THE 1958 ISSUE OF THE TECHNICIANS LOG  
COMMEMORATING THE SCHOOL'S  
10th ANNIVERSARY

GEORGIA INSTITUTE OF TECHNOLOGY  
ATLANTA, GEORGIA

March 1, 1958

OFFICE OF THE PRESIDENT

The Southern Technical Institute has been instrumental in bringing to American technology a new concept in higher education. In her few short years she has assumed national leadership and recognition in her field. Her graduates have made and will continue to make a major contribution to our state, regional, and national economy. A capable and devoted faculty and administration deserve a large measure of thanks and appreciation for their accomplishments.

It is our hope, our wish, and our expectation that continued growth in programs, physical facilities, and contributions will mark the vigorous and promising future of the Southern Technical Institute.

On its Tenth Anniversary, we extend to the Southern Technical Institute our congratulations and express our pride in the significant contributions which it has made to engineering education.

Sincerely yours,

*E. D. Harrison*  
Edwin D. Harrison  
President

### 14 Members of STI's Original Staff

Pictured here are the 14 members of STI's staff who began their service with the school within the first year of its existence and who are still giving their best for the advancement of STI. Seated, left to right: C. A. Arntson, Head of Mech. Dept.; J. E. Lockwood, Assistant Professor, Mech. Dept.; G. L. Crawford, Dean of Technical Div.; L. V. Johnson, Director; Mrs. M. N. Mavity, Administrative Assistant; L. Y. Bryant, Registrar. Standing, left to right: C. T. Holladay, Head of Civil Technology Dept.; C. R. Orvold, Head of Building Construction Tech. Dept.; J. M. Davis, Supt. Buildings & Grounds; E. J. Muller, Head of Drawing Dept.; L. H. Taylor, Head of Heating & Air Conditioning Dept.; G. L. Carroll, Dean of Basic Studies; C. V. Maddox, Acting Head of Math Dept. and Dean of Students; F. Z. Geeslin, Manager of Dining Hall.

## DIRECTOR L. V. JOHNSON REVIEWS SOUTHERN TECH'S PAST AND FUTURE

by L. V. JOHNSON

On January 2, 1948, a vanguard of five of the Southern Tech faculty and staff opened offices in Building 24 and began the job of building a college. They faced the job of converting open barracks into classrooms, laboratories, and offices, hiring a qualified faculty, designing courses, buying equipment, and selecting textbooks, all for a college program practically unknown in the entire South.

The first quarter opened on March 24, 1948, with an enrolment of 116 students, 106 veterans and 10 non-veterans, enrolled in seven different courses. Our faculty and staff then totaled twelve. This quarter's enrolment of 826 students in eleven curricula, with a faculty and staff of 63, is a measure of our success to date, but it is only a beginning.

Today, ten years and 1512 graduates later, the technical-institute program is beginning to be understood and the technician is becoming a valuable and respected member of the industrial team. I am proud to say that the work of Southern Tech and the fine work of its graduates have contributed much to this better understanding of the technical-institute program and the training and responsibilities of the technician.

### FIVE REASONS GIVE SUCCESS

Southern Tech was extremely fortunate in that its establishment was requested by industry and a Georgia Tech Administration with an understanding of the need

for the program and the energy to sell it to others. Our progress has been due (1) to the respectability given our program through its connection with Georgia Tech and its Engineering Extension Division (2) the understanding, support, advice, and financial assistance given by Georgia Tech and the Board of Regents (3) the assistance and advice given by the Associated Industries of Georgia and the Southern Tech Task Force Committee (4) E.C.P.D. Accreditation and (5) last but not least an untiring and enthusiastic faculty.

In considering the future of Southern Tech, attention must be focused on the fact that it is the engineering and science fields which have "exploded" far beyond the horizons of just a few years ago. Thus as the engineer moves into the realms of science and mathematics, and out of the realms of application and operation in which the engineer started and has grown, many technicians must be trained to take over this important work in applied engineering and science.

### CAMPUS IS NEEDED

Given a permanent and adequate campus, I believe Southern Tech will have an enrolment of 5,000 students and offer curricula in at least 15 technical fields by 1970. To achieve this goal will require the coordinated and enthusiastic support of our students, alumni, faculty and staff, and friends in all fields of endeavor, but with their help I am confident of success.

# SOUTHERN TECH, PIONEER IN TECHNICAL EDUCATION

By GEORGE L. CARROLL

When The Technical Institute opened for classes on March 24, 1948, neither students nor instructors knew just what the future of this new type of educational institution would be. Here was a two-year technical college under the Engineering Extension Division of Georgia Tech, designed to train engineering technicians. But what was a technician? What would a technician be prepared to do in industry? Could he find employment after he finished Southern Tech?

## FELT LIKE PIONEERS

The faculty and staff felt somewhat like the pioneers, not knowing whether the new college would be able to hew itself a path through the obstacles facing a newcomer to the educational scene of the Southeast. The Associated Industries of Georgia felt that the rapidly expanding industries of the South would need engineering technicians. The administration of Georgia Tech had faith in the new idea. But prospective employers and prospective students and the general public did not understand the purpose or the value of a technical institute. Director L. V. Johnson and his co-workers saw that their biggest problem would be to inform industry and the public — to “sell” the new educational institution to those who would benefit from its existence. And, of course, they realized that the product of the institution must be of good quality if The Technical Institute was to create a place for itself in Georgia and the South.

For several years, the question of each day was “What is the crisis today?” “From crisis to crisis” could have been the motto of The Technical Institute. So many obstacles had to be overcome that they cannot be recounted here. A less courageous director would have “thrown in the sponge,” and a faculty without courage and faith would have sought security in their former occupations.

## INDUSTRY INFORMED OF STI

Industry began to learn of the product of The

Technical Institute in 1949. Here were technical graduates who had “know-why” as well as “know-how.” They were not skilled tradesmen. They were not engineers. They were engineering technicians — and they were good ones! Industry wanted more than the college could provide. The public, the high schools, the prospective students began to hear about and talk about the success of the graduates in industry.

The director put on a campaign to advertise the school. He “stayed on the road,” talking to civic clubs, school groups, chambers of commerce, groups at Georgia Tech, wherever he could carry the message. Members of the staff contacted high schools on College Days and Career Days, visited counselors and principals. Under the direction of Mr. J. J. Defore and Mr. L. Y. Bryant a film, “The Technician in Industry,” was produced. A Counselor’s Conference was held on the campus. A very effective publicity campaign was organized by Mr. R. W. Hays — news articles, newsletters to counselors and principals, brochures and catalogues mailed to schools and to prospective students, radio and television shows and advertising, articles in technical periodicals.

## NAME IS CHANGED

Somewhere along the line The Technical Institute became Southern Technical Institute, and the Diploma was changed to the Associate in Science Degree. Employers upgraded graduates whose diplomas were retroactively changed to degrees. The Placement Department had difficulty in helping prospective graduates decide which places to accept. Placement was not a matter of finding “places” for graduates. There were more places than there were people.

And now, Southern Tech, on March 24, 1958, only ten years after its establishment, stands as one of the leaders in the field of technical-institute education, not just in the South, but in the nation. Can anyone object if we throw out our chests and brag a bit about our achievements? But, like Tennyson’s Ulysses, we still realize that “Though much is taken, much remains.” We cannot relax or become complacent, for we still have tremendous obstacles to overcome, not the least of which is the need for an adequate campus and permanent buildings. We pledge, therefore, in March, 1958, to continue our campaign to make Southern Tech an even greater institution and to render the greatest possible service to the South and to the nation.

Faculty and Staff  
members celebrate its

# 10<sup>th</sup> ANNIVERSARY

Southern Tech's Faculty and Staff members celebrated its Tenth Anniversary Saturday evening, March 29, with a Dinner-Dance at the Officers' Club, Naval Air Station, Chamblee, Georgia.

Mr. Steinkamp served as master of ceremonies. He introduced the speakers of the evening, viz: Professor Howell, Director, Engineering Extension Division, Georgia Tech; Mr. Dudley, Past-President, Associated Industries of Georgia; and Mr. Stewart, President of the Southern Tech Alumni Association.

Professor Howell complimented Mr. Johnson's accomplishments as Director of Southern Tech; he further praised the faculty for their

cooperation. As a gesture of appreciation, a clock-radio from the faculty and staff was presented to Mr. Johnson by Professor Howell.

Mr. Johnson thanked the faculty and added that without them he could not have accomplished what he has. He wished for many more years of success for Southern Tech.

Mr. Dudley also complimented Mr. Johnson for his excellent work. He heartily endorsed the technical institute program for industry, and offered his help in any way to further the program.

Mr. Stewart, one of Southern Tech's early graduates,

spoke in behalf of the Southern Tech Alumni. He voiced appreciation for the training received here and the opportunities offered as a result of the training; and he praised the school very highly for the progress made in the ten years of existence.

The remainder of the evening was spent dancing and getting better acquainted. A couple of the faculty members and their partners put on jitterbugging exhibitions that bore no academic resemblance — thus proving that professors are human.

# ... IN RECOGNITION OF ...

## MR. CLARENCE A. ARNTSON

We sincerely appreciate your long and faithful service and assure you that you will not be forgotten by those of us who have been fortunate enough to have known you. For your ten years of faithful and efficient service to the students in supplying their needs, we offer this meager space of heartfelt recognition.

## MR. JESSE J. DEFORE

Friendliness, kindness, and an unselfish concern for the welfare of the students are characteristics of this leader. Because it is our belief that these outstanding qualities deserve merit, we of the 1958 LOG Staff show our most humble appreciation in the award of this recognition.

# AND DEDICATED TO

As a tribute to our Tenth Anniversary we dedicate the 1958-59 yearbook to our very deserving director, Mr. L. V. Johnson. His untiring, unselfish efforts and his never-failing interest in Southern Tech have been most instrumental in successfully making this Tenth Anniversary come true!

Mr. Johnson has dedicated ten years of loyalty, hard work, and sincerity of purpose to the success of Southern Tech. His actions have inspired confidence and demanded respect among his co-workers, as well as the students.

As far as Mr. Johnson is concerned, there has never been a "trivial" problem concerning Southern Tech; anything relative to the welfare of the school is of utmost importance and holds priority with him.

May we have many more years of directorship under Mr. Johnson!

Editor Walter Walker  
presents copy of the 1958  
Technician's Log to Di-  
rector Johnson.

# AROUND THE CAMPUS

After the student lays the corner stone, L. V. Johnson directs the construction until it is finished.

It takes a large number of people to build and operate an educational institution such as Southern Tech. While attending school, we the students diligently dig and learn to build a foundation for the future. If it were not for the people working together around the campus, our foundation would not last through the first storm.

The secretaries and stenographers in administration help to build the foundation.

The campus, after all the students have gone home.

The instructors help build the foundation with modern equipment.

After the last stone has been placed, there are those happy two who are willing to help you find the right job.

**You are right! It is real snow  
and it fell at Southern Tech.**

**It doesn't snow much in South  
America so the boys from South  
of the Border really enjoyed  
throwing snowballs when we  
had the first big snow at South-  
ern Tech!**

There isn't anything better than good fellowship . . . and food!

## “THE TECHNICIANS”

The Southern Tech Technicians, 1957-58 squad, was an explosive team of basketballers. Although this team didn't win the greater portion of their games, Southern Tech always commanded the respect of their opponents. We, the

students of STI, are proud to have had you bear our colors. You are to be commended on your sportsmanship and dependability to the Southern Technical Institute.

DON WEED

A poised 6-4, whose 17 points-per-game scoring average effectively blankets the fact that defense is his forte, is the Atlanta Tipoff Club's choice as Junior College player of the year in this area. Don Weed is the boy. Weed transferred to Southern Tech from Clemson after his marriage. Weed was honored by the club at its annual Jamboree April 9 at the Helenic Center on Chester Bridge road. Weed hit 323 points in 19 games and wrapped up the season with 20 and 14 points in two state tournament games, earning all tournament honors.

Southern Tech was the surprise of the state tournament in Macon—due in large part to its growing Weed. His 20 point night came in the opener against favored Georgia Military College. The next night he and his mates almost knocked off top-seeded Abraham-Baldwin before falling by ten points in the closing minutes.

# STI Enters JC College Basketball Tournament

HARBIN

DAVIS

The referee steps out into the center of the court, two lanky boys stand there waiting poised, half crouched; the ball shoots into the air, it is tipped, and the 1958 version of the annual Georgia State Junior College Basketball Tournament is under way.

This year the games are being played at Porter Gymnasium, at Mercer University, which is on U. S. 41, just north of Macon, Georgia. The contests promise to be very good, with all teams aching for a chance to make up the losses of a flu-ridden season.

The way the teams are seeded is: first, Abraham Baldwin; second, Brewton Parker; third, Young Harris; fourth, South Georgia. The tilt will continue Tuesday through Friday, Feb. 18-21.

The first match will begin at three o'clock when West Georgia meets Truett-McConnell.

The Southern Tech quintet will start their debut at five o'clock, Tuesday when they attack Georgia Military College whom they haven't met this year.

The leading scorers for the Green and White this season are:

Name	Gms.	Pts.	Avg.
Don Weed .....	16	259	16.2
Max Samples .....	18	271	15.
John Reid .....	18	212	11.9
Pete Martin .....	14	133	9.5
Cohan Davis .....	15	114	7.5

The Hornets made their best bid when they racked up ninety points against Middle Georgia, on Feb. 8. This was their highest score for the season. Coach Lockhart says, "Colds held the Hornets down the first part of the year, but as the season wore on, the team progressed until they are in tip-top shape for the tournament. Prospects for next year look extremely good with twelve Frosh returning." Our team is out to make a showing this week, so plan to be there and back them all the way.

# Technicians Get Revenge, Trip Norman 72-70; North Ga. 87-69

After enjoying the Christmas holidays, the "Southern Tech basketballers" traveled to Norman College to defy all predictions in defeating Norman College 72-70.

Don Weed, a transfer from Clemson College, paced the Tech five with 22 points. Cohen Davis, who is to be praised for his defensive work, was the second highest scorer of the night with 13 points. Don O'Quinn scored 12 of the night's total points. Other scorers were Pete Martin, 5; Gary Vinson, 2; John Reid, 8, and Max Samples, 10. Earlier in the season Norman defeated the Hornets 79-76.

## NORTH GEORGIA 87-69

Southern Tech's basketball team issued storm warnings, from the "Hornets Nest," to all conference foes when they soundly thrashed North Georgia 87-69. "The Hornets' are 100 per cent better, and they don't look like the same team," stated umpire Gene Sackett.

The Technicians were a ball of fire from the very beginning, and made an all high record in hitting 53 per cent of their shots. The Tech five played an exceptionally good defensive game. Don Weed again sparked the Technicians with 22 points. Cohen Davis, Max Samples, Don O'Quinn, and John Reid were the main S.T.I. stalwarts in revengeful upset of North Georgia.

Baseball Turnout Offers Bright Future for Hornets

There has been an excellent turn out for the baseball season this year. Most of the team has had no experience in junior college competition, but their training should make the team very successful toward winning games. At the afternoon sessions, the players receive strenuous

batting and fielding practices. The rookies have had some experience in either high school or service. The student body should support its team, and in return, the team will support the student body. The following is a list of the men who came out for the baseball season:
