Governor Charges Chancellor to Reprioritize

By CHARLES BANTON

Late summer early fall of 1995, Gov. Zell Miller came to a conclusion that could have a major effect on not only the Southern Tech campus, but all campuses in the state of Georgia. After the Olympics the Georgia economy will probably slow down, making it more difficult to obtain funding for long term projects, stated Miller. Anticipating this slow down, Gov. Miller called in the heads of all state agencies and charged them with the task of assembling a list of high priority projects that they feel deserve con-

sideration for available funding from the state. Miller presented his proposal to the state legislature in January. This proposal included redirecting 5% of the budget to fund projects that were selected from the list given to him by his agency heads.

Chancellor Stephen Portch, who heads the Board of Regents, has charged Stephen Cheshier with assembling a list of projects at Southern Tech that meet the agency goals and are considered a high priority. Another challenge from Portch was to redirect 5% of the schools existing budget to high priority projects in the event that state funding is not

awarded. Southern Tech receives almost \$5,000,000 from the state.

What does all this mean to you? Some of the projects under consideration are 1) the introduction of a BAS degree at Southern Tech. 2) Distribution of education, which includes offering our CS Master's Degree as well as other degrees to other schools in the university system, and developing the already existing program which is sending classes via cable TV to the local community. 3) The further development of the fiber optic capabilities on campus. 4) The entire university system is changing its

administration software over to a system called Banner. 5) The quarter to semester conversion will demand additional time from the faculty which will require additional funding. 6) Placement and career services programs to strengthen relationships with employers. These are a high priority. The freshman experience is a new program that is focused on retaining freshman who are adjusting to college life.

All of these projects will be proposed but it is not known which ones will be funded until the state legislature produces its budget. When asked what he felt the stu-

dents wanted on the wish list for Southern Tech, President Cheshier responded "Students are interested in quality instruction, and we have tried to get resources to do that. Another thing that students want is adequate services to support the non-classroom part of being a college student." Cheshier also said that students desire all of these services, without an increase in tuition or activity fees. This is in no way a 5% cut in the budget."

The presidents staff is involved in this project. Mr. John Hosey,

NSBE Awarded Chapter of the Year in Miami

By KEVIN BRYAN

The Southern Tech chapter of the National Society of Black Engineers impressed everyone by winning the Chapter of the Year award for their region.

Out of the six regions that divide the nation, the branch of NSBE of Southern Tech beat out 38 other groups to become the winner of their

region, Region 3.

The competition between the groups is classified according to size. The small (10-30 members), medium (31-75 members) and large (76+ members) groups compete against each other.

The small and large categories have virtually no competition, so it is especially impressive that Southern Tech, with 73 members, won

the top spot in the medium group.

There are several things the chapter is judged on to win this honor. Each group hands in a Chapter Development Plan (CDP) to the organizers in order to show their accomplishments.

The organizers look at, among other things, the quality of speakers at their meetings, the activities held at the school and its willingness to work with other campus and community groups.

The SCT NSBE chapter has shown itself worthy in all three of these aspects.

The organization has had a plethora of activities this quarter. Along with their weekly meetings, a number of Black Heritage meetings were held, as February is Black History Month.

A Black Heritage Celebration was held on Feb. 21, and a Black

Coronation was held on Feb. 24.

An Oratorical Contest was held in Birmingham, Ala. last Nov. 3-5, and Southern Tech won third place in the region.

The PCI mentoring program being held with Marietta High is still going strong, and the group participated in Video Conference 2000.

The multimedia experiment featured prominent speakers from the group's Washington headquarters, and was viewed all over the nation via satellite hookups.

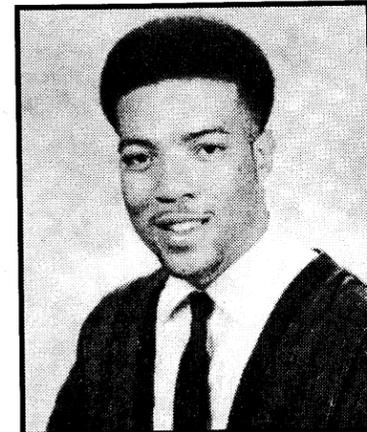

The local chapter has also helped sponsor an upcoming study session on March 14-17 in order to get students with tutors in otherwise untouched subjects.

On a related note, NSBE President Andre Willis won a regional award — the Timothy Briggs Award of Outstanding Leadership.

Willis was one of only three

winners of the \$200 scholarship,

Each president is automatically eligible for the award, but to win he must show excellence in leadership and a number of successful activities accomplished through the group.

Andre' Willis, NSBE President

Fiber Optics Adds Spice to the RS6000

By KEVIN BRYAN

The computer room in building E should be familiar to everyone as the spot on campus to register for classes and to access their beloved e-mail accounts.

In fact, most people simply stop by the room to check their e-mail and download files, and do little more in the way of investigation than find out why the modem lines are always busy.

However, the current wiring is being massively upgraded to a fiber optic system, and will, among other things, expand the campus' access to the Internet.

First, a history lesson about the current computer network.

There have been at least three networks installed in the ground before the current fiber optic cable.

The problem has been that each system was completely separate from the other, and on cable line. Yes, the same kind for your cable TV. The technology is stable, but antiquated.

In fact, the old system received a death knell when 3-Com, the previous maintainer of the cable system, refused to touch the network after their contract expired on July 1, 1995.

A new, more permanent system was needed, and fiber optic cable was the answer.

The plan to place the new cable in the ground saw the go-ahead in mid-June, and construction began the beginning of fall quarter.

However, this idea has been in the works for over three years. Hal Barnes, the previous Academic Systems Analyst, fought for the project, but faced a lack of funding to place the wire in the ground.

It would seem that getting the fiber optic cable would be the hard part. In reality, getting the cable was

easy. Instead, the school has spent \$750,000 in order to place a well-planned, expandable underground conduit through which cable can go.

To give an idea of the expandability, groups of 4-inch conduit, ranging from two tubes to eight tubes replaced the existing system. Inside each conduit are three flexible conduits. The fiber optic cable only takes up one flexible conduit.

While the construction is finished for the moment, there is no money left for the moment to buy ethernet hardware to take advantage of the new wiring.

The glaring exception is the Galileo network. For the Galileo project, temporary wire was added to the library above ground to allow the project to move forward as soon as possible. This allowed direct connections to the Internet without going through the rs6000. Access to the World Wide Web would be impossible without the direct connection, and is one benefit of the foresight now shown by the school.

Another benefactor is Building F, or Continuing Education. The department, which possesses an unusually low profile on campus, can now offer more classes on the Internet than it used to because of its new wiring.

This upgrade in the system has been a long time coming, and is sorely needed. For one, the Galileo project would not have been possible if the computers had had to be connected asynchronously to the rs6000.

Ron Skopitz, the current Academic Systems Analyst, hopes that an upgrade of the minicomputer will alleviate the load somewhat, but actual plans for this are far in the future.

In the meantime, students will have to live with the current speeds. One thing the upgrade in ser-

vice will not do is increase the number of modem connections to campus.

Anyone who has tried calling in to campus has often been frustrated with numerous busy signals and seemingly good connections that produce nothing on the screen.

There are currently 14 modems that allow you to connect to the minicomputer from off-campus sources.

While high-quality modems are used, the server connecting them to the minicomputer is very slow to respond to the increasing number of commands being sent to it.

If someone disconnects by turning off their computer or doesn't

terminate a job, the server has a hard time recognizing the disconnection. It didn't see a formal hangup command, so it doesn't know what to do.

When the next person calls, they inherit the last person's problem. The modems connect easily, but the server still doesn't know what to do.

The second person to dial in gets nothing but a blank screen. If this happens to you, enter some escape commands such as Cntl-Z, Cntl-Q, Cntl-D, or Cntl-C to tell the server the last job/connection has been terminated.

This will usually clear up the problem and you'll be able to dial

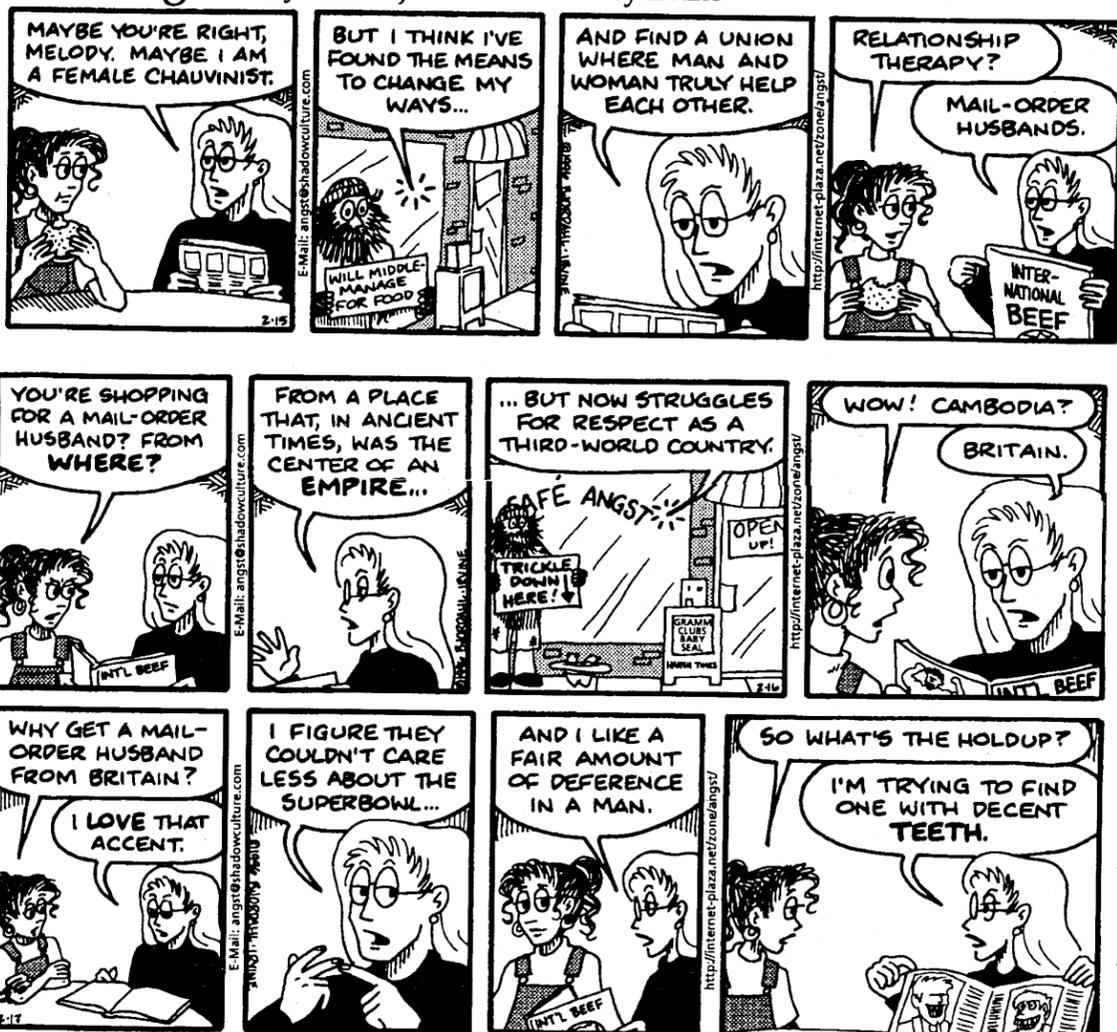

in again to get a good connection.

The only real solution to this problem is a new modem server. The good news is that a new server has been received. The bad news is that it is still being configured, and will not be ready until sometime during the spring quarter.

Again, patience is required. What is not required is dialing a large amount of numbers. All the modems are on a rotary system, so dialing one number will allow you to access every modem.

Finally, it might be of some interest to know the operating hours of the Building E computer lab. The operating hours are 9-10 Mon-Thurs, 9-6 Fri, and 12-6 Sat-Sun.

GTA Petitions Bus System

By TOMM PENDLETON

Last month Lucius McDowell of the Georgia Transportation Alliance (GTA) appeared on one of WGHR's talk shows to discuss the changes in Cobb County Transit bus system. GTA is a non-profit, transportation organization interested in a well balanced, multimodal transportation system for the state of Georgia.

McDowell appeared in response to an article published in the January 16 edition of the Sting. The article, entitled, "CCT Plans Changes In Routes" reported on CCT's recent decision to propose severe changes in the current bus services to the County Board of Commissioners.

GTA's purpose is to inform the community, including college stu-

dents who rely on the bus system, about the restructuring and to clarify the recommendations by the Department of Transportation and what the effects will be.

GTA contends that public transportation is an essential component of a balanced transportation system in Cobb County. Many citizens (including Southern Tech students) rely on transportation services provided by CCT for work, school and other activities. McDowell argued that the recommended cuts to existing services and the proposed revenue increases are not acceptable to the general public because the surveys conducted by CCT were inaccurate.

They were conducted over a two day period on a limited number of riders. Also GTA noted that the surveys consisted only of questions

concerning rider habits and usage. The public was not actually consulted about what steps to take to further improve the bus system.

The proposal includes either fare increases or elimination of free transfers as well as severe alterations and elimination of many of the existing routes. "And that will destroy the original intent for which CCT was created," says McDowell.

GTA has posted an open petition concerning public transportation in the student center for students to sign.

McDowell plans to return to the campus before implementation deadline in April this year he will be conducting a student signature drive to block the changes proposed by the CCT to the board of commissioners.

Spring/Summer Employment

- Fun Jobs
- Management Experience
- Good Pay

The Fun Company, Inc. is looking for outgoing, organized individuals to be on-site Event Managers for large corporate events. Wednesday through Sunday work is available.

- Must be 21 or older (DOT Regulations)
- Must be willing to travel Thursday-Sunday
- Management experience preferred but not necessary
- \$100-115 per day plus all meal and travel expenses

SAE Builds Car of Their Future

By TOMM PENDLETON

The Southern Tech chapter of the Society of Automotive Engineers (SAE) is currently embarked on a mission: to build, compete and win in next year's annual nationwide collegiate design competition.

Although their first two ventures did not prove fruitful in terms of placement, our SAE chapter was able to gain invaluable information and experience at the events.

"We were going up against a bunch of talented, experienced teams from eighty-five of the top schools in the country," said Orren Williams, Faculty Advisor for SAE on campus. "We're raw rookies still on the learning curve."

Last time SCT went [to the competition] they made compromises just to be able to say they went.

They started out with square, thick-walled tubing; massively overdesigned. "We went in heavy and just went by the rules. We went in with an inappropriate engine that we paid only one hundred twenty-five dollars for. It was the only one we could find. We've had two entries and learned a lot. This time we won't have to compromise."

In an effort to improve their chances to win, Southern Tech's team will not enter this year's competition. They will use this year to completely redesign a formula car from the ground up. The amount of time required to do it right, as well as budgetary constraints are considerations.

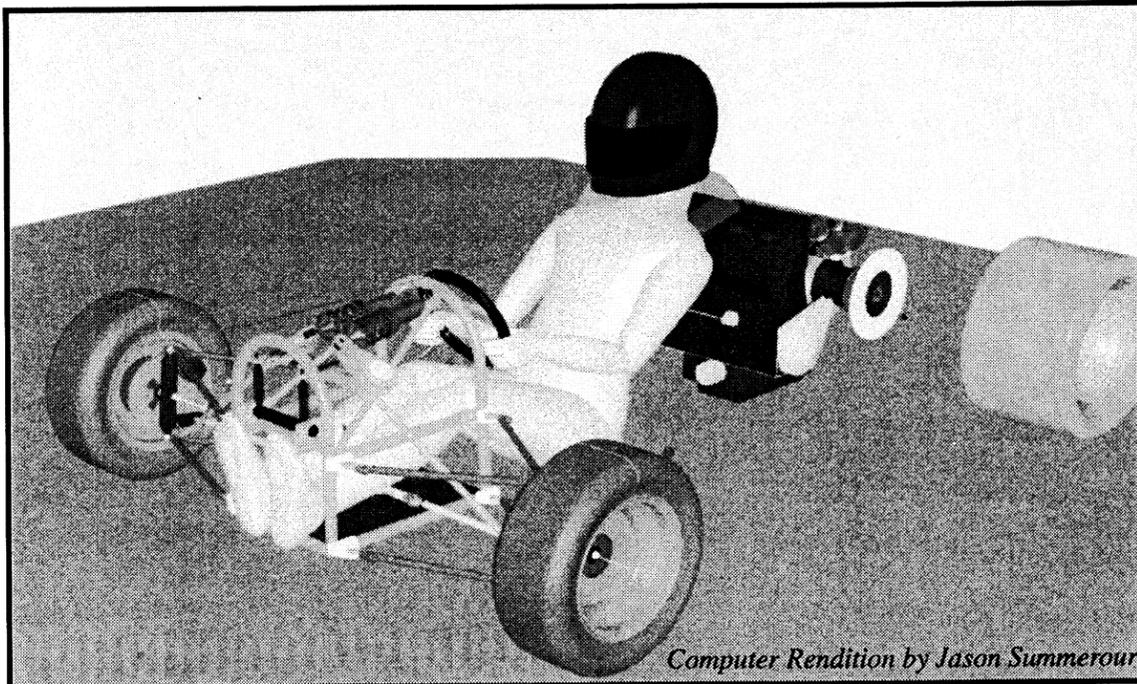

One key element of the project's predicted success has been assembling a team of people who are racers and understand being a team player to reach the team's objectives.

Southern Tech's new team is spearheaded by Jason Summerour, an MET graduate who is now enrolled in SCT's Computer Science program. Summerour is designing next year's entry with the help of Dr. Logue (MET). Logue specializes in suspension design and analysis and has Indy car experience. Summerour is using CAD and a special suspension design software package.

The new design will raise our level of competitiveness. "We've been there and seen what it takes to design, build and race," says Williams. "You have to go there with an engineer's eye, touch, taste and feel to get a hold of what you need to do. And we feel it is important that students get involved in professional organizations. The end result is, it makes you a better engineer."

The event is very large and includes not only formula race car competition but robotic walking machine, airplane, super mileage vehicle and, the largest and most recognized, mini baja competition. The yearly event consists of thousands of competitors from around the United States. It offers students a chance to get involved in a real world experience by designing and testing prototypes.

The formula car competition is

Computer Rendition by Jason Summerour

The formula car design includes a custom made electronic fuel injection system, an electronic shifter and an integral transmission from a 600cc motorcycle.

not a race like the Indy 500. Teams are comprised of ten members and four driver's. Judging is performed in cost analysis, design and presentation.

The three point static judging for safety must be completed before teams can enter the dynamic events: acceleration and skid pad (maneuverability) tests. Prizes are awarded for each event as well as overall. Other awards are given by various organizations such as Delco for innovative electronics and

Goodyear for best teamwork. Sports Car Club of America (SCCA), student societies as well as the automotive industry giants (Ford, GM, Chrysler etc.) are also on hand to lend a hand as team stewards and to scout potential future engineers. A long list of companies donate and offer cut rate parts for the college teams.

The scouts are looking for new engineering talent who love cars, are getting hands on experience and pursuing an engineering degree."

The SAE competition takes students from initial design through production and testing. It also gives students experience in team work, project management and communications.

Southern Tech's team has targeted Fall Quarter for completion of the new formula car. Not entering the competition this year will allow them to test their car and train their drivers in some of SCCA's amateur racing events before entering the competition in 1997.

Food Committee To Meet Monthly

By COLLEEN DESMOND

A Food Service Committee was recently formed to increase communications between ARAMARK and the Southern Tech population. The committee is made up of students and faculty who have expressed an interest in improving food service.

The meeting on Friday, February 23, was attended by Glenn Forbes and Ray Boyd as ARAMARK representatives and several faculty members including Dr. Simon Stricklen, Dr. Anthony Tilmans, Kim Jackson and Barry Birkhead. The two student representatives were unable to attend although Andrew Keels faxed a memo relating his food service concerns to the committee.

In his memo, Keels stated that "the food quality just isn't there like it used to be." He suggested that ARAMARK concentrate on improving the quality of the food. "The new food service area looks great, but when I go to eat I want to buy food not atmosphere."

Keels wrote. Professor Stricklen echoed Keels concerns in the meeting saying "I don't think the general feeling is positive. What concerns me the most is that you believe that the reports are all optimistic and rosy and they are not."

Glenn Forbes, Director of Campus Dining Services, replied that it is very difficult to please such a large and diverse customer population. "It is difficult to meet all of

the regional taste requirements. People talk about wanting the crisp vegetables but then what sells is the southern style vegetables with bacon fat," said Forbes. Boyd stated that "consistently the food [quality] has been at the top" compared with regional colleges.

Stricklen conceded that people are not always consistent in knowing what they want. Birkhead complimented ARAMARK on their deli service and prices.

People at the meeting generally felt that the renovations have worked out well. The transition has been pretty smooth," said Boyd. Even during the lunch rush the wait at the registers is usually less than a minute reported Boyd. "Our biggest problem has been a backlog at the Pizza Hut," said Boyd. Pizza Hut purchases account for approximately 40% of the overall sales.

Forbes also stated that ARAMARK plans to sell plastic "earth friendly" cups that could be refilled with soda at a discount price. Coincident with the recent renovations, the free refill policy with sodas was revoked.

Boyd recommended that the Food Service Committee meet monthly to address concerns. He offered to provide a free meal for committee members to sample the food randomly during the month and provide feedback to the committee. The next Food Service Committee meeting is tentatively scheduled to meet next quarter on Thursday, April 4 at 12:00 pm.

Budget Cycle Begins Soon

By CHARLES BANE

Bill Finnick reported on the SAC conference that he and Vice President Kris Allegood attended in Atlanta last weekend. Bill raised the question of the President's power to change student activities budget without resubmitting to the SGA for consideration. This created a great deal of discussion, but no conclusion where drawn.

Another topic discussed was the registering of students for local and national elections. This is a concern of student government associations all over Georgia.

Southern Tech had approx. 10% turn out for student elections last year while that other Tech school boasts of having close to 20% voter turn out in last year's elections.

An election committee, composed of SGA members who are not seeking office, will be formed at

the beginning of the spring quarter.

During the SAC conference Kris Allegood worked with a committee which submitted a proposal to send letters to school presidents addressing library hours.

There are schools that do not have late hours like Southern Tech and, therefore do not provide access for night students passed 10:30. The proposal was voted down because not all schools have this problem and those schools did not wish to put unnecessary strain on relations with their president's as stated by Kris Allegood.

Plans involving the vending machines are being discussed, so if anyone has comments about the vending machines please bring these to the attention of Barry Birkhead. If there are any comments about the food service please make them known, also to Barry Birkhead. A Food Service Committee was recently formed to address student

concerns.

The Chinese Friendship Association was voted into existence as an official organization. This organization will allow Chinese students access to national events and recognition nationwide that otherwise would not be available. This organization was accepted with the assurance that discrimination would not be practiced.

Ray Smith sent letters to all organizations requesting their attendance at a February 28th meeting to receive budget packets that they can use to present next years budget in a uniformed style.

Smith highly recommended that every organization have a representative there if they want their organization's budget to receive serious consideration.

Brian Mchart has resigned as a judiciary judge. General operations funds are 3945.15 and student development funds are 1550.00.

Franken's Big Fat Funny Book

By BILL GREVE

 *Rush Limbaugh is a Big Fat Idiot and Other Observations* by Al Franken. Delacorte Press. 271 pages. \$21.95, but it's on the best-sellers list so you should be able to find it for 30% off.

By the title alone there is no doubt that the contents of this book will be an above-board scholarly tome. Why, the author is even pictured on the cover wearing a jacket and tie while holding a pipe.

And since this is a scholarly work, Mr. Franken is up front about the meaning of the title: "I thought the title, aside from the obvious advantage of being personally offensive to Limbaugh, would sell books. Let me explain why: It makes fun of Rush Limbaugh by pointing out that he is a big lard butt." Though, to be fair, it is pointed out that in 1986 Rush weighed less than Oprah.

The book is much more than the varying categories of Rush's largeness (big fat liar, big fat hypocrite,

etc.), Al Franken has also taken the time to comment on other equally irritating persons; many of whom Al has met and professes to like.

"Gingrich, Newt: Deadbeat dad" whose reluctance to pay alimony forced his ex-wife to take him to court and that "her church took up a collection to help them get by." Perhaps Gingrich "got the idea of churches filling in for government from his own experience."

Remember the giraffe comment? That calls to mind an image "... of the grasslands of Africa. During the Neolithic Period. Rush, Newt, and Bill Bennett, all 825 pounds of them, are trying to run down a giraffe. The giraffe is thinking, 'No problem here'."

"Phil Gramm: Everybody's Favorite Bastard" and "Pat Buchanan: Nazi Lover" are another two entertaining chapters. One of the funniest chapters is "Bill Clinton: Greatest President of the Twentieth Century." At least I think that's supposed to be a joke. I laughed: "Honoring another campaign commitment - to choose a Cabinet that 'looked like America'"

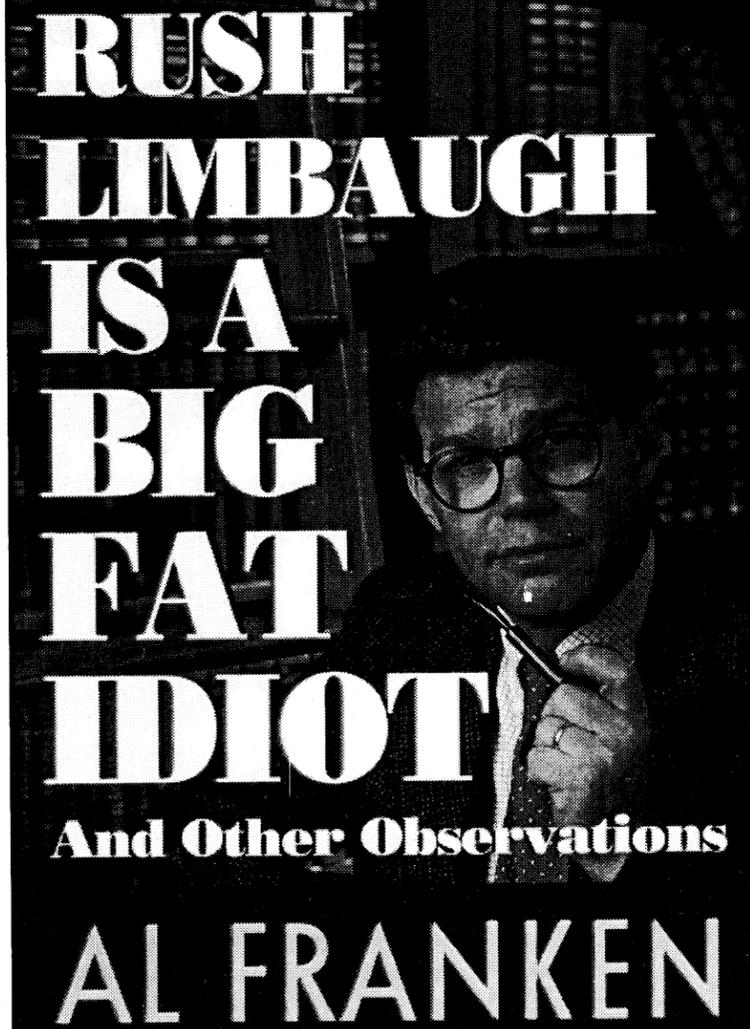

Clinton stocked his administration with an adulterous Hispanic, a couple of mildly crooked black guys, a six-foot-one woman whose mother used to wrestle alligators, and a four-foot-tall Jewish guy. Which doesn't look like America at all, but it's an exceptional model of diversity."

I guess Franken wasn't planning on being named Secretary of the Interior (for you youngsters out there that is a reference to James Watts. I'm not going to explain it, you'll have to look it up).

Not to be missed is the fictional short story "Chickenhawk." Rush, Phil Gramm, George Will, Clarence Thomas, Pat Buchanan, and Danny Quaylee, while "hawkish" on the Vietnam war, found some way not to serve. In "Chickenhawk," they are all led into battle by Oliver North (who actually served in Vietnam). Of course North single-handedly saves their butts only to get fragged by Gramm in the end. True story: North liked the story so much he actually had Al Franken on his radio show.

Al Franken is one of the original Saturday Night Live writers and creator of the Stuart Smalley character (I'm good enough, I'm smart enough, and doggone it, people like me!).

He can often be seen on *Politically Incorrect* with Bill Maher trad-

ing witticisms with Arianna Huffington and pimping this wildly funny book.

BILL GREVE believes books can only be dangerous if thrown at your head.

The Sting will give away its copy of this book to a SCT student who submits their name and address to *The Sting* by March 29. We will have a drawing March 30.

'96 Winter Formal: Putting on the Ritz

By KEVIN MARKS

Few events bring out the dichotomy of the casually dressed student compared to the elegantly dressed student more than a Formal. In particular, Southern Tech's Winter Formal held this past Saturday, February 17th.

Your fellow students, transformed for this occasion into princes and princesses, enjoyed a fine evening of entertainment and culinary delights.

Formals are often associated with pomp and circumstance but Southern Tech's gala event was none of these but, rather, it was a relaxed evening of fun and dancing, culminating with the crowning of this year's Mr. and Ms. Southern Tech.

Ray Smith, reading from a formidable list of accomplishments for each candidate, was hard pressed to include everything prior to the announcement of the winners. When he had finished, Abraham Wright was handed the scepter identifying him as Mr. Southern Tech for 1996, and Helen Gavrikova had the tiara placed upon her head signifying her selection as Ms. Southern Tech for 1996. Congratulations to them and the entire Court for their participation.

Following the crowning, the band resumed its excellent rendition of music from a wide variety of sources from rock to blues to jazz to soul.

The band's moniker is *The*

Patty Mack Musical Entertainment Services Group and consists of a fine blending of several musicians, topped off by the exquisite voice of Patty Mack herself.

Everybody was dancing to the beat of the music, though some distinguished themselves on the dance floor as masters of every step. I even recall seeing one couple doing the tango.

Others distinguished themselves in less traditional fashion. One student was seen "collecting" kisses from as many women as possible. By the end of the evening, his cheeks were covered red with the familiar shape of lips.

Another student was seen "sharing" his date with someone who had come alone. A rumor circulated that the student's date was actually his wife! What a fine gesture of brotherhood and camaraderie, found only at Southern Tech.

The Holiday Inn on Delk Rd. provided a marvelous environment for the celebration and the food was excellent.

Imagine feasting on platefuls of fried shrimp followed by luscious chocolate-dipped strawberries. A cash bar provided all the liquid refreshment one could desire, and the Holiday Inn staff were superb hosts.

If you were unable to attend this year's Formal, you missed a fun party, and you missed seeing your friends dressed to kill in fine threads of silk, and gowns of glitter. We hope to see you at next year's party.

8+3=12 MATH

By DR. JOEL C. FOWLER

Last issue's puzzle was to find the area of an isosceles triangle having altitudes of length 5, 6, and 6. The correct answer of 75/4 was received from Michael Harris, Kale Davis, John Blanchard, and Helen Spivak.

For a new puzzle, suppose that a freight train travels x times as fast as a passenger train. The freight train takes x times as long to pass the pas-

Stayin' Alive Building bloc

By JULIE SCALA, R.N.

Eating a good diet should be easy, right? There are six food groups of which you need daily servings. They include fats, oil and sweets, use sparingly; bread, cereal, rice and pasta group, 6-11 servings; fruit group, 24 servings; meat, poultry, fish, dry beans, eggs and nuts group, 2-3 servings; vegetable group, 3-5 servings; and milk, yogurt and cheese group, 2-3 servings. If you're not a number cruncher, you could get lost.

How can you be certain you're eating a proper diet and getting all the building blocks of a strong food pyramid? Keep a food diary for yourself and find out exactly what you do eat. Many people are surprised to know that they eat much less healthily than they thought.

Women average three servings while men average four servings daily from the non-nutritious fats and sweets group. List all the foods that you take into your body every day for about a week and see where your strengths and weaknesses lie.

To introduce more nutrition into your daily diet include:

Winter Formal an

Above Honest Abe receives His Scepter. Below Smooth Ray Smith falls for another girl.

senger train when going in the same direction as it does when they are going in opposite directions. Find the exact value of x.

Answers should be sent, via conventional methods or e-mail (jfowler@st6000.sct.edu), to Joel Fowler in the Mathematics Department. Correct answers and the names of the first to find them will be printed in the next issue of The Sting.

Dr. Joel C. Fowler is an Associate Professor of Mathematics.

Stayin' Alive

for eating right

- Eat small bite-sized fruits or pieces of fruit rather than eating candy or cookies when your sweet tooth calls.
 - Continue to eat the foods that you enjoy, but eat smaller portions. Slow down when eating and savor each bite and you should never know the difference.
 - Snack on cold cereal and skim milk topped with fresh fruit pieces.
 - Use more vegetables than necessary in your recipes that call for them.
 - Eat fruits and vegetables during every meal to meet recommended amounts.
 - Dunk your dipping meats or chips into fruit or vegetable salsa instead of gravies or sauces.
 - Enjoy dessert when you eat out but split it with at least one other person.
 - Buy single-serving packages of snack foods. These will limit your intake of these less nutritious foods such as potato chips.
- Julie Scala is the head of Campus Health Services.

HERE'S THE REVISED STANDARD EMPLOYMENT AGREEMENT. SIGN IT OR BE FIRED.

"THIS AGREEMENT IS BETWEEN THE COMPANY (HEREAFTER REFERRED TO AS 'THE ONLY COMPANY THAT WOULD EVER HIRE YOU') AND YOU (HEREAFTER CALLED 'PUDDING HEAD')."

IT SEEMS TO HAVE A BIT OF ATTITUDE. OUR LAWYERS TURNED ON US. I SUSPECT RABIES.

I CAN'T BELIEVE THEY EXPECT US TO SIGN THESE NEW EMPLOYMENT AGREEMENT FORMS.

ACCORDING TO THIS, ANYTHING WE EVEN THINK OF BECOMES THE COMPANY'S PROPERTY. I'M SURPRISED THEY DON'T CLAIM OUR FIRSTBORN SONS!

WHAT DO YOU SUPPOSE IT MEANS WHEN THEY COPYRIGHT OUR "DNA AND ALL DERIVATIVE WORKS"? THEY'D MAKE AN EXCEPTION FOR YOU.

LOOK AT THE AGREEMENT MY COMPANY IS FORCING US TO SIGN. THEY CLAIM THE RIGHTS TO ANY IDEA AN EMPLOYEE EVER HAS.

NO PROBLEM. JUST RETYPE IT WITH A FEW STRATEGIC OMISSIONS AND SIGN IT. THEY CAN'T PROOFREAD EVERY ONE.

WOULDN'T THAT BE DISHONEST? MAYBE YOU COULD JUST SHOW THEM SOME OF YOUR IDEAS AND THEY'D GRANT A WAIVER.

THIS 3-D COLORED PIE CHART SHOWS AN UNEXPLAINED RISE IN EXPENSES.

YOU EACH GET A BINDER OF COLORED PIE CHARTS SO YOU CAN HELP FIND THE CAUSE OF OUR RISING EXPENSES.

HOW MUCH DO COLOR COPIES COST? I THINK I SEE IT! IT'S NOT THE "MAGIC EYE," DOOFUS.

I MOVED OUR SOFTWARE DEVELOPMENT WORK TO THE IMPOVERISHED NATION OF ELBONIA.

I'M BRILLIANT. THEY WRITE HIGH-QUALITY CODE FOR SIX CENTS A DAY! THERE'S NO RISK!

RED ALERT!

ELBONIA

TOMORROW YOU BE THE COMPUTER.

I HEARD THAT OUR SOFTWARE DEVELOPMENT WORK HAS BEEN MOVED TO THE TINY NATION OF ELBONIA.

THINGS CAN'T GET WORSE THAN THAT.

DILBERT, YOU'RE IN CHARGE OF INTEGRATING THE ELBONIAN'S SOFTWARE WITH OUR EXISTING SYSTEMS.

OKAY, NOW IT CAN'T GET ANY WORSE. YOU MIGHT WANT TO GET A TUBERCULOSIS VACCINATION.

SOMEWHERE IN ELBONIA

I'VE BEEN ASSIGNED TO CHECK THE SOFTWARE YOU'RE WRITING FOR US UNDER CONTRACT.

THE DOCUMENTATION IS WRITTEN IN OUR OWN ELBONIAN LANGUAGE. IS THAT A PROBLEM?

THAT'S BETTER THAN I'D HOPED. I WAS AFRAID NOBODY HERE KNEW HOW TO WRITE. WRITING IS EASY. SOMEDAY WE HOPE TO READ, TOO.

BEFORE I ACCEPT THE SOFTWARE YOU WROTE UNDER CONTRACT, TELL ME WHAT DEVELOPMENT METHODOLOGY YOU USE.

WE HOLD VILLAGE MEETINGS TO BOAST OF OUR SKILLS AND CURSE THE DEVIL-SPAWNED END-USERS.

SOMETIMES WE JUGGLE.

AT THE LAST MINUTE WE SLAM OUT SOME CODE AND GO ROLLER SKATING.

I WOULD FIND THIS HUMOROUS IF NOT FOR THE PIG ON MY BACK.

YOU SAVED ONE MILLION DOLLARS BY HAVING PROGRAMMERS IN ELBONIA WRITE SOFTWARE FOR US.

BUT WE WASTED FOUR MILLION DOLLARS TRYING TO DEBUG THE SOFTWARE.

AND THE ENTIRE STAFF OF OUR QUALITY ASSURANCE GROUP QUIT TO BECOME MIMES.

LET'S BLAME THE MIMES; THEY WON'T TALK.

 KKKKKKKKKKKKKKKKKK
 EEEEEEEEEEEEEEEEEEE

I am glad to see everyone made it back from Chattanooga alright. I'm sure the people at the hotel were just as glad to see us go. The formal was a blast, at least that's what they tell me. I want to say thanks to the alumni who showed up.

We ended the basketball season on a good note by beating Pi Kappa Phi and Sigma Nu. Soccer season is going well, when we play, and everyone get ready for softball season just around the corner.

We would like to say happy birthday to J.D. Also coming on March 4 is our next alumni meeting. Everyone mark your calendars for Initiation and the races on March 8-10. Get ready for the alumni St. Patrick's day party, time and place to be announced. **Tekes Raise Hell!!!**

Sigma Nu

Iota Pi 332

The Green Machine is on the way and is scheduled to make its stop at the Sigma Nu House on St. Patrick's day weekend (that's a two day party). Study for finals and then come out for the party of the quarter.

The weather seems to be getting warmer brothers. This kind of weather promises a good retreat this quarter. The first weekend of March is the time and the house is the place.

Baseball is in the air. Students, show your support for the Southern Tech baseball team by cheering them on at all of the games.

Where is everybody going for Spring Break this year; Daytona, Panama City, The Dead Sea, or Marietta, GA. Wherever it is, have fun and be safe, not sorry. Sigma Nu wants as many students as possible to return for Spring quarter, and more importantly, **SPRING RUSH.**

Good luck on finals

Get busy living or get busy dying

Gamma Phi Beta

SNOW #162

I hope everyone enjoyed the weekend, Homecoming and the last weekend of Mardi Gras. I know many of us were pulling for our own nominee for Ms. S. Tech; however, we do want to congratulate Abe and Helen for Mr. & Mrs. S. Tech.

I have to make a retraction from the last article. I meant to say the TKE's had a social, not a for-

mal, but they did have a formal the weekend of Homecoming (I was close). I hope I didn't get anyone in trouble with their girlfriends.

We had a scavenger social with the Sigma Nu's and I think we found a little **too** much (?). Thanks for the good time guys. Thanks for the Valentine's that were sent to the Gamma's, for some of us, that was our only Valentine. (I'm not talking about myself, ...really) Thankyou Sure Shots, it's about time! Fat Tuesday was an adventure, especially for our own Jules, Amy, Angel and Jacqueline. Someone needs to tell Amy that chasing boys in cars with beads in your hand is prohibited. Ha-Ha! Gotta love LIFE.

Don't forget big/little 3/1. Happy B-day to Catherine 3/2. Carrington and Jennifer watch your backs on March 8th. Have a great St. Patrick's Day.

Pi Kappa Phi

By Snake Eyes and Roadblock

Alright everyone, we going to start this article by saying Praise Jesus! The "Dukes of Hazard" is back on T.V. It can be seen at four and seven weekdays on T.N.N. Congratulations to Jon Hamby for making The Journey of Hope, now Rick has someone else to sweat profusely alongside of. Also congratulations to Helen and Abe for getting

Mr. and Mrs. Southern Tech.... sorry John, and sorry John for not going to Mardi Gras. For those of us who went, we saw things that were pleasing to the eye, and yet we saw things that made us want to vomit, like a 30 year old man wearing tight leather for instance. And this was the first 5 minutes we set foot on Bourbon street. For those of you who are thinking of going, remember, there is no such thing as an ugly woman in Mardi Gras, there are many different levels of drunkenness. Remember spring softball is coming up, so start tuning those hitting skills. Here ye, here ye **March 15th** at the PI Kapp House... The Blowout Party!!! Movie of the Week = "Happy Gilmore." Quote of the Week "Hey Hilary, Guess what?" Finals are coming up, everybody study hard. Now you know, and knowing is half the battle. **NOT QUITE** enough said.

are you ready for

Southern Tech... Step Show In the House

By T.P.

Last Friday night Southern Tech hosted the second annual Back to the Motherland Step Show. The show was sponsored by the Black Student Association and promoter and president Matthew "Chu" Nelson achieved success once again with a mega turnout; 500 PLUS people in the house!

The show went off well again and was even bigger than last year. "At this rate we're outgrowing our space," said one organizer. "Next year we'll be even bigger."

Southern Tech is building a

reputation as a serious step show venue and the event was regarded as one of the more successful on campus by many in attendance.

Participants were from Southern Tech, Georgia Tech and West Georgia College.

First place went to the Alpha Phi Alpha Fraternity, Inc. from Georgia Tech. Second was awarded to the ladies in pink of the Alpha Kappa Alpha Sorority, Inc. from West Georgia and third went to Omega Psi Phi Fraternity, Inc. from Georgia Tech

The after party was held at Club Escape in Marietta.

Reprioritize from pg 1

President for Business and Finance, stated that these items are a priority, and if not done by new funds, they will be funded by redirecting existing funds. "It's a kind of shell game that goes on with this." Something that students might not be aware of, the construction seen on the parking lots and roads is donated from the Dept. of Transportation free of charge and is not considered a budget item.

The Southern Tech strategic priorities are set internally by the

Strategic Planning Committee. When asked what voice the students have in these issues, Cheshier stated that the SGA president, Bill Finnick, has the same voice as the other fifteen members of the planning committee. Cheshier said that the departments have submitted their wish lists and the President's staff are filtering through them to ensure they match the priorities. A final list will be circulated around campus to describe what is submitted to the chancellor.

Uncle Sam SCT Needs You

By KEVIN MARKS

Volunteer *n.* One who gives or performs services of their own free will. To give or offer on one's own accord. To enter into an undertaking of one's free will.

The Student associations are filled with opportunities in which to volunteer your services. From layout assistance for this publication, to the multitude of professional organizations on campus, to the Campus Activity Board, to Student Center work.

The list goes on and on. In fact, there are about fifty such organizations on campus, and all have one common thread: They need volunteers to be successful.

What is particularly nice about volunteering at SCT is that it provides all students with a better environment, and it will make you, the volunteer, feel good.

Personally, I have chosen to give several of my hours per week to *The Sting*. I find the campus newspaper to be well thought out, well designed and informative. I volunteered as a vehicle to express my opinions and attitudes, and to inform my fellow students of news and events. This is a pleasurable experience for me, one which I would love to share with others. Unfortunately, I cannot, and such is the nature of volunteerism.

Nowadays, people are too busy to be bothered with

organizations, even if they directly affect their daily lives. "No," they say, "I would rather sit on a rock and do nothing. I would rather skateboard down Main Street. I would rather listen to 120 decibel music and watch my face melt." Yes, excuses abound and all are as empty as space itself. How unfortunate that people don't take up the "cause" anymore. The positive effects that are a direct outgrowth of volunteering are immeasurable, transcending even the bounds of our lifetime. Imagine all the positive *karma* you could add to the universe!

What are you waiting for? You are a college student now, away from mommy and daddy (most of you), and you are mature enough (most of you) to prioritize your lives and your time. Nobody expects you to give up your A in Circuit Analysis, English, C++, or whatever.

Nobody expects you to lead the charge for every SGA organization. However, with so many to choose from, you have the unique opportunity to offer your expertise in some area on campus and become part of the solution, rather than part of the problem. Burn that candle on both ends for one quarter and feel the renaissance of your spirit.

What are you waiting for? Get out there and VOLUNTEER!

English's Quick Kick in the Butt

By BILL FINNICK

A topic of concern on many college campuses of late has been retention. Retention as in how to keep flunkosis from spreading throughout the ranks of their student bodies.

The Student Advisory Council, a sitting of state institution Student Government Associations who have trouble sometimes counting to twenty, is looking at the Regents' Test. While not a method normally considered a primary source of removing those who can not cut it academically; enough students are unable to pass this two part test to create sectors wanting the hurdle lowered, or even dropped altogether.

Then there are those who would have higher education stop with arithmetic. Yes, there are those who will point out that grocery stores now compute the cost per serving for you to figure the value you can find in choosing the economy size packages. Our President may well be the one who knows the cost of a gallon of milk and a dozen eggs; so if that is all it takes to be the leader of the world's last superpower then basic math should be good enough for a college education.

Then there are schools like Tech and Tech, Southern and Georgia respectively, that have built reputations on certain sieve courses. Dirt is one of those classes where one can learn about sieves, and if not careful find themselves sieved. Leaders of scholastic internment at these arenas of mental gymnastics feel that there is a need for professional organizations to set up tutoring programs to help their underclassmen.

What I personally feel would go along way in eliminating barriers to graduation would be the wholesale eradication of the lowly comma. The comma is the modern day rat of academic black death. Oh, it calls to the student "use me the reader needs a break" and so one drops a comma; and then another ten points. Should there have been one prior to that last quote? Can one write a sentence of more than eight words without using one? If you have an opening comma does one need a closing complimentary comma?

Lets face it, the comma kicks butt. Just look at it (.) it's a boot coming for the unsuspecting student's rear.

Bill Finnick says, "When a comma won't do try a semicolon!"

Never Say Never

By CHARLES BANTON

Never, Ever, give up. One Tuesday afternoon I was searching drastically for help with my bone crushing Physics class. First I went to my professor's office during his office hours and did not find him there. I then went to the Physics office, who sent me to the learning resource center, promising me it was open. After finding their office closed I was furious.

I went to the administration building in a last desperate attempt. The nice lady behind the window gave me a puzzled look. Finally, a guy who looked really busy, stepped up and said the magic words "How can I help." His name is John Andrew and he deserves a big thank you.

John stopped everything he was doing and helped me work through my frustrating homework. He wanted to make sure that I understood what I was doing and it wasn't even his job. There needs to be more people like John on campus.

What would you do if you where in my situation? Would you just give up and tell your professor that the reason you didn't do your homework was because he wasn't in his office? I think people today give up too fast.

I know people who allow circumstances to stop them from doing incredible things. People run from their problems instead of pushing through and dealing with them. Any thing is possible for those who dare to take on the challenge.

Don't tell me you're unique and your situation is different because we have all felt like that at one time or another. So don't wimp out and sell yourself short. So what, you made a mistake, get back up. A friend told me once "if you're not making mistakes, you're not doing anything."

Anyone who believes in the God of the bible cannot accept a life of defeat. Didn't Jesus say "Anything is possible for God." and "If God is for you, who can be against you."

Fax 708 475.8807

LETTERS TO THE EDITOR

The Sting welcomes letters on any topic. Letters should be typed or neatly printed, double spaced and should not exceed three hundred words. Letters must include a name, address and phone number for verification purposes. But names may be withheld on request. *Unsigned letters will not be printed.* *The Sting* reserves the right to edit letters for style, content or size. All letters are run on a space-available basis. Please send all letters to *The Sting*, Southern Tech, South Marietta Parkway, Marietta GA 30060-2896, or E-mail cdesmond@st6000.sct.edu, or drop them off at *The Sting* office - Room 252 in the Student Center. All letters must be in before the deadline printed below.

ORGANIZATION ARTICLES

Articles must be submitted by the deadline printed below and typed on a 3.5 inch Mac. computer disc. Please limit articles to two hundred words. All such articles are subject to editing for style or content, and are run on a space-available basis.

JOINING THE STING

Any student paying Activity Fees is eligible to join *The Sting*. We prefer creative students who have passed English 110. Come to our meetings Thursdays at Noon, in Room 220, upstairs in the new Student Center, or call 528-7310.

THE NEXT DEADLINE

All organization articles, letters-to-the-editor, advertisement requests, and public service announcements must be turned into *The Sting* by April 10, 1996 to be considered for the April 16, 1996 issue..

SUBSCRIPTIONS

Subscriptions to *The Sting* are \$3 a quarter or \$12 an academic year. All subscriptions start with the first issue of the succeeding quarter. Checks for subscriptions should be made payable to *The Sting*.

PRICE

The Sting offers to every student, faculty, staff member, alumni, and official visitor of Southern Tech complimentary copies of each issue numbering up to 0.25% of the print run for the respective issue. Every copy above 0.25% is to be purchased according to a price set by *The Sting*. Taking more copies of an issue that constitutes 0.25% of the print run of that issue is THEFT and a criminal offense.

EDITOR'S EDITORIAL

Once again SCT received national recognition because of one of their professional organizations. The National Society of Black Engineers (NSBE) is the largest organization on campus and their organizational successes were recognized when they received Chapter of the Year award for their region (*see pg 1*). NSBE's leadership was demonstrated this month as they hosted a blitz of popular events which attracted hundreds of people from the community.

Another proficient group on campus is the Society of Automotive Engineering (*see pg. 3*). The technical plans and accomplishments of the formula car's talented team is awesome.

These organizations, along with several others like ASCE, should inspire other professional groups to rejuvenate themselves.

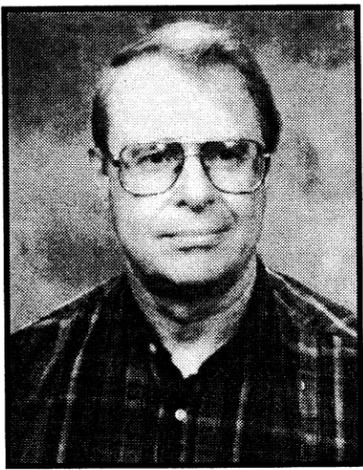

The February 28 budget informational meeting will begin next years budgetary cycle. Because of hard work by SGA, more money should be available to active professional organizations next year. Groups should take this opportunity to prepare ambitious plans to join top SCT organizations in making a difference.

Trent to Retire

By COLLEEN DESMOND

Professor Edward Trent will be retiring from teaching in the Electrical and Computer Engineering Technology department at the end of winter quarter. Trent began teaching part time at Southern Tech in 1972 and, after retiring from Lockheed, started teaching full time in 1989.

Trent believes that teaching is one of the most rewarding occupations. "In essence I believe the reason I teach is it the only way I can leave a legacy for the future," said Trent. Although Trent has a bachelor's and master's degree in electrical engineering from Georgia Tech, he likes the applications oriented approach to education that Southern Tech offers. "One student came back to say that because of the applications oriented background he

Professor Trent

was able to solve problems that other engineers couldn't do," said Trent.

Trent and his wife plan to move to their farm in south Georgia after his retirement. He plans to stay physically active by planting trees and caring for his farm and mentally active by continuing to teach part time at area colleges. "I still have some mountains to climb that I haven't climbed yet," said Trent.

Lame Duck Tales...

The History of Southern Tech, Part V

By Dr. RICHARD BENNETT

The announcement, in June 1958, of the pending relocation of Southern Tech to Cobb county was greeted with various reactions. In Dekalb county there were few recriminations as the county was busily engaged in building its plans for use of the former Naval Air Station facility, and there were, after all, two well-founded colleges in the county. In Cobb county, the news was greeted with joy and a sense of triumph. For the faculty and students of Southern Tech, the news was important, but there were still classes, grades, and the immediate concerns of education. Since the school was only a two year school, the move to Cobb would scarcely affect any of the students enrolled in June 1958.

The move to Cobb was to affect the administration of Southern Tech dramatically, almost from the start. There were not only the "routine" issues of running a school with an increasing enrollment and a growing national reputation, but architects plans to be considered, building budgets to be prepared, and relationships with two counties to be maintained or developed. The money for the new campus buildings was to be released by the Governor's office, but the construction had to come in within budget, for neither Georgia Tech, the Board of Regents, nor the Governor's office were inclined to supplement what had been set aside for the new campus.

During the transition phase to Cobb, there were also numerous challenges which Southern Tech faced. The 1959 Georgia legislature took the whole University System hostage over budget issues, threatening to close it down. This hurt enrollments throughout the system for a time. In mid-1959, L. V. Johnson was promoted to the Directorship of the Georgia Tech Engineering Extension Division, and Professor Hoyt McClure was promoted to Director of Southern Tech. Though this change of leadership actually represented a

continuity and strengthening of the school's position in relation to her parent institution, it also meant some change of leadership styles. There were also problems with the contractor and his supervisors, and at least one short-lived strike along the way, which slowed down progress on the new campus construction, and added an additional year to the whole process.

At Southern Tech itself, the transition period was a busy one for faculty as inventory and equipment underwent careful examination. Desks were repaired and refinished. Lab equipment was similarly repaired. Where the equipment was too far deteriorated, purchase of new equipment was planned. The move itself would be a massive undertaking, not only including a moving company for the heavy items, but files, books and personal equipment and small items. All this would have to be done between quarters, so that when the school opened in Cobb county at the beginning of its first quarter there, it would be "ready for business." Logistical planning for this began months in advance, with the delays only complicating the situation.

After some forceful persuasion during June 1961, it was determined that enough buildings would be far enough completed by the end of summer quarter to allow Southern Tech to move to the new campus, and the final details were worked out. The beginning of fall quarter was delayed a week to allow sufficient time to complete the move. Finally, in September 1961, as summer quarter came to a close, caravans of cars, trucks, vans, and moving vans began ferrying Southern Tech to its new location. The same spirit of cooperation which had greeted the opening of the school in 1948 continued as the school moved into its permanent home. There was an excitement about the new campus, the new buildings and the new era upon which Southern Tech was about to embark.

More next time...

Perides Honored 500th Career Game

Inside The GAC

Southern Tech Head Men's Basketball Coach, George Perides, notched his 500th career coaching win last Wednesday night as his Running Hornet's edged LaGrange in Marietta 67-66

Junior center, Kevin Williams, grabbed an offensive rebound on a missed free throw and then after being fouled went to the charity stripe and hit one of two to give Southern Tech the victory and Perides his coaching milestone.

"The kids in this program should get all the credit," said Perides, who is in his 20th season as head coach of the Running Hornets. Before arriving at Southern Tech in 1976, Perides coached four years at Palm Beach Atlantic College in West Palm Beach, Florida.

"Sometimes you get mad at the kids and then later you hug them. We all want to win, but the bottom line is, how are the kids representing the school? How successful are they after playing here? Southern Tech gave me the opportunity to coach basketball and I am so glad that they have stuck with me for so long".

Coach Perides kind of down played the milestone, but his fam-

ily, who were in attendance at the game as they usually are in the Hornets nest, were very proud of him. His son remarked, "I want everyone to know 'my dad has won 500 games whether he does or not'!"

Coach Perides has become an icon of sorts in the old G.I.A.C. and now the G.A.C. as most fans at home or on the road have come to expect the colorful coach to show up on the sideline in his trademark jogging suit and lead his team to a victory.

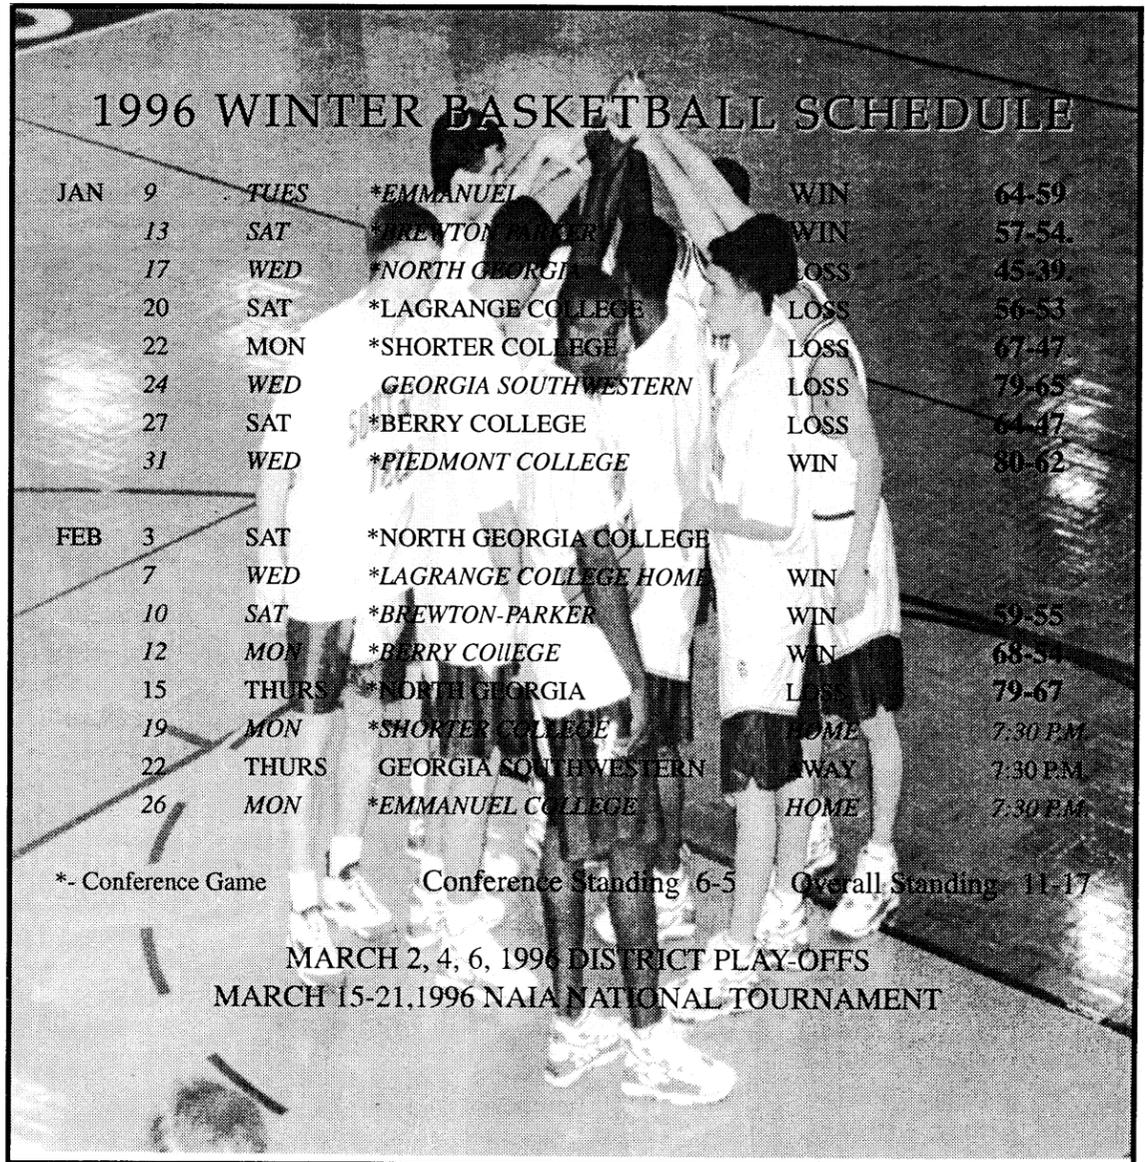

Wins have become commonplace for Perides as he has averaged over 20-wins a season in his 20 years at Southern Tech.

Player of the Week

Inside The GAC

Southern Tech's Kevin Williams and North Georgia's Julie Crowe have been named the G.A.C. basketball players of the week.

Williams, a 6'4 Junior forward from McDonough, Georgia, led the Running Hornets to a pair of G.A.C.
