more interesting future.

The Corn Crop

High Cost of Loving
 A man who had been stopping at a snazzy hotel was paying his bill. He looked up at the cashier and asked what it was she had around her neck.
 "It's a ribbon," she said. "Why?"
 "Well," he replied, "everything else is so high around here that I thought perhaps it was your garter."

Waiter—Customer No. 2654328
 A long-suffering diner noted that his coffee was served without a spoon.

"This coffee," he remarked pointedly, "is going to be pretty hot to stir with my finger."

A short time later the waiter returned to the table with another cup of coffee.

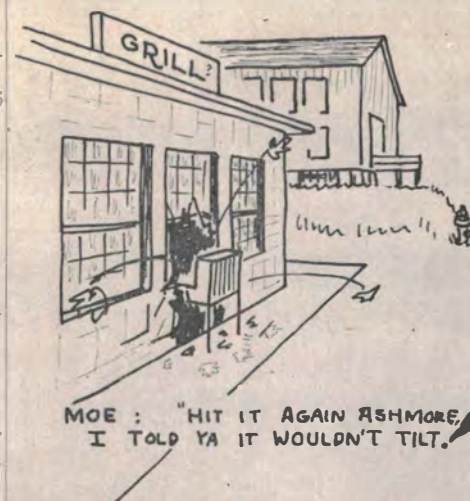

"Maybe this isn't so hot, sir," he said.

Gathered As It Was

"Yuk. Yuk." Cried the Clerk
 Mrs. Jones was spending the day in bed with a severe cough and her husband was working in the backyard, hammering nails into some boards. Presently a neighbor came over to chat with Jones.
 "How's the wife?" asked the neighbor.
 "Not very well," replied Jones. "Is that her coughin'?"
 "No. It's a chicken coop."

Alimony in the World
 The trial was on and the husband bitterly opposed paying his wife alimony. Finally the judge said, "Look here, no matter what you say, I'm going to give your wife \$50 a week!"

"Fine," said the husband, mellowing. "I may give her a few dollars a week myself."

Tim Wells Cogitates About '48

By EDITOR T. T. WELLS

1948! You were quite a year, but now you are a back number in the past Times. You were the year when things were done in Berlin. The year when

Of Berlin, Russia, Politics, Women, Wise Tracks, Etc.

important people are: "I don't mind guests' shortcomings; it's their long stayings that bother me." "Give a woman an inch and she'll think she's a ruler." People who live beyond their means were told to act frugal; and hard trick women were told to make their husbands disappear.

There were a yawning as an you Then silly wear, and a man experience.

right enrollment, new The Insti- hard trend and ever for giving Georgia and the Southeast the trained minds and skillful hands necessary for industry.

Technician's Staff

As for elections, television proved they looked as bad as they sound. The Discreets tried to win the election and turn the ship of state into a Yawl and were voted the most likely to succeed. However, Democracy proved itself and allowed us to decide which guy we preferred to mess things up for us.

But 1948 wasn't all politics and international Whoa! ("Whoa!" "That was what we kept crying to Russia.") Prices went so high that someone found a pearl in an oyster in a night club and almost broke even. A woman divorced her louse of a mate because she learned he was sitting up with a chic friend. Young men were advised to beware of a girl in her middle flirts. If you give a girl lingerie, she'll give you the slip.

Some important sayings by im-

In response to the past and the present glaring glances from the evil-eyed males, the Roving Reporter has made an effort to find out the exact views on the legless situation.

Why do you like short dress-lengths? Do you think women show their best features in short dresses and sweaters? Which gives women the best chance for landing a husband: (a) Deceiving her looks by covering up her legs and using pads in the right places and showing (modestly, of course) the really

 L. G. Dewberry, of Stone Mountain, says, "The Big Stare would be an improvement over the New Look. By all means, I think women show their best features in short dresses and sweaters. After all, why cover up her natural charms?"

Institute Enrolls 340 Students; Six Instructors Added

(Continued From Page One)

do, since they have completed the things that they had to do.

A wood shop and a sheet metal shop, both equipped with new, efficient, modern machinery, went into full operation on January 3 with regular classes scheduled in both. Mr. J. E. Lockwood is teaching the woodwork and Mr. P. A. Ringsmith the sheet metal.

Six New Instructors

The new quarter also finds new faces behind the desks as well as in front of them. An increased enrollment, the offering of many more advanced courses, and the resignation of Mr. Israel Hornstein, of the Electrical Department, made necessary the addition of six new instructors to The Institute's teaching staff.

These men and their subjects at The Institute follow in physics, Mr. C. E. Taylor, Emory graduate, teacher in Fulton County for 17 years, and skilled photographer; and Mr. J. J. DeFore, graduate of Mercer and Cornell and former instructor at both schools; in electricity, Mr. S. T. Mayo, Auburn graduate with much electrical experience at General Electric and in the Navy, and Mr. W. C. Chamberlain, Georgia Tech graduate and former instructor in drawing, Mr. J. M. Mattingly, another Tech alumnus, and a man of varied experience in drawing and paper industry, and Mr. J. L. Davis, graduate, a man with a man's experience.

right enrollment, new The Insti- hard trend and ever for giving Georgia and the Southeast the trained minds and skillful hands necessary for industry.

The Question The New Look

I think a girl has the best chance of landing a husband by being modest in her actions, but I don't mean too old-fashioned.

Mr. J. L. Davis, instructor in Industrial Management, remarks: "More modesty is shown by the wearing of long dresses. More dignity is shown in this respect. In looking for a wife, I believe the girl will cater to the long dress craze he will want his future wife to have the appearance of a really has

5 WAYS TO KEEP FROM GROWING OLD

1. When approaching a railroad crossing never stop, look, or listen. People may be in your mind.
2. Never wear the right of way. If the other guy is crazy show him who's boss.
3. Why bother with signs? No one reads them to do and do it right. If anyone else is doing it, you're in the job.
4. When you're in the job, always use with locomotives at crossings. Engineers like it because it breaks the monotony of their job.

Served Behind Bars . . .

Warden "We're going to give you anything you want for your last meal."
 "Could I please have a bottle of champagne?"
 "Sure—any particular vintage?"
 "Yes—1985."

Q as in Billiards . . .
 He: "Please give me Mr. Dillburg's telephone number."
 Operator: "Is that initial 'B' as in William?"
 He: "No, it's 'D' as in pickle."

Conclusion

With the words on this page, we conclude the first annual of a fast-developing college, The Technical Institute. As we turn this book over to you, we recall many incidents that have taken place during its production — the birth of the book and the selection of the annual staff last fall — the student-wide contest of naming the book and designing of the cover — the days spent in planning — the constant thought of deadlines — the many nights we saw the sun set and rise while we worked — the many obstacles we had to overcome — the lowered grade-point ratios of the staff — and finally, the distribution of the book and the feeling of a job successfully completed. It has been fun, and we have had experience in producing the book.

The book could not have been produced by the staff alone. Many thanks to our advisors, Mr. G. L. Carroll, Mr. C. R. Orvold, Mr. F. J. Johnson, Mr. P. R. Lewis; to Mr. C. E. Taylor for his excellent photographic work; to Gaspar-Ware Studio, Photo-Process, and Foote and Davies, Inc., for their excellent services as photographers, engravers and printers.

Most of all, we, the staff, want to thank Mr. Thomas T. Wells for his excellent job of producing "THE TECHNICIAN'S LOG."

May this book serve its mission of bringing back to you memories of your Alma Mater. With this we bid one fond farewell.

THE STAFF.
