

*Forty Years
of Tradition*

**THE 1988 LOG
SOUTHERN COLLEGE
OF TECHNOLOGY
“BUILDING OUR OWN TRADITION”
MARIETTA, GEORGIA
VOLUME 39**

TABLE OF

STUDENT LIFE 18

As Southern Tech grows, new traditions are born. New ideas are developed to meet the changing needs of the student. Where they live, where they learn and what they love are all a part of Student Life — Southern Tech style.

SPORTS 50

The sports program has grown through the years — the athletic programs' development thus far benefits all the students in some way. Traditionally, the basketball and baseball teams are supported by the student body whether they win or lose as long as they try. Competition adds to student growth through intramurals everyone can enjoy healthy competition if only organization wise.

ORGANIZATIONS GREEKS 92

The organizations have become an ever increasing tradition. These are professional, social, and religious organizations designed to meet the growing needs of the Southern Tech students. Fraternities and sororities are developed to provide brotherhood and sisterhood and aid in mature social development. Professional organizations provide materials and knowledge necessary to meet goals students have set for themselves.

CONTENTS

FACULTY

ADMINISTRATION 68

The administration and faculty grew and developed into a new structure. The original school being one institution divided into departments has changed for the better. Now that Southern Tech has grown, the need of the students is once again fulfilled. This time by changing the departments into three schools of development: these schools being the School of Management, The School of Technology, and the School of Arts and Sciences.

CLASSES 126

Traditionally, the freshman year takes at least four quarters to actually complete, but the three years that follow go so quickly that the extra quarter does not really matter. These four or five years prepare Southern Tech students to face the future after graduation. SCT 101 is only the beginning to preparing students for college and the real world.

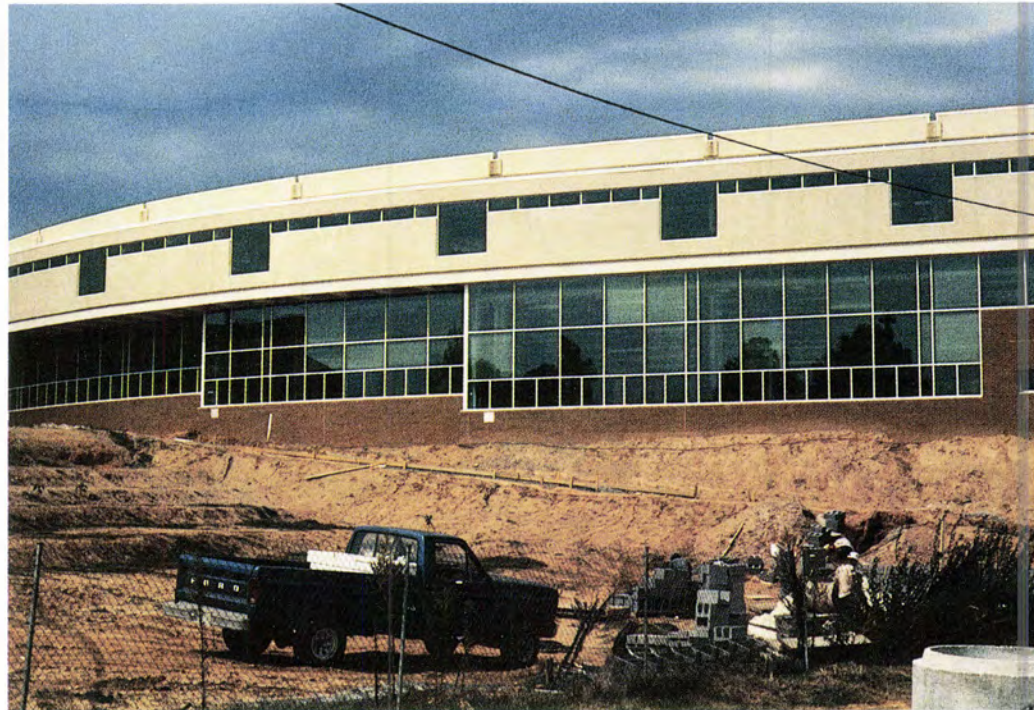

CLOSING 166

As Southern Tech approaches its fortieth anniversary, another year comes to an end. The traditions will continue to grow just as Southern Tech students continue to grow in their knowledge of technology.

BUILDING OUR OWN TRADITION ...

The staff of the '88 Log has chosen the theme "Building Our Own Tradition", because over the forty year history existence there has been a constant pursuit to create a higher institution of learning anchored deep in Tradition. Although Southern Tech is a relatively young college, the sense of Tradition here is very strong. As students attending Southern Tech, we come in constant contact with many of the customs, practices, and beliefs handed down to us from former students whether they are socializing at the "Rock", jammin to the music at the Beach Party, or enjoying the Bath Tub Race, we sense the hard work and dedication of our predecessors. Without their hard work and dedication, Southern Tech would not be a reputable institution it is today.

The pursuit of Southern Tech is to build its own Tradition not only evident in its beliefs and practices, but can be easily seen in the physical aspects of the campus. Nowhere can this be seen more clearly than in the new library addition. The new library addition opened in August of 1987 — ahead of schedule, in fact four days early. Construction on the addition began in October of 1986 and at a final cost of \$3.5 million dollars. The library was designed with several unique features such as student study rooms provided for private study sessions. There are also lecture halls for the guest speakers and presentations. Artifacts donated to Southern Tech by Mr. P. H. Bealy Smith and family were incorporated into the design of the new addition. The designers, Sizemore and Floyd — Architects, Inc., wanted to bring the past and the present together, which they successfully did. Students will gain knowledge in the new library addition for decades to come making the addition a vital part of Southern Tech's strong Tradition.

... ON A SOLID FOUNDATION

1. View of the old library looking from the direction of the dorms. Library when it was built in 1969.
2. Sixties style architecture with indented corners lined with glass blocks.
3. Student studying diligently in the library.
4. Another shot of the exterior design of the library.
5. View of the interior of the old library when it was built in 1969.

In order to build a strong structure there must first be a solid foundation. Here at Southern, the foundation has been laid and is ready to be built upon. Most of the present buildings on Southern Tech's campus were built in 1961. However, since then, enrollment increased. One of the buildings added after the 1961 construction was the old library. The building which is now known as the old library (after the construction of the new addition) was constructed in 1968 at a cost of \$642,000,000. It was reported in the school's annual report from 1968 that the library would house 50,000 volumes and will eventually seat 400 to 450 persons. It includes a seminar room, a speaker's office, a storage room and kitchen, a future computer room, a library staff lounge and a music room equipped with a stereophonic sound system.

BUILT ON A STRONG FOUNDATION . . .

1. Main entrance to the academic building.
2. Front view of the academic building and part of one of the old classroom buildings — still being used today.
3. Computer labs have taken place of the conventional classroom.
4. View of the academic building and the bell tower attached to the new library addition.
5. Back view of the academic building from the second floor of the library.

David Sosnin 3

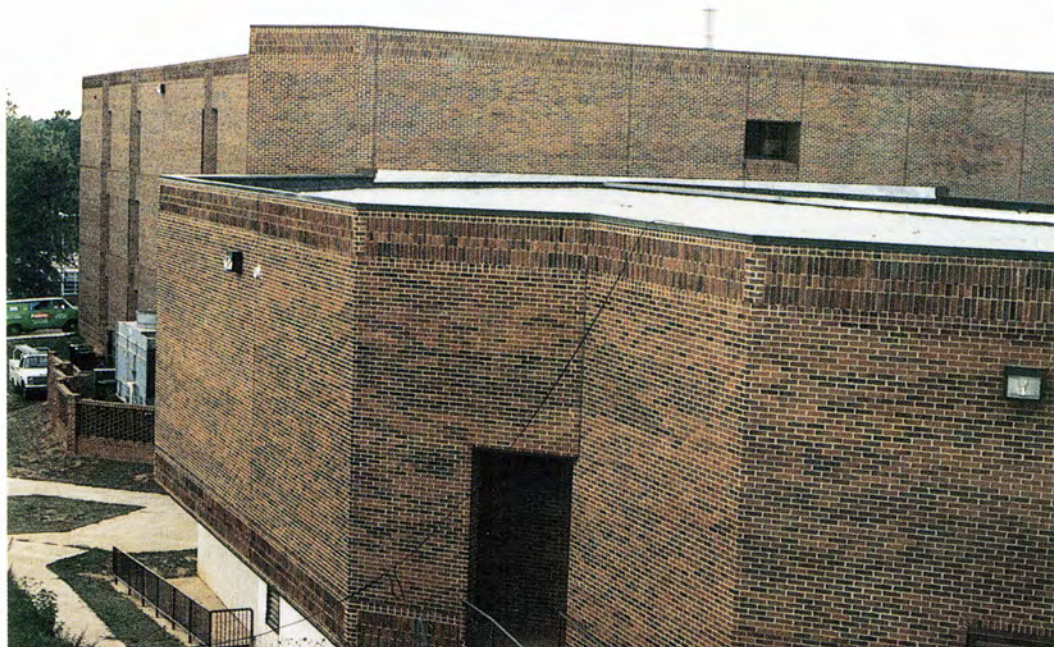

The classroom buildings at Southern Tech have come a long way from the barracks on the SCT campus at the Atlanta Naval Air Station in Chamblee, Georgia. As mentioned earlier, the campus was moved from Chamblee to Marietta in 1960 and eight original buildings were constructed. There were four classroom buildings providing more than adequate space for the growing Southern Tech population. Over the next thirty years, however, the enrollment of SCT increased dramatically and finally in 1983, the administration decided that the construction of a new classroom building was needed.

In the spring of 1984, construction of the new academic building began. The architectural firm of Sizemore and Floyd was chosen to design the new classroom building. But due to slow process and other problems, the school decided to change contractors. The academic building was completed and opened in September of 1986.

... TRADITIONS LAST FOREVER

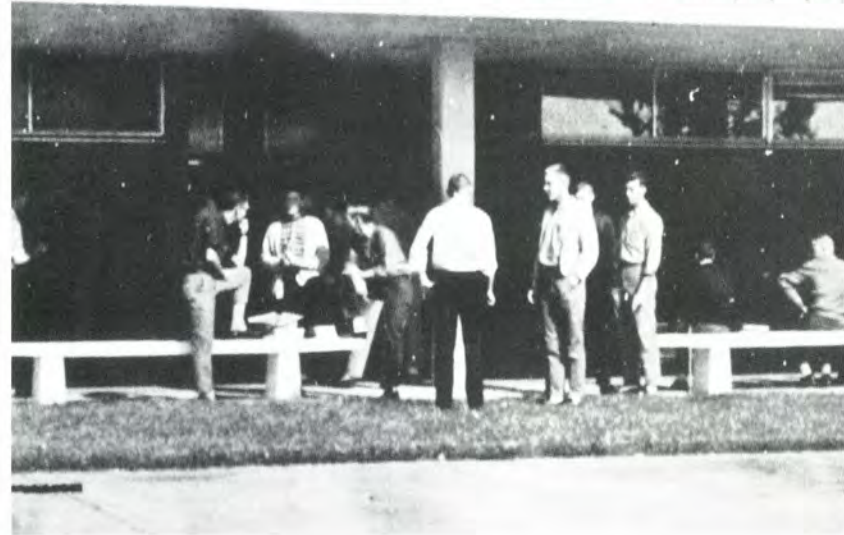

1. *Old classroom building.*
2. *S.C.T.'s first classroom buildings were barracks.*
3. *Students socializing in front of the academic building.*
4. *Classrooms have come a long way in its forty year existence.*

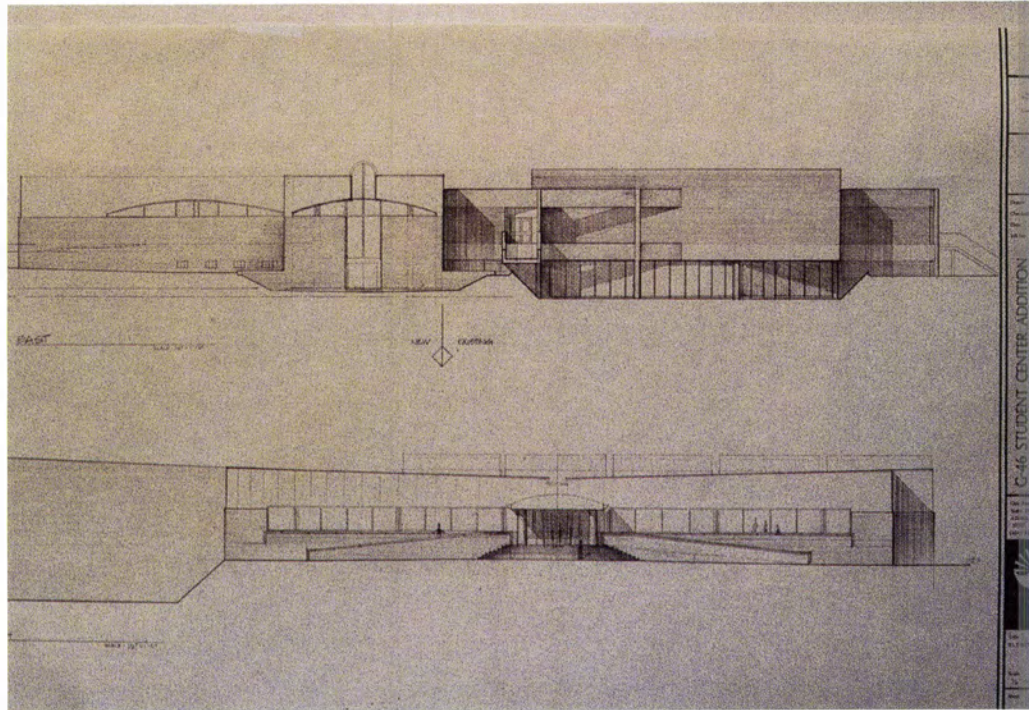

Southern Tech began the job of building its solid tradition forty years ago on January 2, 1948. It was on this date that five faculty and staff members opened offices in building 24 of the Naval Atlanta Air Station in Chamblee, Georgia. At this time there were no classroom buildings, no administration building, no student center, and no library. Instead, there were only open barracks which in time would serve the purposes of the building mentioned above. Mr. L. V. Johnson, the man that first conceived the idea of a two-year technical school would become the school's first director.

As Southern Tech's enrollment grew, it became necessary to find a new location with adequate room for growth. A spot was found in Marietta, Georgia, that suited this purpose, and on December 17, 1958, a ground breaking ceremony was held to start the construction of the present day campus. The new campus was to consist of eight buildings on a 188 acre track of land. The first of Southern Tech's new dormitories was completed in the latter part of December of 1964. The building provided living facilities.

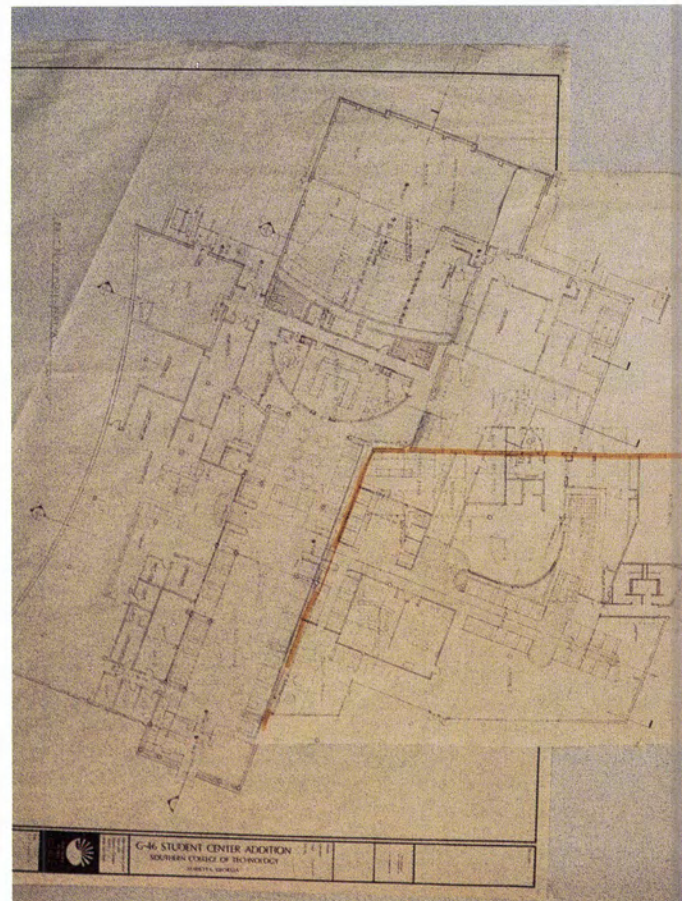

TRADITIONS MATURE & THRIVE ...

1. *Proposed finished elevations of the redesigned Student center.*
2. *Floor plans of the first floor plan of the student center.*
3. *Floor plan of the second floor of the student center.*
4. *Presentation drawings of the new recreation area.*

Traditions not only grow from beliefs but also grow from practices. Practices handed down from generation to generation constitute a tradition. In order for traditions to mature and thrive, there must be a conducive environment. At Southern Tech we have just the facility necessary for traditions to grow. This facility is the student center.

In the early years of Southern Tech, there was no student center — only a dining hall (shown on page 15). Usually the students would socialize in one of the classroom buildings after classes were over.

Southern Tech did not have an official student center until 1976 when the present student center was opened. Southern Tech's rapid growth in the last ten years has brought about the necessity for an addition to the present structure.

In 1986, the school's administration commissioned the architectural firm Sizemore & Floyd to design the new addition to student center. In their design, the architects added many features that are in great demand here at SCT. Included in the design is a 400 seat dining facility, a bookstore, and a theater. Construction on the new student center addition is tentatively scheduled for the fall of '88. With the eventual completion of the student center addition will come a greater opportunity for the growth of traditions on SCT's campus. The staff of the LOG hopes that the students attending Southern Tech at the time of the student center's addition completion will take full advantage of what is destined to be a great facility.

3

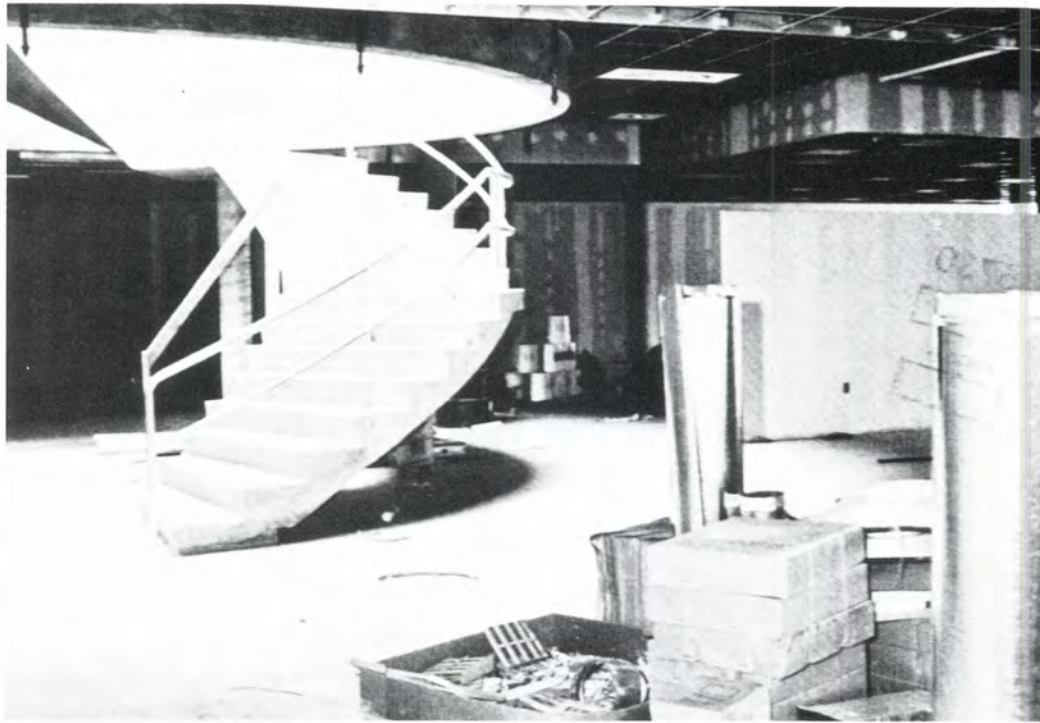

David Sosnin

... IN A CONDUCTIVE ENVIRONMENT.

1. Pictures from the 1976 construction of the student center.
2. Finished upstairs of the student center.
3. Students relaxing in the downstairs recreational room in the student center.
4. One of the greatest pastimes of the students here at S.C.T. — playing pool — this is where this tradition started.
5. Old dining hall at the old S.C.T. campus in Chamblee, Georgia.

1

2

3

Over the years, Southern Tech has made sure that there was always a conducive environment for the growth of Traditions.

As stated earlier, on the preceding page, there was no student center when Southern Tech was located on the Atlanta Naval Air Station. There was a dining hall that provided meals for hungry students. Most of the socializing done by the students was done in the classroom buildings.

After the school moved to Marietta in 1962, there was still no student center provisions made, but the dormitories provided an excellent backdrop for socializing. The dormitories were originally designed with a cafeteria and several lounges. A gymnasium was constructed in 1967 to provide the students with some forms of recreation. In 1976, the present student center was opened. The newly opened student center included several ballrooms for speakers and lectures, a cafeteria for student dining, a radio station, and offices were provided for campus organizations. The new student center was immediately put to use by the student population. Students spent their spare time playing pool or video games. If they were in the mood for a slower pace, a big screen t.v. was provided as well.

The student center has become an even greater part of Southern Tech's growing Tradition than it was when it first opened in 1976. At one time or another, all students must come spend some time in the student center whether it be work or play. The actions of students here at Southern Tech create the Traditions that will live on well after they no longer walk the halls of the student center.

4

5

NEW TRADITIONS

There are several new Traditions here at Southern Tech. In 1986, the school decided to change its name and have a new seal designed.

The college's name was changed from Southern Technical Institute to Southern College of Technology. It was rumored on campus that the new name stated the school's purpose clearer than the old name.

The school also commissioned that a new seal be designed. On the new seal, are pictured a Southern Tech Diploma, The Georgia State Seal, a textbook, and a sketch of the rock.

The new changes in the name and the seal went over without too much turmoil. In the end, every one concerned was pleased with the outcome. The changes were seen as just the birth of New Traditions to be passed on to future generations.

Paul Grady

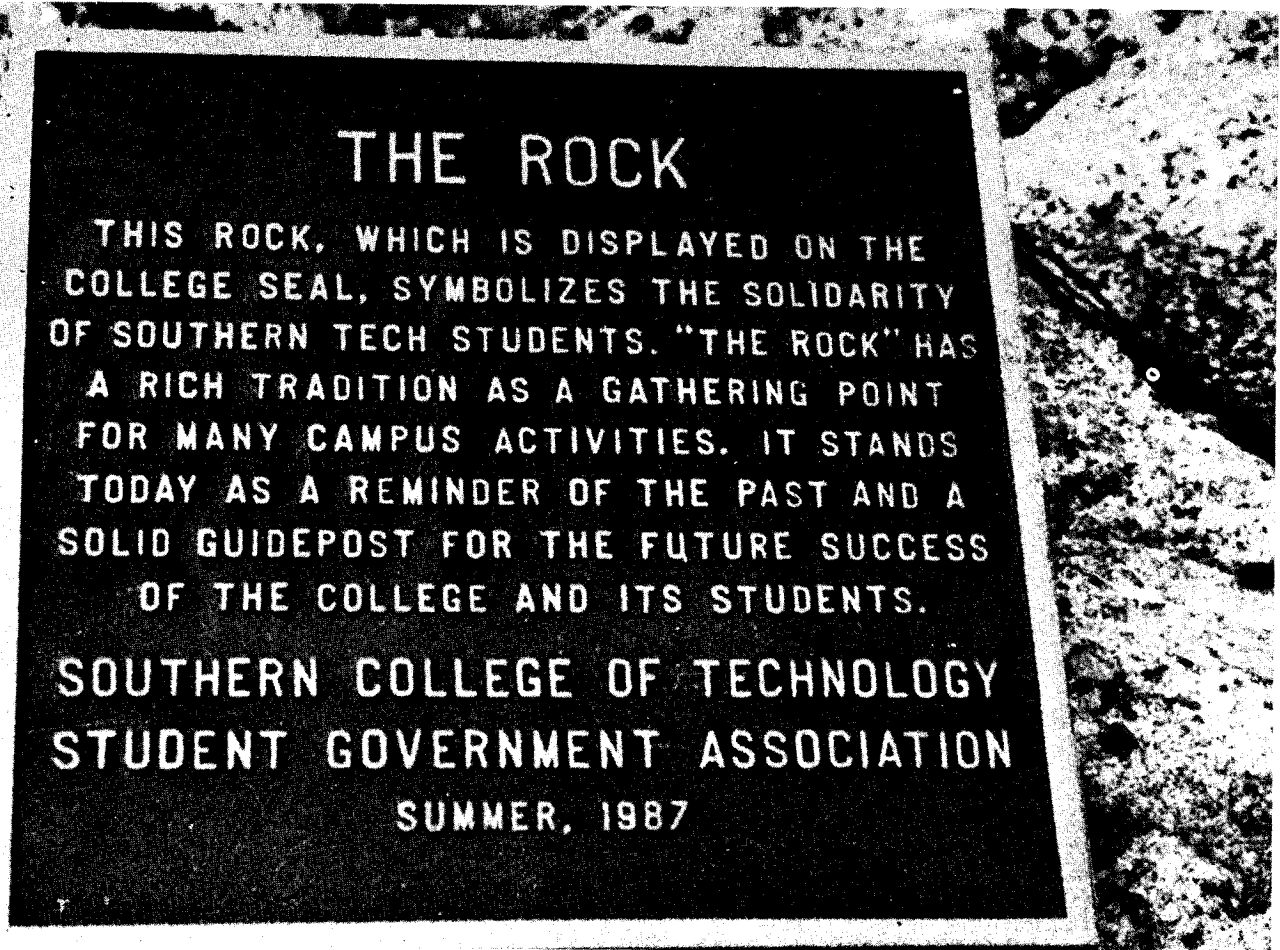

1. The name change as seen on the sign at the entrance to the campus.
2. The new seal for Southern Tech.

2

OLD TRADITIONS THE ROCK

AN OLD SCT TRADITION COMES TO AN END.

While many new SCT traditions are being created constantly, one old SCT tradition came to a sudden halt this year. "Capturing The Rock," is now a tradition of the past. For many years, capturing the rock was one of the biggest traditions enjoyed by SCT students. It was considered a show of school spirit whenever a campus organization or fraternity was able to gain possession of "The Rock."

In recent years, however, the capturing of the rock was accompanied by vandalism of the campus. The school's administration responded by banning any organization from "Capturing the Rock." The "Rock's" future was in limbo for some time while the administration decided what "The Rock's" fate would be. The administration's final de-

cision was to permanently ban the tradition of "Capturing The Rock." Along with the decision to permanently ban capturing the rock, the administration also felt that the area surrounding the rock should be cleaned up. After the rock and the surrounding area were cleaned up, the school commissioned a plaque to be made and placed on it.

One of the lines from the inscription reads as follows, "The Rock" has a rich tradition as a gathering point for many campus activities.

- 1) Plaque, now presently on "The Rock."
- 2) PPD placing the plaque on "The Rock."

STUDENT LIFE

WHAT'S HOT!

1987-88
A YEAR
IN REVIEW

The year is 1987, the news is hot. As the world changes, the news that is important also changes. The most popular news was that of the Iran-Contra hearings by a Senate Investigation Committee. Vice-President Bush was under fire constantly, but the hearings made Ollie North a hero.

The good and bad ideas came to light. Maybe the airlines were not as careful as they should have been when it came to safety. Planes continued to fall in a crashing pattern and mid-air near misses continued to happen. People stopped flying as often and exchanged airline tickets for rental cars.

The most shocking of all the news was the crash of the stock

market that rocked the United States: the crash that repeated itself several times before 1987 ended. The rise and fall of the stock market made investing a game that separates the men from the boys.

At Southern Tech the spray paints and tents were packed away never to be used again. Instead "the rock" became a place of honor with flower and gravel to give the location a new beauty. Construction on a new Textile Department was started. The ground was broken and work began. Plans for the student center addition were displayed for all to see and discuss.

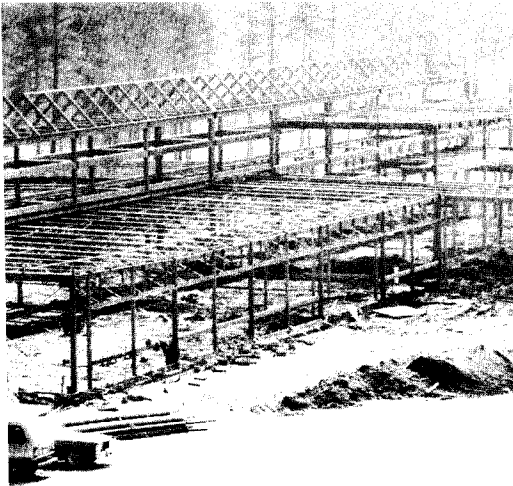

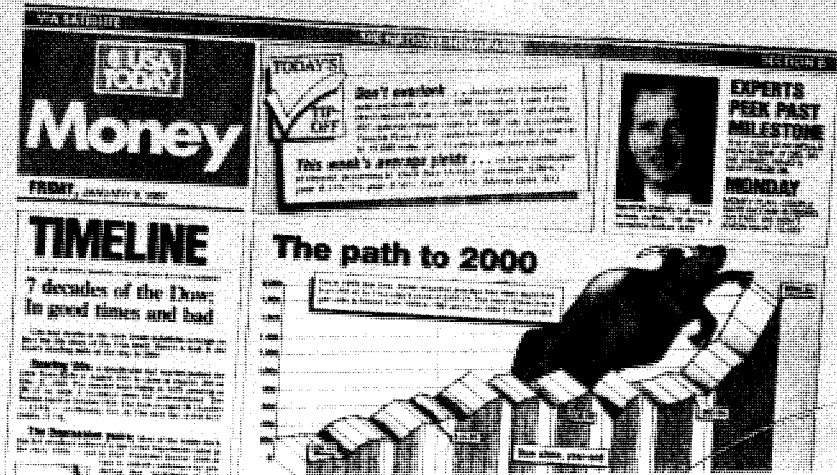

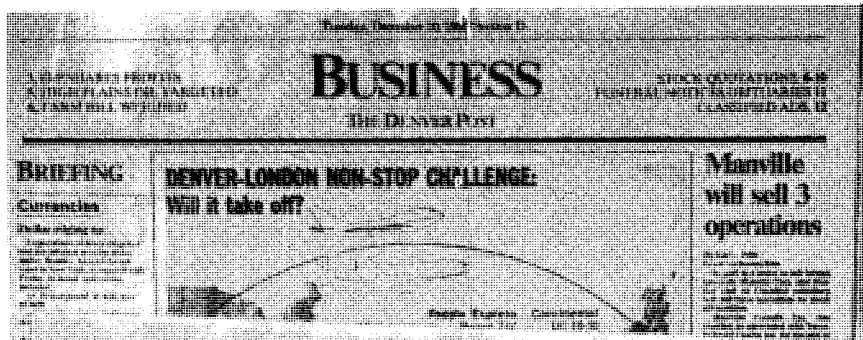

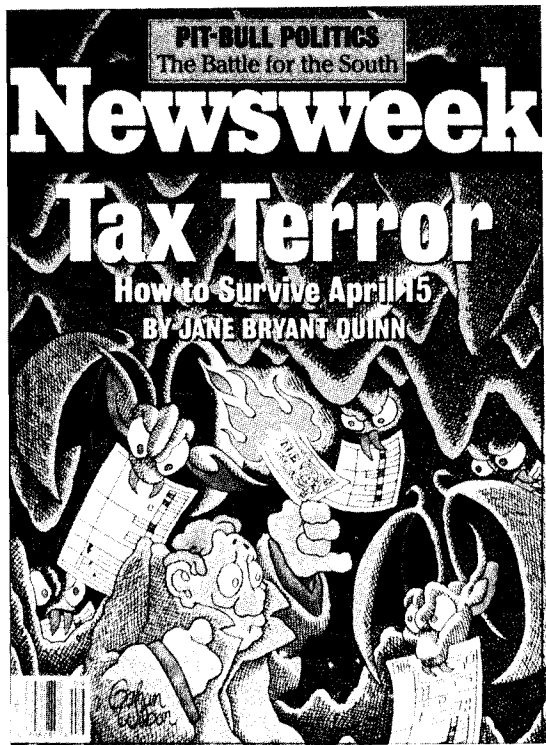

1988 began with a bang. The new year brought new dreams and new desires. Winter Olympics started and ended so quickly that it was hardly noticeable. America watched as the gold and silver

slipped out of Debbie Thomas' grasp that Saturday Night during her long program performance. Three strikes, you're out, so four gave her a bronze medal.

The Election Campaign for a new president brought out senators, politicians, and ministers. During the first ever, Super Tuesday election, a black man won Georgia. Jesse Jackson was that man. George Bush wiped out his opponents constantly for the republican ticket, while the democratic ticket was still anybody else's game. The democrats have finally got to make a decision this time, also a first, they will make that choice in Georgia.

Southern Tech, Georgia, and the World were not expecting many of the surprises of the year but dealt with each challenge as they arose, like the winners they are.

MONOGAMY -OR- PROMISCUITY

Is today's society as sexually active as it was in the 60's, in the 70's, and in the early 80's? A few of those who were, back in the days when monogamy was thought of being taboo, still are, but what about the vast majority ... NO!

Today's society, the young adults, the middle-aged adults, and the primal adults are pretty much staying with their current mates—and with good reason, due to the widespread pandemonium of AIDS (Acquired Immune Deficiency Syndrome). People are scared and are very inadequately informed; who would not be frightened of a disease that scientists and pathologists cannot seem to find a cure for and continue to stonewall the public about what they can and cannot do with those stricken with the disease. People are not only afraid of AIDS but other STD's (Sexually Transmitted Diseases). Not that AIDS was present in the early or mid sixties, but the pandemonium it is bringing about is causing the resurgence of other STD's that were not forgotten

but did not seem to be as equally contagious, when infact, they are. Sure, some like variety and spontaneity, simplicity and dullness, kinkiness and wholesomeness, but they are finding it, these qualities or characteristics, in their present lovers. Whatever the preference may be, each couple finds it within one another. Why not, no one wants to catch something that is contracted doing something enjoyable.

Although these diseases are dangerous and most often fatal when not treated, there are precautions people can take to prevent alleviating the enjoyment that comes along with sexual intercourse. For instance, using a condom or semicide before beginning the act and washing the genitals after completing the old-time ritual does help eliminate the possibility of contracting AIDS and other STD's.

It is true that there is no known cure for AIDS and that everyone cannot and will not contract this deadly virus: there are some who are just carriers, meaning they can pass the virus on to another person and not know it, or carry the virus without showing any symptoms for years to come or at all.

What exactly is AIDS? AIDS is a virus (what kind of virus, we do not exactly know, and if we did, we would more than likely have a cure for it) that attacks a person's white blood cells (T-Lymphocytes) in the human blood. A person's white blood cells helps fight off diseases within a person's system; without a perfectly operational immune system, that person becomes susceptible to all kinds of bacteria, germs, fungi, and other viruses that may cause life-threatening illnesses. This is one of the many reasons

why scientists and pathologists cannot pinpoint what AIDS is because it puts the human body through so many changes; for example, AIDS could cause a person to contract the flu, sure there is a remedy for the flu, but once that is taken care of, AIDS drags its victims' bodies through other traumas. The human body can only take so much abuse and sooner or later the system will be attacked by some new and unknown virus, for which there is no cure because the new and unknown virus is something different.

To prevent any risk of contracting the disease, a person should not have intercourse with homosexual or bisexual men, present or past intravenous drug abusers, and a combination of both homosexual or bisexual men who are intravenous drug users, whether they are past or present. Of course, these people are the ones who contract the deadly virus: there are very few people who contract the disease through blood transfusion or donating blood. As a matter of fact, donating blood is not a problem at all.

As mentioned earlier, STD's (Sexually Transmitted Diseases) can be just as deadly as AIDS, and they are when ignored. Among these STD's that are deadly are Gonorrhea, Syphilis, Herpes, and many more, but the main difference is that there are cures for these diseases when taken care of properly and soon. Although AIDS is becoming widespread and many more cases are being reported everyday, STD's beats AIDS by a large margin as far as cases being reported; in fact, over ten million Americans are infected with STD's as opposed to the 29,000 cases of AIDS being reported. These diseases are spreading so rapidly because many people do not recognize the symptoms, inform their partners, and the main reason—sexual activity is increasing. The results that come from these reasons are that eighty five percent of these cases involve people between the ages of fifteen and thirty, more than 100,000 women are left sterile, and if the disease (whatever disease a person may have) is left untreated, death is a strong possibility.

To prevent from contracting any of these painful, uncomfortable, annoying diseases, a person should pretty much follow the same guidelines given for preventing AIDS: use a condom, use semicide killing agents, and wash up afterwards. But, on other hand, if a person does contract any of these STD's or AIDS, he or she should seek help immediately through their local clinic or hospital.

Yes, sex is a powerful word and act within itself and is safe when practiced correctly. If practiced correctly, meaning ruling out promiscuity and following specific guidelines, AIDS and many other fatal STD's can be prevented. So, the next time someone sees another someone who is alluring, seductive, or shapely-sexy and asks him or herself 'I WANT YOUR SEX,' that someone should ask the other question, 'OR DO I?'

COMMUTER

BLUES

COMMUTING, AN EVERYDAY HEADACHE.

4,000.

Commuting is a big tradition here at Southern Tech. Over the years, Southern Tech has become overwhelmingly a commuter school. Although there are dormitories on Southern Tech's campus, there is not nearly enough campus housing for Southern Tech's student population, which is nearly

A large number of Southern Tech's students come from the metropolitan Atlanta area. Almost every suburb of Atlanta is represented on Southern Tech's campus. Some students call Marietta home while others call Stone Mountain home. Decatur, Snellville, Dallas, Woodstock and the city of Atlanta are all places students call home. It is not uncommon for a commuter student attending SCT to come from as far away as Rome, Georgia, which is nearly sixty (60) miles from Marietta.

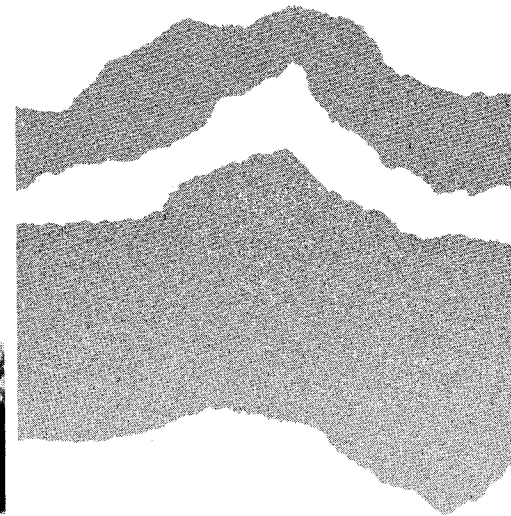

In traveling sixty (60) miles a day, a student is bound to have certain difficulties. One of the biggest difficulties a student is bound to face is traffic. Some mornings and evenings the traffic is unbearable. It only takes a single accident to back up morning traffic in a matter of moments. At times like this, a car radio becomes a student's best friend. A radio makes the time go by a lot quicker, but after thirty minutes of sitting, not even a radio seems to help. By this time, the only thing on a student's mind is getting to school as quickly as possible.

Coming to school in Bumper-to-Bumper traffic is only half of the battle. Once a student reaches the campus parking lot, then comes the next biggest battle, finding a parking space. Initially, only a close-in parking space will do, but after riding around a parking lot for ten minutes or so, a person tends to lower his/her standards — any space that is

five feet away will do. In the end, the entire "Parking Lot Game", as we will call it, becomes a predator sport. The object of the game, spot a fellow student leaving a parking space and pounce on it. It's not unusual to see SCT students racing down aisles in order to seize a vacant spot. In time, a student becomes rather good at this, perfecting this game to a science. Although this entire scenario sounds hopeless, all is not lost. A student, if he is persistent enough, is bound to luck up on a space.

Well, after fighting Bumper-to-Bumper traffic and dueling with fellow students for vacant parking spaces, a student now has to find the strength to go to class and comprehend everything that is being discussed. Following this class, a student goes to Physics 203, Technical Writing, and Basic Programming, after all this, the student feels maybe it's time to head home. He/She leaves the classroom building, walks across the campus, finds his car and starts to get in it and go when he notices a white slip of paper on the windshield. My, what could this be? A friendly note, an advertisement, an entertainment handbill. NO!, it's the notorious SCT campus safety citation. These citations can be found on a number of students' cars. Most students consider these citations somewhat of a plague. A plague that will not go away. By the end of the quarter, the typical student has their fill of campus police, campus citations, and campus parking.

For Southern Tech seniors that commute, obtaining a good job is not the only thing to look forward to following graduation, no longer having to fight traffic and fight for a parking space is more than enough incentive to graduate and "GET THE HELL OUT OF DODGE."

- 1) A view familiar to so many Southern Tech Students, the skyline of the Cumberland-Galleria area as seen from I-75.
- 2) The view commuting students see when exiting I-75 North onto the South Marietta Loop.
- 3) Old Drive-in Movie Theater Lot on Southern Tech's campus.

CAB ENTERTAINMENT

CAB (Campus Activities Board) did a great job of entertaining the SCT student body this year. Through hard work and creativity, CAB put together some of the year's most memorable activities.

The '87 Beach Party was the success that it is every year. This Year's Beach Party featured a swim suit contest, a Mr. Macho contest, and a Lip Sync contest. The crowd was also able to dance to the sounds of the band "Top Secret".

In the fall of '87 CAB sponsored the annual Homecoming Week events. The Homecoming Week activities included a pre-game pep-rally, a post game Homecoming dance, and the coronation of SCT's two Homecoming Queens. Yes, that's right, there was a tie for the coveted title of Homecoming Queen. The two Homecoming Queens were Amelia Echols and Evelyn Pascual.

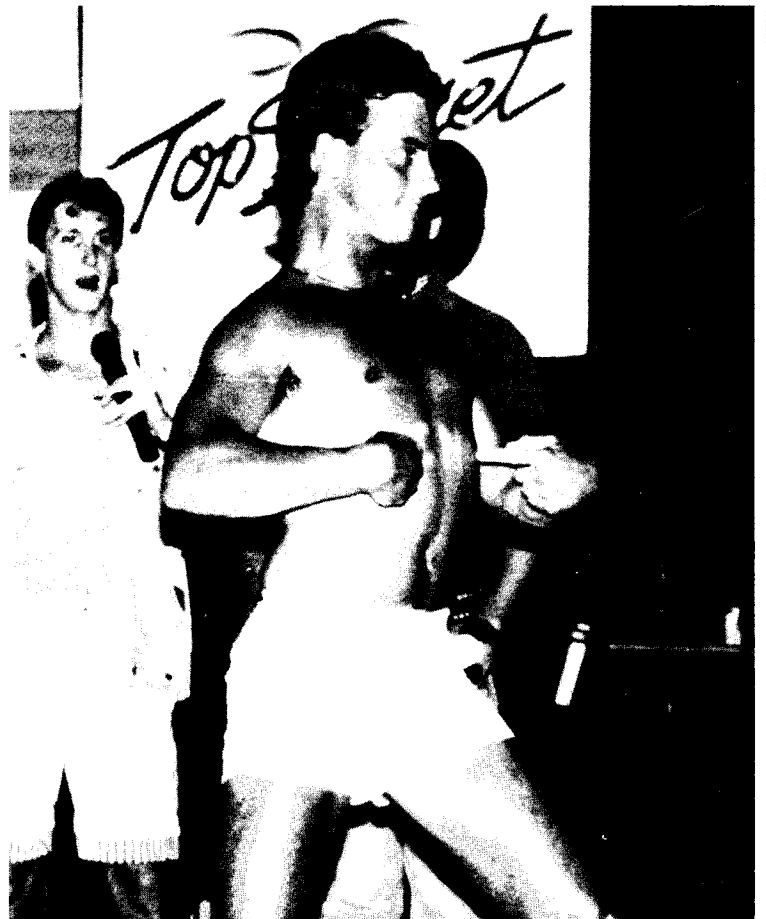

CAB continued to provide top notch entertainment for SCT during Winter Quarter with the production of "1001 Black Inventions." CAB presented the production in celebration of Black History Month.

Also, in February, CAB sponsored Michael Swe-dicks' Reptile World. Michael, along with his brother, own one of the largest private reptile collections, Reptile World, Inc.

In March, CAB held Casino Night. This is the one night that Southern Tech students can spend "money" until they are "stone broke." Students were eligible to win prizes such as microwave ovens, barbecue grills, hair rollers, and stereos. This was one night that no one could lose.

These are just a few of the many events that CAB sponsors throughout the course of the year. CAB provides a television and vcr for the viewing pleasure of students who have spare time in their busy school day. Feature movies are also shown once a month in the student center.

With CAB providing the quality entertainment that it has in the past, it's almost impossible to have a dull moment on campus.

- 1) A couple dances to the music played by a live band at homecoming.
- 2) Snake, posing in that Mr. Macho contest.
- 3) Students gambling for the fun at CAB's Casino Night.
- 4) Folk music at lunch time.
- 5) Michael Swedick presenting Reptile World to the SCT student body.

4

5

DORM LIFE

BUILDING A TRADITION OF EXCELLENCE THROUGH TOGETHERNESS

The residence halls have developed certain standards of performance that have become almost traditions. These traditions have made the residents grow and develop into responsible adults.

The basis behind these standards are simple ideas learned in early childhood. Living in the dormitory and in such a close environment only enhances what the individual already knows.

One of the ideas is that of respect. The residents are constantly reminded (not necessarily verbally) to show respect to their fellow students. Respect is treating the other students as you would hope they would treat you and understanding that each of us has our own good and bad days. With such a large number of people living in the buildings, it is necessary that each person also respect each other's right to privacy, to quiet, and to maintain the right of their personal possessions. Yes, these ideas are old but yet they are new.

The next idea is one that aids in the students' development just like the first but in a different way. Living in the dorms provides the resident the opportunity to meet other people. These people may have a

different religion or culture. They may be black or white but because the students are maturing, they become friends. Our students come from different cities, regions, states, and countries. Although they are different, they learn to interact with a variety of people and they become acquaintances and friends.

To succeed in the dormitory and in life it is necessary to work together with others that you have something in common with. Staying up late to help one's roommate study for an important test is a test for the individual — a test of life. Helping others is a part of friendship, one of the most important.

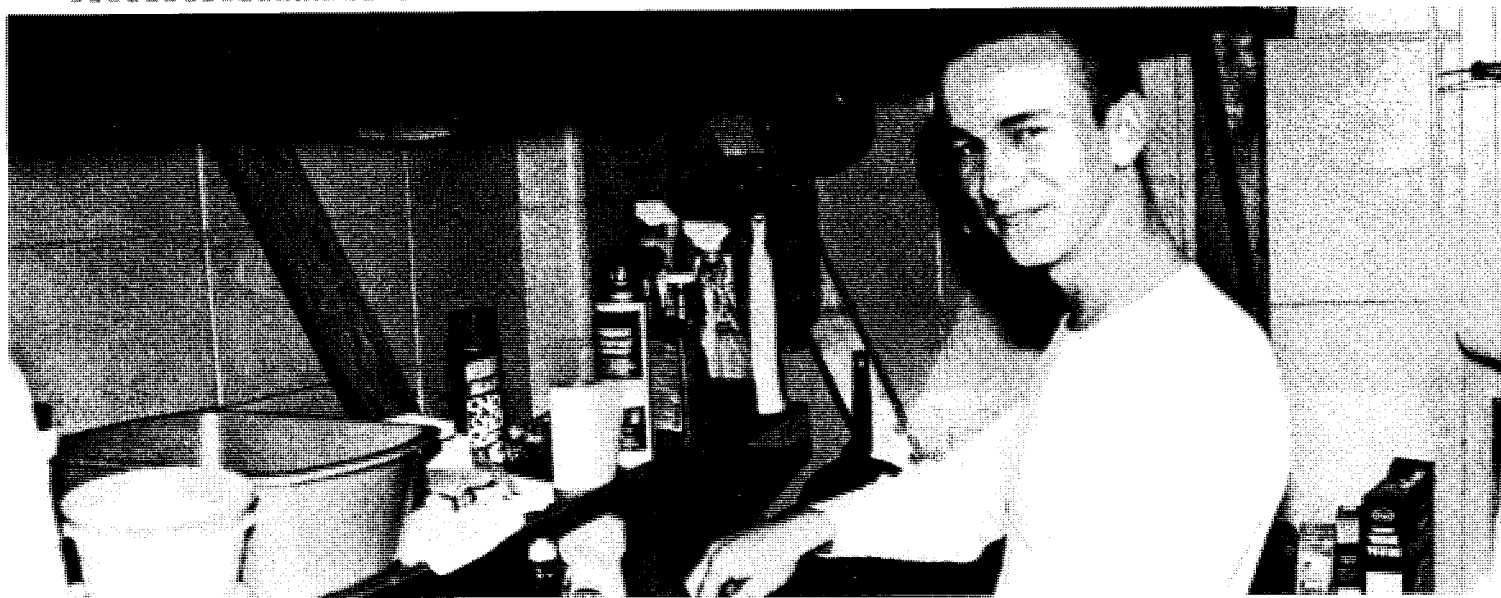

Did you get any mail from home, Vanessa?

The best part of waking up in the morning is knowing there will be an afternoon nap.

Smile. You're on candid camera.

It doesn't take much room to cook a real meal in a dorm room.

Keep the door open so that a cool breeze can blow out the hot air.

I decided that studying has made me tired, so I'm going to spend more time relaxing.

DORM LIFE

Who is in charge?

The residence hall has a staff of individuals ready to help the students day or night. The Director of Housing is responsible for the administration and the day-to-day operations of the residence hall system including staff selection, training and supervision, overseeing the facilities' management and maintenance, development and enforcement of policies and student rules and regulations, and the coordinator of social and recreational activities in the halls. In addition, the director coordinates an off-campus housing service which includes a listing of apartments, general renters' information as well as consumer information. The director of housing is Steve Holtz.

As in any office, there is a secretary, but the housing secretary is someone very special. Teri Carruth is the secretary of the housing office: she maintains the operations of the housing office which include clerical duties, coordination of off-campus housing listings, appointments for the director, and other assigned task.

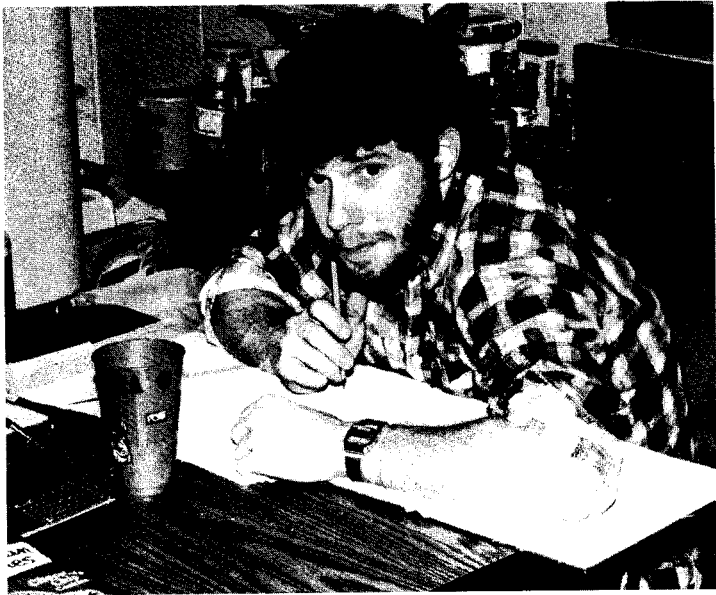

Finally, the residents have people they can talk to and relate to their peers. The resident assistants are students who are located on each floor to assist the residents in school matters, personal concerns, advising, campus information, emergencies and activity involvement. There are at least two R.A.'s on each floor. They are responsible for "duty" which insures emergency help during the evening hours.

Karen, "Hide me from the camera, I look a mess."

Gette-Up Horsey! I'm ready for hall races.

I have all the comforts of home here, including a microwave and can goods.

Yes, this is a Sin Den and we are all devils.

I just love studying with my girlfriend.

Life is hard enough, I have to try and get dates on a pay phone.

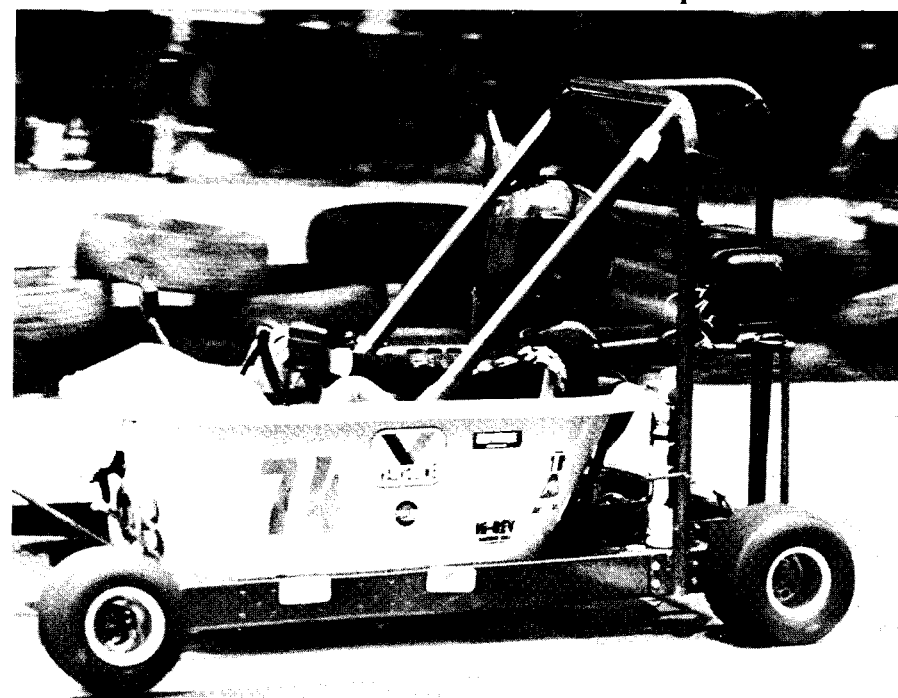

SPRING BATHTUB RACE

1. The spring bathtub race drew a large crowd.
2. Gamma Phi Beta, a sorority here at SCT, sponsored a tub for the first time ever in SCT's history of the bathtub race.
3. Budweiser tub No. 25, driven by Greg Caudell, received an award for being the best Engineered Tub.
4. Sigma Nu tub No. 96, driven by Rodney Bridges, won 1st place.
5. Greg Caudell drove the Budweiser sponsored tub.
6. John Whitmire was the driver for the Bud Lights tub No. 63.

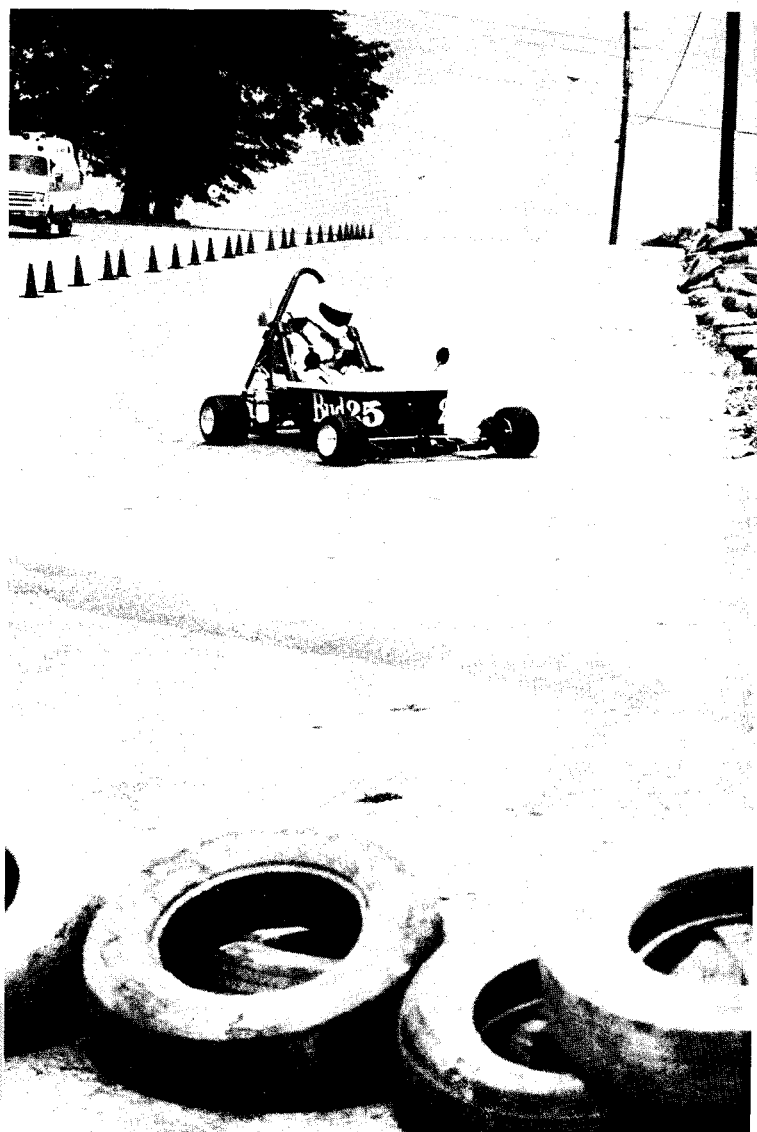

All photo credits for bathtub race go to Paul Grady.

1

2

3

The 1987 Spring Bathtub Race was a great success. The spring race began with a soap relay and the vintage race. The soap relay was made up of five members who relayed the unusual item of soap around campus. First place winners in this contest were BSA (Black Students Alliance).

After the soap relay, the vintage bathtub race was held to honor the races early history. Sigma Nu was victorious over Tau Kappa Epsilon.

Following the vintage bathtub race, the main bathtub race was held. Rodney Bridges, driver of Sigma Nu Alumni's tub No. 96, took first place. Mike Smoker, driver of Amatech's tub No. 17, came in second place, Third place went to Mike Pershinsky, driver of the Spring Garden College tub No. 6. In the Lever Cup Challenge, Mike Pershinsky won first place and Lee Miller in WHGR/B&L's tub No. 4 won second place.

Once again, the students of Southern Tech were fortunate enough to witness another great bathtub race filled with excitement. There is no doubt that the bathtub is here to stay and destined to become one of Southern Tech's greatest traditions.

5

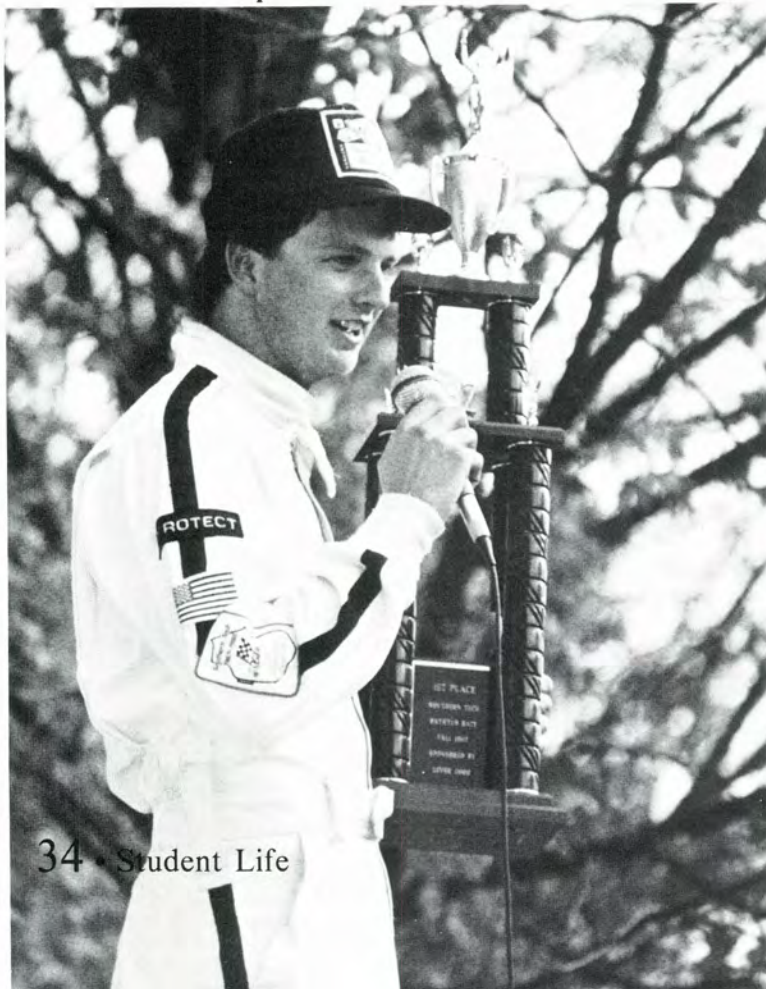

6

FALL BATHTUB RACE

1

2

3

4

The annual fall bathtub race was held November 8th, 1987. The race had two divisions: the Lever Cup Challenge and the Veteran Class of Racers. The field was divided into two sections, the rookies and the veterans. The rookies raced in the Lever Cup Challenge division and the veterans raced in a separate class. Each class entered four bathtubs. The Lever Cup Challenge class had tubs sponsored by B&L racing, Lambda Chi Alpha, Tau Kappa Epsilon, and Sigma Nu. The tubs entered in the veteran class were Sigma Nu, Bud Light, Budweiser, and Miller racing.

The race was dominated by two tubs, No. 25 (Budweiser) and No. 15 (Miller). Tub No. 25, driven by Greg Caudell and sponsored by Budweiser, was first to complete the 60 lap race. The other two winning tubs were No. 15, sponsored by Miller racing, and No. 63, sponsored by Bud Light.

The Fall Bathtub Race is once again a great success. Every fall quarter, students of SCT look forward to the thrill of bathtub racing. As the years go by, the fall bathtub race becomes a bigger and better tradition here at SCT.

5

1. Members of Sigma Nu Fraternity make repairs on their bathtub.

4. Sharp curves and turns in the race course added to the thrill of the race.
5. Sigma Nu, a fraternity here at SCT, sponsored tub No. 2 in the LCC class.

BEACH PARTY

Beach Party, another tradition here to stay at Southern Tech. As usual, beach party was the fulfilling, exciting, and fun filling event it is always made out to be. Although the beach party was moved from between the dorms to the gym due to the threat of rain, it was quite successful with the help of the campus participating by appearing and the efforts and plans of CAB — Campus Activities Board. The entertainment was provided by Star Search winners, Top Secret, a pop-rock, seven member band and two professional frisbee throwers, who demonstrated some of their famous routines for the student body of Southern Tech.

Star Search winners, Top Secret, played many popular tunes both pop and beach to set the atmosphere of having a real beach party. In between breaks, comedian/emcee, David Kenny, hosted the other functions at the beach party: Mr. Macho contest, Lip Sync contest, and the all traditional Bathing Suit Contest. Of course, a beach party would not be a beach party without a barbecue.

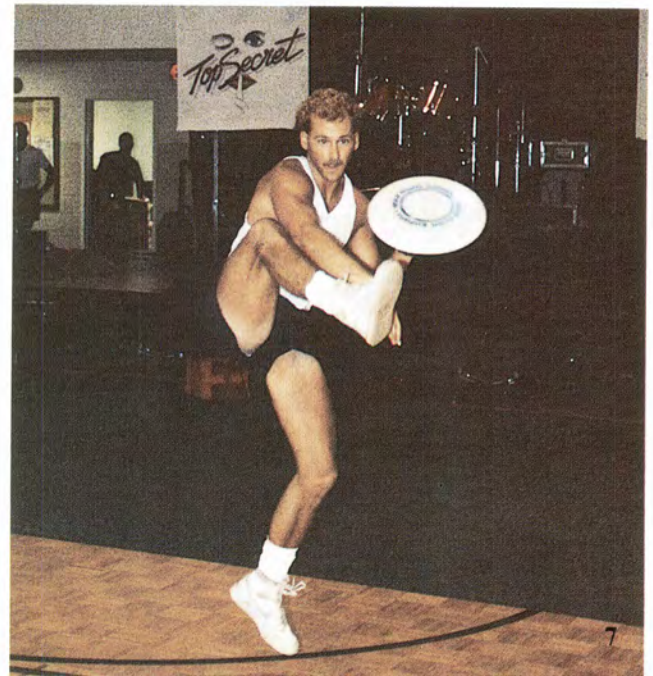

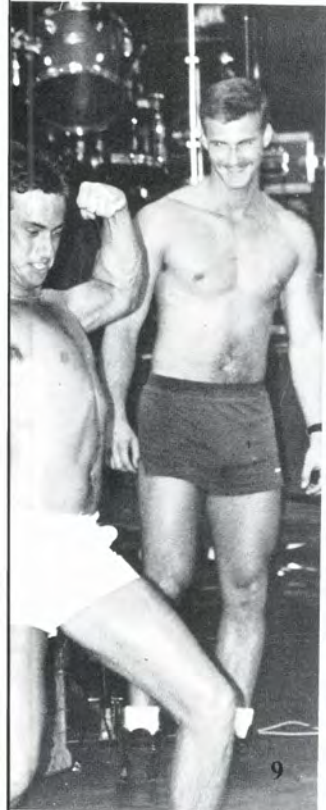

The Southern Tech student body really enjoyed themselves through participating in the many events that took place during the beach party and watching the participants perform.

GREEK WEEK

IT IS NOT WHETHER YOU WIN OR LOSE

but how you play the game

Once a year the Greeks get together for GREEK WEEK. This is an overall competition between the fraternities and sororities to see who is the best greek organization on Southern Tech's campus. The competition usually shows that in the end no one is really a loser because everyone wins.

There are many different kinds of games that test every member of the organization. Some of the games have originated from long standing traditions on campus. The Egg Throw, for example, comes from the past tradition of capturing "the rock." The innocent victims being the captors, of the rock, who are bombed by other organizations using eggs. The game during Greek Week has much the same goal. The activity does not take place at "the rock" nor are the targets people, but the end is the same. The eggs are more like arrows and the target remains a bullseye. There are no human targets, but if the thrower thinks the target is a member

5

GREEK WEEK

of another organization that's fine because that is part of the fun.

The games are always a healthy part of the interaction between the groups. The events sometimes help outside organizations while also having fun. One event in the competition uses the Red Cross Blood Drive by getting as many members of each organization to give blood and get points by the number of members.

The greeks have a variety of activities that are all a part of GREEK WEEK, these are open to everyone, but the games are only for the greeks.

HOMECOMING COURT OF 1988

3rd Runner-up: Barrie Gilliland

4th Runner-up: Michelle Brinkley

2nd Runner-up: Georgiana Conger

Amelia Echols

Hometown: Snellville, Ga.
 Major: ApET (Apparel/Textile Engineering)
 Class Rank: Senior
 Why Attend S.C.T.: Feels that S.C.T.'s program for apparel design suited her needs and seemed to be the best among other Georgia colleges.
 Campus Activities: 1987 SGA-Pres., ΓΦΒ-sister, ΣΠ-Li'l sister
 Why run for H.C.Q.: Nominated by SGA and Views on what H.C.Q. should represent: H.C.Q. should be someone who is involved in activities on campus and cares about the future of the students and the campus itself.
 Post-Graduate Plans: Master's Degree in Industrial Mgmt., pursue career in apparel field as a production mgr. or quality control mgr.

Evelyn Pascual

Hometown: Atlanta, Ga. (Born in Augusta)
 Major : AET (Architectural Engineering)
 Class Rank: Sophomore
 Why Attend S.C.T.: Feels it is a very good engineering school and has a very good Co-op program.
 Campus Activities: BSA, NSBE, and NAACP member
 Why run for H.C.Q.: Nominated by BSA/NAACP
 Views on what H.C.Q. should represent: Represent S.C.T. in a professional manner to the best of her ability.
 Post-Graduate Plans: Become a registered architect and own an architectural firm.

HOMECOMING DANCE & GAME

Photo by Richard Frye

Homecoming this year was held at the Historic Roswell Mill, a very different atmosphere since S.C.T. has always held its homecoming dances in hotel ballrooms or the student center. Although different, the setting that Roswell Mill set was very attractive and nostalgic. The decorations, food, and beverages were all tasteful and appealing to the eye as well as the palate. Of course, a dance would not be a dance without a band — a good band. The band, Midnight Blues, played many good dancing tunes.

Midnight Blues played many catchy tunes, both old and new. This was very apparent through the students' enjoyment of the dance floor and their involvement in singing along with the band in some of their tunes and even calling a couple of individuals out of the audience up on stage to sing lead in an "Oldie but Goodie." Our hats go off to the CAB committee (s) for choosing the location, Roswell Mill, and the band, Midnight Blue, for S.C.T.'s homecoming.

YOU'VE GOT THE LOOK . . .

"You've Got the Look," is how the chorus line in Prince's popular tune goes. Here at Southern Tech this line has a special meaning. Southern Tech's student body is a very diverse group comprised of people from all over the continental United States as well as from all over the world. No matter where an individual student is from, that student is bound to have a look reflecting their personality. Whether this look comes through in fashion, behavior, or attitude, it is a look unique only to that person.

Here on this page, we want to share some of those looks with you.

1

2

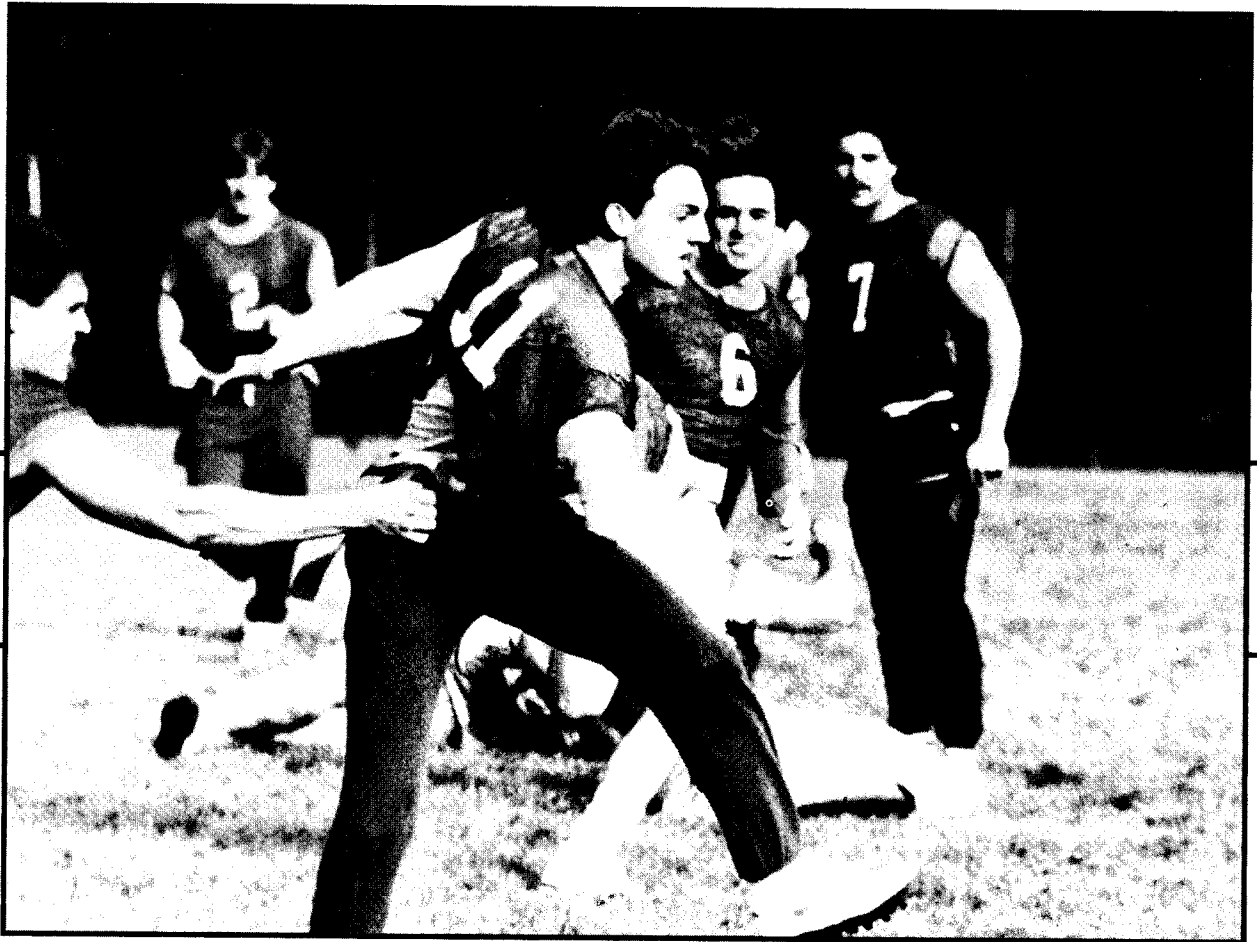

3

1. That "Need a Vacation" Look.
2. That ever popular "Look of Confusion."
3. Southern Tech's version of the Geisha Girl.
4. He's got that "Cool, Calm, & Collective" Look.
5. She has that undeniable "What Do You Want" Look.
6. That "Special" Look.
7. The Look of a Whimsical Guy.

SPORTS

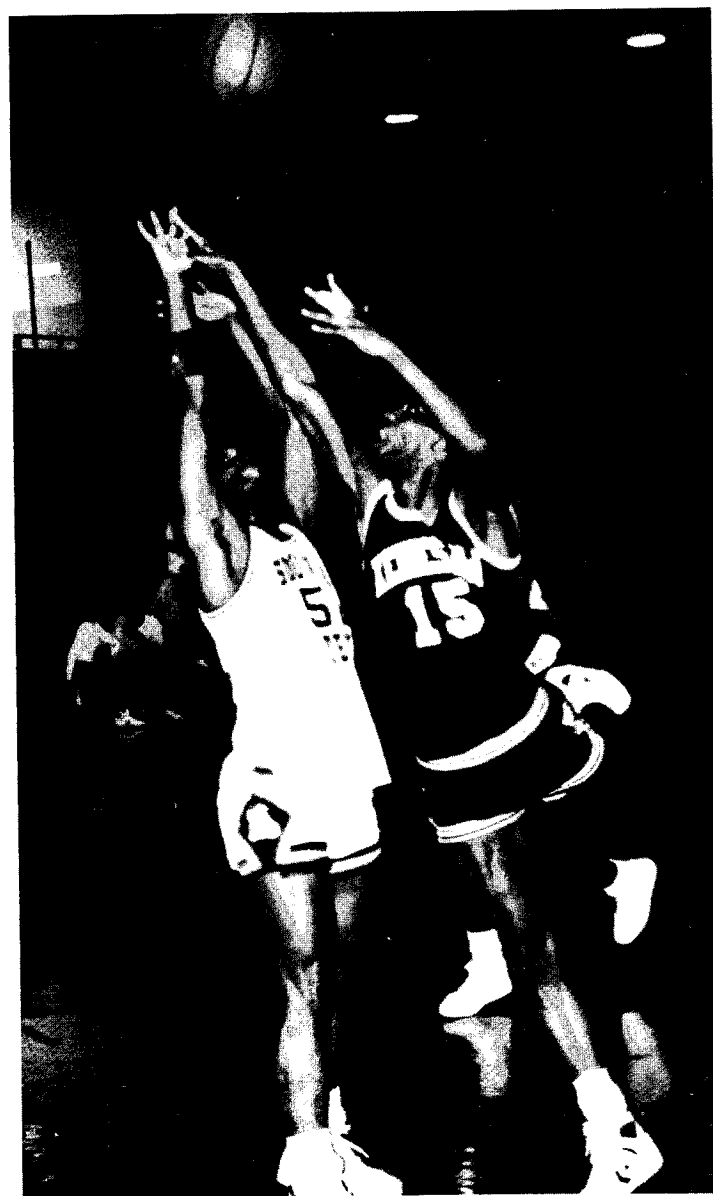

1987-88 HORNETS

The 1987-88 Hornet team did a commendable job this year. The team had to work much harder than usual since the majority of the team was young, but despite this handicap, the final record boasted 22 wins over 11 losses, and the District 25 overall record was 13 wins and 5 losses. Head coach George Perides along with assistant coaches Richard Stallworth and James Waldon brought the team together for a successful season. The Hornets were faced with losing an average of 51 points per game as compared to the 1986-87 season, but were still seeded second in the District. The Hornets have always been a powerful opponent in the NAIA (National Association of Intercollegiate Athletics) and in the eleven years the Hornets have been a member, they have been to the finals nine times and won six out of those. Coach Perides pointed out "there is a tremendous amount of tradition here", referring to the Hornets successful lifetime program. He also added that the young team had adjusted well to the structured type of coaching that Perides implements. The Hornets tied for second place in the GIAC Conference championship and wrapped up the season in the finals of the District 25 playoffs in a very intense game against Georgia College with the score 36 — Hornets and 38 — Georgia College. An important aspect of being a Hornet player is the practical discipline that is impressed upon the player. Coach Perides stresses the importance of teaching the fundamentals of everyday life by using basketball as a training tool to cope with the ups and downs of real life. By having a young team, Perides remains optimistic about the future of the team since he can mold them into a tighter team force. Assistant coach Richard Stallworth also added that this season's Hornet team was going through a rebuilding year and he was pleased with the team's efforts and victories.

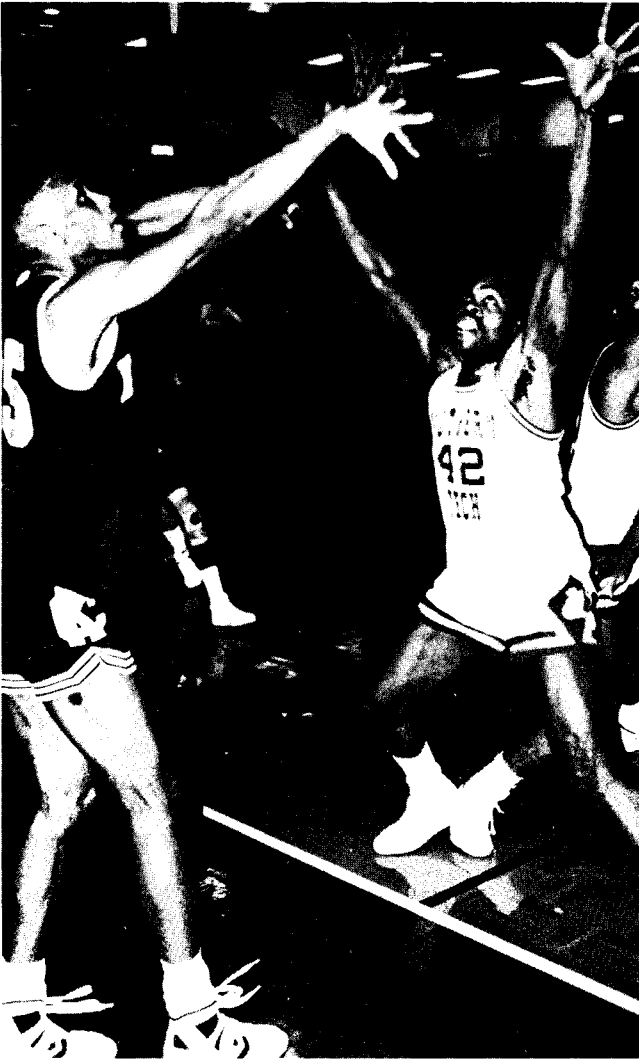

Outstanding leadership roles from Seniors Bobby Hines and Terry Givens, along with Junior John Bouleware, gave the team added support throughout the season. Senior Terry Givens was the season's leading scorer with an average of 18.5 points per game and broke the school record by scoring 37 points in one game. He was voted second place for the District 25 team (similar to an all-star team) and received the February small college player by the Atlanta Tip Off Banquet. The leading rebounder for the season was Senior Bobby Hines with an average of 7.5 rebounds per game. Junior John Bouleware was the leader in assists with an average of 3.67 rebounds per game and Freshman Maurice Charlton made the NAIA District 25 all freshman team.

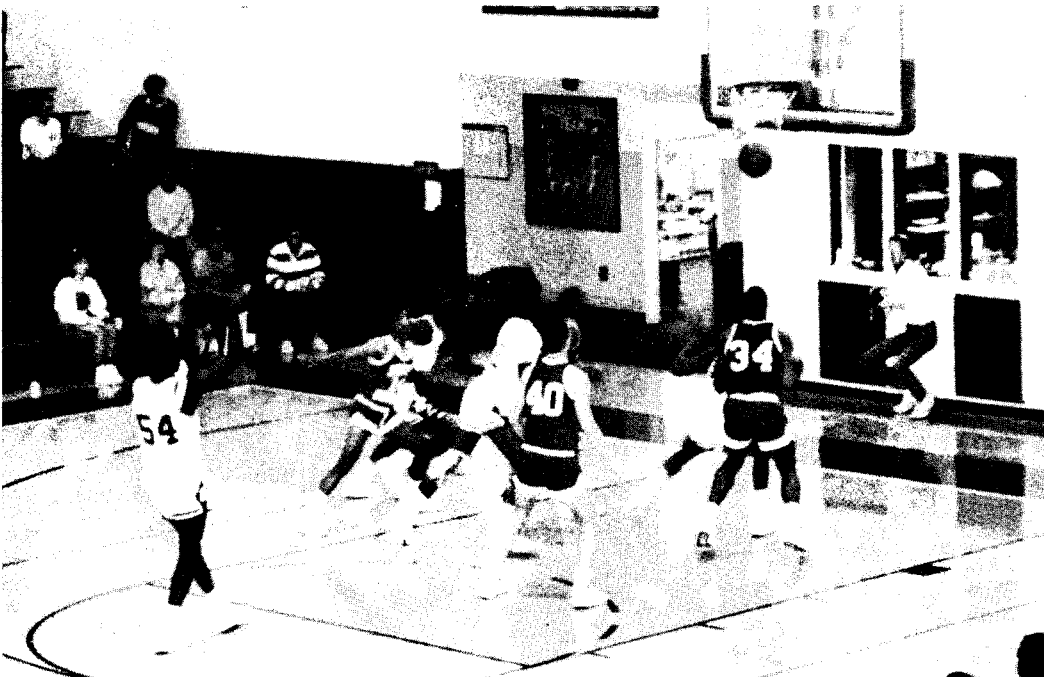

Junior Rodney Armstrong penetrates the North Georgia defense to put two on the board. Staff photo — Greg Braxton.

Senior Chris Carter puts the pressure a Kennesaw player. Staff photo — Greg Braxton.

North Georgia feels the pain of getting stung by Senior Bobby Hines as he makes the free throw shot. Staff photo — Greg Braxton.

CROWD CONTROL

The Southern Tech Hornets have many advantages on the court, but the biggest off-court advantage they possess crowd support. A great multitude of fans attend the games, and they get intense. Shouts of encouragement, dismay, and excitement echo inside the gym as the team plays the game. Halftime activities keep the crowd warmed up and prepare them for the second half. The players can sense the anticipation of the crowd and motivate themselves to perform to the best of their abilities. Many greek and non-greek organizations come together to express their support for the Running Hornets, standing in true brotherhood/sisterhood for the duration of the game. Keep up the support fans!

Right: The Hornet's mascot *Stinger* entertains the fans at halftime with crazy antics. **Below:** A standing crowd cheers the Hornets on to victory!

Left: Michelle Brinkley and Lisa Long watch intently to see if the shot scores. **Above:** David Key points with the coolness only a Hornet fan could possess.

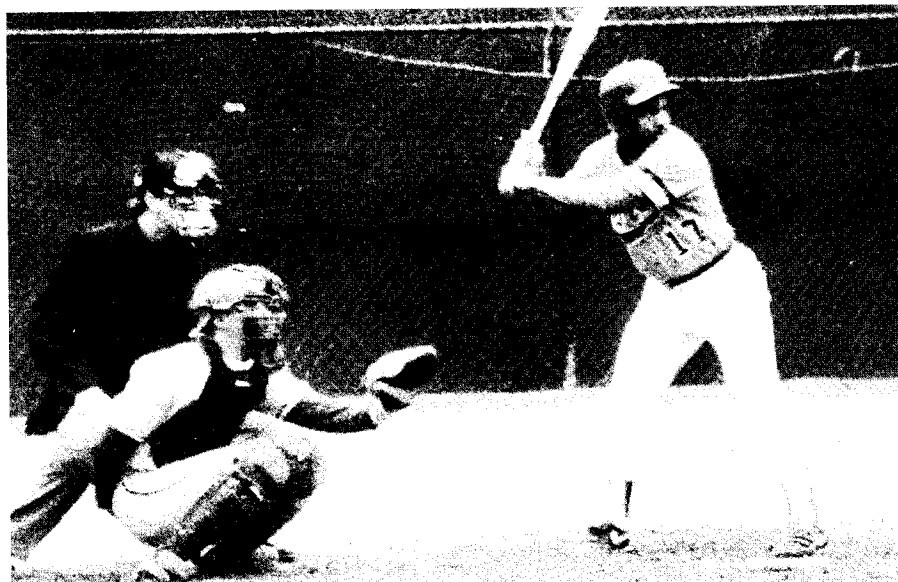

The 1987-88 Hornet basketball team: (L-R) Chris Carter, Darren Holley, Terry Givens, Rufus Kay, Head coach George Perides; Standing: Assistant coach Richard Stallworth, Craig Collard, Marx Favors, Rodney Armstrong, Ricky West, Bobby Hines, Kneeling: John Molden, Reagan Earney, John Bouleware, and Maurice Carlton.

INTRAMURAL SPORTS AND RECREATION

The 1987-88 year proved to be refreshingly varied in the intramural sports and recreation department. Activities included a fun-packed skiing trip to Steamboat Springs, Colorado, flag football, bowling, basketball, white water rafting, and even a basketball officials clinic! Other activities such as aerobics, billiards, volleyball, badminton, and a track club add to the variety of sports offered by the department. Karl Staber — the director — enjoys getting involved with the activities and gets as close to the

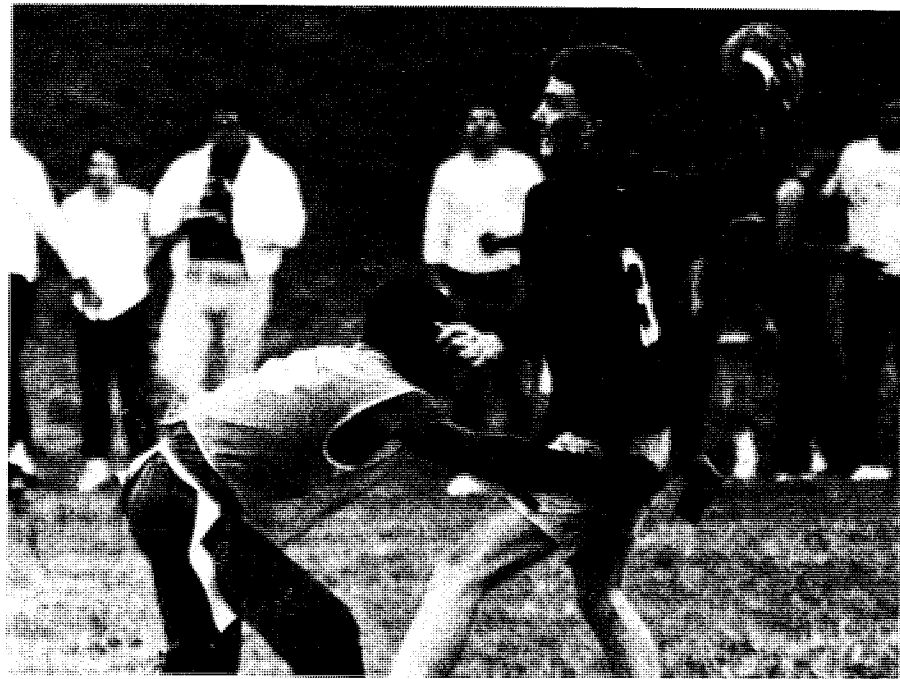

action as he can. At the end of the year, the department sponsors a pig roast and the champion students receive winning tee shirts and the respect of their peers. Many outdoor clubs and activities are offered by the department, and outdoor equipment such as camping materials are available for rent for students and faculty. Students are encouraged to take advantage of this department's resources, as intramural sports and recreation was designed for the student's leisure time activities.

Lane Woodall keeps the ball alive in volleyball and the LOG's own Paul Grady prepares to demolish the pins in intramural bowling.

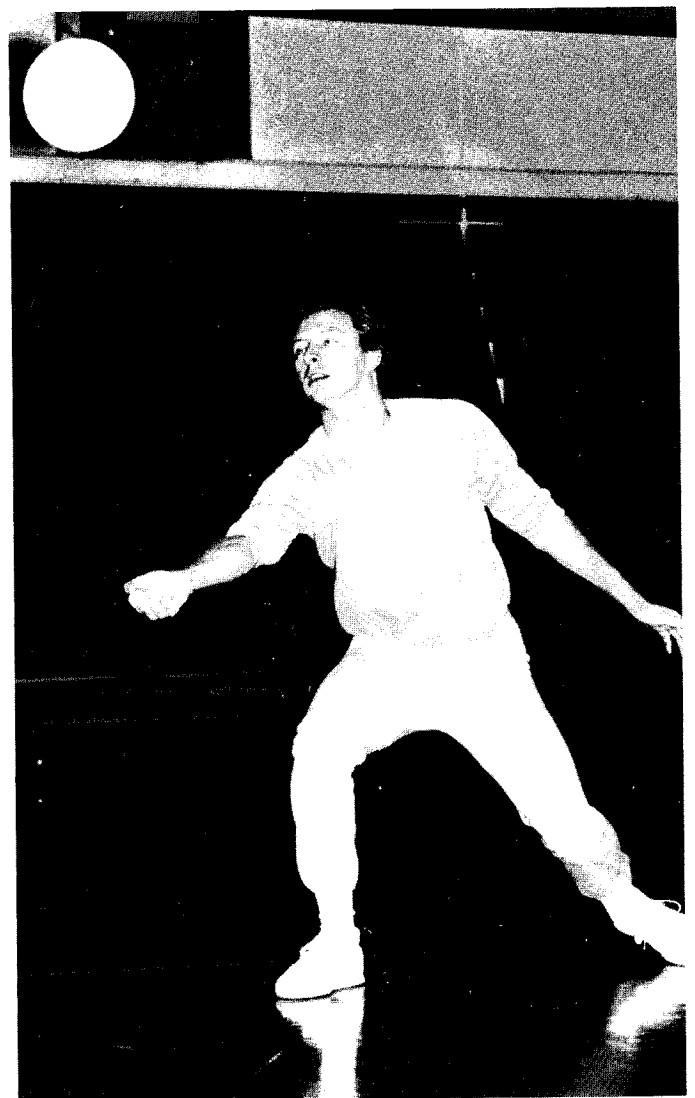

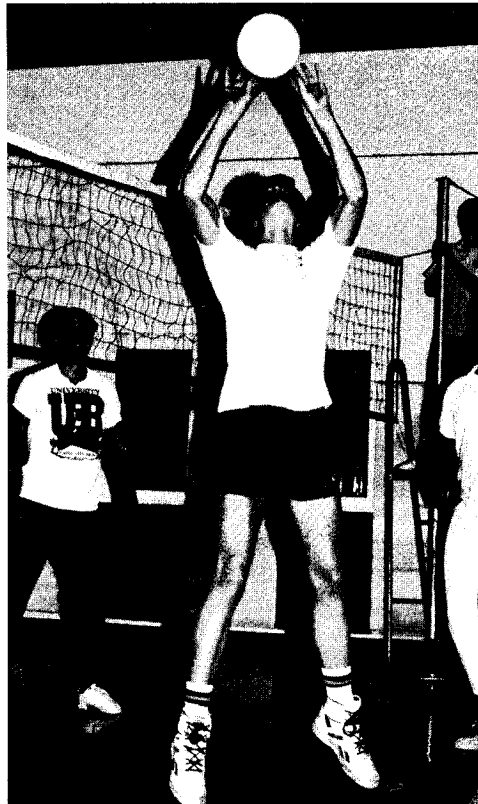

Karl Staber, the Director of Intramural Sports and Recreation, concentrates on returning the serve. **Above right:** Kim Ray and Stan Hughes enjoy the view as the lift takes them to the middle of the mountain in Steamboat Springs, Colorado. **Below left:** Ernie McGehee proudly shows his skiing gear on the slopes. **Below right:** Jason Ponder is pressured to get the pass off before he loses his flags.

TENNIS

The 1987-88 Tennis team consisted of Head coach Dr. Lee Tucker, Angel DeVelli, Budi Suryono, Fadi Layous, and Ken Croft. The Hornet tennis team upholds tough challenges to students, but proudly offers stiff competition to the challengers. Players must maintain a G.P.A. of 2.0 and have attended Southern Tech for at least one quarter.

BUILDING A STRONG TRADITION OF SPORTS EXCELLENCE.

FACULTY & ADMINISTRATION

ADMINISTRATION

A Strong Administration . . .

Southern Tech could not build a strong tradition without the leadership of a strong administration. Under the present administration, led by Dr. Cheshier, the school has experienced phenomenal growth in the last five years. As mentioned earlier in the book, evidence of this growth can be seen in the recent completion of the new academic building and the library addition. The administration has done an excellent job of lobbying for money for future projects on the SCT campus.

Dr. Cheshier has done a great deal to bring national and international recognition to Southern Tech. Early in the year, Dr. Cheshier took a trip to China in order that Southern Tech establish better ties with a growing economic power like China. As a result of Dr. Cheshier's visit to China, Southern Tech has been visited by several lecturers from China. These lecturers brought knowledge and a broader understanding of the world to SCT.

The LOG staff wants to thank the school's administration and Dr. Cheshier for their support and wish them continued success in leading Southern Tech.

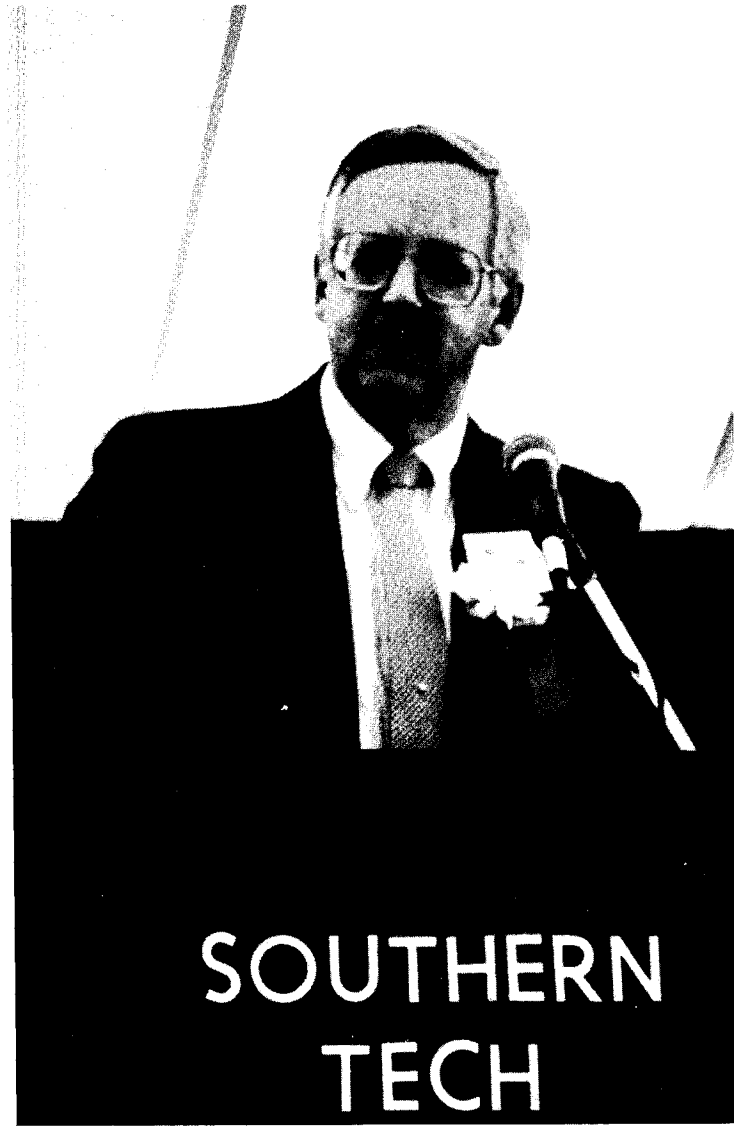

PRESIDENT
Dr. Stephen R. Cheshier

- 1) Dr. Cheshier speaking at the Tech Fest.
- 2) International students and Dr. Cheshier meet to discuss issues pertaining international students on SCT's campus.
- 3) Meeting with international students is one way in which Dr. Cheshier can assure that Southern Tech will one day become a truly internationally known college.
- 4) Dr. and Mrs. Cheshier pose for a picture with Rep. Joe Mack Wilson and Mrs. Al Burruss.

SCHOOL of ARTS & SCIENCES

For the most part, the 1987-88 academic year has been one of planning and getting to know one another as a school. Prior to this year, the departments comprising the Arts & Sciences had little opportunity to function as a unit and express its own unique character, separate of the role it played as a member of Southern Tech's technical community. But given the reorganization of the college into schools and the hope that new degree programs of an applied nature in the Arts & Sciences, in concert with Southern Tech's overall mission would be forthcoming, we set to plan for that eventuality.

PLANNING FOR THE FUTURE:

Our planning thus far has involved developing a draft of a mission statement for the School of Arts & Sciences that would serve as a model upon which to structure our service role as a school in terms of general education and the basic sciences, as well as our own undergraduate degree offerings which we hope to develop over the next two years. Present discussions have centered on developing a framework for degree programs in the Arts & Sciences that would be in concert with our college mission and which would successfully articulate the goals and unique character of the school as stated in its mission statement. Doing so, we believe would enable us to provide the Southern Tech student body not only with an educational program aimed at serving the "whole student" but also with a program that would allow for increased opportunities for out students attain a balanced college education during their undergraduate years.

**SCHOOL of
ARTS & SCIENCES
DEAN
Dr. E.A. VIZZINI**

DEVELOPMENTAL STUDIES

John T. Gordon

Barbara N. Anderson
Advising Center

Central to the mission of the Developmental Studies Department is a serious commitment to serve the whole student. Faculty in this department take this latter phrase to be much more than a stylish academic label. Thus, the department's commitment to the whole student means a commitment to personalizing instruction and to increasing student-teacher contact. We not only concern ourselves with correcting academic deficiencies but also with urging each student forward in the maturation process. The

department's courses in reading, English, physics, and mathematics are designed specifically to initiate students into the entry level courses at Southern Tech. Further, we provide Regents' Test preparation for all those who need it. The Developmental Studies laboratory—its materials and its tutors—serve the college at large on a walk-in and on a referral basis. We like to think of ourselves as a resource center to anybody at Southern Tech who is having a problem with mathematics or verbal skills.

HUMANITIES & SOCIAL STUDIES

Carol M. Barum
Assoc. Prof.

Virginia H. Hein
Assoc. Prof.

John S. Tumlin
Prof.

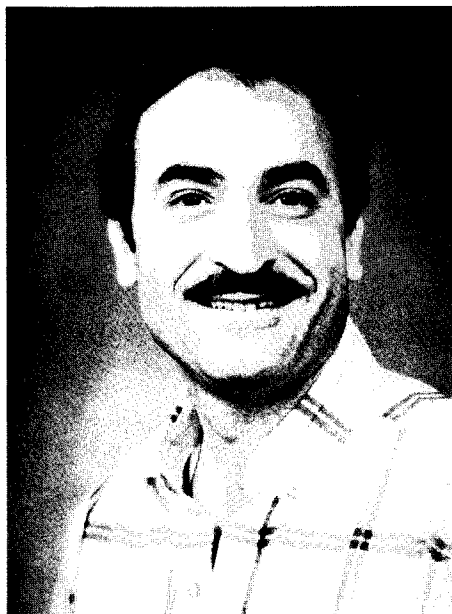

Robert C. Wess
Assoc. Prof.

Along with mathematics, Southern Tech, like any other college whether it is technical or arts and science based, has its share of general courses such as English and history courses to make up the students' curriculum. What makes our humanities & social studies department so special is that it offers such a wide range of English courses, for example the English courses range from English 101 to technical journalism to rhetorical strategies for technical writing, and the basic history courses such as western civilization to special topics in history. To make the English department stand out better than has before it offers a Master's degree in Technical Writing and Telecommunications. For those who have a resilient time with writing an essay, the English department has a writing center where the staff and faculty of the English department help those with their writing problems.

MATHEMATICS

Ahmad M. Abu Said
Assoc. Prof.

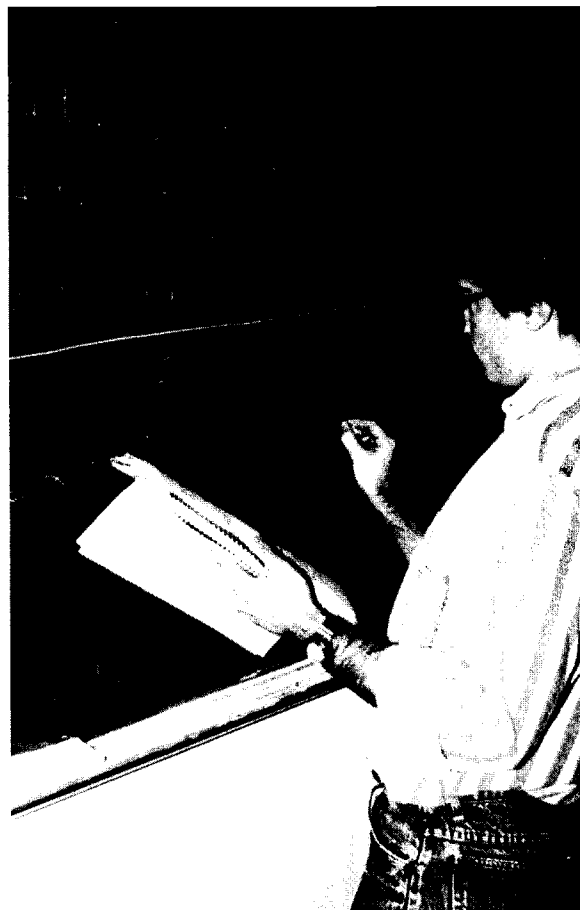

Kathleen A. Hall
Prof.

Edward L. Green
Asst. Prof.

Jack R. Pace
Asst. Prof.

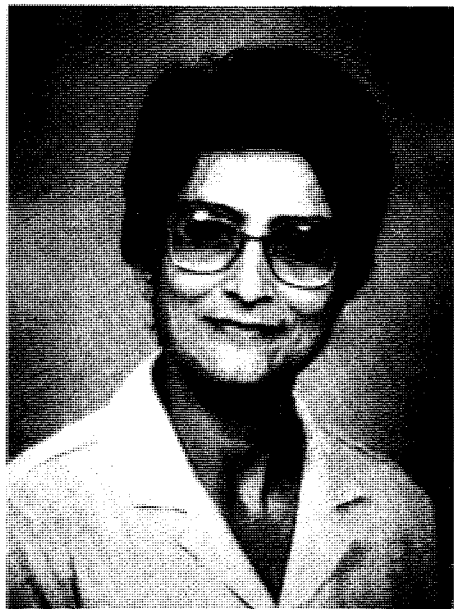

Southern Tech's math department offers many arithmetic courses ranging from basic college algebra to special topics—math. Each course is unique in its own right but also similar at the same time. Since Mathematics plays an important part in every technical student's curriculum, it is very important that each student understand what he or she is doing in each and every math course he or she is required to take and why he or she must take that particular course(s) no matter how demanding or frustrating it may appear to be. For this, the math department, like the English department, has developed math help session where tutors, free of charge, are available to help students with their problems concerning their math course(s). And for those who just adore math, the School of Arts & Sciences offers both a math minor or an Engineering math minor degrees. This is to enhance the students degree and help the students become more prepared for the real world.

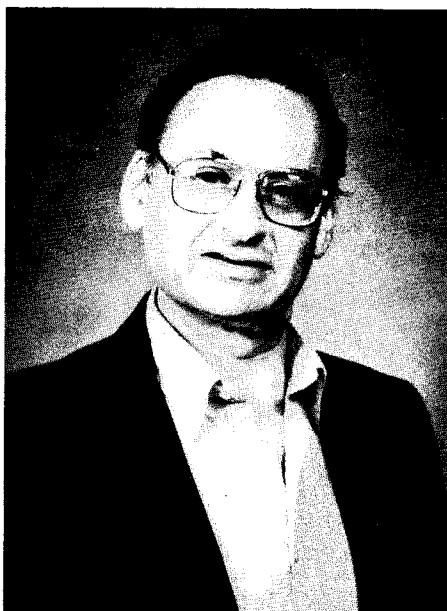

Jose L. Vinelli
Asst. Prof.

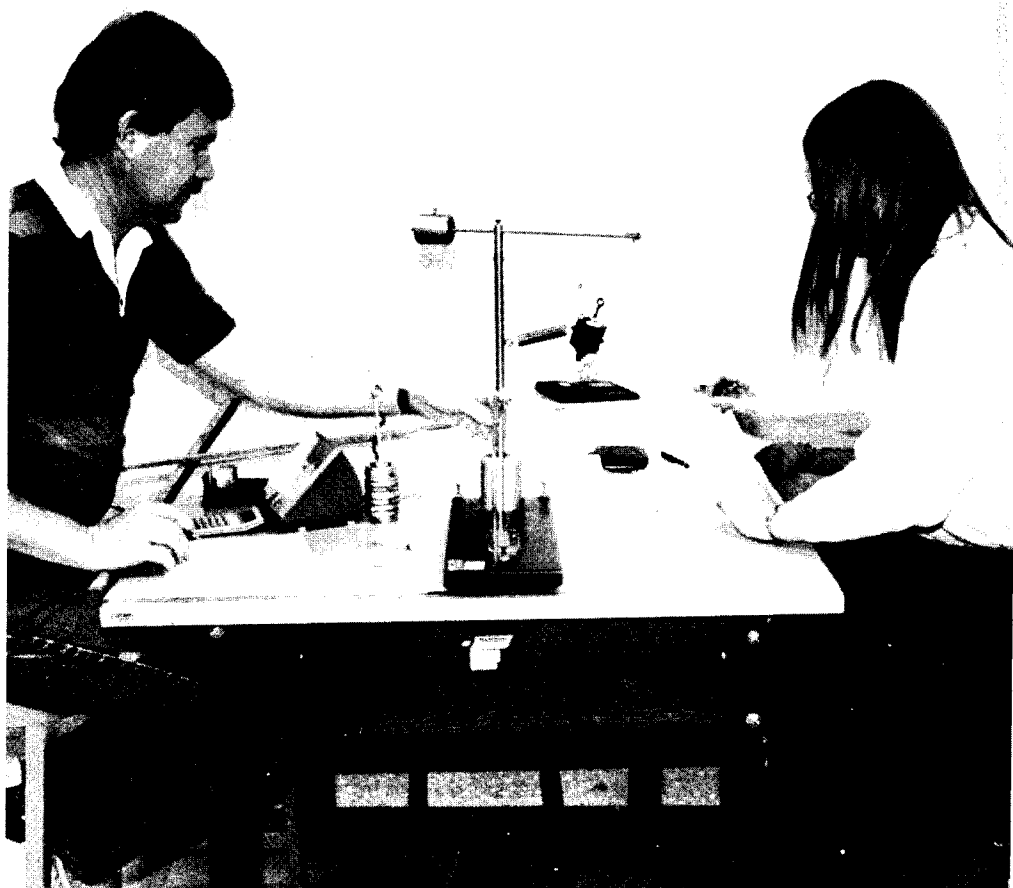

PHYSICS & CHEMISTRY

Jayanti Lahiri
Assoc. Prof.

Sidney Schuster
Asst. Prof.

The chemistry & physics department at Southern Tech is quite unique in its own dextrality too. Although the department does not offer any master's degrees or minors in chemistry but does offer technical physics options to add to the students' degree. Of course, not having any master's degrees in chemistry or physics programs does not mean that they're not on the way, in fact, they very well could be.

Recently, the physics department just added a few more phys-

ics courses involving optics where students can add a minor to their present degree plan. Southern Tech's physics department offers a wide range of courses; for instance, the department offers courses from basic mechanics to optics to descriptive astronomy. Also, along with the special optics option and the wide range of physics courses, Southern Tech's physics & chemistry department now has calculus based physics, which should make taking physics somewhat uncomplex.

SCHOOL OF TECHNOLOGY

The 1987-88 academic school year has been an exciting one for the School of Technology. Construction of the new 20,000 sq.ft. Clair Harris Apparel/Textile Center of Excellence is underway. This facility should be completed prior to Fall quarter 1988. It will house four new classrooms, two of which will be tiered and computer equipped. It will have a 100-seat seminar room/auditorium; and four major apparel/textile laboratories. In addition, it will house several faculty offices.

The School of Technology received the College's first major applied research grant as a subcontractor to the Georgia Tech Research Institute from the Department of Defense/Defense Logistics Agency of the federal government. Under this contract, the School of Technology will establish an Advanced Apparel Manufacturing Technology Demonstration Center for the purpose of demonstrating to apparel/textile industries in the southeast, advanced automated manufacturing techniques for military apparel. This contract is for three years at minimum and possibly longer. In addition, other supplemental

by the Accreditation Council for Construction Engineering. The first group of construction students will graduate in the Spring of 1989. After this occurs, the College will be in a position to pursue accreditation from the ACCE for this new program.

The Electrical & Computer Engineering Technology department continues to develop the curriculum and laboratories in the area of artificial intelligence. Optical scanning and decision making are current capabilities of this laboratory. Development of fiber-electro-optic coursework and laboratories is also well underway.

The methods of Work/Work Measurement Laboratory in the Industrial Engineering Technology department was completed during this academic year. This facility provides students with the ability to develop, review, and critique industrial work situations from video recordings.

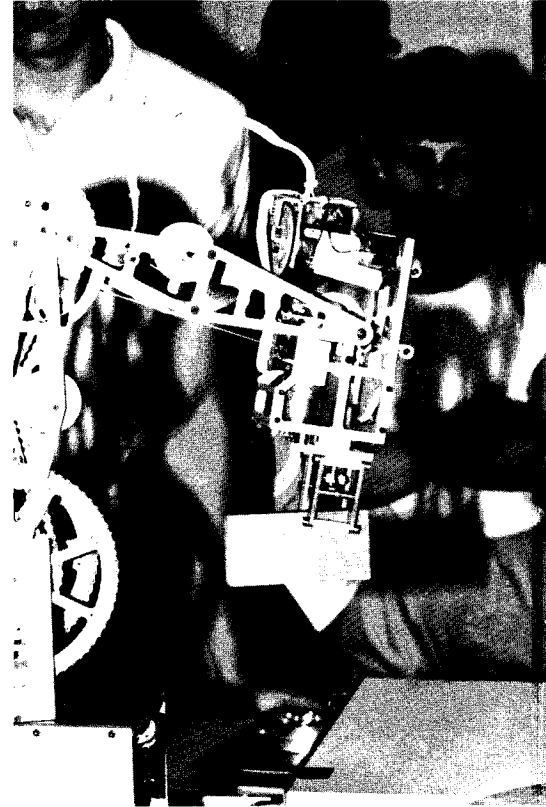

research work will likely be awarded. Students and faculty alike will benefit from this experience.

The new Automated Manufacturing Laboratory in the Mechanical Engineering Technology Department was completed during the past academic year. This facility provides students with computer-aided design — computer-aided manufacturing experiences.

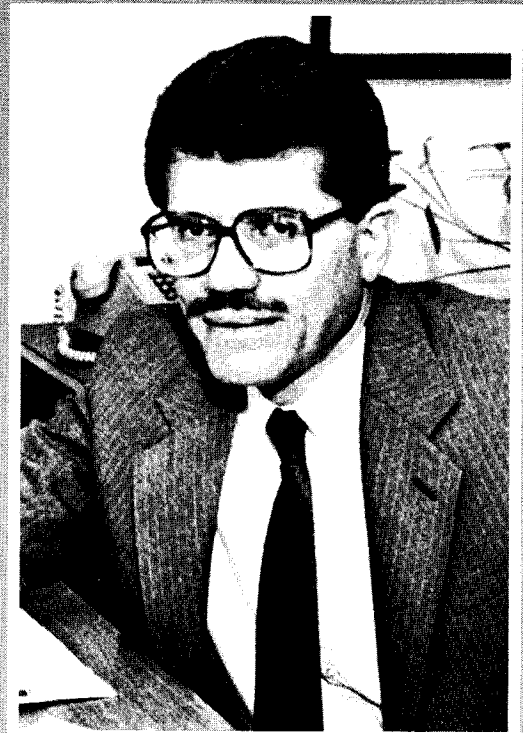

The new Civil Engineering Technology Surveying/Computer Laboratory was under development during the past academic year. This facility provides the total station surveying equipment capability to perform automated surveying and topographic and general arrangement plotting. In addition, the laboratory provides a focal point for CET students to perform computer solution to civil and structural design projects.

Further development of the Architectural Engineering Technology Computer-Aided Design and Drafting Laboratory took place during this past year. Diversified CADD equipment was procured for the laboratory.

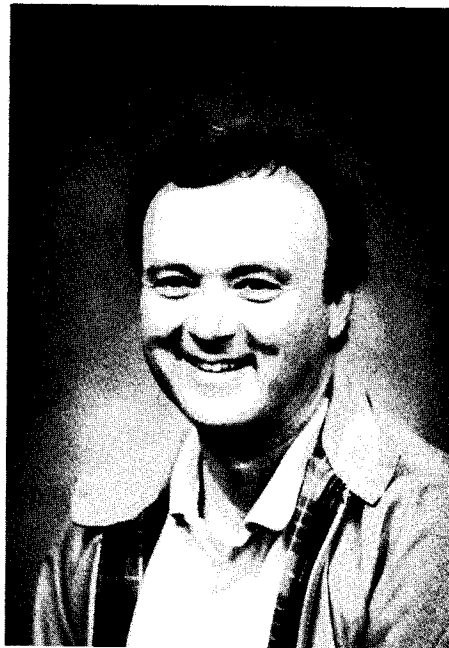

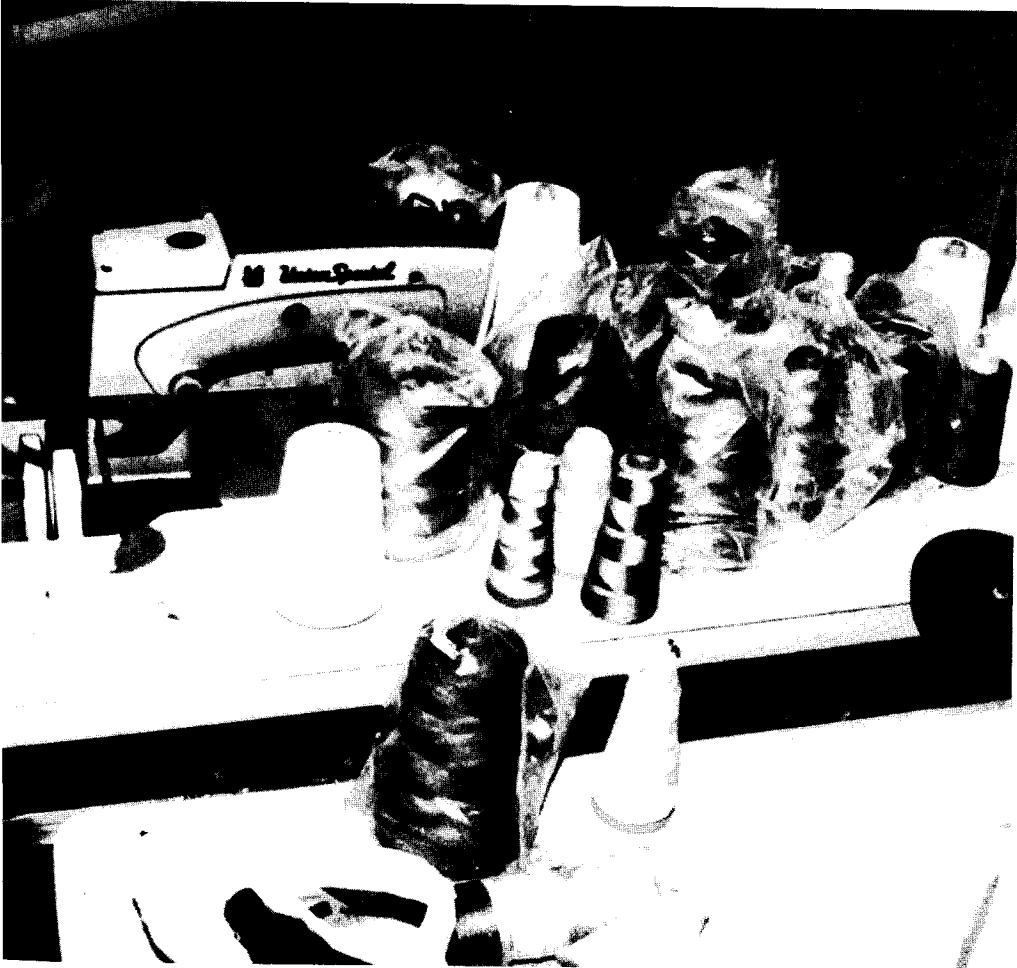

The Construction Administration program was awarded candidacy status

APPAREL & TEXTILE ENGINEERING

Larry Haddock
Dept. Head & Professor

Apparel Engineering

The apparel industry is one of the largest and most basic industries in the United States. It provides one of man's most basic and continuing needs — clothing.

From the receipt of raw materials to the shipment of the finished product, the apparel industry offers a creative and challenging career. Opportunities for qualified people to move eventually into executive-level positions are excellent.

Apparel Engineering Technol-

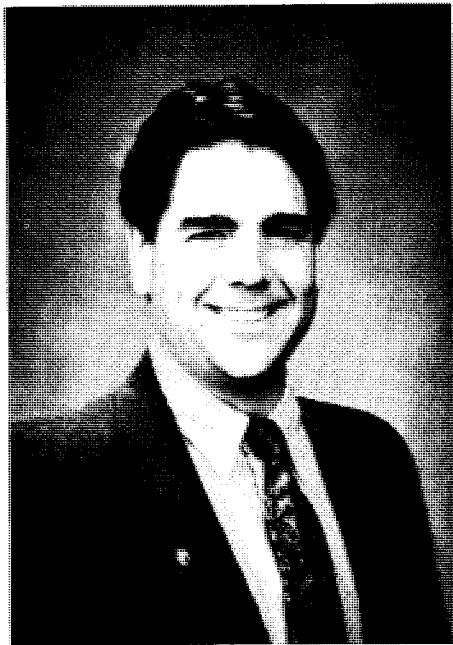

ogy is designed to train students in all major functional areas of apparel manufacturing.

Textile Engineering

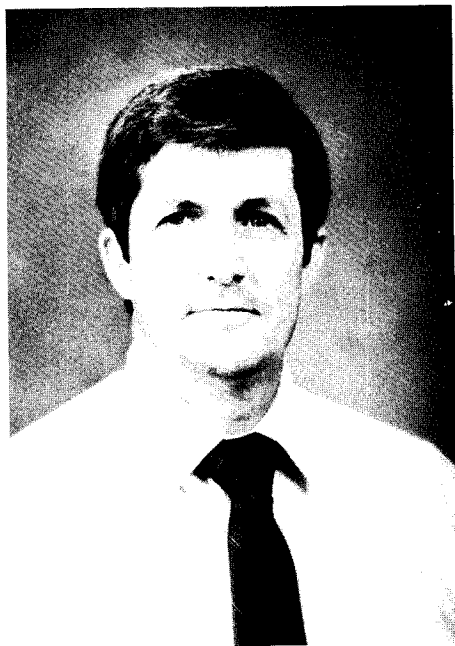

Students in Textile Engineering Technology are trained in the three areas common to all Southern Technical Institute technologists. These are communications, basic sciences, and supervision.

In the fourth area, Textiles, the student is given a broad program of courses in textile manufacturing.

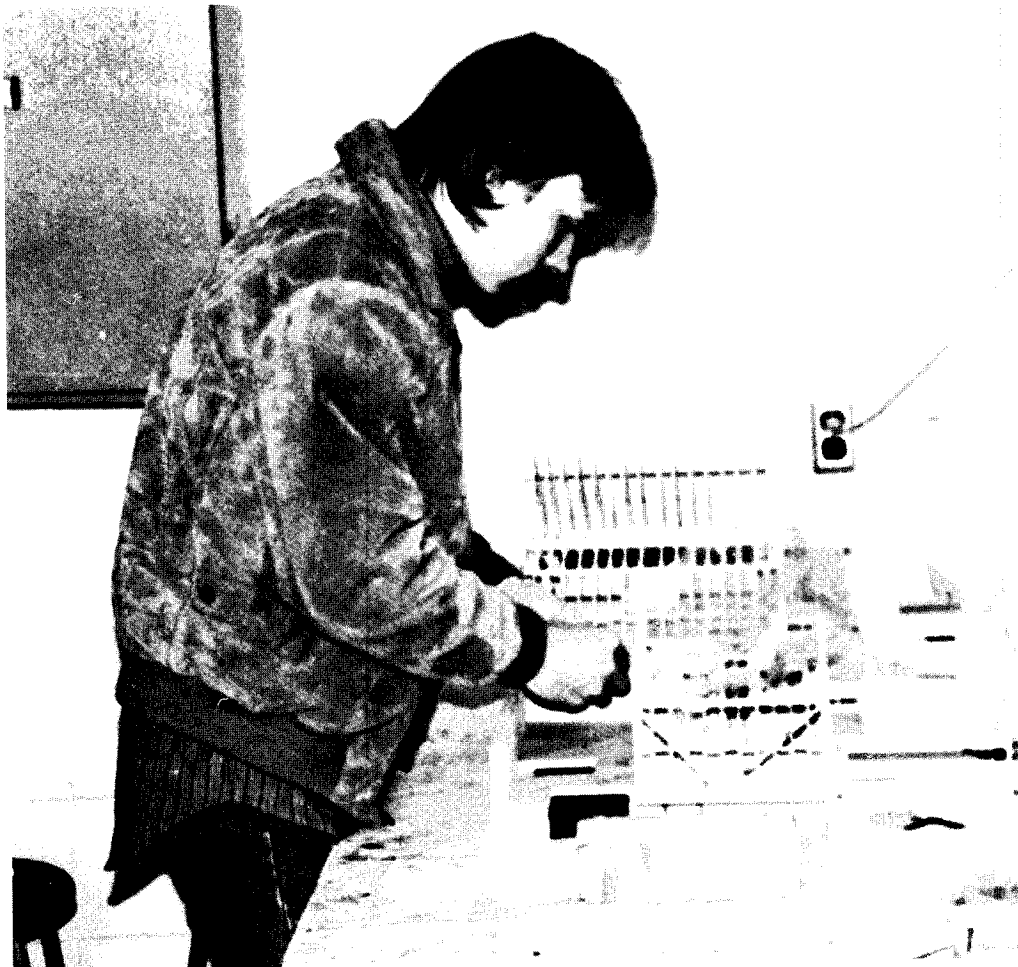

ARCHITECTURAL ENGINEERING

Paul Black
Asst. Prof.

James W.C. McKay
Prof.

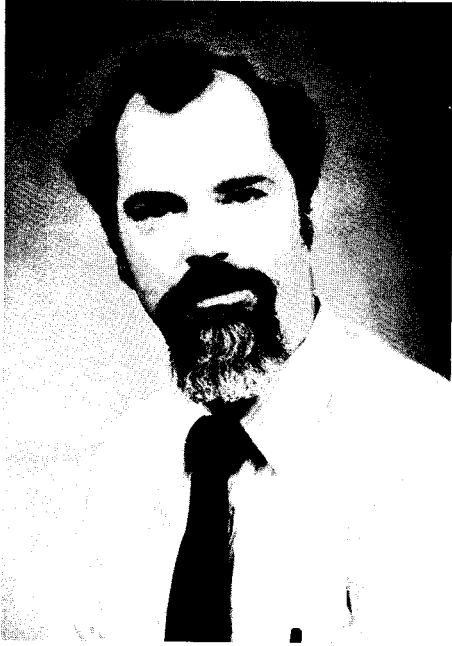

The primary objective of the Architectural Engineering associate degree program is to train students for useful careers in the housing and light construction industry. To this end, courses are offered in architectural drawing, wood construction, wood structures, dwelling house design, and estimating. A secondary objective is to prepare students for continued training in architectural construction by providing a thorough grounding in English, mathematics, and physics.

The bachelor degree program in Architectural Engineering Technology is concerned with the application of proven techniques as practiced by the architectural,

construction, and engineering professions. The objective is to train students in three major areas: architecture, structural design, and construction. The emphasis is on the development of working drawings, rather than design, in the area of architecture. The most common types of structural design and the methods used in practice to analyze a structure are taught. Training in building construction covers materials, methods, and estimating. The goal of the program is to make courses as practical as possible from the standpoint of current practice in architecture and construction.

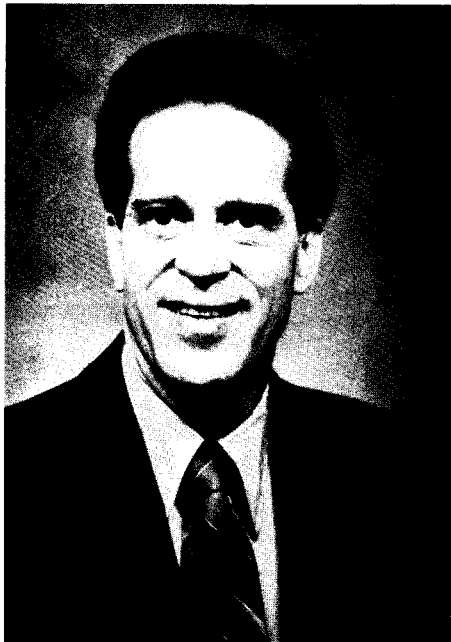

CIVIL ENGINEERING

David E. Hornback
Dept. Head & Assoc. Prof.

Robert L. Carter
Asst. Prof.

Hans A. Troemel
Asst. Prof.

Civil Engineering Technology is a broad field producing technologies with versatile backgrounds in a number of subject areas. Southern Tech graduates have the qualifications to enter careers in construction, structural design, surveying, transportation, hydraulics, site planning, and environmental technologies. By taking one of three prescribed sequences of courses at the bachelor degree level, a student can specialize in Surveying, Construction, or Structures. A student preferring the flexibility of a broad background can select major electives from several areas of Civil Engineering Technology without specialization. At the associate degree level, a student can either specialize in Surveying or choose the general Civil Engineering Technology degree.

Graduates specializing in Surveying are taught the principles and techniques of boundary, topographic, geodetic, route, and construction surveys. Students apply classroom knowledge in laboratory exercises through use of state-of-the-art surveying equipment including theodolites, electronic distance meters, electronic laser total stations, and optical alignment devices.

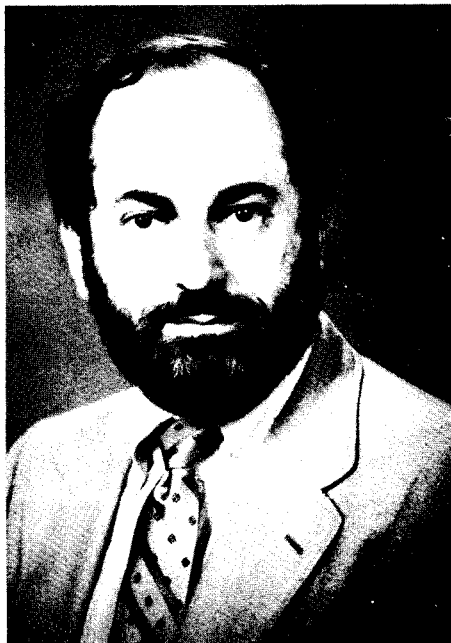

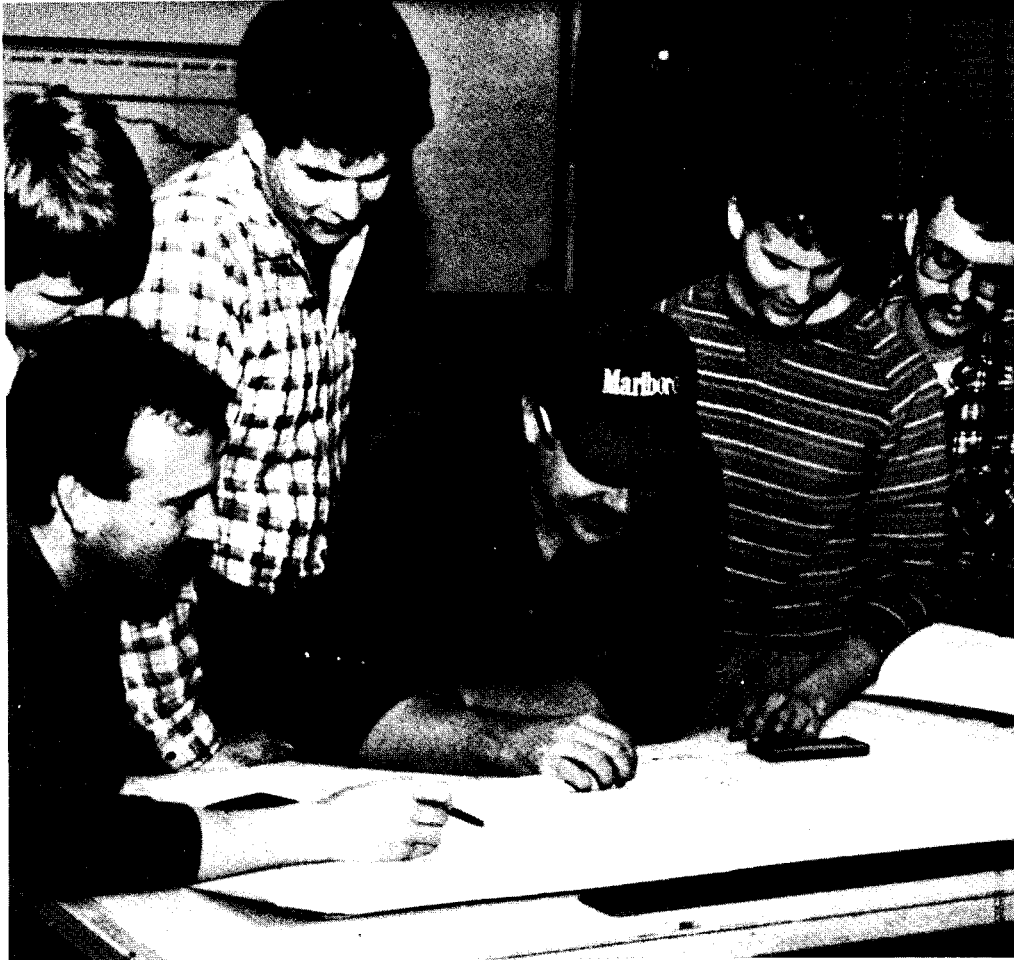

Graduates specializing in Structures are prepared for positions involving the design, plan preparation, construction, and inspection of modern buildings and bridges.

Graduates specializing in Construction will take coursework in construction methods, management, project planning, scheduling, estimating, and administration.

CONSTRUCTION ADMINISTRATION

George M. Wallace
Dept. Head & Assoc. Prof.

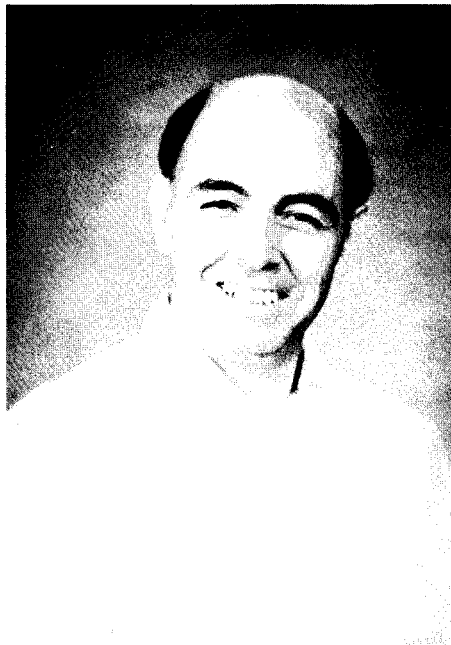

Allan J. Hall
Asst. Prof.

Construction education is defined by the Associated Schools of Construction as a "... discipline which is designed to instill in future constructors the skills, knowledge and understanding necessary to make the critical decisions which will guide the production and management processes of the largest industry in the architecture are combined with specialized courses in construction. Completion of this

curriculum prepares the constructor to work with other specialists in the building arena in managing and creating the human environment. Graduates in the field will help to solve the complex technical and managerial problems in the building process, and can look forward to challenging careers which provide a full range of outlets for their creative efforts."

ELECTRICAL

Charles L. Bachman
Assoc. Prof.

Robert W. Robinson
Asst. Prof.

Julian A. Wilson
Prof.

Electrical Engineering Technology is a branch of engineering education that emphasized the practical aspects of engineering rather than abstract concepts or theories. It is a blend of the application of science, engineering knowledge, and technical skills used in support of engineering activities.

Electronics is a relatively new science, but it has given birth to an industrial giant. Computers, medical electronics, automation, communications, instrumentation, radar, and robotics are but a few fields based on electronics.

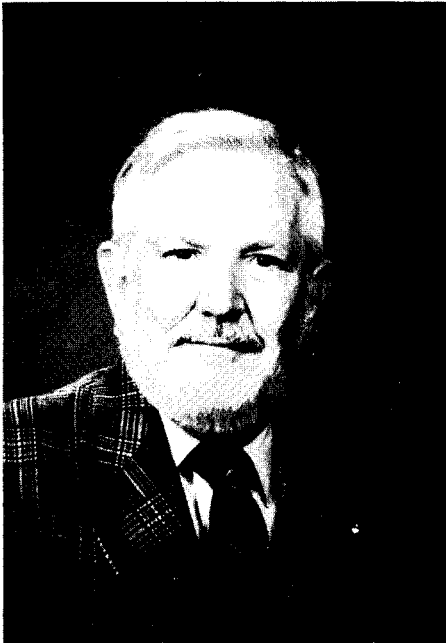

This demand has created a

need for electrical engineering technicians and technologists in all phases of development, design, production, maintenance, and troubleshooting. This need is being met by graduates of the associate and bachelor degree programs in electrical engineering technology.

The following options are available at the bachelor degree level:

- 1. Communications.*
- 2. Microprocessor Control and Robotics*
- 3. Power Generation and Distribution*
- 4. General*

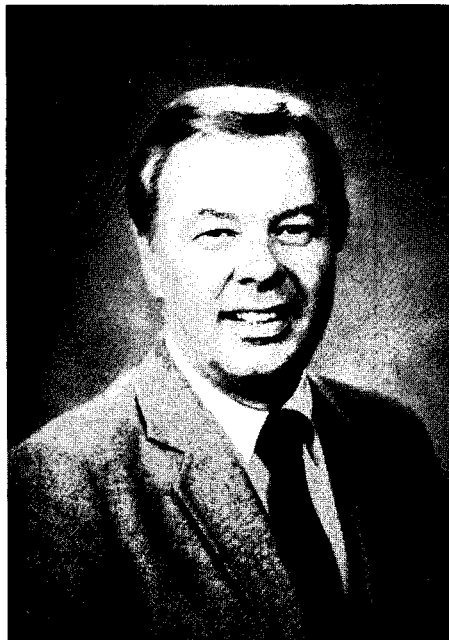

INDUSTRIAL ENGINEERING

James W. Bannerman
Prof.

Richard W. McGuire
Assoc. Prof.

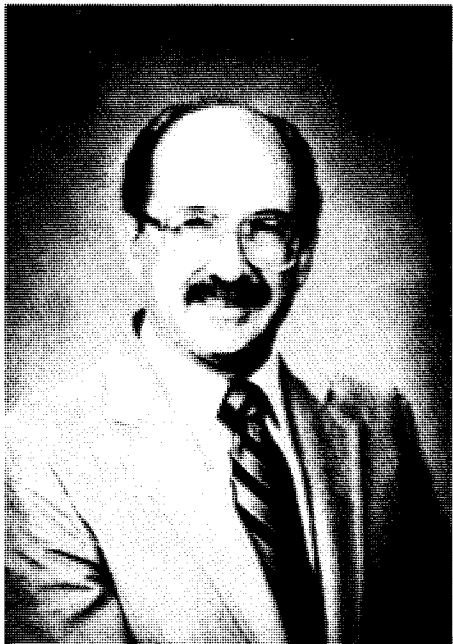

Charles A. Wimberly
Prof.

The field of Industrial Engineering Technology offers the student a challenging career in business, industry, or government. Industrial Engineering Technologists, deal primarily with the efficient management of money, materials, and manpower in a business environment. They solve problems dealing with the location and layout of plant facilities, materials handling, work-station design, wage and salary payment plans, quality control, personnel selection and placement, occupational safety and health, and economic cost studies. To enable the graduate to solve such a wide variety of management problems, the curriculum of study will be broad and interesting.

MECHANICAL ENGINEERING

Julian R. Lee
Assoc. Prof.

William D. Rezak
Dean and Assoc. Prof.

Phillip C. Rymers
Assoc. Prof.

Mechanical Engineering Technology is concerned with the practical aspects of the following: generation, transmission, and applications of heat and other mechanical forms of energy; the design of tools and machines; and manufacturing processes

and techniques. The Mechanical Engineering Technology curriculum combines basic sciences and mathematics with engineering technology to prepare the graduate to meet the needs of today's and tomorrow's technological society.

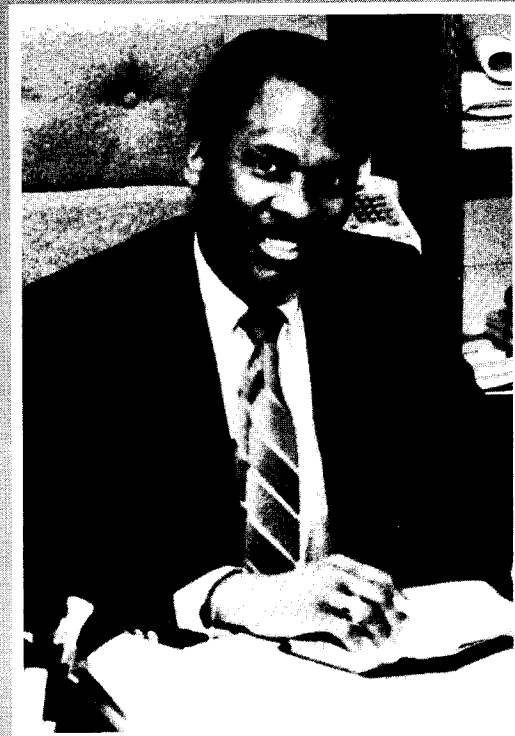

SCHOOL OF MANAGEMENT

Southern Tech's Master of Science in Technical Management is the only program of its kind in the South, and one of only a few in the nation. While traditional Master of Business Administration (MBA) programs require in-depth exposure to several functional areas within the business administration field (such as accounting, management, finance, marketing, production or manufacturing and information systems), the MSTM program focuses mainly on one area — management.

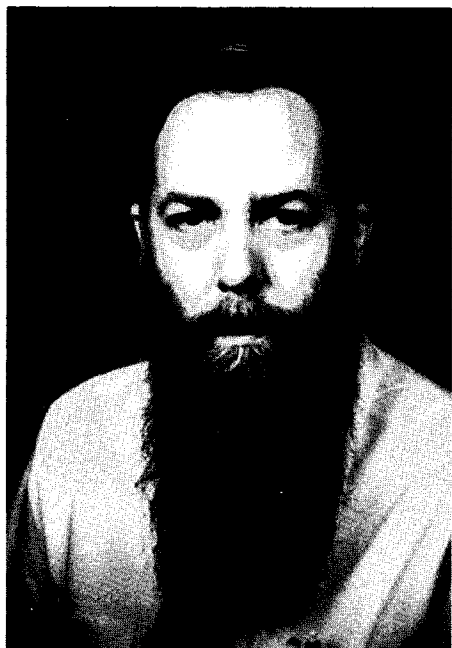

The program is very efficient for people whose primary concern is learning to manage. It centers on the elements of management within a technical environment, with emphasis on problem-solving, decision-making and human relations.

**SCHOOL of
MANAGEMENT
DEAN
DR. ROBERT J.
YANCEY**

COMPUTER & INFORMATION SYSTEMS

Robert A. Harbort
Dept. Head & Asst. Prof.

The Computer Information Systems program is concerned with the practical aspects of developing and using computer systems in industry and business. Computer systems are used in many application areas, including information management, engineering and scientific support, and process control. They may be designed to support one user or many users and may consist of one computer or "networks" of interconnected computers.

The bachelor degree program in Computer Information Systems emphasizes the entire scope of computer systems, ranging from basis hardware principles through the systems and application software levels to the use and management of such systems. The pro-

gram offers three options: Artificial Intelligence, Information Systems and Technical Analysis.

Artificial Intelligence Option

The Artificial Intelligence Option emphasizes advanced coursework in mathematics and computer systems covering the principles and applications of Artificial Intelligence (AI). Areas of study include AL languages, applications generation, several expert systems applications areas, and a senior project course. The curriculum emphasizes the practical aspects of AI so that graduates will be prepared to deal with the management and application of AI and expert systems in business and industrial settings.

David F. Franklin
Asst. Prof.

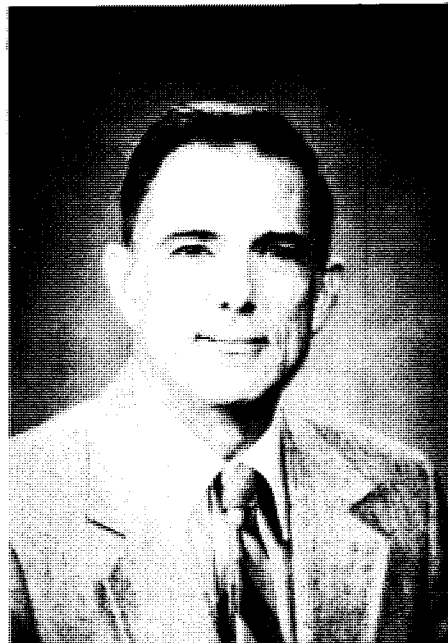

Fred D. Harstfield
Asst. Prof.

Steven L. Morrisett
Asst. Prof.

Rebecca Rutherford
Asst. Prof.

Ronald N. Schroeder
Asst. Prof.

Information Systems Option

In addition to providing a solid background in computer hardware concepts, programming, and systems design, the Information Systems Option provides a concentrated study of the business and managerial aspects of information processing through courses in management information systems, accounting, quantitative management principles, project planning and control, and database systems. The graduate of this option should be equipped to pursue a career in systems analysis and design, programming, data processing operations management, or sales.

Technical Analysis Option

The Technical Analysis Option emphasizes the more technical aspects of the computer system

itself, its operating system and related system software, its performance under the demands imposed by various application environments, and its use in the analysis of technical and scientific data. Comprehensive course work is provided in computer hardware and software concepts, system design, and programming. In addition, advanced courses are provided in operating systems, real time processing, and computer graphics as well as in mathematics, numerical methods, and simulation and modeling. The graduates of this option should be equipped to pursue a career in such areas as computer operating systems, real time process control, engineering and scientific computation, or manufacturing support.

ORGANIZATIONS/GREEKS

DELTA SIGMA THETA

Delta Sigma Theta Sorority, Inc. is a national Greek letter society with chapters reaching across the United States, West Germany, and the republics of Haiti and Liberia.

Delta was founded in 1913 at Howard University in Washington D.C., and since then has grown into an organization with 725 chapters and over 125,000 members.

Pi Nu chapter of Delta Sigma Theta was chartered on Southern Tech's campus in the spring of 1987. Delta Sigma Theta is a public service organization, which strives to promote sisterhood, academic excellence, and high moral standards among it's members.

1) Members of Delta Sigma Theta meet with their faculty advisor Mary Ellen McGee. 2) Shiela Jackson is the current president of Southern Tech's chapter of Delta Sigma Theta.

GAMMA PHI BETA

GAMMA PHI BETA

Gamma Phi Beta was the first sorority on the campus of Southern Tech. We here chartered on January 26, 1980 as the Delta Omicron Chapter of Gamma Phi Beta.

Colors: Light brown & dark brown

Flower: Pink carnation

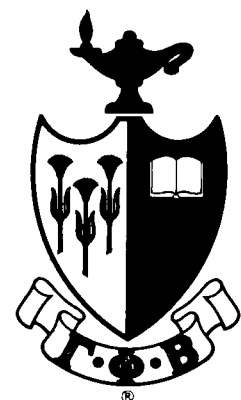

Local mascot: Unicorn

Open Mascot: Founded upon a rock

Objective: To promote the highest of womanhood.

Since the founding, Gamma Phi Beta members have had a commitment to lifetime membership and to the selection of members willing to assume leadership responsibility in society. Gamma Phi Beta focuses on individual growth, lifelong education, philanthropic service, the inspiration provided by our ritual and social enrichment.

Gamma Phi Beta is one of the oldest women's organizations in the United States, founded November 11, 1874 at Syracuse University, and one of the seven founders of the National Panhellenic Conference. The word "Sorority" was coined for Gamma Phi Beta.

ALPHA DELTA PI

A "Diamond Four-Point Chapter"

A coveted among Alpha Delta Pi chapters is to be designated a "Diamond Four-Point Chapter," which means that the chapter excels in scholarships, leadership, talent, and participation on its campus. After only four short years as sorority at Southern Tech, ETA DELTA chapter received this award at the 1987 national convention. The chapter continues to work hard and to participate in Southern Tech activities. Way to go, A DEE PI! Remember . . . "We live for each other!"

PANHELLENIC COUNCIL

The Southern Tech Panhellenic Council is composed of representatives from the three sororities on campus, which are Gamma Phi Beta, Alpha Delta Pi, and Delta Sigma Theta. The officers and delegates of the council work to build strong relations between the group members. The council also strives to encourage good scholarships and to love the college and the community.

LAMBDA CHI ALPHA

... There is a Difference

This has been a great year for Lambda Chi Alpha here at Southern Tech. We greatly increased the size of our chapter. A great fall rush aided us in our growth. Unfortunately, with the arrival of new people, comes the graduation of close friends. Saying goodbye is always hard.

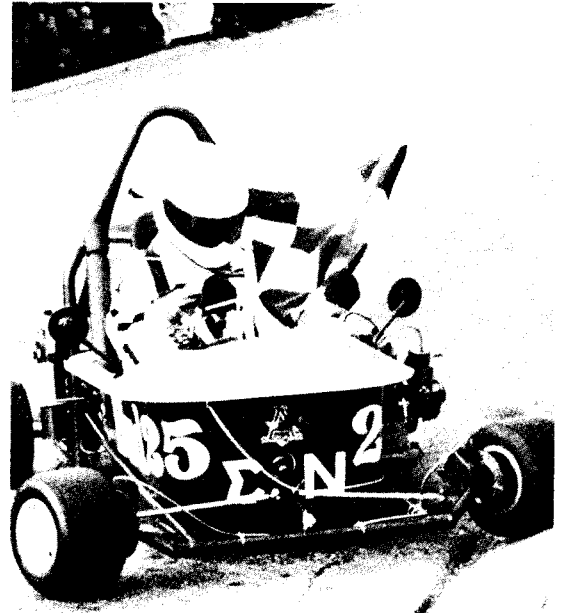

We upheld our tradition in football by winning the championship again. Lets try our best and capture it again next year. The future is what Lambda Chi Alpha looks to. The high goals that we set for ourselves is what makes us much better. Each step we take towards the future is one step closer to our goals.

Not Pictured: Rene Smith, Rick Saurders, Richard Isabell, Tony Brown, Darrell Johnson, Frank Cloud, John Douglas, Jeff Dewberry, Ken Matheson.

SIGMA NU

Sigma Nu, a well established fraternity here at Southern Tech, is known within the collegiate community as a leader. The goal of our fraternity is to make better men through our ideals of Love, Truth, and Honor. Being a brother of Sigma Nu means that the college experience may be just a little more interesting — and much more valuable.

SIGMA PHI EPSILON

A Tradition Built on Virtue . . .

The Georgia ETA chapter of Sigma Phi Epsilon Fraternity was founded on February 14, 1981 at Southern Tech. Our Fraternity is based on three cardinal principals: Virtue, Diligence, and Brotherly Love. Each quarter Sigma Phi Epsilon has many fun filled activities. We start Fall quarter with rush, move right into Prater's Mill Country Fair, Halloween Party, Fall Formal, Thanksgiving Dinner, and finish up with our Christmas party. Winter quarter, we celebrate our founding, go to Regionals, and go skiing. Spring quarter, we are back at Prater's Mill Country Fair and planning our other spring time activities. Summer quarter, Panama City is still recovering from our annual visit and we are off to our Summer Retreat to plan our next year. In addition to having all this fun, we maintain the highest grade point average on campus. Sigma Phi Epsilon is one of the youngest fraternities at Southern Tech and the fastest growing. In much the same way, Sigma Phi Epsilon has grown nationally to be the best fraternity in the world, we have grown at Southern Tech to be the best on campus. The brothers of Sigma Phi Epsilon are involved in many other activities at Southern Tech—many in leadership positions. We are leaders on campus. A leader within our own national fraternity as demonstrated by our being chosen to host the 1987 Regional Leadership Academy in Atlanta. Sigma Phi Epsilon offers a chance to realize your full potential.

PI KAPPA PHI P.U.S.H., OUR PHILANTHROPY

The creation of Pi Kappa Phi was for the sole consideration of a perpetuation of friendship. This fraternity was founded by three men on December 10, 1907 at the College of Charleston in North Carolina. These three men were Lawrence Harry Mixson, Simon Fogerty Jr., and Andrew Alexander Kroeg, Jr. The purpose of the fraternity is to create an environment for educational, social, and personal growth. Our local chapter was founded on January 31, 1981. Pi Kappa Phi created its own philanthropy, P.U.S.H., which stands for Play Units for the Severely Handicapped. Our local chapter donates towards P.U.S.H. every year. We also donate towards the Diabetes Foundation in hope to find a cure.

The functions of the future are hard to place dates upon; however, there are several functions that are standards and dates for them always come later. The winter quarter is the host of our ski trip. The winter quarter also hosts our chapters' Founders' Day party. Our formal, the Rose Ball, comes in May during spring quarter. Retreats to Clayton and Alabama usually come in the spring and summer. The fall represents the beginning and we celebrate the beginning of our fraternity. The Founder's Day banquet is a personal thing for the brothers. Pi Kappa Phi represents so much to so many different people, to place words on its meaning is difficult to say the least. Pi Kappa Phi stands for the things that words can not describe.

L to R: 1st Row: Ricky Gibbs, Tommy Parker, Kim Ray, Lawrence Vandiver, George Reese, Tim Jackson. 2nd Row: Will Webb, Ed Smith, Ron Conroy, Ron Hughes. 3rd Row: Rucker Blakely, Mike Piccne, Chris Morgan, Michelle Cooper, Laura Stephens, Paul Raniere. 4th Row: Randy Wheeler, David Foster, Kevin Stacey, Mark Coffin, Buddy Sawyer, Kent Buffington, Thomas Morris, Richard Blumgren, Pam Williams, Michele Jones, Joel Preston, Eryk Fisher. 5th Row: Steve Barrett, Doug Liscio, Hector Gonzales, Jason Sumner, Steve Brown, Kim Shore. 6th Row: Rhonda Robinson, Scott Carter, Jeff Stowe, Randy Hartley.

TAU KAPPA EPSILON

A Heritage to be Proud of . . .

The men of the chapter of TKE at Southern Tech are very proud of their heritage. The TKE chapter has been at Southern Tech for fifteen years and has played a major role in campus activities.

1987-88 school year was a very busy school year for TKE. TKE's strive for excellence which shows in everything the chapter has done this year and continues to do throughout the year.

The chapter donated to many charities including Cystic Fibrosis and the American Red Cross. TKE received many new brothers this school year. These new brothers have learned the ideals of the largest fraternity in the world—Love, Charity, and Esteem. In the years to come, TKE promises to be the best fraternity on campus.

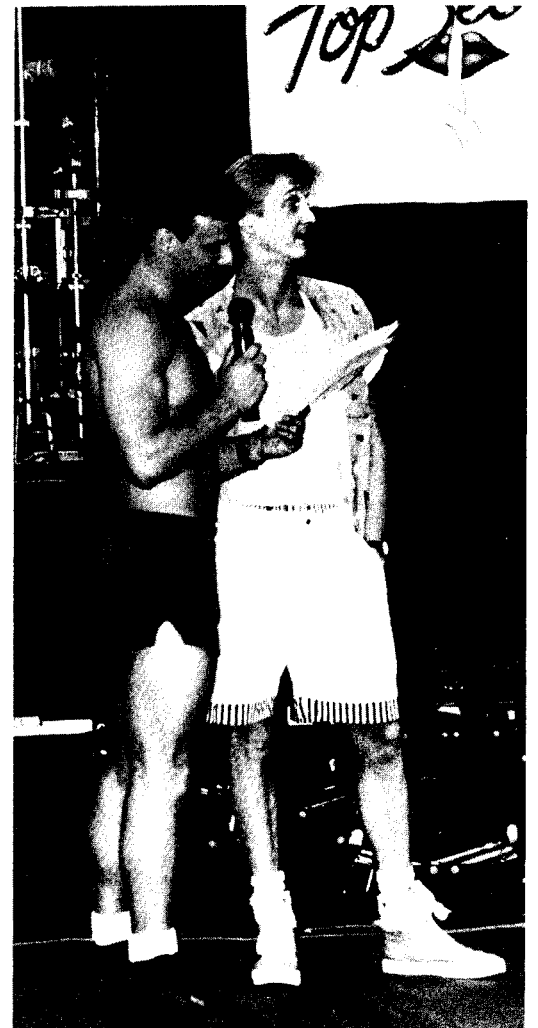

L to R: 1st Row: Dan Crowley, Freddie Harris, Jeff Harper, Eric Ewald, Jason Horne, Ken Upchurch. 2nd Row: Stacey Easler, Keith Milford, Jo Lynn Sams, Georgianna Conger, Julie Berger, Courtney Hall, Kim Lewis, Garnett Long, Lynn Fielder, Kathy Dixon Bell. 3rd Row: Chris Nichols, David Fergeruson, Chris Kittrell, A.J. Governale, Brian Clarke, Shane Hyllenberg, Tim Dwyer, Patrick Eiland, Cliff Leatherwood, Steve Reynolds, Dennis Pigg, Tom Tapp, Ken Boggs, Scott Chatfield, Lamar Owen. 4th Row: Paul Wilson, Scott Whittenore, Bart Wills, Chris Lindsay, Brad Brannon, Mike Durand, Scott Robinson, Steve Davis, Jeff Causey, Terry Blount, Zack Amacher.

IFC

Inter-Fraternal Council

The IFC is an organization set up of representatives from each fraternity and sorority on campus. The council acts as an organizing and service group for the Greek organizations on campus. We also help organize and sponsor Greek events such as Greek Week and organizational fairs.

L to R: 1st Row: Brad Lemming, Randy Hartley, Tim Jackson, Mike Gambaccini, Chris Thompson, Robin Alworth. 2nd Row: Paul Grady, Scott Slay, Mike Nixon, Eric Spraut, Keith Milford, Matt Baldree, Jim Hall, Scott Crider, Rene Smith. 3rd Row: Chip Morgan, John Fisher, Lamar Bevil, Jimmie Richie, Bob Jansen, Terry Blount, Alan Gehringer

ALPHA PHI ALPHA

WE'RE ALWAYS THERE TO TAKE THE INITIATIVE.

Alpha Phi Alpha Fraternity was founded in 1906 at Cornell University. It is the first of all black Greek organizations and has a total membership of more than 125,000 with chapters throughout the world. It's membership includes some of the most outstanding men to date — Dr. Martin Luther King, Atlanta Mayor, Andrew Young just to name a few. Make no mistake — whenever leadership is needed, an Alpha Phi Alpha man is always there to take the initiative.

The Nu Mu chapter was founded at Southern Tech in 1977 and later included Ga. Tech in its chapter base in 1978. The men of the Nu Mu chapter strive to uphold the aims of the fraternity throughout the year and stress excellence in all their endeavors.

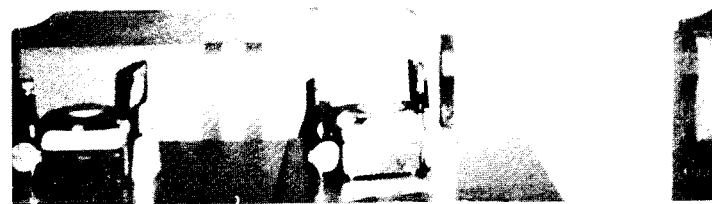

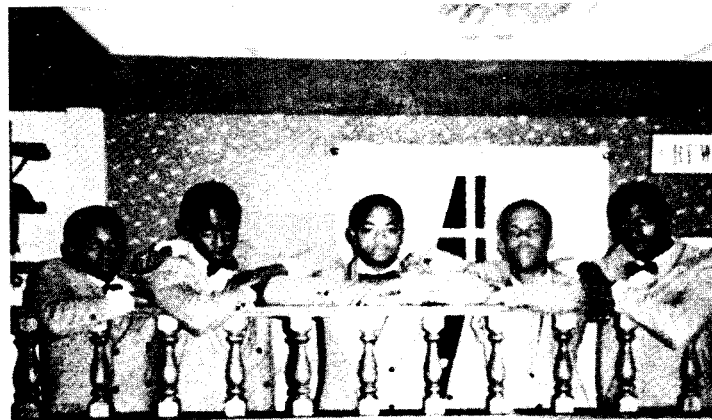

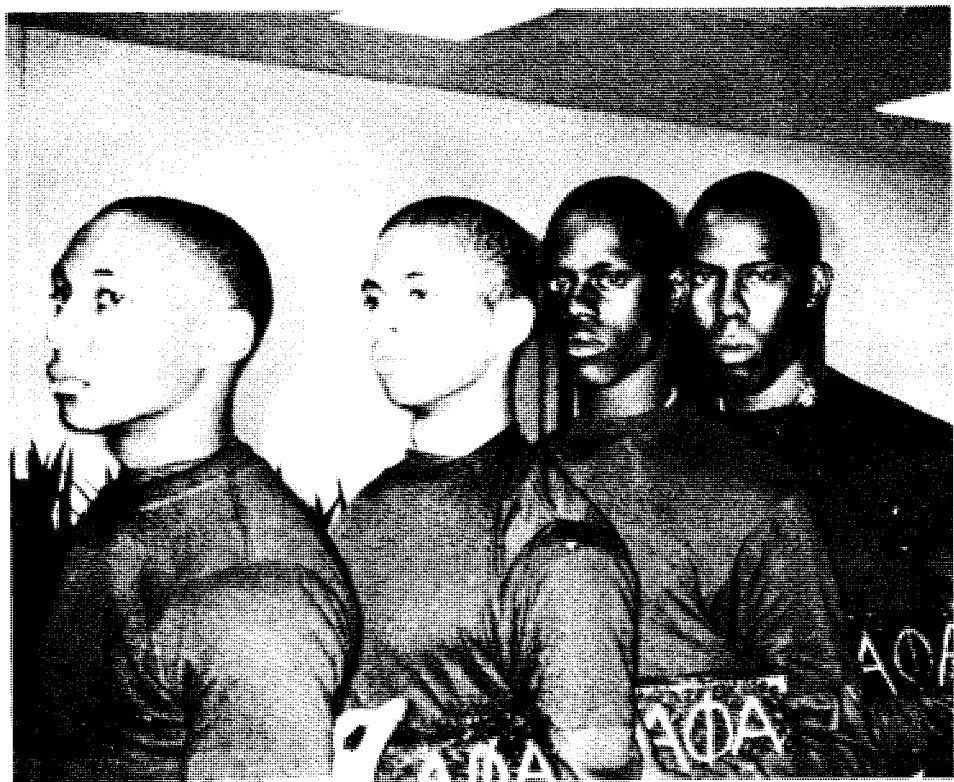

Throughout the year, the men of the Nu Mu chapter continue to shine brightly the light of Alpha Phi Al-

pha in service to the community. Some campus activities during the school year include the annual Black and Gold ball to crown the queen, chosen in a pageant where young women of Ga. Tech or Southern Tech compete for the title. Nu Mu chapter sponsors an annual Black Awareness Greek Week show, holds various parties and smokers (Rush Meetings), and plans an annual brotherhood retreat. The brothers raise money.

It has been said that, though the men of Alpha Phi Alpha may march to a different drummer individually, when together they accomplish their goals with a characteristic of excellence that is uniquely noteworthy of Alpha men. The brothers of Nu Mu invite everyone to this challenge of upholding noble aims, leadership, and scholarship — a challenge that will last a lifetime.

ACM

ASSOCIATION OF COMPUTING MACHINERY WE HELP PROMOTE COMPUTER PROFESSIONALS

The student chapter of the Association of Computing Machinery has been chartered since spring quarter 1987. Some of the activities we have planned each year are participating in the regional programming contest held at the University of South Carolina this year, one social gathering each quarter, field trips to local industries, and visits from distinguished lecturers. In addition, each year we have a community project to benefit either the school or some local organization or group. Finally, the major goal of this organization is to promote computer professionals in the desired course of interest.

L to R: 1st Row: Ron Schroeder, Sally Sage, Jean Bacon, Don Eddleman, John Morgan, Rob Duggan, Gene Cato. 2nd Row: David Ellis, Dale Kiesow, Shawn Tapley, Scott Kelley, Joanne Byrd, Keith Neundorfer, Azita Miahnahri, Cindy Holliday, Alan Seagraves. SOUTHERN COLLEGE OF TECHNOLOGY JAZZ BAND

WE HAVE GROWN TO AMAZING HEIGHTS

The Southern College of Technology Jazz Band was formed many years ago as a Pep Band for the basketball team. Since that time, the band has grown to an award winning Jazz Ensemble. Some of the highlights of the recent past include: Winning an award at a Jazz Festival in Orlando, performing at a Night in Old Savannah as the warm-up band for the Preservations Hall Jazz Band in New Orleans, Cobb County Kaliedoscope, and performing for Lockheed's Management Association Dinner, and the Southern Tech Alumni's Dinner. Throughout the year, the Southern Tech Jazz Band performs at various school functions.

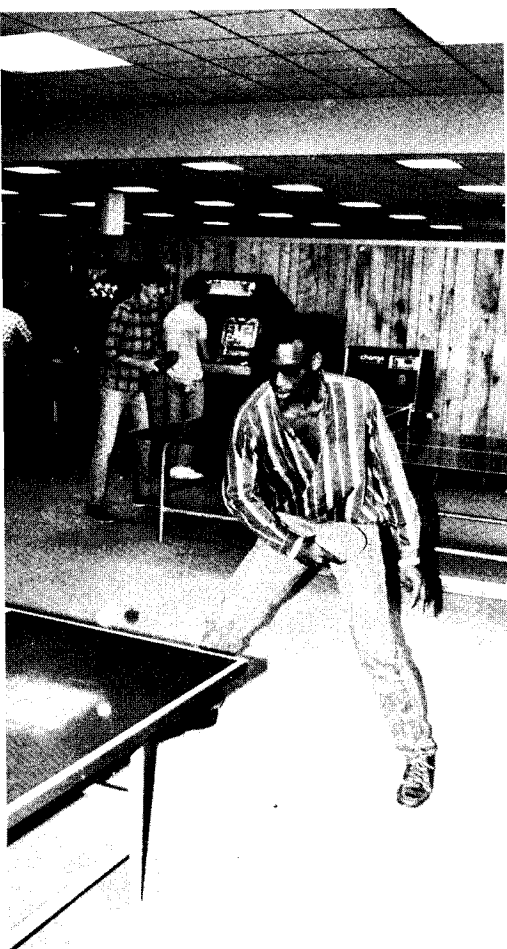

L to R: 1st Row: Bennie Bridges, Woody Heavens, Dennis Rice. 2nd Row: Dave Baskin, Glen Fiveash, Sandy Lloyd, Jamee Langston, Kevin Walker, Robert Mims, Prof. Gabrielli — Advisor. Not Pictured: Mark Cory, Bradley Grant, Beth

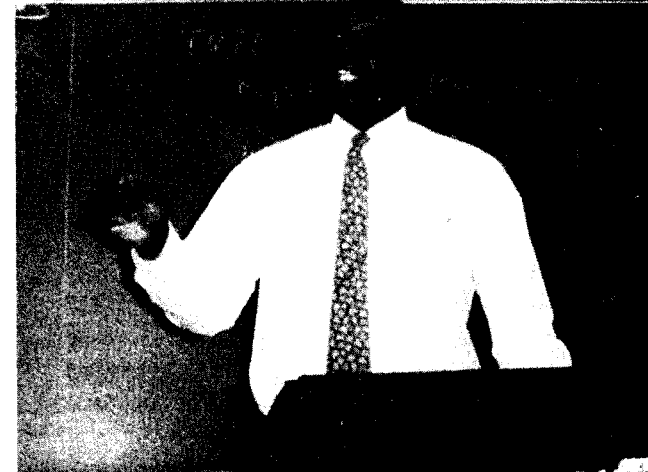

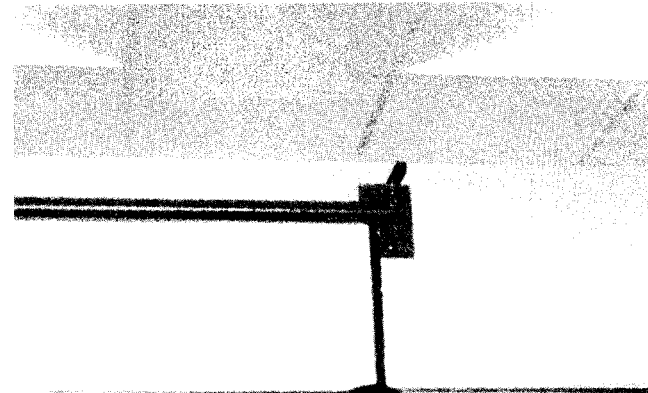

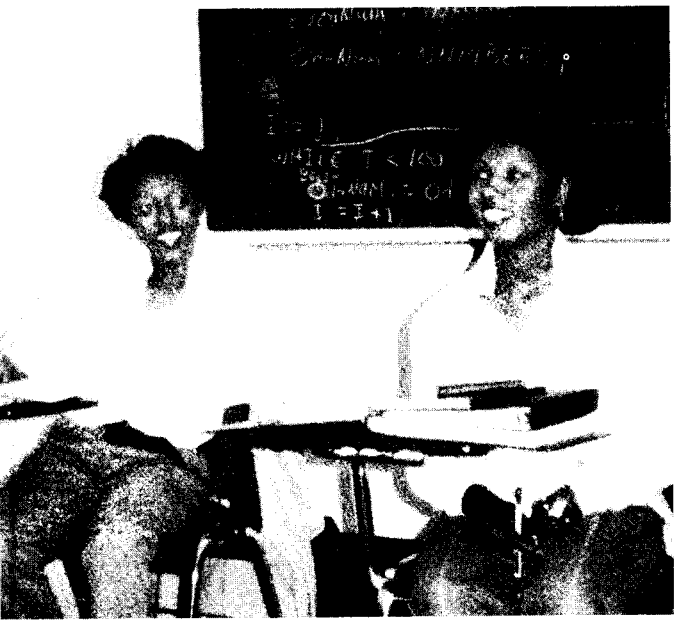

NSBE

National Society of Black Engineers

The purpose of the NSBE is to bring awareness to the Southern Tech family of the contributions of the Black to the American way of life; to assist in the guidance and orientation of the new black students on campus; to provide a continual guidance for the members of the association; to improve the relationships between black and other students; to provide a social outlet for its members; to take an active part in the cultural, social, and athletic activities of the institute; and to provide a voice for black students at Southern Tech.

CAD

A Tradition of Creativity

The Campus Activities Board (CAB) is an organization whose basic purpose is to provide student activities for Southern Tech students. The organization is composed of six committees, an executive board, and a program advisor. These six committees include Films/Videos, Special Events, Lectures/Cultural Events, Recreation/Novelty, Variety, Music/Concerts, and Publicity/Promotion. Through these committees, events such as the Street Dance, Homecoming, Casino Night, Beach Party, and Arts Festival are derived.

The members of CAB are energetic, enthusiastic, and creative individuals. We strive to provide the best events possible for SCT students. Through CAB, members get to go to places such as Birmingham and Washington D.C. to look for entertainment to bring to the SCT campus. We get chances to meet and work with celebrities including Byron Allen, Billy Ocean, Kathy Rigsby, and numerous others. In addition, we also go on fantastic leadership retreats.

CAB is always looking for new people. There are no fees or dues, just fun and excitement. We hope that every student will consider CAB as the organization for them.

- 1) CAB members discuss details of Casino Night.
- 2) CAB members on an annual retreat: Left to Right 1st Row: Tena Mullinax, Marsha McCrary. 2nd Row: Kirk Johnson, Annabella Wright. 3rd Row: Bobby Blount, Karen Brown, Mike Sims.
- 3) CAB member, Monique Laney, is a dedicated staff member.
- 4) CAB Advisor, Susan Dudd

ISA

International Student Association

We have a place in the SCT community

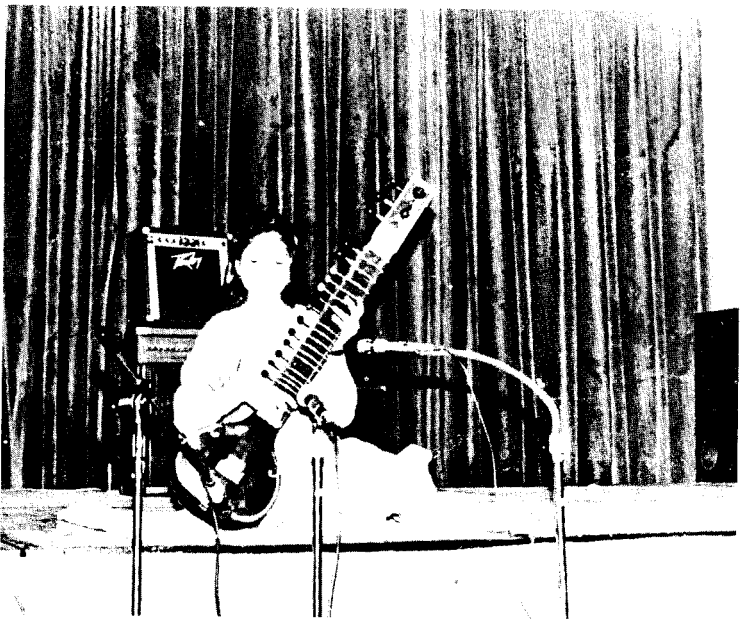

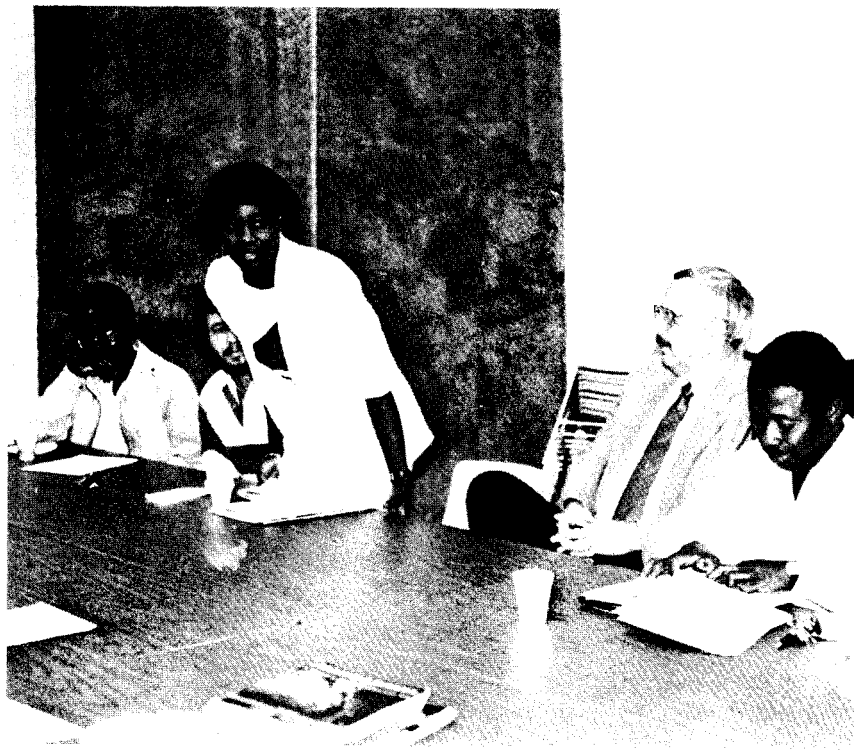

The International Student Organization was formed in the fall of 1986 after a lapse in activity for several months. Since then, Amendments to the ISA constitution have been made and enforced as well as improved. In the beginning, the ISA was looking for its place in the SCT community, and now, we have found it.

The ISA is dedicated to aid and support foreign students with their activities. The organization is open to all Southern Tech students with a focus in international student concerns and on fostering a positive international atmosphere at Southern Tech (As per the Preamble of the ISA Constitution). During the fall quarter, ISA held a big gaila called the International Festival, where the members of the ISA performed many ethnic dances and played many instruments of their homeland. In addition to the entertainment they offered to themselves as well as the SCT campus and many others who attended, the ISA served many dishes from their homelands. The entire event was a success.

ISA Preamble

The International Students Association is an organization established to aid and support foreign students with activities. The organization is open to all Southern Tech students with a focus on international student concerns and fostering a positive international atmosphere at Southern Tech.

'88 LOG STAFF

Building Our Own Tradition

The yearbook staff was organized under the pressure of school, life, and future. Out of these ideas, our theme was developed. The Log Staff wanted to create something that would become a basis for all other future yearbooks. Something that would say how we felt about Southern Tech and each other.

The staff has several ideas they wanted to share with their fellow students to express what they have gotten from them and school. Teamwork was one. The hours were always long but worth the time. The cover itself was only the beginning of what could

be accomplished through teamwork. It expressed through a series of lines how we felt about Building Our Own Traditions.

Southern Tech has been growing and building for forty years, and the Log Staff wanted it known that these changes for the better have not gone by unnoticed. The plans for the yearbook began right after the completion of the previous book. The book is a collaboration of several people working toward a common goal. The goal being the completion of a yearbook filled with pride, and a book that the Log Staff can be proud of.

'88 LOG STAFF

"Building Our Own Tradition."

- 1) As Photographic Editor, Paul Grady was in charge of all staff photographers and took numerous pictures himself.
- 2) Editor, Tim Barker, and Administrative Asst., Doris Combs, work out last minute details on some yearbook pages.
- 3) John Williams made sure that SCT sports were covered thoroughly in the Log.
- 4) Doris Combs was responsible for most of the typing and correspondence of the staff.
- 5) Patty Hannon, staff photographer, spent many hours walking SCT's campus looking for candid shots.
- 6) Richard Frye, Darkroom Editor, was in charge of developing all staff photos taken by our photographers.

SGA

Student Government Association We're here to serve the students

The Student Government Association serves a very important function. It is through this organization that the students may voice their opinions and concerns for the decisions and policies of the college. All students have a part, be it voting in the elections or holding an office. This year's Student Government Association did a fine job representing the student body.

BSU

Baptist Student Union A Tradition of Fellowship . . .

The Baptist Student Union is affiliated with the Southern Baptist Convention. This does not mean that the group is closed to students that are not Baptist. The B.S.U. does not discriminate with regard to race, sex, religion, color, or national origin. We have students from all over the world and from all denominations as members of B.S.U. Every Thursday afternoon, during the academic quarter, and year, B.S.U. has a free luncheon open to all students. On Monday nights, we have informal meetings. Throughout the year, we have retreats to many places, attend many conferences, and a mission trip during Spring Break. The B.S.U. is also involved in helping the less fortunate near and afar.

STING

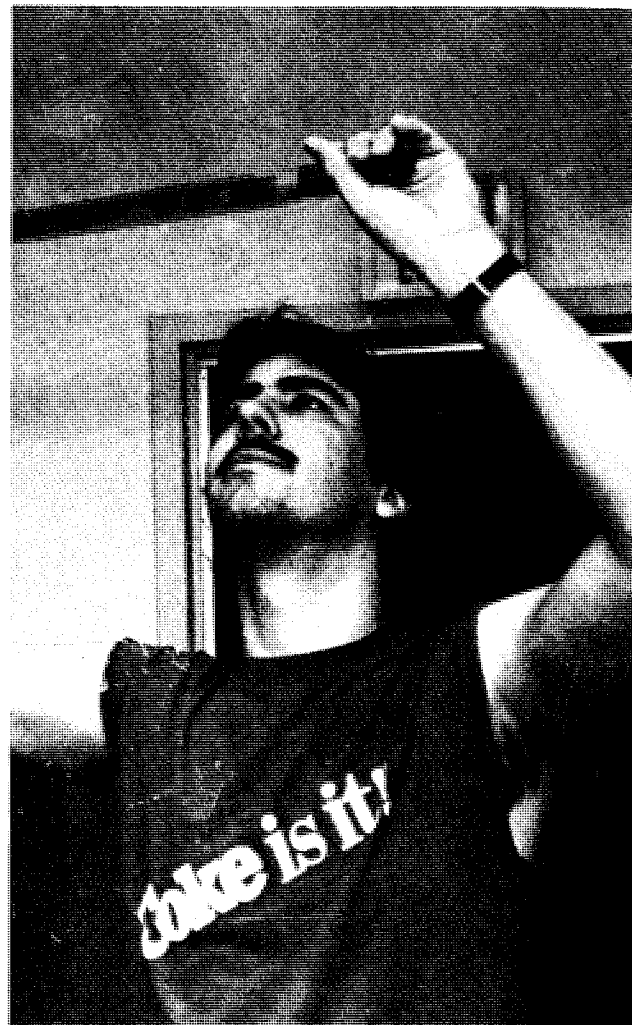

SCT's Reliable Informant

Southern Tech's student newspaper, *The Sting*, has made many advances this year. In the past, there has been about eight people on the staff. This year, the staff has grown to about twenty (20) students. All of this help means that we are able to put out a larger paper that is more interesting and informative.

During the year, we covered many different types of stories. The two main events on campus, Tech Fest and the Bath Tub Race, were both front page items. In fact, coverage of the Bath Tub Race resulted in the first color photo in the newspaper.

In addition to the news, we also cover entertainment. Probably the most widely read part of the paper is *Bloom County*. Between classes, students would read about Milo, Steve Dallas, and Opas (among others). "A Look Back," was introduced to show students what life at STI used to be like (it's SCT to us, but STI to them) ten to twenty years ago. The *Rock's Record Review* and *Nitelife* reviews newly released records from old and new artists and the local bar scene, two elements common to college life.

We, the *Sting* staff, had a good year and a larger staff which means good newspapers to come. With larger and better newspapers on the way, the students, faculty, and staff will enjoy reading the newspaper.

WGHR

“ROCKIN’ ” the SCT Campus

Formed seven years ago, WGHR broadcasts at 102.5 FM for 18 hours a day seven days a week. The staff including the managers, engineers, and announcers is entirely composed of Southern Tech students. With its recent format change to new progressive college music, WGHR has achieved national recognition in the college market and servicing from over 80 record companies. The broadcasting studio is located on the lower level floor of the Student Center and the transmission site is also located on campus. We at WGHR are always looking for adventuresome types to expand our staff.

- 1) WGHR, 102.5 on the FM radio dial.
- 2) Kevin Sharp, Jennifer Culver, and Friend pose for the photographer.
- 3) Two Jive Turkeys
- 4) Shilpe makes a very good point, don't know what the point is, but it's a good one.
- 5) Kevin, Don't be too hard on Vincent.

IEEE

INSTITUTE OF ELECTRONIC & ELECTRICAL ENGINEERS WE STRESS THE NEED FOR THE ASPIRING IEEE STUDENT

The Institute of Electrical & Electronic is a professional organization dedicated to the pursuit of new electrical and electronic techniques. The organization stresses the need for the aspiring IEEE student to be aware and involved in all areas of Electrical and Electronic Technology. IEEE is not restricted to EET majors (Electrical Engineering Technology), although they are the group's main concern.

The Southern Tech chapter is always open to new members to join. It currently has thirty members and continues to grow.

Chairman: Tim Washington
Vice Chairman: Dan Ussery
Secretary: Russ Norman
Treasurer: Jerry Young
Security Officer: Scott Hamilton
SGA Representative: Chris Williams

AIAS

ARCHITECTURE STUDENTS BUILDING A BETTER UNDERSTANDING OF ARCHITECTURE.

The AIAS (American Institute of Architects-Student Chapter) is a professional organization with chapters on college campuses across the nation. The Southern Tech chapter of the AIAS is alive and going strong.

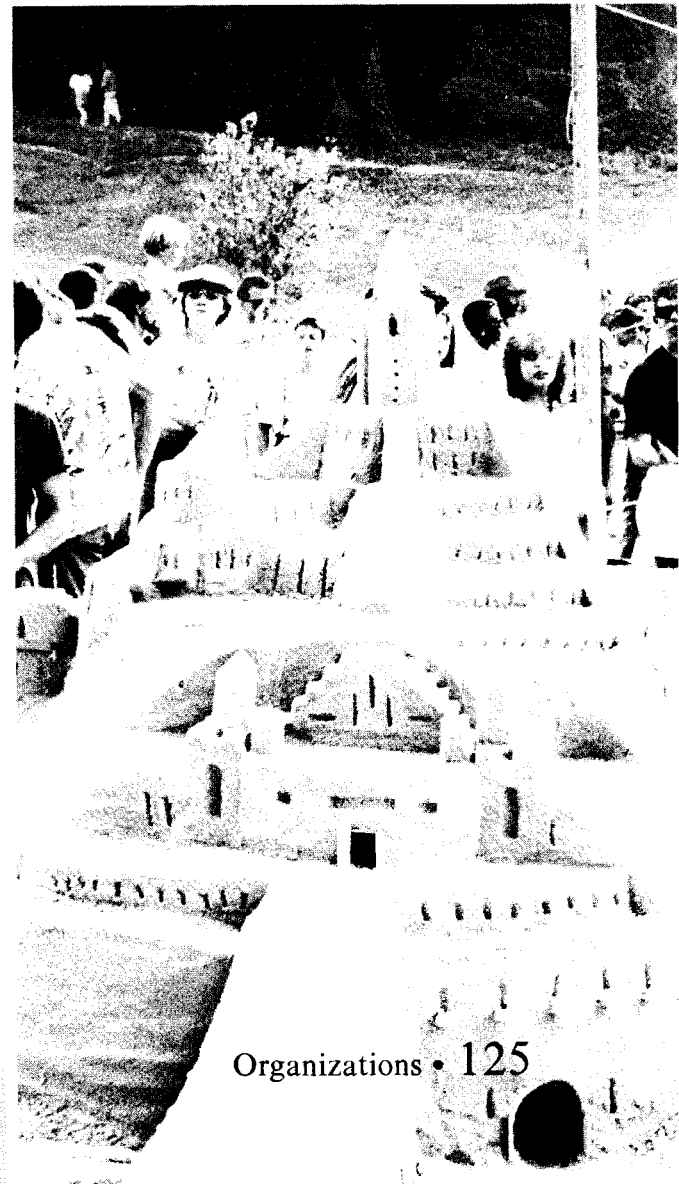

The AIAS here on Southern Tech is a very active organization, continuously working hard to promote a better understanding of architecture and the architects do.

The AIAS began the year by participating in the annual sandcastle competition at the Atlanta Arts Festival. The AIAS was also responsible for sponsoring the annual valentine day balloon sale, which was a huge success. The SCT chapter of the AIAS makes every effort to be represented at many national conventions held by the AIAS.

The AIAS had a successful year in '88 and looks forward to an even better year in '89.

CLASSES

SENIORS

At last, graduation day doesn't seem so far away. I am finally only quarters away from completion on this phase of my life, but it's strange that all I can think about is how much I will miss being here at Southern Tech.

Senior Spotlight

Name: Mark Cory

Classification: Senior

Hometown: Albany, Georgia

Major: Mechanical Engineering Technology (MET)

Career Objective: Possibly getting a job as a mechanical engineer upon graduation

Organizations: Member of the Jazz Band since '84, Director of the Jazz Band (a few years ago), Member of Society of Manufacturing Engineers (SME), Member of the National Society of Professional Engineers (NSPE), also listed in Who's Who On College Campuses

Favorite Tradition at ST:
Bath Tub Race

We thought being building manager of the student center would be a pretty demanding job in itself without going to school full time and keeping up with your studies. We asked Mark Cory, ST's building manager, exactly how hard is it to juggle that responsibility along with being a member of the Jazz Band.

Being building manager of the student center can be hectic at times, but the job is rewarding. Some of the responsibilities that go along with the position are setting up equipment and supplies for those who reserve special ballrooms in the student center to hold their functions, greeting visitors, giving directions and opening and closing the student center. He chose the position (well, he was appointed to the position of building manager because he was once the recreation desk manager and his roommate was the building manager at one time and he would help him out) therefore, Mark knew the ropes of the job. The best part of the job to Mark is the immediate access to current events happening on campus, being able to meet new people and keeping in contact with them. According to Mark, being involved in other activities on campus gives the student more variety in his/her college career, improves and develops his leadership skills and broadens the students' horizons.

JUNIORS

A student's junior year is a year of decisions. This is the year most students declare a major and seriously contemplate their life after graduation.

At this point in a student's life, the world is full of possibilities that are just waiting to be explored. The uncertainty that is present in a student's life at this point in their academic year can be very stressful. It is important to the student that his environment be conducive for pondering his future plans. Southern Tech provides a perfect environment for such an important task. As a junior at Southern Tech, a student can be sure that he is headed for a bright future.

Junior Spotlight

Name: Lamar Bevil

Classification: Junior

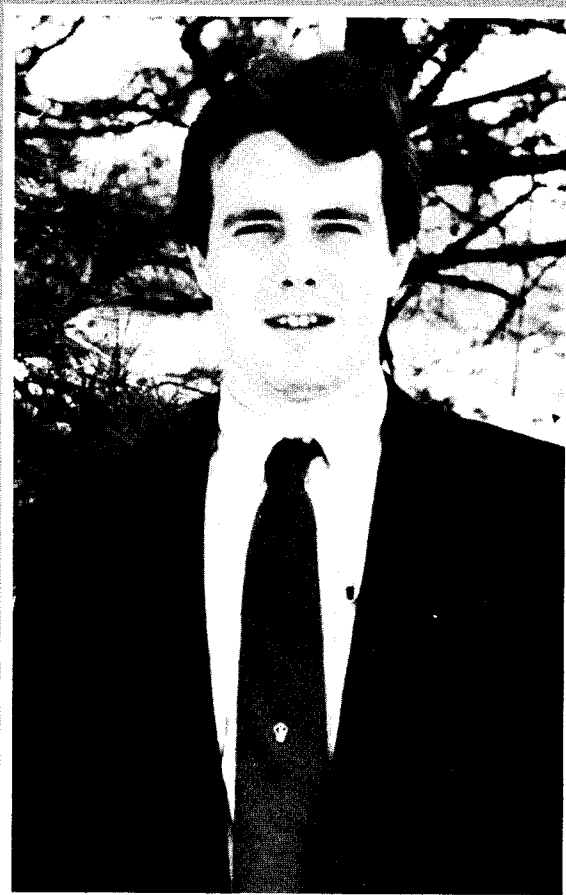

Hometown: Cartersville, Georgia

Major: Industrial Engineering Technology (IET)

Career Objective: Finding a job in the Textile Field upon graduation, possibly in the North Georgia area.

Organizations: Sigma Phi Epsilon ($\Sigma\Phi E$) Fraternity Member, Interfraternity Council (IFC) — Secretary/Treasurer, Student Government Association — Judiciary Chairman

Favorite Tradition at STI: Beach Party, i.e. "Tornado in the Gym Party".

As we did with all the other spotlight candidates, we asked Lamar a couple of questions concerning the organizations he's involved in here at STI. Since Lamar has been involved in so many organizations, we, the yearbook staff, asked him to choose which ones he'd like to talk about.

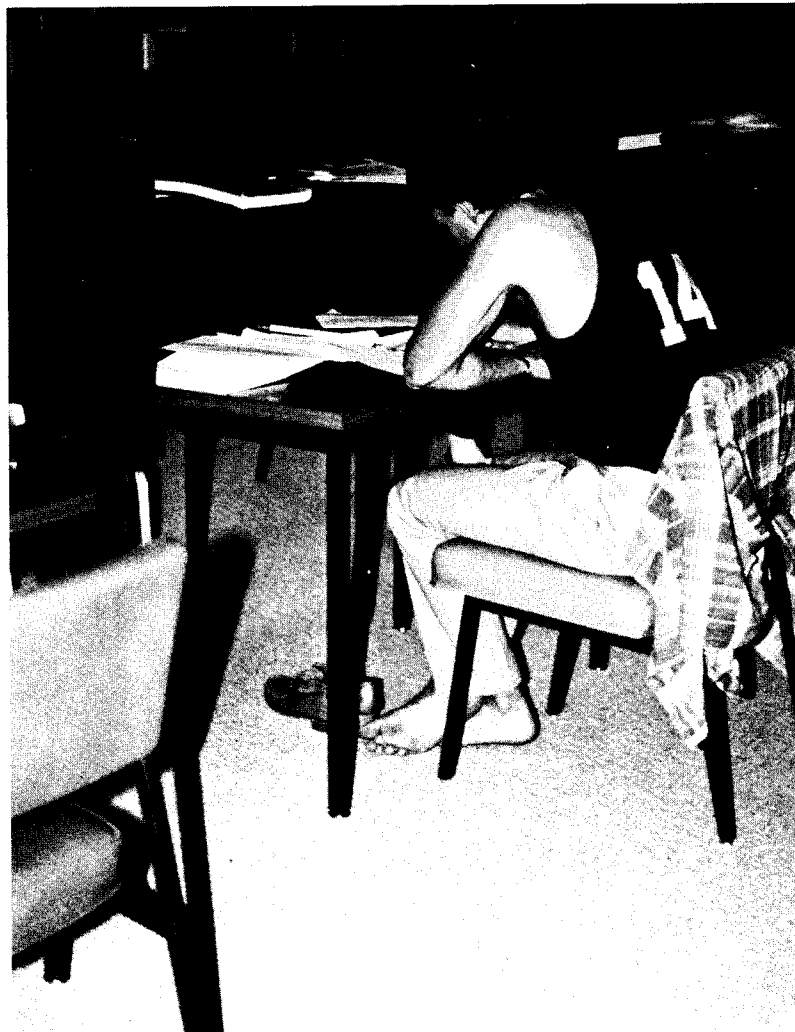

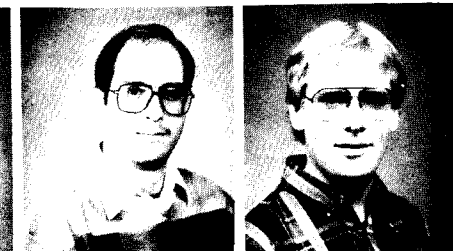

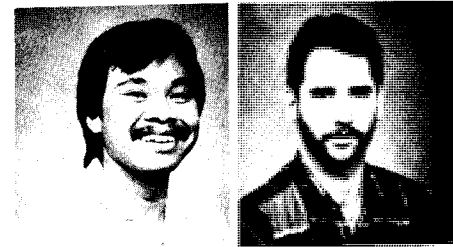

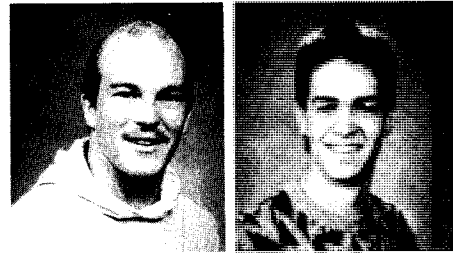

Since Lamar was and still is part of $\Sigma\Phi E$, we asked what exactly did he do as Chaplain of Sigma Phi Epsilon. As Chaplain he acted more as an advisory model, helped out with problems that would arise within the brotherhood, and planned brotherhood retreats. He also said that he chose to be part of $\Sigma\Phi E$ because of the principles it stands for, the friendship and fellowship of the brothers, and that the best part of being part of Sigma Phi Epsilon is making new friendships and going on trips.

The best part of being on the SGA is learning how to deal with people on a professional basis and learning how to organize organizations professionally. The best part of IFC is being able to interact with other groups. Last, we asked our Junior Spotlight why he thinks students should get involved in campus activities, and like most of the responses we got, he feels that life in the classroom is not what the real world is all about.

SOPHOMORES

This is the year sophomore students finally feel that they are an integral part of college life. Now that they have learned from the mistakes of their freshman year, they are full of confidence and ready to take on all the challenges college has to offer. Being the low man on the totem pole is no longer the main concern of a sophomore student.

By the time the sophomore year begins, students have established social contacts and good times are just waiting to happen. By the sophomore year, a student has become involved in campus activities — doing his part to build Southern Tech's Tradition.

Sophomore Spotlight

Name: Monique Laney

Classification: Sophomore

Hometown: Washington, D.C.

Major: Electrical Engineering (EET)

Career Objective: To have an upper level managerial position in sales and marketing with a mid-size company.

Organizations: Southern Tech Track Club (Cross Country), CAB (Campus Activities Board), BSA (Black Student Association), NSBE (National Society of Black Engineers), IEEE.

Favorite Tradition at ST: The discipline Southern Tech instills in its students.

The way that Monique Laney dedicates herself to CAB is unbelievable; one would think that she's an outgoing, get involved type of person. But in fact, it is inconceivable that someone had to drag her to the first CAB meeting. Initially, Monique was reluctant to join CAB, but once she got involved, she was hooked. Monique says that CAB's diversity is what really intrigued her about the organization.

Monique joined CAB last year as a general member; however, this year she is the acting chairperson of the lecturers and cultural committee. As chairperson of this committee, Monique is responsible for finding quality lecturers and cultural events to come to SCT's campus. It sounds like a demanding job and Monique confirms that it is.

In her first year as chairperson, Monique has been very successful. In February, Monique attended the NACA (National Association of Campus Activities) convention in her hometown of Washington, D.C. The event that Monique really looks forward to is the Annual Arts Show held each spring. Monique says that the Art Show is very challenging, that it "is very time consuming and dealing with a large number of people can be challenging."

Monique has a theory on student participation on college campuses. She feels that outside interests (other than academics) are needed in order to grow. Monique ended her interview with the following: "When I was in high school, I was a member of a lot of school organizations for the prestige. I just had my name on the roster; however, since attending Southern Tech, I have discovered that being an active member of an organization is the best aspect of being a member. When you're involved, you grow as an individual."

FRESHMEN

A student's freshman year is a commencement of a new educational experience. Students come to college waiting to gain more knowledge and a better understanding of the world around them. They also come to college looking forward to making new friends and associations that will last a lifetime. Along with this anticipation, a freshman also feels a great deal of appreciation and confusion.

A freshman student is initially mind-boggled by the college experience. Surrounded by a new environment, freshmen have the task of creating their own special spot in this new environment.

Freshman Spotlight

Name: Ed Hardy

Classification: Freshman

Hometown: Marietta, Georgia

Major: Computer Information Systems Technology (CIST)

Career Objective: Someday, hopes to have a job pertaining to his major, become president of a multibillion dollar computer corporation.

Organizations: Sting Staff—Arts/Features Editor “Anything Where Culture Is Applied.”

Favorite Tradition At ST: Late Night Cramming Sessions

One of the first acts Ed Hardy performed upon arriving at Southern Tech was joining the newspaper staff. Below are some answers Ed gave the yearbook pertaining to his activities on the newspaper staff.

As Arts/Features Editor, Ed assigns articles and projects to people under him on the newspaper staff, besides assigning articles to other newspaper staff members, he's also in charge of distributing movie passes and overseeing movie reviews in the Arts section of the newspaper. As well as organizing the assignments pertaining to entertainment, he chooses which comics and which articles concerning Nightlife go into his section, and like everyone else on the Sting staff whose in charge of a particular section of the paper, he also does the layout. Ed chose the newspaper staff because it was something he's always wanted to do but never had the time while he attended GA Tech, and he also feels that it's a good way to get to know people. We asked Ed what's the best part about his job that he enjoys most. His reply was getting out and going to different functions going on around Atlanta (i.e. He was able to get some free tickets to go see the play CATS.) We also asked our freshman Spotlight student why he thinks students should get involved in other activities. His reply was that academics is only half of schooling and learning how to develop a social life is the other half.

Pizza Specifications

MATERIALS LIST

To make the Perfect Pizza:

- 1) Fresh Dough – Prepare to perfection. Bake to golden brown in high temperature oven to assure crust that is tender on the inside, crispy on the outside.
- 2) Savory Sauce – Spread generously on unbaked crust.
- 3) 100% Real Cheese – In sweeping movements, sprinkle the perfect blend of shredded cheeses over the sauce.
- 4) Skillfully Prepared Toppings – Add vegetables, meats, cheese, fish – whatever you think tops the Perfect Pizza. All items must be of the finest quality!

But wait a minute! You don't have to go to all that trouble! Just Call Domino's Pizza. We'll custom make your pizza – right to your specifications. And we deliver to your door in 30 minutes or less, or it's \$3.00 OFF. Guaranteed!

So Avoid The Noid, Call Domino's Pizza and enjoy your very own, custom made "Perfect Pizza!"

With unfailing direction and firm commitment, *Amoco Fabrics and Fibers Company* has become a leader in fiber research, producing a diverse line of fibers, yarn systems and fabrics used every day in the home and in industry.

Carpet fibers and backings

Amoco's continuous filament olefin yarn system, *Marquesa Lana*, along with the nation's No. 1 backing systems, *ActionBac* secondary and *PolyBac* primary, are all used in the manufacturing of America's highest quality carpets.

Construction fabrics

Amoco's complete line of woven and non-woven polypropylene fabrics, used for paving, ground stabilization, erosion control and silt fence, meet or exceed all engineering requirements.

And more

Amoco also provides vital ingredients for end products like wallcoverings, upholstery fabrics, disposable non-wovens and luggage, just to name a few.

So, when you look to the future, look to the leader. Look to Amoco.

Amoco Fabrics and Fibers Company

900 Circle 75 Pkwy./Suite 550
Atlanta, Georgia 30339
(404) 956-9025

Amoco Fabrics and Fibers Company makes fibers and yarn; not finished carpet. *Marquesa Lana*, *ActionBac* and *PolyBac* are Registered Trademarks of Amoco Fabrics and Fibers Company.

Opportunities for Innovation

Innovation has been a Georgia Tech tradition for more than 100 years. And for 80 years, it has been a shaping force for Kawneer Company, the world's leading manufacturer of architectural aluminum products.

As innovator of the first glass holding metal framing system in 1906, and many product "firsts" since then, Kawneer's architectural systems are featured on many of the world's most recognized buildings.

Our products provide diversity of design to architects and building owners in the United States and throughout the world, where our 15 manufacturing plants are strategically located. Over four thousand employees are dedicated to innovative problem-solving, product integrity and attention to the market needs.

Kawneer Company salutes Georgia Tech, where opportunities for innovation begin.

Brussels, Detroit,
Singapore, and Atlanta
have in common?

John Portman's mixed-use urban complexes have become world-renowned—because they're people-oriented, extremely efficient and dramatic.

Today, we have ten companies that do everything from conducting feasibility studies to counseling foreign companies on doing business in the U.S. That's the kind of far-reaching corporate approach we're going to continue to build on.

GO ON A POWER TRIP.

The XL600R gives you the power to choose your own course. Whether tripping around town ... or cross country. Its smooth, potent 589cc engine includes Honda's RFVC™ cylinder head for a wide, controllable powerband. Dual carburetors deliver instant response at any rpm. And air-adjustable forks, Pro-Link™ rear suspension and a front disc brake provide the handling and braking to match. On the road ... or off. Set your course on the XL600R. And get a feeling of power.

HONDA

SPECIAL THANKS:

The Entire LOG STAFF — For Their Support During What Was Sometimes A Rough Year.

The Delmar Company — For publishing the 1988 LOG. Bill Wolfe, Sales Representative; Sherry Breneman, Customer Service.

Barry Birkhead, Staff Advisor, and Kim Villagomez, Secretary — for their patience and support.

Richard Frye — For his continued support even after spending so many hours on last year's book.

Annabella Wright — For her "SPECIAL" ideas, copy, and support.

Paul Grady — For his photographic expertise.

All the Staff Photographers — Thanks for a great job.

John Williams — For doing a great last minute job on the sports section.

Liz Cage — For bringing a little joy into my life.

Mr. and Mrs. Jeffe Barker — For their undying support throughout four years of working on the yearbook. Well Mom and Dad, No More Late Hours Working on the Yearbook.

Thank God — For giving me the patience and deligence for completing this endeavor.

STAFF:

Timothy W. Barker	— Editor-in-Chief
Annabella Wright	— Assistant Editor
Richard Frye	— Darkroom Editor (Advisor)
Doris Combs	— Administrative Assistant
David Sosnin	— Former Darkrm. Editor
John Williams	— Sports Editor
Paul Grady	— Photography Editor
Mike Brown	— Photographer
Patty Hannon	— Photographer
Greg Braxton	— Photographer
Brett Reese	— Photographer

SPECIFICATIONS:

Program	— Graduate
Size	— 9x12
Paper Stock	— 80#, Triple Gloss Enamel
End Leaves	— Parchment Sand
Cover	— Embossed Cover w/Gold Hot Stamping
Type	— Headlines: 60pt., 3A
Body Copy	— 12pt., 2B
Photo credits	— 5½pt., #3
Pages	— 200
Copies	— 1400

It's hard to believe that all of the hard work is over. The hard work did pay off however, in a yearbook that I feel is second to none. Putting this yearbook together was not an overnight job, but a job that took several months and many man hours put in by a small but dedicated staff. The theme of the '88 LOG "Building Our Own Tradition" gave the entire staff more incentive to see this journalistic endeavor to the end. From the very beginning, everyone felt very strongly about the theme and had many ideas on how to best express them in this yearbook. I, along with the rest of the staff, hope that we have successfully expressed this theme with quality and a certain amount of class. We also hope that the student body of Southern Tech is proud of the 1988 LOG and feel that they are represented in only the most positive sight.

Now, speaking on a more personal note, being the Editor-in-Chief of the 1988 LOG has been a rewarding experience. I found the editorship of the '88 LOG to be a tremendous education in the academic sense, but it was an education in dealing with people in the everyday sense. I will remember the lessons I learned from being editor of the '88 LOG and will hopefully live a better and fuller life because of them.

I end now by saying a final farewell and by wishing the next year's editor continued success. May the 1988 LOG inform and entertain future Southern Tech Students.

Sincerely,

Timothy W. Barker
