LOG

1988 LOG - ANNUAL PUBLICATION OF
SOUTHERN TECHNICAL INSTITUTE,
MARIETTA, GEORGIA

Southern Technical Institute's Log Staff is proud to present to you one year of nostalgia and memories in pictures and print of the life, the knowledge, the joy and the sorrow that have been assembled here within these pages. The Log Staff hopes that it has presented this review in a totally unbiased manner.

Journey through the corridor of time with us now and take a look at what Southern Tech was twenty years ago. Southern Tech has always been a leader in education. We will continue to be the best and brightest in the next year ahead.

LARRY J. OXFORD
Editor-in-Chief

We of the **TECHNICIAN'S LOG** staff gratefully dedicate this year book to the students and alumni of Southern Tech. They are the ones that have made S.T.I. what it is today.

LOG

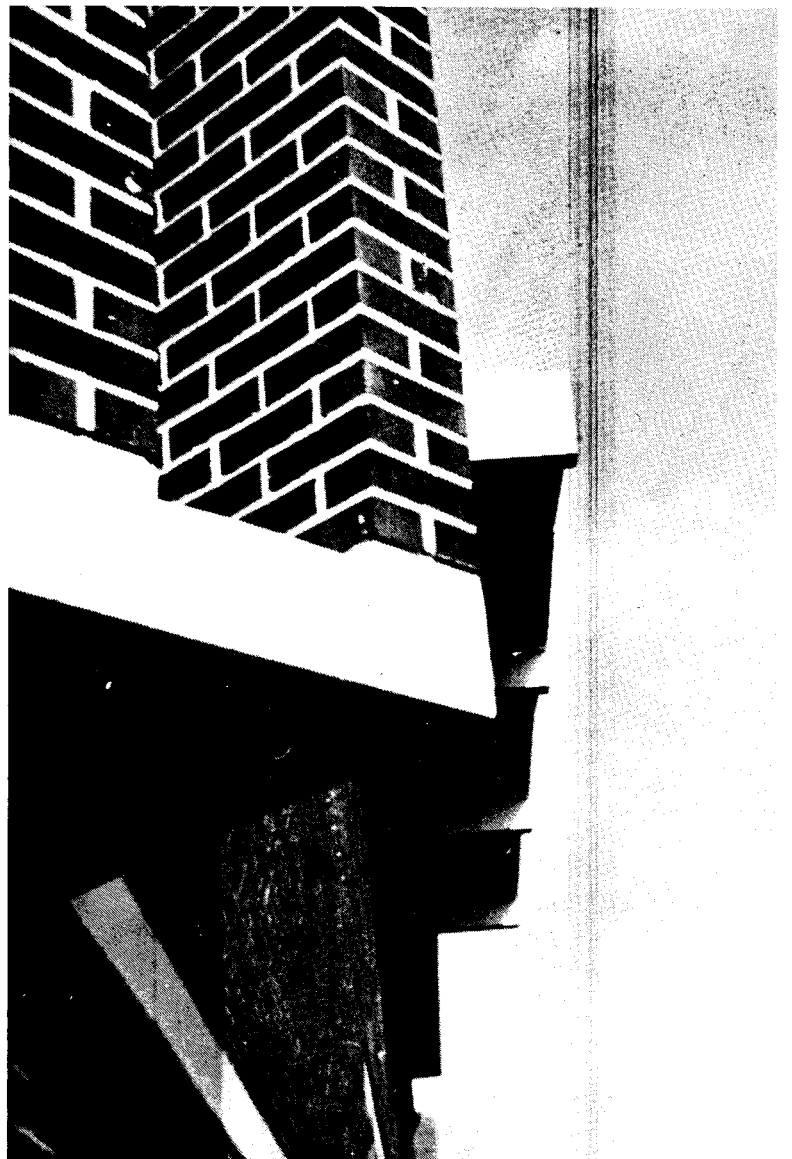

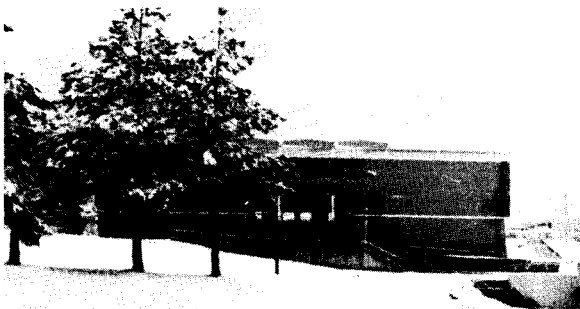

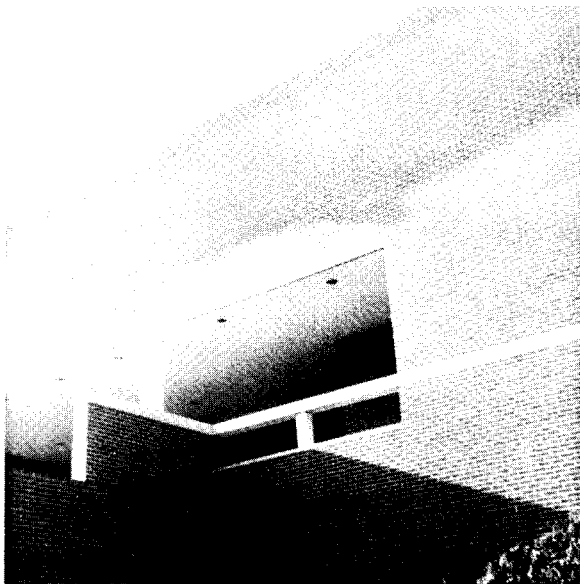

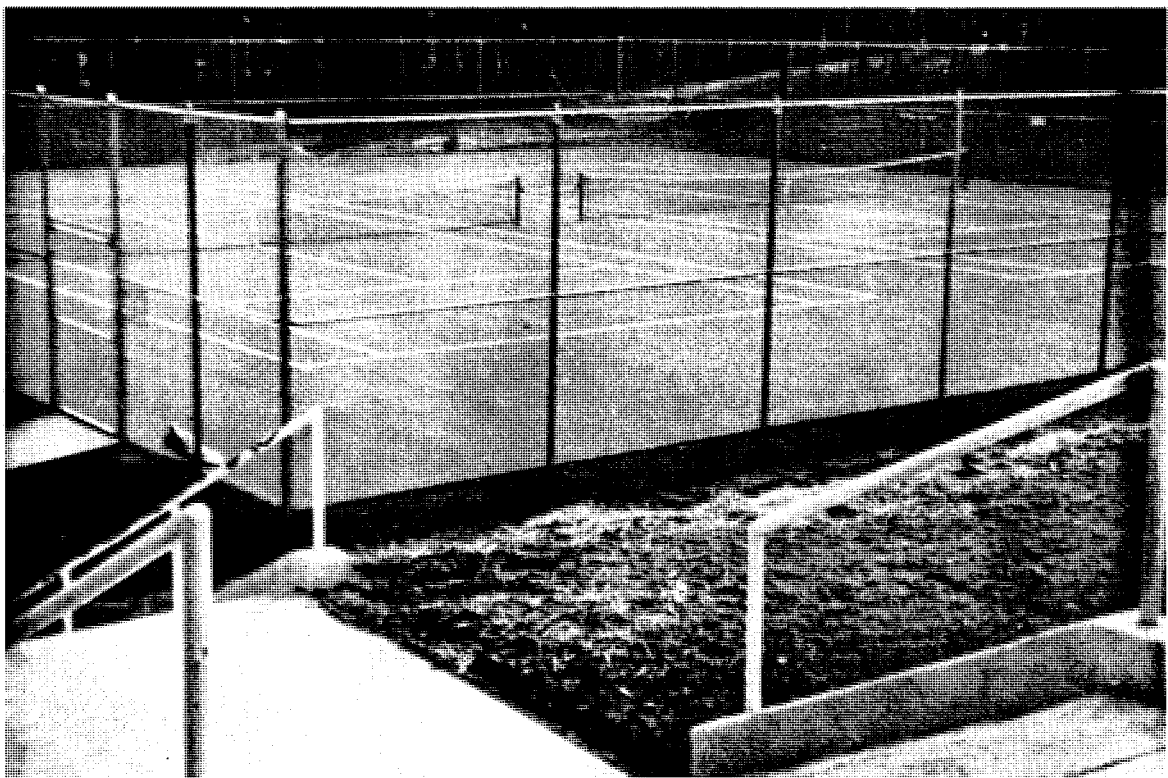

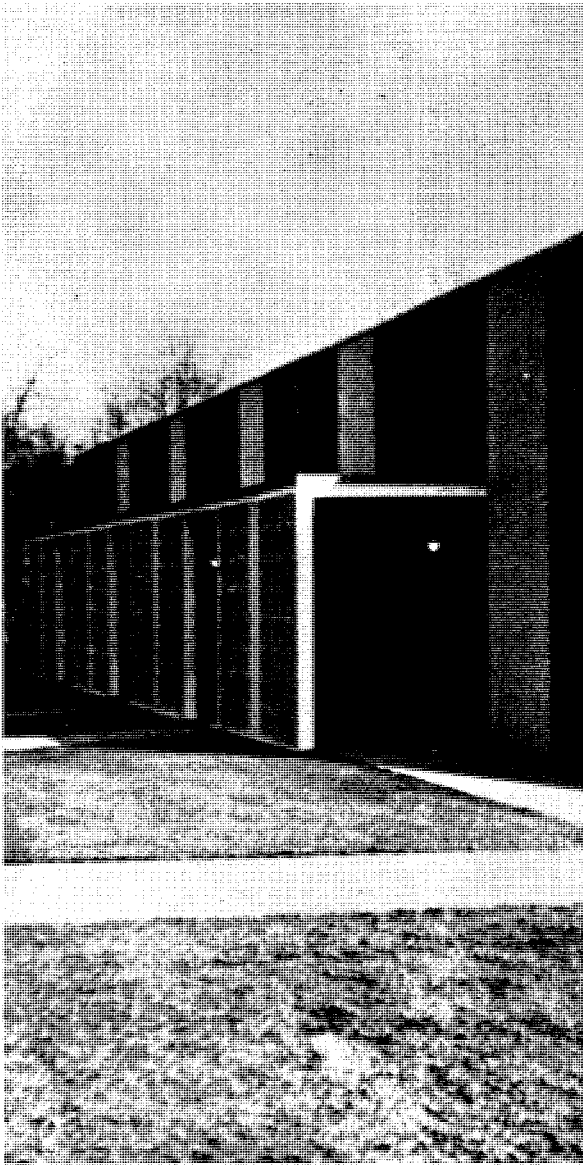

“THE ROCK”

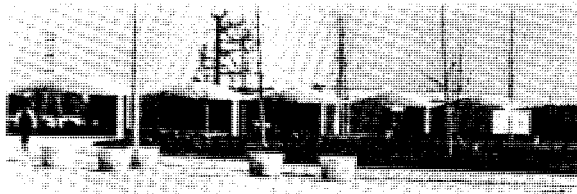

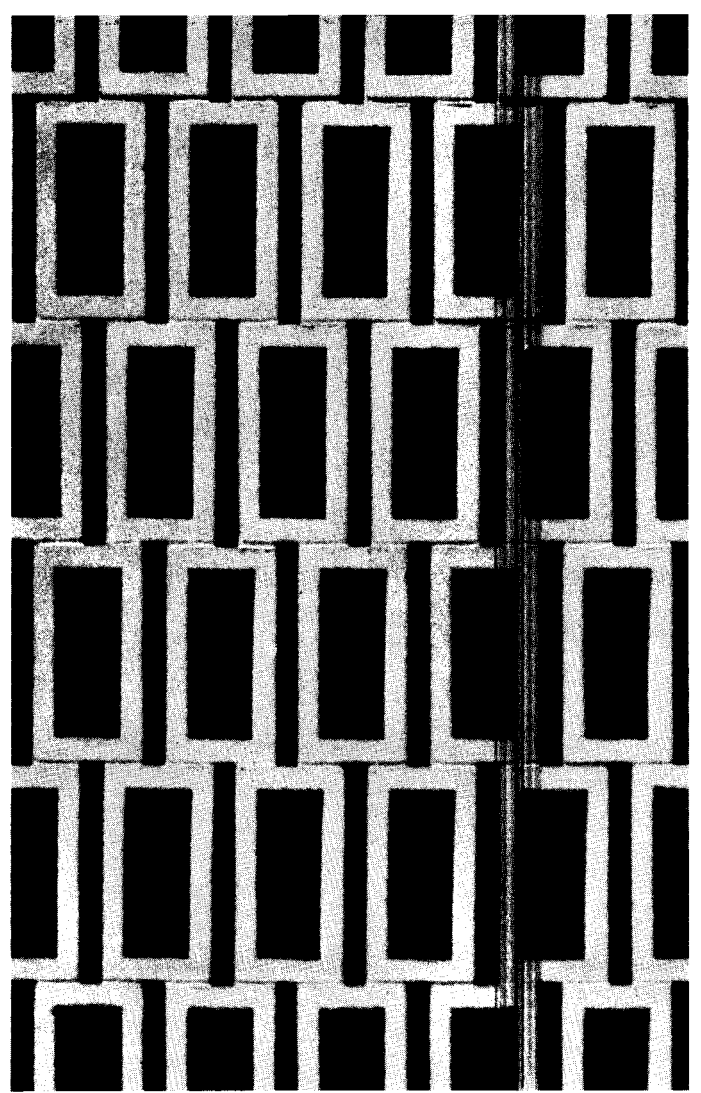

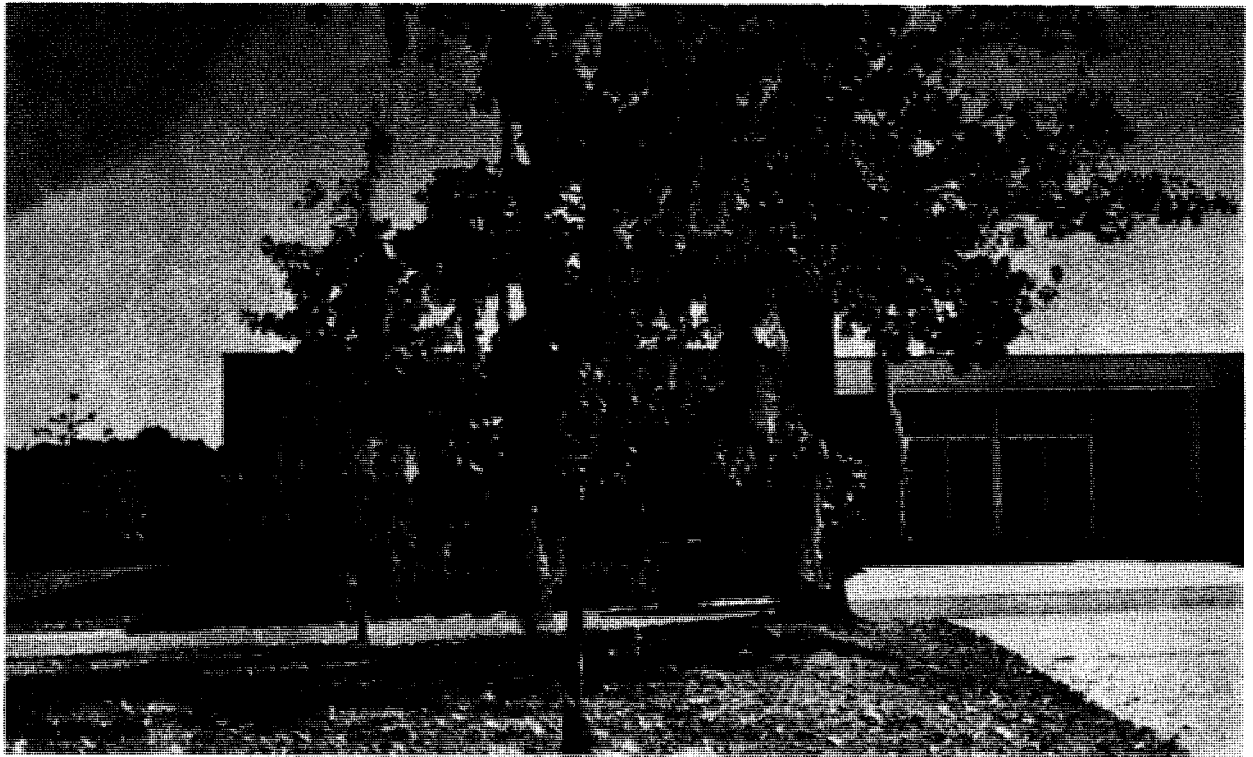

THE SCHOOL IS CHANGING VERY RAPIDLY. LAST YEAR THE GYM WAS ADDED, WINTER QUARTER THE TENNIS COURTS, AND THIS SPRING THE LIBRARY.

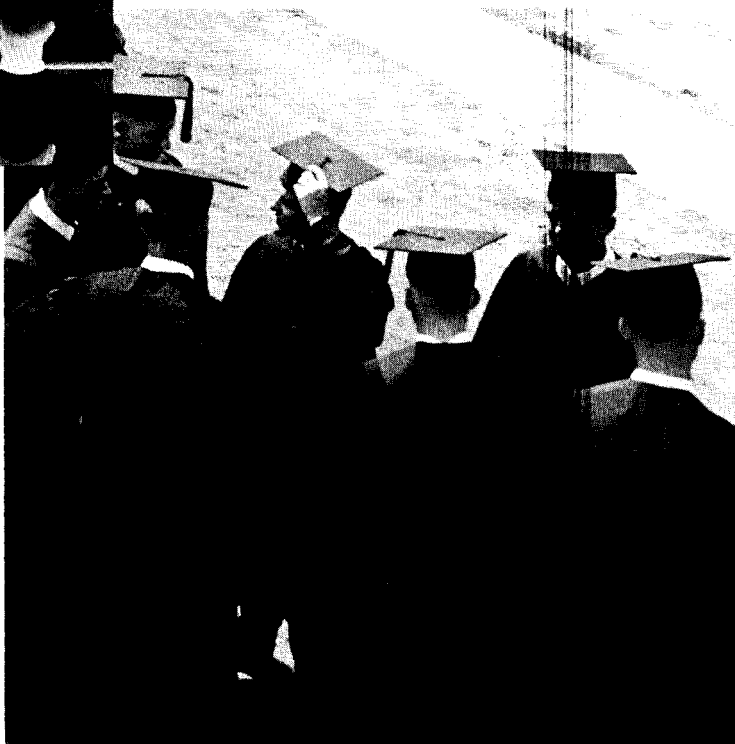

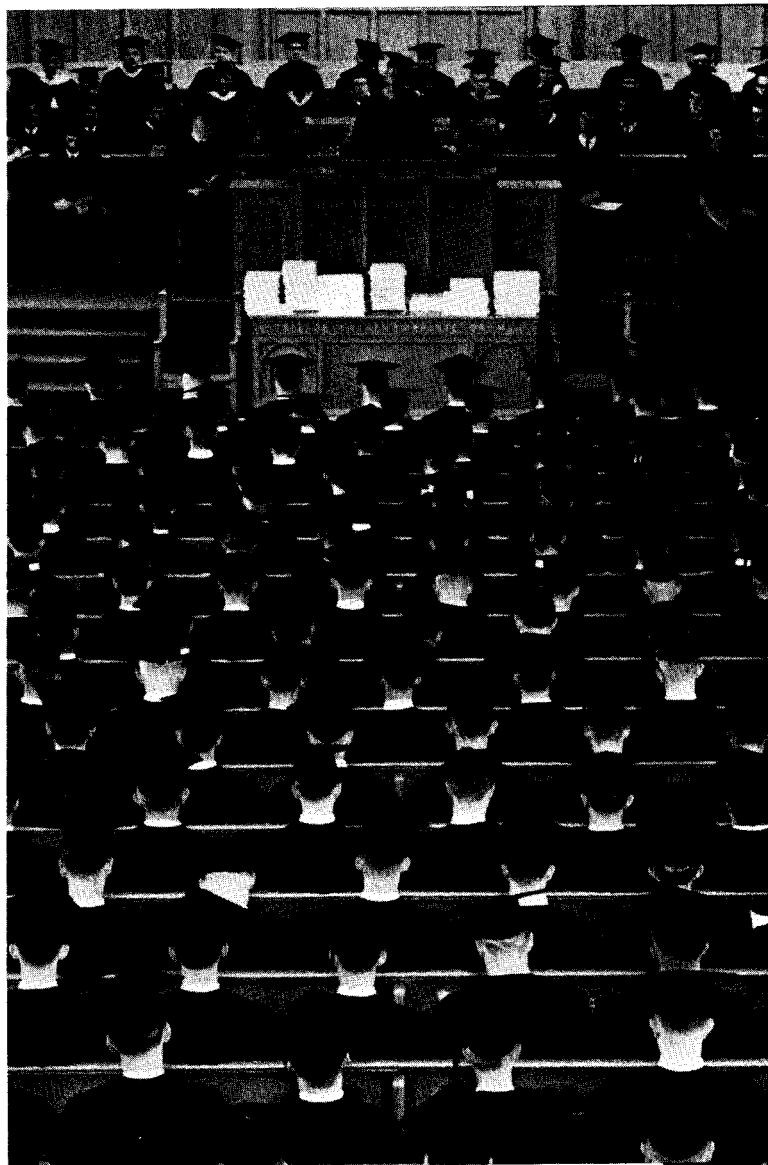

Even though the campus is rapidly changing,
the existing buildings still retain their beauty.

A decorative border of black scrollwork surrounds the text. The scrollwork consists of multiple loops and curves, creating a frame for the central text.

1948

1968

Commemoration

Twenty
Years

On January 2, 1948, a vanguard of five of the Southern Tech faculty and staff opened offices in Building 24 of the Atlanta Naval Air Station and began the job of building a college. They faced the job of converting open barracks into classrooms, laboratories, and offices, hiring a qualified faculty, designing courses, buying equipment, and selecting text-books, all for a college program practically unknown in the entire South.

Barracks at the Atlanta Naval Air Station

This was the beginning of Southern Tech. It did not come about all at once but took years in the making. Mr. L. V. Johnson played an important role in the founding of Southern Tech. It was he who first conceived of the idea of a two-year technical school.

Pictured here are the 14 members of ST's staff who began their service with the school within the first year of its existence.

Seated, left to right: C. A. Arntson, head of Mech. Dept.; J. E. Lockwood, Assistant Professor, Mech. Dept.; G. L. Crawford, Dean of Technical Div.; L. V. Johnson, Director; Mrs. M. V. Mavity, Administrative Assistant; L. Y. Bryant, Registrar. Standing, left to right: C. T. Holladay, head of Civil Technology Dept.; C. R. Orvold, head of Building Construction Tech. Dept.; J. M. Davis, Supt. Building & Grounds; E. J. Muller, head of Drawing Dept.; L. H. Taylor, head of Heating & Air Conditioning Dept.; G. L. Carroll, Dean of Basic Studies; C. V. Maddox, Acting head of Math Dept. and Dean of Students; F. L. Geesling, Manager of Dining Hall.

The first quarter opened on March 24, 1948, with an enrollment of 116 students, 106 veterans, and 10 non-veterans, enrolled in 7 different courses. Seven students graduated in Southern Tech's first commencement exercise. Our faculty and staff then totaled 12. Our enrollment this past fall quarter was 1215 students in 10 curricula of which 3 courses have more than 1 option. Today, we have a faculty and staff totaling about 100 people. We had 302 students graduating last year. This is a measure of our success to date, but it is only the beginning.

A graduating class while Southern Tech was at the Atlanta Naval Base.

SOUTHERN TECH'S FIRST GRADUATES

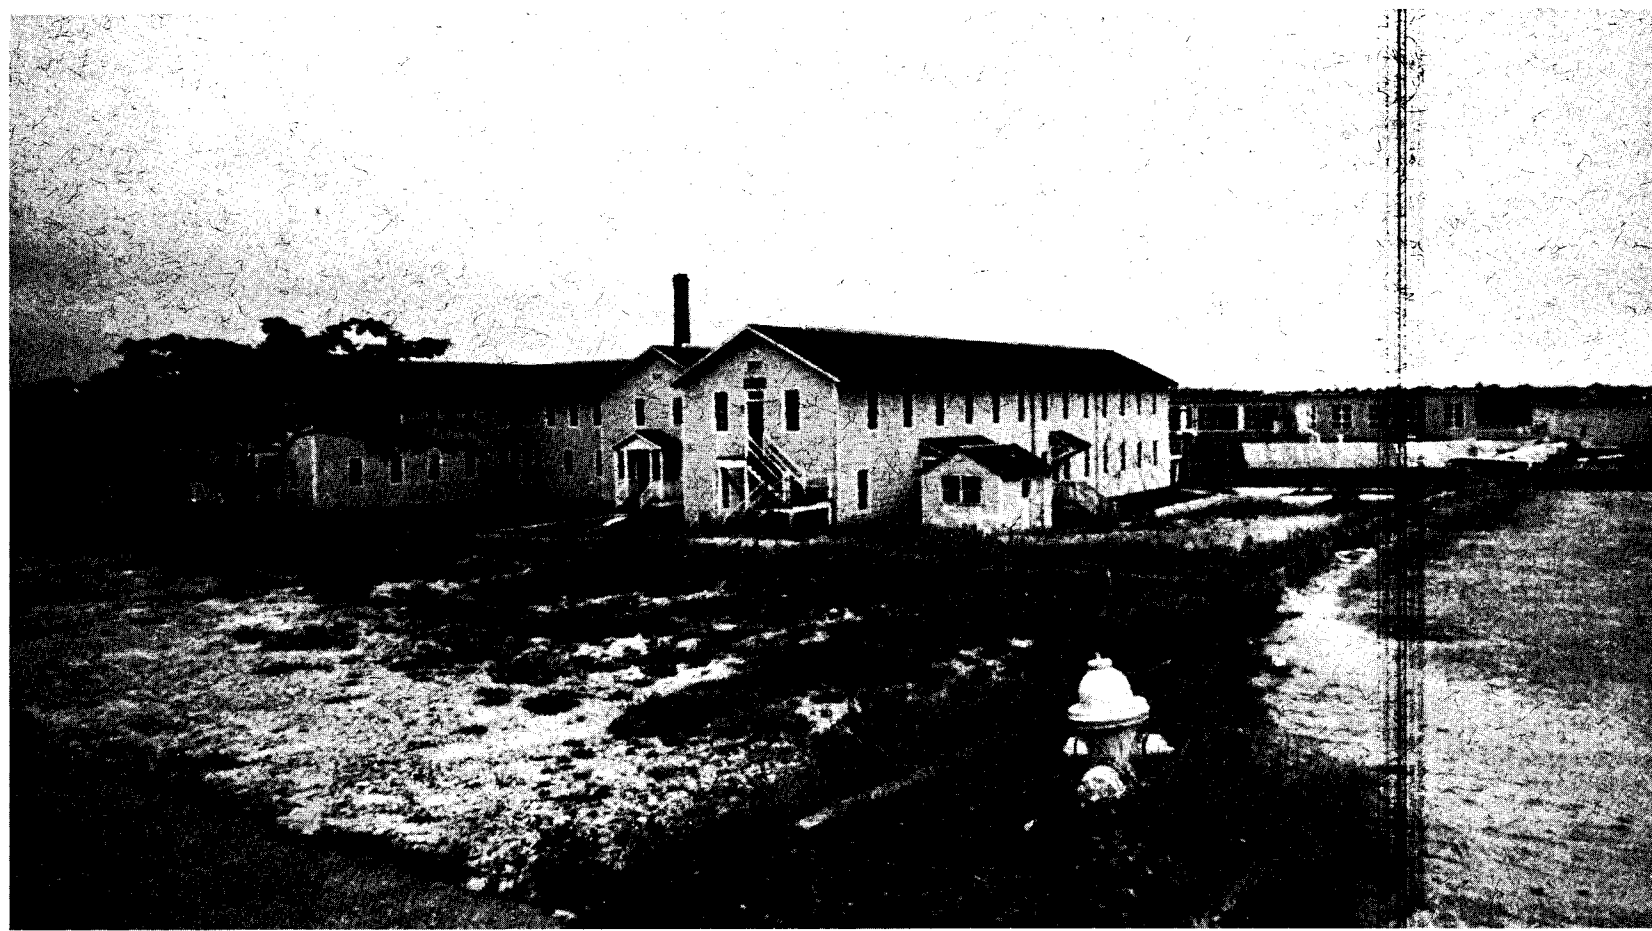

Six Mech-From left to right, they are J. C. Withers, G. S. Robarts, N. R. Anderson, B. D. Hobbs, J. S. Charles, and W. O. Walton. R. C. Bynum, Ind. T. student is not pictured.

Some where along the line the Technical Institute became Southern Technical Institute and the diploma was changed to the Associate in Science Degree.

An aerial view of Southern Tech while at the Atlanta Naval Air Station.

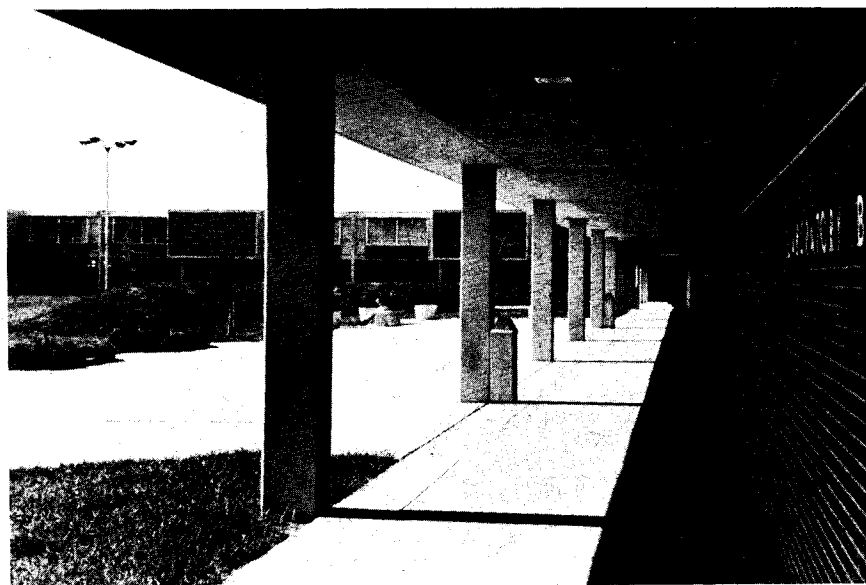

Old Navy barracks that were used for dormitories by Southern Tech while at N. A. B.

In the early days of Southern Tech the Mech club was one of the first organized on the campus. This club was changed to Alpha Mu Sigma, and a chapter of the ASTE has been sponsored by the local chapter of this group in Atlanta. The average starting salary of the first graduating class was approximately \$250 per month, and now has been gradually raised to \$569 per month.

The first big step for the construction of Southern Tech's new campus was taken with the ground breaking exercise, December 17, 1958 on the present campus grounds in Marietta, Georgia.

Southern Tech then located in Chamblee, Georgia moved to Marietta in September of 1961. The campus consisted of eight new buildings on an 188 acre track of land.

Grading for the parking lot at Southern Tech.

Leveling for construction of Norton Dormitory.

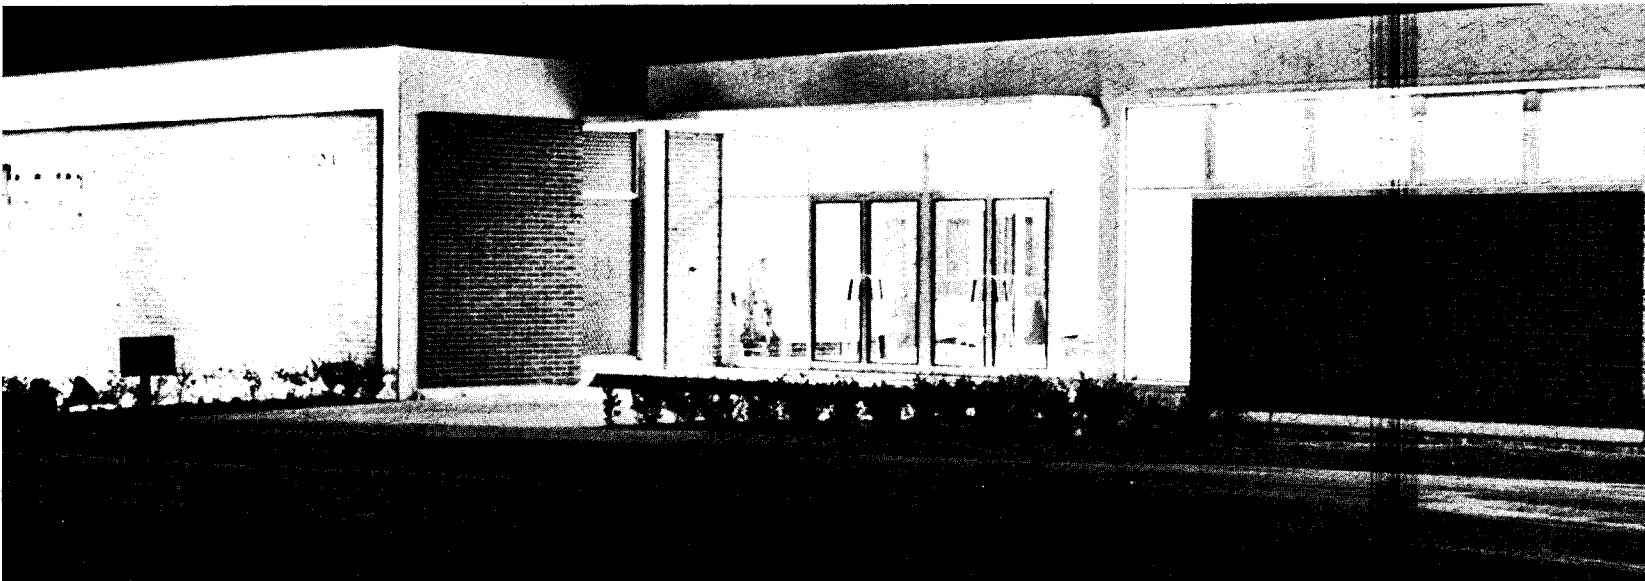

The first of Southern Tech's new dormitories was completed the latter part of December of 1964. The building provided living accommodations for 186 students, and dormitory supervisors.

The second, larger, dormitory was under construction at a spot on the campus just below the first dormitory just before the completion of the first dormitory. The second dormitory houses 300 students and dormitory supervisors.

Completion of Classroom buildings at S. T. I.

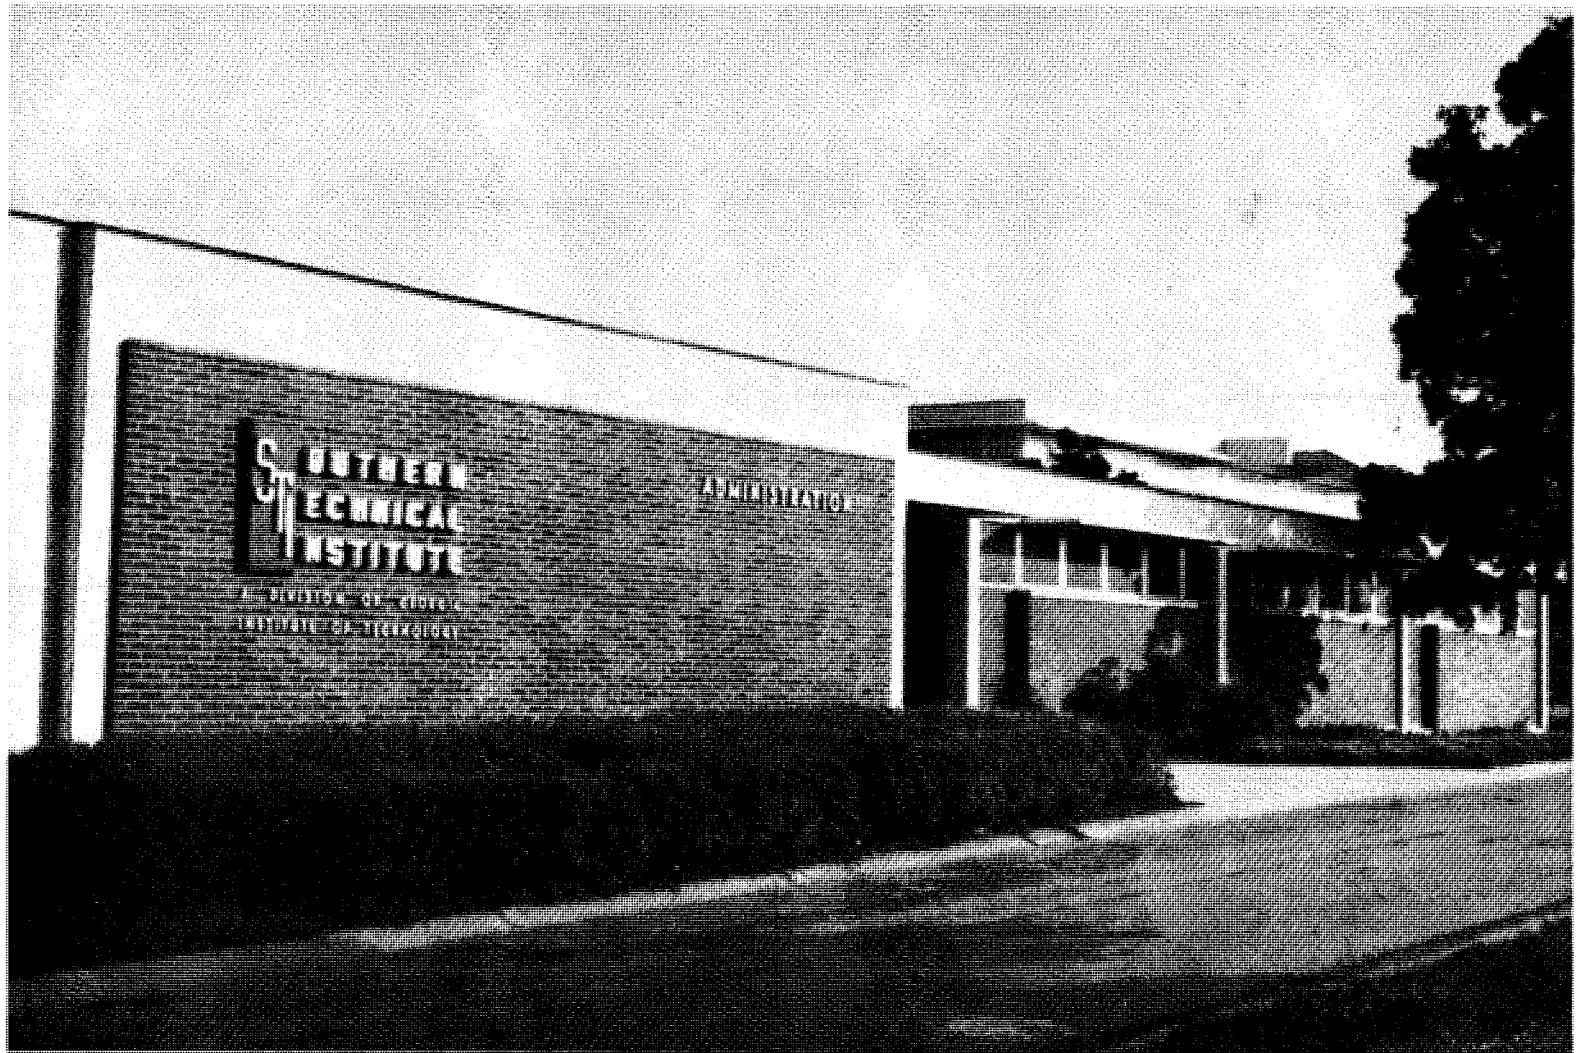

Ever since the Southern Tech campus has moved to Marietta, there has always been some sort of construction going on here. The new gym that seats 2,000 people was under construction right after the second dormitory was finished. The new library building is now a reality.

Administration building at night.

Today, twenty years after Southern Tech had its beginning, it stands as one of the leaders in the field of technical-institute education, not just in the south, but in the nation. Can anyone object if we throw out our chests and brag a bit about our achievements? But, still like Tennyson's Ulysses, we realize that "Though much is taken, much remains." Just keep your eyes open and you will see that we have not stopped growing.

BASKETBALL

Left to right, standing: Steve Whitt, George Lamont, Butch Jordan, Wayne Dean, Harry Mansell, Frank Ward. Kneeling: Leroy Rabern, Terry Lindsey, Terry Abney, Carl Hazelwood.

New strategy is introduced into the game.

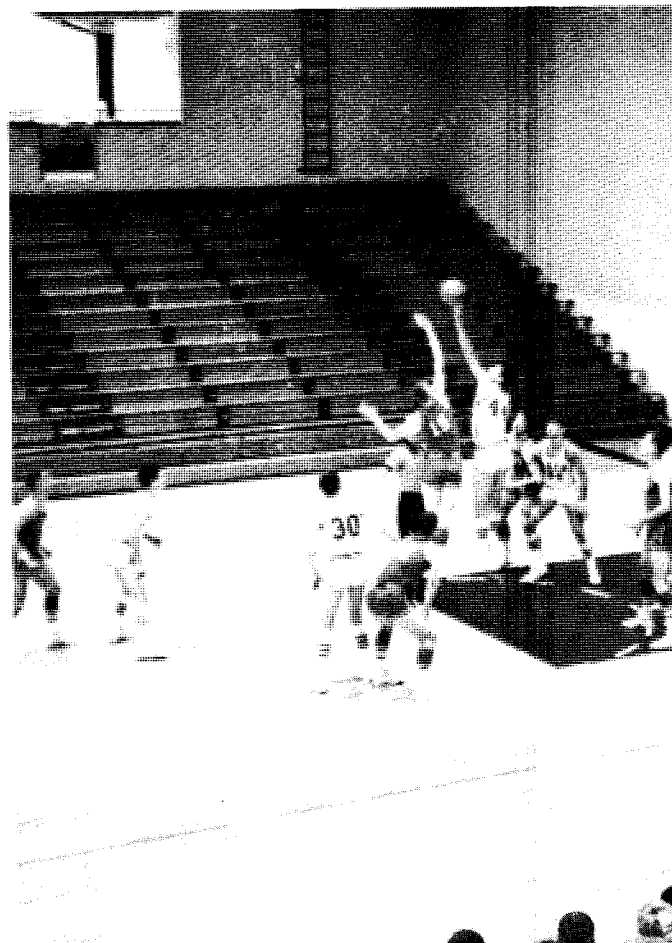

Up a little higher Terry, we need 2 points.

Ain't nothing to it.

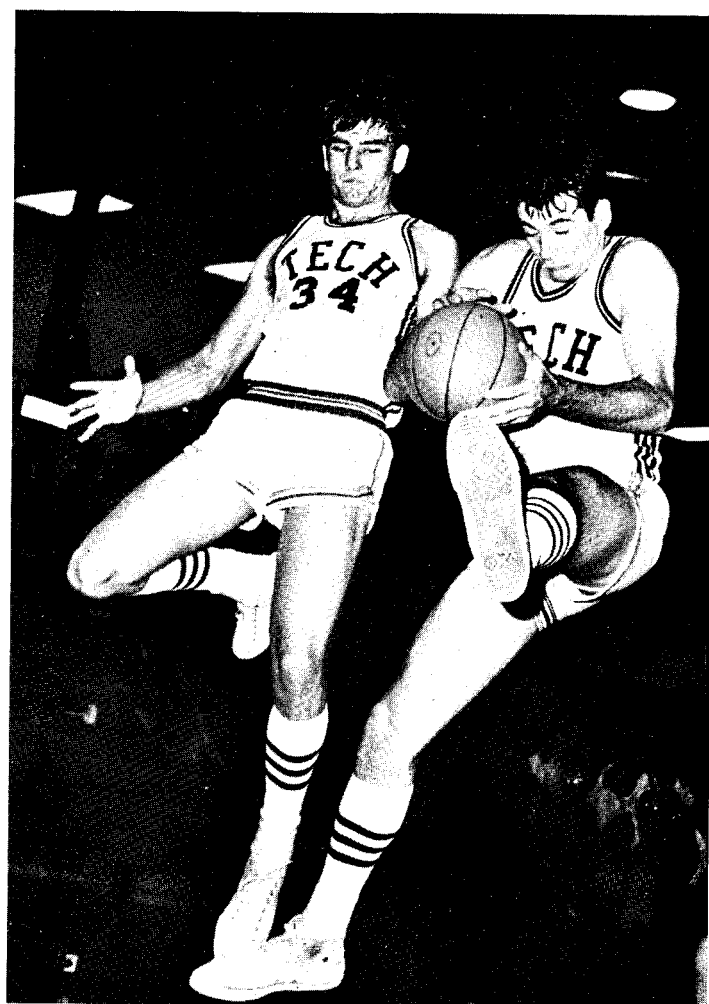

Sock it to 'em "George", Sock it to 'em.

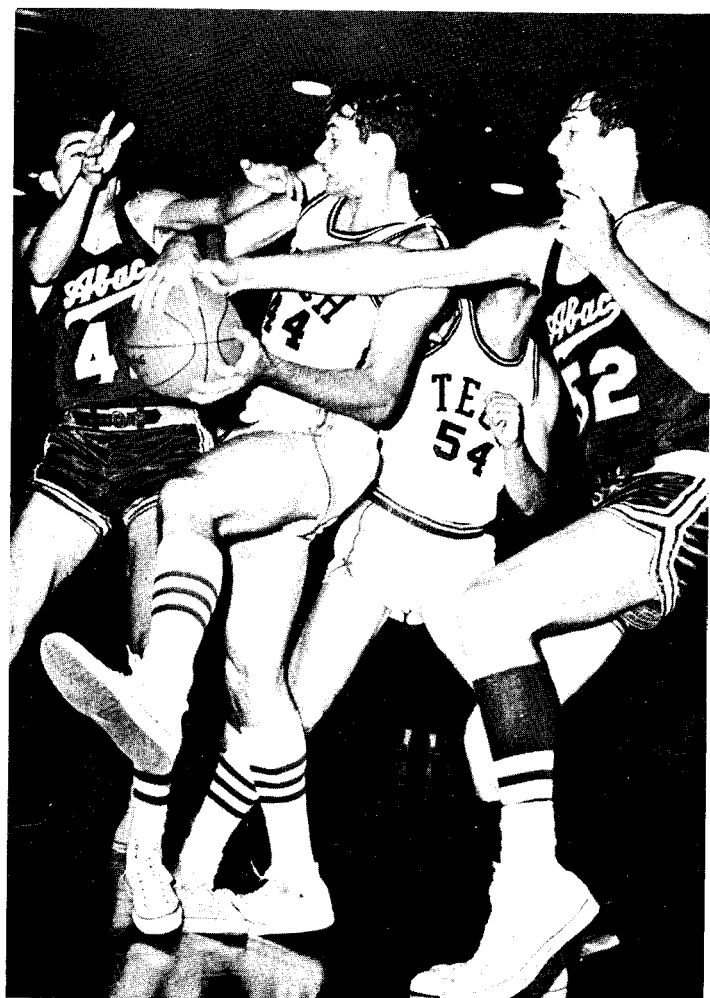

Do I see your "FACE" in the place?

Two Points "BALLET" style.

UP-UP and away with George and Butch.

Hold on Butch, here comes help.

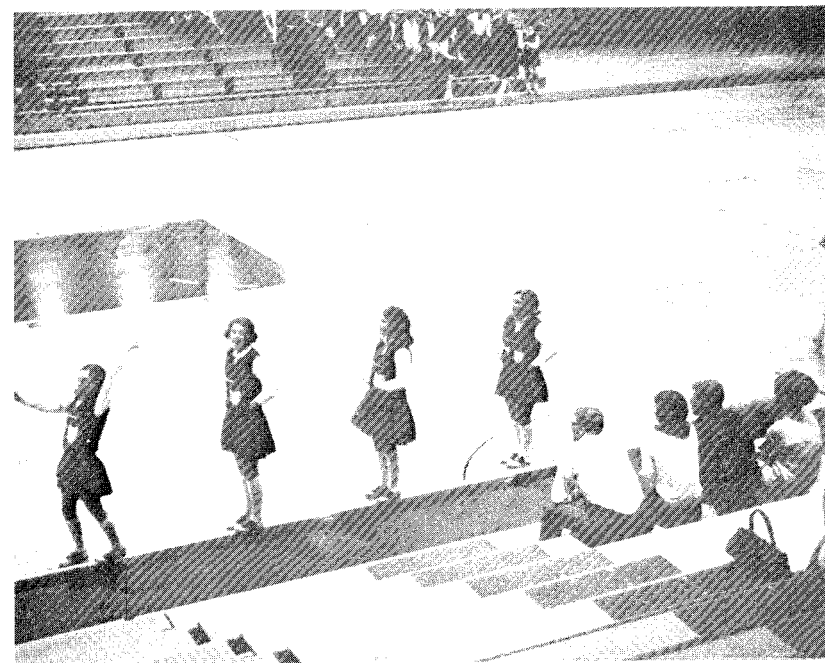

Carl is up to his old tricks, 2 points.

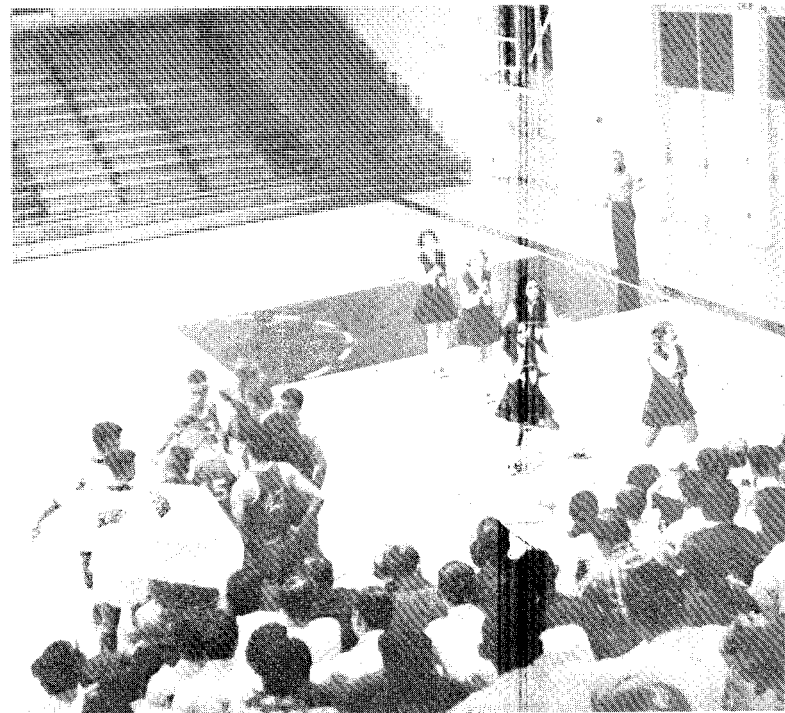

GREEN HORNET'S CHEERLEADERS

Left ro right: Carol Tatum, Captain; Dana Roberts; Jan Struensee; Susan Murry; Bali Tillery.

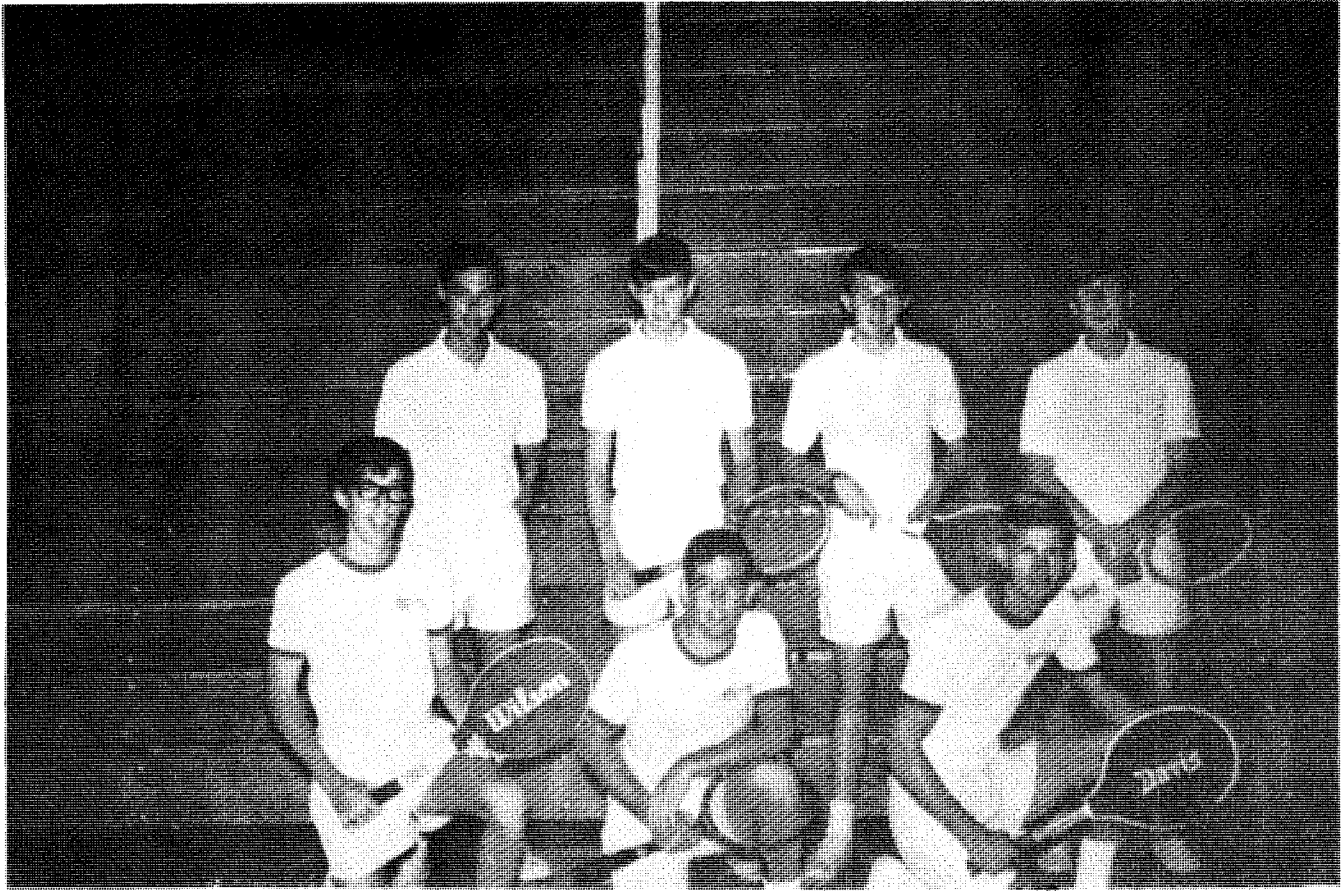

Hey-Hey-Hey-Hey
Green Hornets
You Look so
Good to me!

Cheerleaders keep STI spirit alive.

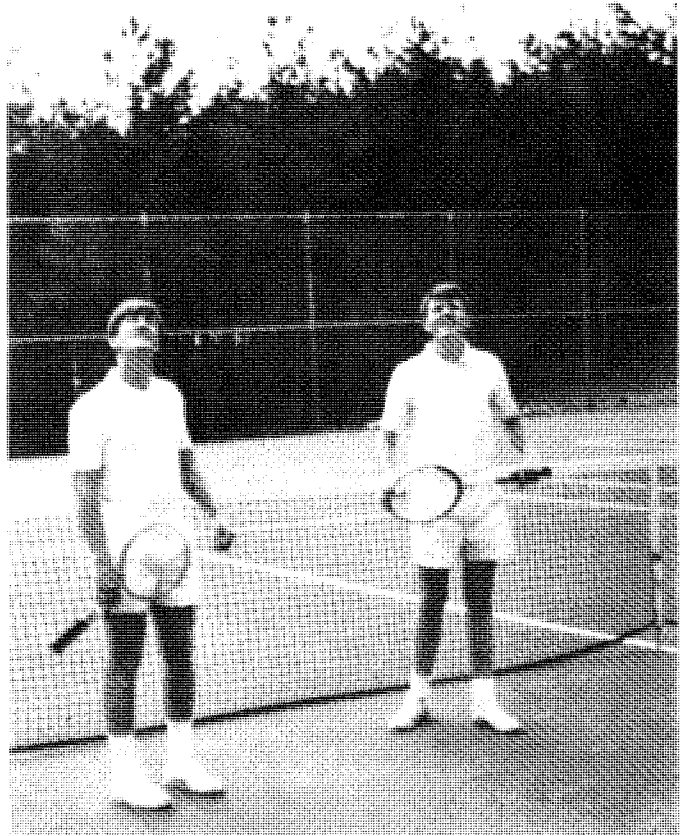

TENNIS

Left to right, standing: Jack Mooningham, Mike Leonard, Butch Odum, Mike Nelson. Kneeling: Pat Blackburn, David Morrow, Bill Emmons.

Assistant Coach, Charlie Thompson

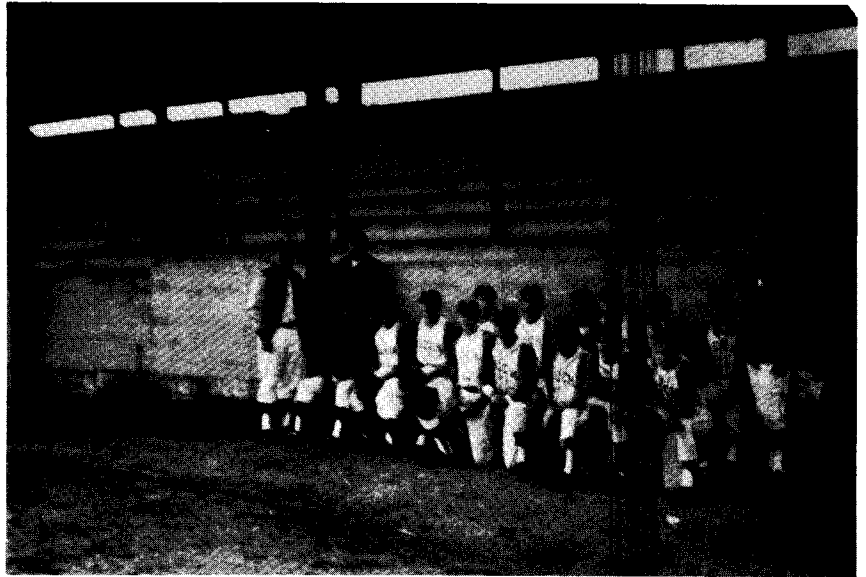

“Look,” it’s a bird, it’s a plane, NOoo, it’s a “Tennis Ball!”

LOCKHEED-GEORGIA COMPANY

A DIVISION OF LOCKHEED AIRCRAFT CORPORATION
MARIETTA, GEORGIA 30060

GENERAL INTRODUCTION

The Lockheed-Georgia Company commenced operation in January, 1951, at Air Force request, to modify B-29s for the Korean conflict. Today, Lockheed in Georgia is engaged in pure and applied research across a broad spectrum, including aircraft research and development; aircraft manufacturing; research, development and manufacturing of nuclear products and work in the missile support and industrial products fields. It is designing reactors for colleges, AEC, and other peaceful uses.

COMPANY DESCRIPTION

Lockheed-Georgia's main plant is located 10 miles northwest of Atlanta in Marietta, Georgia. Officially, it is Air Force Plant No. 6, operated by Lockheed for the Air Force, but is known as the largest aircraft factory under one roof (75 acres) in the free world. Measuring 1,005 feet in width, 1,034 feet in length, the plant can accommodate five aircraft final assembly lines. Its more than 25,000 employees receive an annual payroll which exceeds 200 million dollars.

Since 1951, the Company has produced more than 1000 c-130 Hercules; won the competition, in March 1961, for the Air Force C-141 Star-Lifter; and was chosen in September, 1965, to build the C-5 Galaxy, world's largest aircraft.

Although Lockheed-Georgia is the Airlift Center of the World, it also boasts of its sleek 550 mph military and corporate jet, the c-140 JetStar, and the unique vertical takeoff and landing (VTOL) research aircraft, the XV-4A jet Hummingbird.

Lockheed-Georgia scientists and engineers are exploring the future today with the use of a nuclear laboratory, which houses a ten megawatt reactor; a new wind tunnel, the world's large privately owned tandem wind tunnel; and a multimillion dollar Research Laboratory.

In research, development and manufacture of its products, Lockheed-Georgia people pursue a plant-wide program - Zero Defects. This program is set up under a Zero Defects Chairman and Administrative Council representing all departments and all levels of activity. The idea on which this program rests is simple but effective, "Guaranteed Perfect by Georgia People."

OPPORTUNITIES

Since Lockheed-Georgia activity encompasses research, development, manufacturing, and marketing, there are employment opportunities in many technological fields.

Advancement at Lockheed is enhanced by the decentralized corporate structure and a company policy of promotion from within. In addition, advancement can be across functional lines, from one functional area to another, as well as promotion from within one specialized area.

SPECIAL FEATURES AND ATTRACTIONS

Want something for nothing? As an employee at Lockheed-Georgia, you are entitled to the following benefits at no cost to you: Group Insurance and Hospitalization and the same coverage for dependents; paid sick leave each year; retirement plan, one of the most liberal plans which is supplemented by a life insurance policy; vacation; two weeks after a year's service, three weeks after 10 years' service; and many more.

There are many advantages to living in the Atlanta-Marietta area such as 19 degree-granting colleges and universities, one of which is Georgia Tech; sports ranging from professional football, baseball, and soccer, to sailing on nearby Lakes, a million dollar Cultural Center which includes Concert Hall, Repertory Theatre, Art School, and Exhibition Galleries; the Atlanta Symphony Orchestra conducted by the famed Robert Shaw; the Open Air Opera with Blanche Thebom as artistic director; and many other advantages offered by a large metropolitan area.

Among other things, IBM computers are helping

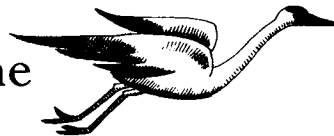

scholars to find what the poet Shelley

learned from the works of Milton

—helping scientists to track the erratic flight

paths of the whooping crane

—helping

historians to deduce precise shades of meaning in

the Dead Sea Scrolls

—helping astronomers

get close-up pictures of the eerie face of

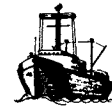

Mars

—and helping oceanographers, sailing

the lonely reaches of the east tropic Pacific, determine

the course of an equatorial undercurrent.

So when there's a problem to be solved, it's amazing

how often IBM computers can help. And we need more

people to help our customers solve more problems.

We're an equal opportunity employer.

IBM[®]
