From 9/11 Until Now

A Timeline

JOSHUA SHANNON

September 11, 2001: Terrorists hijack four airliners and fly three of them into the 1 and 2 World Trade Center and the Pentagon, with the fourth plane, Flight 93 crashing into the ground in the Pennsylvania countryside. A little more than 3,000 people die. Airline travel is stopped for several days, and the stock markets don't open again until the following Monday. President Bush addresses the nation, calling the terrorists "faceless cowards." That night, Congressional leaders speak on the steps of the Capital Building; afterwards, they and many other members of Congress sing "God Bless America."

September 13, 2001: The White House makes the first official connections between Usama Bin Laden, al-Qaeda, and the attacks.

September 14, 2001: President Bush makes his first trip to Ground Zero, and briefly addresses the people helping in the cleanup.

September 20, 2001: President Bush addresses a

joint session of Congress. In it, he calls for the Taliban government in Afghanistan to turn Usama Bin Laden and other al-Qaeda leaders over to US officials, to allow inspections of terrorist training camps, and to release all foreigners detained by the government.

October 2, 2001: The USA Patriot Act, a bill the President is encouraging in order to aid in the war on terrorism, is introduced into Congress.

October 4-19, 2001: The anthrax attacks start. The first target is the American Media, Inc. building, home to a tabloid news service. Over the next two weeks, Sen. Majority Leader Daschle, Tom Brokaw, and Sen. Leahy are sent anthrax-laced letters, and several other places are sent hoax letters. 5 people are killed, with 11 being infected.

October 7, 2001: The US led air war against Afghanistan begins.

October 10, 2001: The government asks that unedited taped messages from Usama

Bin Laden not be aired on US networks out of fear that they might contain secret messages.

October 16 & 17, 2001: The Senate shuts down its office buildings and the House of Representatives shuts down entirely due to the anthrax attacks.

October 19, 2001: The ground war in Afghanistan begins, led by US Special Forces.

October 24, 2001: The House of Representatives passes the Patriot Act.

October 26, 2001: The

Senate Passes the Patriot Act, and President Bush signs it into law.

November 13, 2001: The Northern Alliance, the main Afghani opposition group to the Taliban captures Kabul, Afghanistan, the capital.

November 26-29, 2001: A riot in a fortress prison near the captured city Mazar-I-Sharif results on over 400 captured Taliban fighters and CIA agent Mike Spann, the first American fatality, being killed, and the revelation of the

SPSU Remembrance Service

MARK CAMPBELL

Southern Polytechnic State University will honor the victims, survivors and heroes of September 11th with a remembrance service and freedom celebration on the first anniversary of the al-Qaeda attacks on American soil. A remembrance service will be held at the Globe between the student center and the administration building from 9:00 to 9:20 AM. At 11:30, lunch will be served near the library.

After the picnic lunch, a live oak will be planted in memory of September 11th. "The tree will be planted west of the Rock," explained Eddie McCracken, SPSU's Horticulturist. "I feel it will have good visibility at this spot in the future, because, according to the master plan, the 'E' building will eventually

be demolished and become a green space. You will have a more open view of that area as you drive around campus."

McCracken explained the choice of a live oak, stating, "The oak was chosen last year as our national tree by the National Arbor Day Foundation. They did not specify a particular species of oak, so I chose the live oak

because it is the state tree of Georgia."

A plaque, to be placed near the oak, will read, "Planted in the celebration of freedom and dedicated by students, faculty, staff, and alumni of Southern Polytechnic State University to the victims, survivors, and heroes of September 11, Continued on Page 5

Student Accused of Child Molestation

ZACHARY JONES

Southern Polytechnic State University student Jasjit Singh Kahlon, age 21, was arraigned in Cobb County State Superior Court on Friday, August 16th, on two charges of child molestation. A jury by trial is scheduled to begin on Monday, October 14th, 2002 in Marietta. Kahlon has pleaded innocent to the charges.

According to the indictment, Kahlon was accused of committing "an immoral and indecent act to" a

Energy Structure Still Vulnerable

MARK CAMPBELL

Almost one year after the September 11th terrorist attack on the Pentagon and the World Trade Center, pipelines that transport the eastern seaboard's fuel remain vulnerable. Two companies, Colonial Pipeline and Plantation Pipeline, transport 115 million gallons per day through the Atlanta area.

Both companies have stated that they have increased security at their facilities. While keycard access is used for fuel truck stations, no observable security changes were found at booster pump stations that move fuel through the pipelines.

The two companies combined provide almost half of the 235 million gallons of gasoline and other fuels used from Alabama to Maine. Colonial supplies about 95 million gallons of fuel daily. The Colonial system extends from Pasadena, Texas to Linden, New Jersey, for the most part using two pipelines. Plantation's pipeline system runs from Baton Rouge to Washington, with the mainline running from Collins, Mississippi to Greensboro, North Carolina. Plantation ships about 20 million gallons daily.

Senator Max Cleland (D-GA) stated, "While it is true that there are countless potential terrorist targets in the metro Atlanta area - from stadiums to bridges to airports - some targets are more vulnerable than others, and some would be more devastating if compromised. I put the pipelines in Atlanta in the second category - if compromised, the very nature of a petroleum pipeline would make any attack a very serious incident."

"For better or worse, these pipelines are privately owned and operated, so there is not a way to mandate that their owners provide security in exactly the way the federal government would like," Cleland stated. "However, as Congressman John Lewis said, 'We may have come here in different ships, but we're in the same boat now.' Meaning, we have to undertake security in this country with a spirit of cooperation for the common good."

Congressman Saxby Chambliss (R-GA) commented, "Earlier this summer, the House passed H.R. 3609, the Pipeline Infrastructure Protection to Enhance Security and Safety Act, which I voted for, specifically addresses issues related to pipeline security." Chambliss explained, "Indeed, the bill called on the Department of Transportation to coordinate with other federal and state agencies on deployment of security personnel to protect pipelines and called for development of contingency plans for setting up alternative pipeline routes in the event of a terrorist attack."

"Moreover, H.R. 3609, requires every pipeline operator to develop and implement a terrorism security program, expands "whistle blower" protections for pipeline workers, allows the Secretary of Transportation to award technical assistance grants to groups for engineering and scientific analysis of pipeline safety issues and to promote the participation in official DOT processes," Chambliss added.

Chambliss continued, "[The bill] authorizes \$100 million for research and development to improve pipe quality, materials inspection, security, information control, improve excavation and repair technologies, provides grants to emergency responders who are the first-on-the-scene of an accident to improve their preparation in the event of an emergency, as well as the coordination of accident responses."

Colonial Pipeline declined to comment further on security. However, Kinder Morgan spokesman Rick Rainey, speaking for subsidiary Plantation Pipeline, stated, "We've also taken appropriate steps to enhance security, some of which include: increasing the number of security personnel on site; additional fencing; restricting access; [and] additional training for employees."

Steve Baker, Manager for Media and Marketing Communications, stated, "Colonial Pipeline does not disclose the exact number or location of these booster stations due to our efforts to protect and secure the pipeline and, more importantly, the people who operate the pipeline and the landowners who live near the pipeline."

Rainey added, "The number of pump stations on the Plantation system is 39."

Colonial operates both a 40 inch mainline and a 36 inch mainline from the Atlanta Junction facility in Austell in Cobb County to the Greensboro, North Carolina delivery facility. According to a National Transportation Safety Board report, twelve pump stations along the route move the fuel through the pipelines. The stations each have from four to six pumps, rated from 2000 to 5000 horsepower each.

Booster pump stations from Austell to Anderson, South Carolina, remain guarded by simple chain-linked fences topped with three strands of barbed wire. No cameras, or concrete barriers to prevent vehicles

from crashing through gates, were observed.

Plantation Pipeline booster stations were similarly unguarded. However in a number of cases, pump stations for the older Plantation system (established in 1942) were observed inside more secure delivery facilities.

Colonial's Smyrna pump station, near Vinings, has wooden posts in the ground to replace a pedestrian access gate near a Georgia Power substation. The station, with four pumps handling 55,000 gallons per minute, lies within 2000 feet of Cumberland Mall. A major rail line and Interstate 285 are located near the facility.

Both Plantation Pipeline and Colonial Pipeline spokesmen stated that they would not comment on the presence or lack of concrete vehicle barriers, citing company policies not to discuss specific security measures.

Chambliss cautioned, "In considering pipeline safety legislation, Congress is also working to address what information regarding pipeline facilities and operations should be available to the public. We

need to be careful not to provide information that would be useful for terrorists to plan attacks on these facilities."

Addressing supply disruptions, a former senior economist for the Federal Trade Commission, Dr. James Langenfeld, said, "In the short term, if a pipeline such as, say, Colonial, were disrupted, in areas that are served primarily by the pipeline, you always see a price spike. Prices always go up."

Langenfeld has addressed the economic consequences of accidental pipeline disruptions, including a Colonial Pipeline spill on the Reedy River in South Carolina that occurred June 26th and 27th, 1996.

A source at the Strategic Petroleum Reserve Office in the Department of Energy stated that 1.5 million barrels of oil can be refined at east coast refineries, mainly near Philadelphia and Newark, New Jersey. "A lot of [refined] product moves up from the 500,000 barrel Hess refinery in St. Croix, U. S. Territories [Virgin Islands]," he added.

A 42-gallon barrel of crude oil yields 44 gallons of refined products, including 19 and a half gallons of gasoline.

SPSU Offers New Programs of Study

ZACHARY JONES

Starting this semester, students at SPSU have three new programs of study from which to choose: Bachelor of Science in Biology, Bachelor of Science in International Studies: Global Technology, and Masters in Business Administration.

Regarding the aim of the new Biology Program, Biology Program Head, Dr. Russell Patrick said, "Our big focus will be on molecular biology, bioinformatics, and also biochemistry." With changes in the way biological systems are described, the degree aims to "prepare students to meet this challenge." Dr. Patrick will lead the new Biology program along with 3 other full-time Biology faculty members. Further, the department looks

to have new Biology labs available for use soon.

The Bachelor of Science in International Studies: Global Technology seeks to "produce graduates who not only understand the political and economic processes of globalization, but also possess technological skills and knowledge that will allow them to deal with the new demands of the global economy." Under the degree, the student will choose a technical specialization out of the many technology programs offered here at SPSU (or a General Technology Concentration). "The program is the first of its kind in the nation! We are looking to set the trend with our program," said Professor Emeritus Charles Weeks, who

headed up the formation of this new degree.

The third new program of study mentioned is truly not a "new" one, but rather a change of name and enrichment of curriculum, from Masters of Science in Management to Masters in Business Administration. Student will choose from specializations in marketing, operations management, management of technology, and management of information systems.

Also added to the 2002-2003 Academic Catalog are the Bachelor/Masters of Science in Information Technology and Bachelor/Masters of Science in Software Engineering. These programs were added last year.

William Bennett to Speak at SPSU

SPSU PUBLIC RELATIONS

Chairman of Americans for Victory Over Terrorism (AVOT) and former Secretary of Education William J. Bennett will speak at Southern Polytechnic State University on Thursday, September 12th at 7:30 p.m. in the school's Gymnasium. A signing of Dr. Bennett's latest book, "Why We Fight: Moral Clarity and the War on Terrorism," will follow the lecture. The program is free and open to the public, as part of the Robert D. Spratlin-sponsored lecture series.

Dr. Bennett served as Secretary of Education and Chairman of the National Endowment for the Humanities during the Reagan Administration. He also served as Director of the Office of National Drug Control Policy under President George H. W. Bush.

Currently Dr. Bennett is Co-Director of Empower America, a Washington-based organization whose mission is to ensure that government actions foster growth, economic well-being, freedom and

individual responsibility. Dr. Bennett also co-chairs, with former Democratic Senator Sam Nunn, the National Commission on Civic Renewal and the Partnership for a Drug-Free America with former New York Governor Mario Cuomo.

A project of Empower America's education and research arm, Empower.org, AVOT's goals are aimed at addressing present terrorist threats and the ideologies surrounding them. AVOT will be a dynamic organization dedicated to fortifying public opinion via

intellectual firepower and mass communication.

Upon the results of a recent Empower.org poll, Dr. Bennett stated, "This is the first comprehensive poll of American college students' attitudes and opinions about the war on terrorism this year. The findings reveal that our college students, to say nothing of our high school students, need to know many things better: the virtues of American democracy, the role we play in the world, and the names of players in that role."

Dr. Bennett is a Distinguished Fellow at The Heritage Foundation and co-director of Empower America. He holds a Bachelor of Arts degree in Philosophy from Williams College, a Ph.D. in Political Philosophy from the University of Texas and a law degree from Harvard University. He is also the author of 14 bestselling books, many about American culture and values.

Censorship or Quality Control?

Lawsuit by student-newspaper editors tests how much oversight administrators can assert

JEFFREY R. YOUNG

Margaret L. Hosty and Jeni S. Porche wanted to bring more investigative edge to Governors State University's student newspaper, *The Innovator*, when they took over as editors two years ago.

The two women, graduate students in English, wrote several scathing articles, attacking the classroom performance of professors, by name, and characterizing administrators as antagonistic to student concerns.

The students say university administrators moved quickly to silence them.

A series of minor acts were intended as harassment, they say. According to the students' version of events, officials had the locks on the newspaper office changed, for instance, and didn't give Ms. Hosty and Ms. Porche the keys. Campus-security officers had to let the editors in when they wanted to work on the paper. And someone from the university read the newspaper's email messages and deleted some of them.

Then — in what the students say was clearly an illegal attempt to violate their freedom of speech — a university dean telephoned the paper's printer and asked that an administrator be notified when the paper arrived, so that officials could review copies before each press run. The dean, Patricia A. Carter, also ordered the printer not to print the paper until an administrator signed off on it. The printer

says he refused the request, and he notified the students instead.

Soon afterward, the students filed a lawsuit in federal court that is being closely watched by student-press and professional-journalism organizations, which say that a ruling against Ms. Hosty and Ms. Porche could subject college newspapers to the same restraints faced by high-school papers.

"We told [university administrators] they were breaking the law, and they did not care," says Ms. Hosty, who served as the newspaper's managing editor from May 2000 until her term ended last April. "The Constitution means something to us...People have given their lives for these rights, and the thing that really [bothers] me is that the university violated the Constitution."

Governors State officials say that they've done nothing illegal, and that they were only trying to make sure that the newspaper was operating in a fair and ethical manner.

University officials apparently changed the locks after a reported break-in of the newspaper office, and they deny any tampering with e-mail messages, according to court documents. Ms. Carter — who did not return calls from a reporter for comment — has said she did call the printer, but she has denied that she wanted to approve each issue's content. She says she

wanted an adviser to check for journalistic quality, including grammar and spelling, according to court documents.

Administrators have also accused the student editors of failing to follow journalistic standards for fairness and good grammar.

Chief among the concerns of student-press and professional-journalism groups: The university appears to be making the argument that it has the legal right to review the newspaper before publication — even for content. A recent brief on behalf of the university by the Illinois attorney general, James E. Ryan, argues that Governors State can review the paper, invoking a 1988 U.S. Supreme Court decision in *Hazelwood School District v. Kuhlmeier*. The *Hazelwood* case granted

wide latitude to high-school administrators to review and censor school papers, and college-press groups have long feared that courts might begin applying that standard to college publications, which have traditionally enjoyed greater freedoms than their high-school counterparts.

"That could have a devastating impact on the future of the First Amendment on college campuses," says Mark Goodman, director of the Student Press Law Center, a nonprofit group that provides student journalists with legal assistance. "In

essence, it is saying that college and university students have no greater First Amendment rights than high-school students do."

It doesn't help, Mr. Goodman says, that the Governors State students are now representing themselves in court because they cannot afford a lawyer. The Student Press Law Center filed an amicus brief last week in support of the students' case, but Mr. Goodman says his group can't afford to pay their legal expenses either.

Mr. Goodman says that the group's brief is also being signed by 25 journalism groups or institutions, including seven college journalism schools, the American Society of Newspaper Editors, the

Association of Schools of Journalism and Mass Communication, and the Community College Journalism Association.

While journalism groups are backing the students' legal case, not all journalists approve of all of the conduct of the student editors. An independent review of the case conducted by the Illinois College Press Association found fault with both the students and the administration. It criticized the editors for unethical conduct, such as serving on the student government while also writing articles about its activities. But it also said the administration was overzealous in its response and probably broke the law by what amounted to prior review of the paper.

SGA Budget Sees Winners, Losers

MARK CAMPBELL

The new student Activity Fee budget approved last year by the Student Government had money flow from some student organizations to others. The budget saw two organizations, the Association of Computing Machinery and GEAR (General Engineering of Autonomous Robots) join the Student Government Association, the Campus Activities Board, *The STING*, and radio station WGHR 100.7 FM as organizations receiving more than \$10,000.

The new budget, at \$325,000 is down from the \$335,576 allocated by the 2000-2001 student government. The older budget had been higher due to a surplus arising from allocations in the first year of Technology Fee budget decisions.

The biggest budget cut went to the Aerial Robotics Team, which placed third in an international competition in Alberta, Canada. The team had received \$14,948 the previous year, yet received no funds this year.

According to student government members, organizations that did not receive funds this year had not submitted a budget request by the February 19th deadline. Twenty-five organizations did not receive any funds, including eight that were funded the previous year.

Five competition teams, including the Aerial Robotics Team, received no funds. In Civil Engineering Technology, these included the Steel Bridge Team and the Concrete Canoe Team. The Mechanical Engineering Technology program saw funds zeroed for the Supermileage Vehicle Team, which had finished sixth in competition attaining 742 miles per gallon. The Electrical and Computer Engineering program's nationally affiliated IEEE chapter and robotics team received nothing.

The Student Center Operations account was allocated \$93,000, a \$6,200 dollar cut from the previous year. The Student Center accounts for 29.5% of the student activities budget.

SGA saw it's five accounts grow from a total of

\$36,320 last year to \$56,536.64. SGA operations increased from \$18,000 to \$20,000, while the SGA Judiciary saw its budget increase from \$1,320 to \$3,000. The bulk of expenditures from both accounts are for stipends to student government members.

The largest increase came in the Student Development account, a reserve fund for contingencies, which expanded from \$10,000 to \$19,722.20. The increase is being held in reserve for *The STING*, the Formula SAE Race Car team, and the National Society of Black Engineers.

SGA members stated that the \$9,722.20 is to match dollar-for-dollar any revenues the three organizations raise through advertising and sponsorships. *The STING* is eligible for up to \$5,000, Formula SAE Race Car team to \$3,222.20, and NSBE to \$1,500.

Student government also increased a reserve fund for campus wide projects and events. The fund, previously at \$5,000 has been increased to \$11,814.44. A Foreign Exchange fund, used to help students attend institutions abroad, remained at \$2,000.

The Campus Activities Board, which plans events for all students, saw its budget cut by \$12,342. The Cultural Series budget, which provides tickets to sporting events, plays and the arts, was reduced by \$3,470. The University Roundtable guest speakers series was trimmed from \$6,300 to \$1,300.

For the first time, Greek fraternities and sororities were eligible for student activity funds under a new SGA policy. The policy caps allocations to \$1,000. Five fraternities and one sorority took advantage of the new policy and received funds.

The new Greek policy also changed funding for academic honors societies. Tau Alpha Pi, the national engineering technology fraternity that was founded at SPSU, saw its annual \$2,740 budget reduced to \$1000. The Phi Psi textile fraternity gained ten dollars, receiving \$1,000 total. Both the Construction honor society, Sigma Lambda Chi, and the management honor society, Delta Mu Delta, did not receive funds.

Two of the three sports clubs gained funds. The SPSU Soccer club received it's first formal budget with \$5,589, while the Ultimate Frisbee

Club received an increase of \$1,895. The Track and Field club remained at \$1,663.

The Track and Field club spent \$962.40 the previous year. The expenditure, at the time approved by club President Kenwin Hayes, paid for shirts for the first annual SGA Inauguration. Hayes was also the SGA President. Hayes, a graduate, could not be reached for comment.

Eight clubs that hadn't received a budget in the previous year were allocated funds. These included new clubs like the Japanese Friendship Society and the Computing Women of SPSU. Some older organizations previously denied funds fared better this year. The Muslim Student Association received \$2,040, while the Residence Hall Association will now operate with \$1,500.

Budget Losers...

The following organizations saw budgets decline. Reductions are relative to the amount budgeted for each organization last year. Not included are Student Government Accounts. Amounts were rounded to the nearest dollar.

Organization	Decrease	Budget
Aerial Robotics Team	-\$14,948	\$0
Campus Activities Board	-\$12,342	\$35,659
Student Center Operations	-\$6,200	\$93,450
Concrete Canoe Team	-\$5,500	\$0
Institute of Industrial Engineers	-\$5,175	\$0
University Roundtable Series	-\$5,000	\$1,300
Super Mileage Vehicle Team	-\$4,882	\$0
Steel Bridge Team	-\$4,130	\$0
WGHR 100.7 FM Radio Station	-\$3,481	\$15,349
Cultural Series	-\$3,470	\$9,000
IEEE (Institute of Electrical and Electronic Engineers)	-\$3,170	\$0
National Society of Black Engineers	-\$1,851	\$7,000
Tau Alpha Pi Honors Society	-\$1,740	\$1,000
American Society of Civil Engineers	-\$1,662	\$3,739
Chinese Friendship Association	-\$1,590	\$1,180
Women in Architecture	-\$1,500	\$0
The Sting (Campus Newspaper)	- \$455	\$16,000
Sigma Lambda Chi Honor Society	- \$350	\$0
American Association of Textile Colorists and Chemists	- \$235	\$500
Inter-Greek Council	- \$41	\$1,703
Total:	-\$77,722	\$185,880

Budget Winners...

The following organizations received budget increases. Increases are relative to the amount budget for each organization last year. Not included are Student Government Accounts. Amounts were rounded to the nearest dollar.

Organization	Increase	Budget
Association of Computing Machinery	+\$8,626	\$11,226
GEAR (General Engineering of Autonomous Robots)	+\$6,450	\$12,801
SPSU Soccer Club	+\$5,689	\$5,689
Specialty Constructors	+\$3,365	\$3,365
Japanese Friendship Society	+\$3,280	\$3,280
Computer Women of SPSU	+\$2,380	\$2,380

9/11 Timeline*Continued from Page 1*

capture of American Taliban John Walker Lindh.

November 28, 2001: The first sighting of Usama Bin Laden in the Tora Bora cave complex.

November 30- late December 2001: US bombs around the Tora Bora cave complex in the hopes of capturing or killing bin Laden.

December 7, 2001: The last Taliban holdout, Kandahar, falls. Taliban leader Mullah Mohammad Omar and many other Taliban members flee the city.

December 11, 2001: Zacharias Moussaoui is indicted for a role in the 9/11 attacks. He is believed to be the supposed 20th hijacker, missing from Flight 93. The government alleges he was in

training for the hijackings when he was detained in August due to suspicious behavior.

December 13, 2001: The government releases a tape of bin Laden that seems to indicate he was responsible for the 9/11 attacks.

December 22, 2001: Hamid Karzai, a Pashtun leader, is sworn in as the temporary leader of Afghanistan for 6 months. After the 6 months are over, a grand council of the Afghani ethnic tribes is to elect a president. Richard Reid is arrested for trying to blow up American Airlines Flight 63 using shoe bombs.

January 23, 2002: Daniel Pearl, a Wall Street Journal reporter investigating a story in Pakistan, is kidnapped.

January 31, 2002: Around this date, Daniel Pearl is killed.

February 5, 2002: Sheikh Saeed, the chief suspect in the kidnapping and later murder of Daniel Pearl, turns himself in to Pakistani authorities.

February 12, 2002: Saeed confesses to Daniel Pearl's murder, which he later recants.

February 21, 2002: A videotape showing the execution of Pearl is given to the American Embassy in Pakistan.

March 7, 2002: Pakistani President Musharraf announces that Saeed will not be extradited to the US until he is tried in Pakistani courts, if then.

May 1, 2002: FEMA's report investigating the World Trade Centers' collapse is released.

May 30, 2002: The official end of the Ground Zero cleanup. A special ceremony begins at 10:29 AM, the time 1 WTC collapsed. More than 1,700 victims still need to be identified.

June 20, 2002: Afghanistan's grand council meets and elects Hamid Karzai to the position of President.

July 15, 2002: Sheikh Saeed and 3 codefendants are found guilty in the kidnapping and murder of Daniel Pearl. Saeed is sentenced to death, and the 3 codefendants are sentenced to 25 years in prison.

July 16, 2002: John

Walker Lindh pleads guilty to fighting against the Northern Alliance and to carrying explosives in the commission of a felony. He is expected to be sentenced to serve 20 years in October.

August 15, 2002: Pentagon workers unofficially start back to work in the damaged portion of the Pentagon. The official date for reopening is September 11, the anniversary of the attacks. Families of 9/11 victims file a 15 count, \$1 trillion lawsuit against parties said to be responsible for the financing and planning of the 9/11 attacks.

SPSU Remembrance*Continued from Page 1*

2001." It will be dated September 11, 2002.

The plaque concludes, "With disbelief, we mourn. With hope, we pray. With pride, we rebuild." The inspirational message is attributed to the World Vision Association, a Christian child sponsorship and relief agency located in Federal Way, Washington.

From 11:30 AM to 1:00 PM, hotdogs, potato chips, apple pie and beverages will be served to students, faculty and staff at the Sycamore Grove near the library. A quilt table will be set-up, where folks can write or draw on a quilt square. The squares will later be gathered and sewn together, with the quilt displayed on campus in the future.

Pipeline Security*Continued from Page 2*

Approximately 84 million gallons per day of fuel is refined or shipped by tanker to the northeastern U. S. daily.

Asked how inland cities in the South, such as Atlanta or Charlotte, North Carolina, might be supplied if the three pipelines serving the seaboard were disrupted, the source said, "I don't know. I don't know that answer." He asked not to be named in connection with this story.

Rainey, speaking for Plantation Pipeline about recovery from disruptions, stated, "Kinder Morgan does keep spare equipment, including pumps and parts critical to the operation of the system on site which would allow us to resume operations in a timely fashion should there be an emergency."

Colonial Pipeline spokesman Steve Baker wrote, "We respectfully decline the opportunity to discuss publicly details of the location of backup equipment."

Baker added, "Colonial has met with Homeland Security Task Forces at both the U.S. and state level and continues to conduct these meetings as part of our effort to ensure the integrity of this vital piece of U.S. infrastructure."

Cleland stated, "The Homeland Security bill which has been drafted by my committee in the Senate does take these pipelines into account. The bill directs the Secretary of Homeland Security to establish procedures and mechanisms to use our intelligence capabilities to identify vulnerabilities and protective measures in a variety of public and private infrastructure components, including pipelines. This information will be used to better protect pipelines around the country, including those in Atlanta."

"Maintaining alternative supply methods, and establishing an alternative route in response to an attack on a pipeline is the best way to address supply issues. As long as pipeline operators can set up an alternative route, they can quickly restore pipeline service," stated Chambliss.

SPSU Student Accused of Child Molestation*Continued from Page 1*

female child under the age of sixteen in two felony counts. The indictment further states the incidents occurred "in the County of Cobb...on, about and between the 1st day of April, 1999 and 30th day of April, 2001."

Kahlon was originally charged on April 19th, 2002. These first charges against Kahlon were dismissed on Monday, June 24, 2002. According to the District Attorney's office, the original indictment was dismissed because of a clerical error. The court recorder had mistakenly recorded all of the grand jurors as present to hear the original bill of indictment; not all of the jurors were present at the time.

A second Cobb County Grand Jury returned a true bill reinstating the charges on Tuesday, July 2nd, 2002. A warrant for Kahlon's arrest was sworn out on Saturday, July 27th. Kahlon was arrested by Cobb County Police Officer R. A. Cunningham the next day.

Kahlon declined to comment to *The STING* on the allegations.

At a motion hearing on Friday, August 30th, Wayne Merisotis, Kahlon's court-appointed attorney, asked for the court to dismiss the indictment. He argued that the two-year time period did not allow the defendant to come

up with a defense to specific instances.

"If I'm accused today, at this time, of robbing a bank across the street, I can show an alibi," explained Merisotis, "That at this time, I'm standing - I was in Judge Robinson's courtroom - an alibi. Some evidence means some evidence."

Judge Dorothy Robinson stated that she would consider the motion and advise the attorneys in writing at a later date.

Asked to comment on the case, Kathy Watkins, Public Information Officer, said, "The District Attorney's office will make no comment on a case pending in Superior Court."

Kahlon is currently free on a \$10,000 bail bond, posted by A-24 Hour Bonding Company of Marietta on Sunday, July 28th. A condition of the bond is that Kahlon have no contact with the victim or any member of the victim's family.

Kahlon is a past president of SPSU's student chapter of the Association of Computing Machinery. As of Thursday, September 5th, Kahlon was still listed as a student member of ACM, according to its website.

Signs of Suspense

WILLIS SMITH

Mel Gibson plays Graham Hess, a farmer whose life is changed forever when his family discovers a mysterious sign in his backyard. The family slowly realizes the crop signs mystery appearances in their backyard is more complex than it appears to be. Overall, I was highly impressed with the suspense level and underlying issues of the film.

The scary-movie suspense comes from our imagination. Most of the suspense comes from the anticipation of the encounter with the crop builder. The director has done an excellent job in making the audience see less than they want to. It is the crop builders' actions that terrify the audience and the Hess family very much. The audience only sees the consequences of crop signs

builders' actions from animals acting strangely to mysterious floating lights to pounding and scratching on doors. The suspense gradually builds with background music and the neighbor's actions. Watching the movie reminds me of the 1938 War of the Worlds radio broadcast by Orson Welles.

The film challenges the audience to think about the concept of faith versus coincidences where everything falls in place. It makes you wonder if there is a hidden reason for everything that happens or is it really luck? It is an excellent film and not a flop. A word of warning, if you go into the theater expecting a film similar to "The Sixth Sense," you will be sorely disappointed. Other than that, it is a terrific film on many levels, playing with every emotion of the audience.

MIB II: Entertaining, Yet Predictable

JOSHUA SHANNON

Men in Black II is the sequel to the 1997 blockbuster, *Men in Black*. Starring Tommy Lee Jones and Will Smith, and directed by Barry Sonnenfeld. It reunites Agents Kay and Jay to fight the villain Serleena, played by Lara Flynn Boyle, and her sidekick, Scrad/Charlie, a two-headed alien played by Johnny Knoxville. Making reappearances from the first film are Rip Torn as Agent Zed, Frank the Pug, the Worm Guys, and Tony Shalhoub as Jeebs.

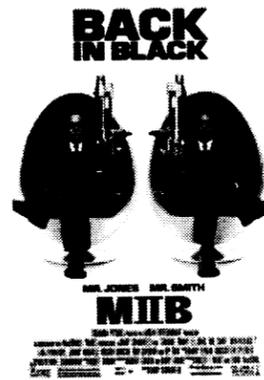

The film opens with a clip of a "documentary" version of one of the MiB's previous adventures, the time they fought Serleena about twenty-five years before the movie begins. Soon after this clip

airs, Serleena's spaceship crashes in New York, and the adventure begins. Eventually, Zed orders Jay to find Kevin Brown (Agent Kay), and bring him back to MiB headquarters in order to deneuralize him. Unfortunately, things don't go as planned, and so Jay and Kay must find another

deneuralizer. From there, they start making plans to save the day.

While the plot is somewhat weak and predictable, the movie is still a treat. There are many laughs in the movie, such as Frank singing a version of "I Will Survive," the reintroducing of Kay to Jeebs, and Serleena's first appearance. The acting is good, but not Oscar quality, and some cameos (Michael Jackson, for example) I could have done without.

If the viewer goes into the theater without expecting anything earth-shattering, he will have a good time. I highly recommend this movie.

Great "Make-out" Movies

Teddy's Continuing Journey

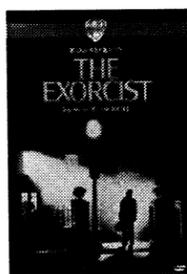

BENJAMIN LEE

Last weekend, Teddy, my perpetually depressed friend, told me that he was worried. I was curious because nothing ever worried him, as he was too busy being depressed. He asked me: "What does it mean when a girl tells you 'She's Late'?"

"Oh Teddy..." That was all I could offer as I told him to tell me what happened. Teddy expounded that he met this girl named TULSA at the video rental store and he claimed that she winked at him and I was not surprised for a girl with that kind of a name. Teddy told me that he immediately abandoned his stack of "Tammy Takes Tallahassee" in exchange for something that reflects his personality. TULSA was impressed with his diverse choice of movies and invited herself to his apartment for a movie marathon. She even offered to buy the pizza and beer. Teddy's depression must have really been obvious and TULSA must have been in the mood for some nobility that day. In any case, Teddy was all out to seize the opportunity. I could have called 911 as a precaution.

Teddy was in charge the very moment he and TULSA got back to his apartment. While Teddy warmed the pizza, got the beer ready and dimmed the lights, Tulsa parked herself, to Teddy's disappointment, on the plush single-seating couch on the other side of the television. Teddy had the perfect remedy for this as he popped in...

THE EXORCIST (1973)

(Horror starring Ellen Burstyn, Max von Sydow, Jason Miller, Linda Blair)

Probably the scariest movie ever made, this movie was so frightening that it triggered a few cases of cardiac arrests in London when it was first screened in 1973. The Exorcist was both controversial and unrelentingly horrific. It tells of a single mother, Chris MacNeil (Ellen Burstyn) whose daughter, Regan (Linda Blair) was possessed by demons. After exhausting secular options, the skeptical Chris conceded that divine intervention was the only

way to save Regan. She enlisted the services of a priest who was battling some demons himself.

The Exorcist is the unsurpassable benchmark and hallmark for the horror film genre. It garnered 10 Oscar nominations but won only 2. The horror vintage was realistic and unrelenting. The language was appropriately coarse and the scenes were all out to inflict fright, unlike horror flicks, which only thrive on merely shocking you silly. Scenes included Regan performing sacrilegious acts with the crucifix, spewing goo and levitations. These were just the tip of the iceberg. What is remarkable was that the effects were not computer-generated! Despite that, the mayhem in the theater was so powerful and effective that it made the movie stands as the all-time horror flick!

Check out the 25th Anniversary Edition on DVD; it includes scenes that are just as horrific but were not included in the original film.

Continued on Next Page

Game Review: Neverwinter Nights

JOSHUA SHANNON

Neverwinter Nights is Bioware's latest game to follow in the success of previous games *Baldur's Gate* and *Baldur's Gate II*. However, instead of using the Infinity Engine of those two games, Bioware has invented a new game engine called the Aurora Engine, which is one of the main selling points of the game. Using that engine, players can create different modules for the game and play with other players around the world. However, *Neverwinter Nights* is a single player game to demonstrate the new Engine.

The graphics are very good, rivaling those of *Dungeon Siege*. However, unlike *Dungeon Siege*, *Neverwinter Nights* actually has a plot. The plot is fairly decent, but somewhat predictable. As the game opens, a plague is ravaging the

city of Neverwinter and it is the hero or heroine's responsibility to find a cure for it and find out who is at the bottom of releasing it. Along the way, there are plot twists, some predictable and some not. The voice acting is terrific for the most part, but there are a few times where I wondered why a particular character sounded a certain way. The music is also very good and appropriate for the situation.

My biggest complaint about the game is that the player is unable to directly control party members other than the main character. While commanding them is relatively simple, I would have preferred to have direct control instead of indirect. My other major complaint about the game is that path finding can be horrendous at times. If there is not a direct path to where the player commands the hero to move, there is a fifty/fifty chance of the character just staying put. A minor complaint of mine is that I couldn't control the camera as fully as I would have liked to, but overall camera control was very good.

Those issues aside, I highly recommend the game.

"Make-out" Movies*Continued from Previous Page*

By the end of the movie, *TULSA* was literally wrapped around *Teddy*. She was shivering uncontrollably and she felt nauseated. It took her more than 10 minutes before she would eat a bite and have a sip of the beer. The movie got *TULSA* onto the same couch as *Teddy* hoped! *Teddy* being the "sensitive new age" guy refused to reduce his experience into something superficial and shallow. He wanted it to work more than just on the physical level; he needed *TULSA*'s involvement to be simultaneously in an emotional realm. So, he felt the time was right to whip out...some "emotion-rousing" movies (a.k.a. "Chick Flicks").

AN AFFAIR TO REMEMBER (1957)

(Romance starring Cary Grant, Deborah Kerr)

Nickie Ferrante (Cary Grant) and Terry McKay (Deborah Kerr) met on a cruise across the Atlantic Ocean (remember that in 1957 air travel was not available). Nickie was notorious for his philandering ways and Terry, a nightclub singer (remember again this is 1957 and night clubs do not have vertical poles on the stage) went all out to keep him at 2 arms' length and besides they were both engaged to other people. However, their guards were not strong enough to keep love away! They agreed to break off their respective engagements and then meet at the top of the Empire State Building after 6 months if they were still in love with each other. However, tragedy struck and the meeting was foiled.

This is the ultimate chick flick. It keeps us hopeful that when 2 persons are meant to be in love with each other, no circumstance can drive a wedge between them. Cary Grant and Deborah Kerr's on screen chemistry was purely magic and sensational. They were then the epitome of the perfect couple! When tragedy struck, although contrived, our hearts were ripped along with theirs. After a later chance meeting, despite the casualness and masked hurt, one could sense that their true feelings were struggling to burst free! This only served to build the movie into an emotionally tear jerking climax, when the truth of their failed rendezvous was finally revealed.

The movie was a remake of the 1934 version, which starred Irene

Dunn. The original garnered 6 Oscar nominations. This film was again remade and updated in 1994 by Warren Beatty and Annette Bening and it also co-starred the legendary Katherine Hepburn.

MOULIN ROUGE! (2001)

(Musical starring Nicole Kidman, Ewan McGregor, John Leguizamo, Jim Broadbent)

The classic tragic tale of man meets woman and falling in love and going against all odds to be together. After battles with ideals and jealous lovers, the lovebirds finally got together. However, just like a typical chick flick, tragedy struck. Set in the turn of the 20th century, Paris, in a notorious nightclub, Moulin Rouge, the headliner of the show, Satine's (Nicole Kidman) beauty and charm could make men shower her with diamonds and expensive gifts. An upstart Bohemian writer Christian (Ewan McGregor) saw her in Moulin Rouge, fell in love with her and was then set to woo her with nothing but his affection.

Unlike a typical musical where the songs and scores were written specifically for the movie, this one steps out of the box. Popular songs of the 1980s like Madonna's "Like A Virgin" and The Police's "Roxanne" were given anachronistic (relative to the movie setting) but creative and innovative treatment that seemed apt for a dramatic rock repertoire. Nicole Kidman, Ewan McGregor and some other notable cast members, who were least known for their singing abilities executed every number with precision and conviction and with their own voices (not dubbed). In addition, the sets, costume and make up were burlesque and the dance numbers were energetic. Moulin Rouge is clearly the best musical ever made since West Side Story.

SHAKESPEARE IN LOVE (1998)

(Romance starring Gwyneth Paltrow, Joseph Fiennes, Geoffrey Rush, Judi Dench)

The movie suggests a possible circumstance of how "Romeo and Juliet", the classic tragedy could have been inspired

and written. Shakespeare (Joseph Finnes) was suffering from every writer's nightmare – the blank page! His then work-in-progress, "Romeo and Ethel, the Pirates Daughter" hit a roadblock until he discovered that his leading man was really a woman. During the Queen Elizabeth I's time, women were not allowed to perform in play houses. Lady Viola (Gwyneth Paltrow) then became not only William's muse but the reason for turning the story into a play that addresses the essence of true love. They fell in love but it could only last till the end of the play because Lady Viola was to marry Lord Wessex.

William Shakespeare's "Romeo and Juliet" has been adapted for countless of mediums and genres. Shakespeare In Love is like one of those "Making of..." type of shows and in this case, it is the "Making of Romeo and Juliet". This movie is by far the most refreshing adaptation since Romeo + Juliet, which starred Leonardo DiCaprio and Claire Danes as the tragic lovers and the musical adaptation in 1961, West Side Story. The beauty of Shakespeare In Love is the interweaving of Lady Viola and William Shakespeare's affair and the development of the play, which was eventually renamed "Romeo and Juliet". The flow of the story was smooth and the romantic zeal brilliantly crescendos to the end.

Throughout this section, *Teddy* started out as just a Kleenex holder. When Cary Grant finally found out the truth behind Deborah Kerr's absence from their rendezvous on top of the Empire State Building in *An Affair To Remember*, *TULSA*'s floodgates just flung wide open. When Nicole Kidman and Ewan McGregor scaled those dramatic notes in *Moulin Rouge!*, her heart welled up with so much pain and love that she had to use dish rags to soak up those tears. Finally, when Joseph Finnes unfurled Gwyneth Paltrow from the cloth that bound her bosoms and when they were both sprouting Shakespearean verses in between their love making, *TULSA* had her face buried in *Teddy*'s shirt. All scheming *Teddy* needed to do then was to put on more suggestive movies.

OUT OF SIGHT (1998)

(Comedy Crime Drama starring George Clooney, Jennifer Lopez, Ving Rhames and Steve Zhan)

Jack Foley (George Clooney) spent his life robbing banks and one wrong step – failing to start the getaway car – landed him back in jail. There he escaped with the help of his partner in crime, Buddy (Ving Rhames). Karen Sisco (Jennifer Lopez) an FBI Agent happened to witness the escape but was kept hostage. After her escape, Karen was hot on Jack's heels, with more a curiosity for the man on the opposite side of the law than a desire to bring Jack to justice. The attraction developed so much so that they needed a time out from their "roles" to enjoy just one sensual rendezvous.

The production is slick and was brilliantly edited despite the story not being presented in a chronological sequence. When the two finally got together, the screen was set ablaze! However when they're back to business, you could feel that frustration of setting aside their attraction. Furthermore, the Soundtrack fitted and complemented the movie like a hand in glove.

GHOST (1990)

(Romance / Thriller starring Patrick Swayze and Whoopi Goldberg)

Sam Wheat (Patrick Swayze) and Molly Jensen's (Demi Moore) lives together were robbed when Sam was killed in a robbery. His spirit was reluctant to pass on to the nether world and he remained only to discover that his best friend had planned the robbery. Enlisting the help of a con spiritualist, Oda Mae Brown (Whoopi Goldberg), who in fact had the gift to communicate with the spirits, he managed to plot his vengeance and above all to convey his longing for Molly.

Ghost is a simple story and probably trite but the romantic and heart wrenching elements were way too good to snub this. Apparently, it was Whoopi Goldberg that stole the movie with her unforgettable and hysterically

comedic portrayal of Oda Mae Brown. However, Swayze and Moore are brilliant actors individually, but their onscreen chemistry relied heavily on the scenes and the music. Other than Whoopi and the steamy scenes, the effects in the movies were worthy of mention especially that of the legion of "grim reapers" that came to drag the "bad souls" to eternal damnation.

"Out of Sight" and "Ghost" definitely got the momentum going – with George Clooney and Jennifer Lopez who are arguably the sexiest beings alive, huddled in a trunk of a car and talking about classic movies, they turned claustrophobia into ecstasy. The bathtub and the stripping scene in the hotel pushed TULSA closer to Teddy. However, it was Patrick Swayze and Demi Moore sensually fabricating and fondling the phallic clay to the strains of "Unchained Melody" that pushed TULSA over the edge!

At that moment I felt very happy for my depressed friend because it was consensual, although she might have been intoxicated with heightened emotions. Maybe getting laid might be a better alternative to Prozac. However from his tone of voice he did not sound like his depression was lifting. "So what happened?" I asked with concern.

"Well, when I called TULSA this morning, she tersely told me: "I'm late. I am going to see a doctor."

"Oh Teddy...didn't you use any protection?"

"Of course! I had all 3 of them on at the same time!" He said in defense to his intelligence.

I was dumbfounded for a good minute before I excused myself, dropped the handset and then ran to the next room before bursting into hysterical laughter! When I regained composure I returned and, with suppressed laughter, very slowly and deliberately told him, "Teddy, TULSA was just late for her doctor's appointment!"

"REALLY?"

"Yes...buddy...you had all 3 of them on, and you cannot get anymore careful than that. OK? By the way the next time, you using one is adequate."

"Well, yes I know. TULSA insisted on all 3 because she said it would be more 'fulfilling' for her. What did she mean?"

Over The Line: A Rare Look at History

WILLIS SMITH

Jacob Lawrence is known as the first African American artist to have a major exhibit in New York. Looking at Lawrence's art and his life is like getting a glimpse of African American history in the United States. His paintings give a colorful perspective on African American history in the United States from the pre-Civil War period to the civil right movements in the sixties. The public is given a rare view of the African-American struggle in the twenty century that history books do not record.

He painted in vivid images the details of slavery in the South and the events leading up to the Civil War.

There are a series of paintings describing the life of Harriet Tubman, a brave former slave woman who led over 3,000 slaves to freedom through the Underground Railroad system. Her name and image has become associated with the Underground Railroad in American history.

He also painted a series of paintings telling the story of the Black Migration to the North during the Depression era. The Black Migration is a significant moment in African-American history that most history books don't mention. The Black Migration is the period when blacks from the South migrated to the North likely Chicago and Detroit for work. Many blacks migrated from the South to the North, leaving farming for industry work and better living.

Lawrence served in World War II and painted his observations of the war. There are paintings that highlighted the effects of the war on soldiers and civilians from the battlefields to wives grieving for their husbands' deaths. Scarier are the pictures of Japanese citizens suffering the effects of the atom bomb. There are also some pictures of the civil right movements during the sixties. Most striking are the Alabama pictures where activists try to cross a bridge in protest over voting rights.

Going through the Over the Line art exhibit, I got a better perspective of African-American history in the United States that one would not be able to get in history books. It is also compelling to watch how his art style had changed over the decades, becoming more eye-catching and hypnotizing to observe. I am sorry that by the time this article comes to print, the exhibition will be closed. The next High Museum guest exhibition will be Impressionism in Paris. This will be an excellent chance to view the great artworks of many famous painters, photographers, and artists. These artists created beauty in the late nineteenth century Paris when it was the art capital of the world. The Impressionism in Paris exhibition will open at the High Museum in early November.

Report From Ground Zero Moving

JOSHUA SHANNON

Report From Ground Zero is Dennis Smith's account of what happened to him and a number of firefighters and police officers on that fateful September day, and a journal of sorts from him during the few months following 9-11. The first half of the book is accounts from many people who survived that day, and also stories of how some firefighters and police officers died, and the second half is Smith's journal. Through this book, the reader glimpses what can only be described as hell on earth.

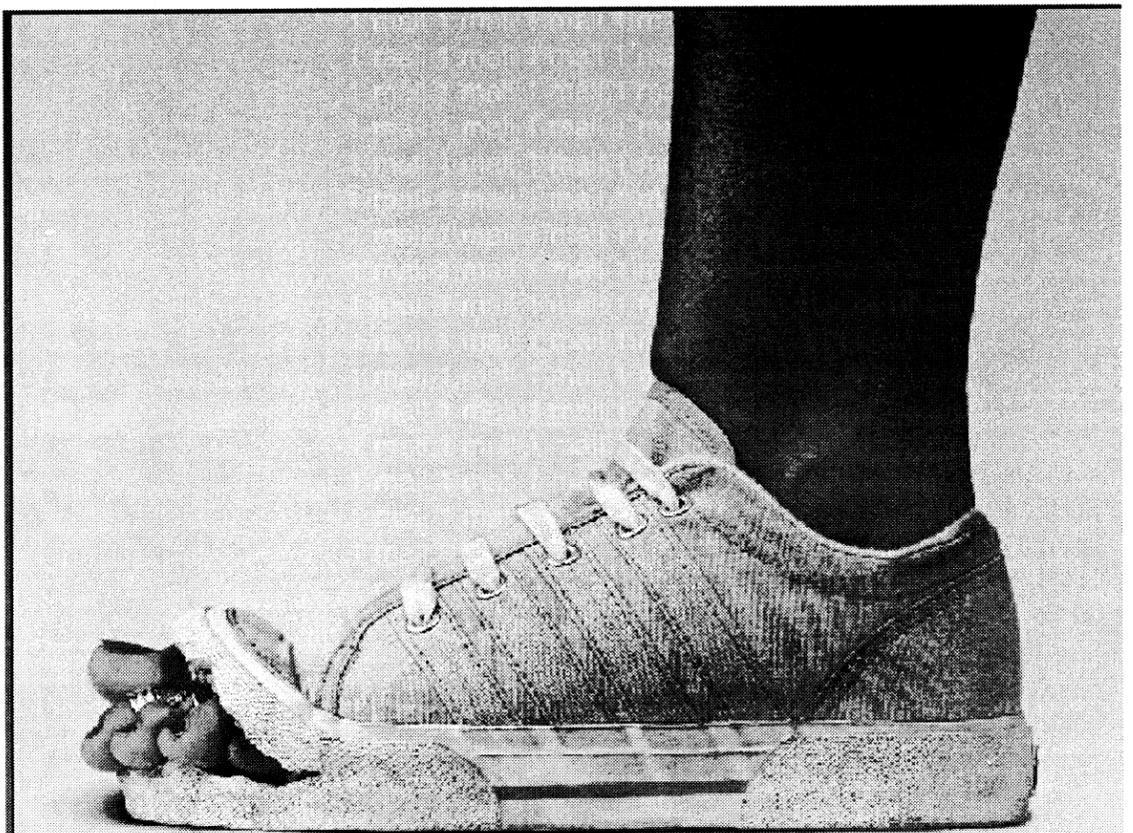

When I first bought the book, I was concerned that it

was just someone's attempt to capitalize on 9-11. Because of this, I was wary when I first started reading. However, my concerns were quickly put to rest; the first few pages after the title page had nothing but the names of all of the firefighters, police officers, and Port Authority officers who died that day. After the names come the stories. The stories are very well done; sometimes they are first hand accounts, sometimes narratives, sometimes a mix of the two. No matter the style, though, they are all moving.

In some respects, the second half of the book is the weaker half. The journal, while

interesting, is nowhere near as captivating as the survivors' stories. However, in other respects, it is stronger because it deals with the funerals of many of the fallen heroes, as well as telling how the cleanup happens, from the "Bucket Brigades" to what happens when a firefighter or police officer is found.

This book is very well written, and is very moving at times. It gave me a better sense of what the firefighters' jobs were that day, and gave me a better appreciation of what they did, and I highly recommend it.

5
SIZE SHOE

9

1
MALL

They're not weeds. They're feet. But they grow about as fast. Good thing there's one place you can go to cover all your back-to-school needs, from head to toe. Plus during Georgia's Tax-free weekend on August 2nd and 3rd, you'll see something else grow, too. *The savings!*

Town Center at Cobb
What may we do for you today?

Letter to the Editor -- Pet Article
LINDA J. WHITENTON
Office Assistant, Registrar's Office

I am writing to respectfully object to "The Pet Guide: Dog, Cat or a Fish" on page 23 of the last issue of *The Sting*, volume 6, number 1, 8/21/02.

I like animals and care about their well-being and humane treatment. You did a good job researching, preparing and presenting the article, and I would have liked to have read the rest of it (part of it didn't print).

I graduated from SPSU, though, and I can tell you that you will not have time to properly care for a pet. Trust me.

Think about how you would feel if you were hungry, thirsty, neglected and your litterbox stunk because the person that bought you was busy writing a paper, studying for an exam, blowing it out at a party or working two part-time jobs just to live. Will you have the money to take your pet to a vet if it gets sick? If you're a college student, you probably won't.

You'll have time after college to enjoy pets, and the time and money to look after them right. Please don't try to keep a pet in college. As far as dorm rules go, per Housing Director Ed Klein fish in a fish tank of twenty gallons or less are allowed, but no other type of pet is allowed in the dorms.

Letter From the Editor — I'm Back

When I see the paper, I think, "Wow! What a difference *The STING* is now from when I came to this campus." It amazes me. I am glad I could be a part of that. But, I surely don't think that justifies slacking up now. *The STING* hasn't finished moving forward. Please let me elaborate on some plans I have for the *STING* this semester.

First, *The STING* this semester will be published biweekly! This is very exciting to me. Sure, it will require more effort and money, but we are working our best to make it happen. If all goes well, you can be proud that your school, completely lacking any program or track in Journalism, has a *biweekly* newspaper. When attending last year's Georgia College Press Association Better Newspaper Contest, I was pleased to find out that we were the *only* newspaper represented without at least a Journalism track at its school. And the paper left there with a First Place Award in Investigative Journalism! I can only hope that the *STING* will represent our school in a fit manner once again this year.

Second, besides more content, I hope to enable *The STING* to provide *better* content. Hence, I hope to send various staff members to workshops and conferences to be better journalists. Mind you, none of us came to SPSU to be journalists. We came to be Engineers, Computer Scientists, and the like. However, this extra effort will hopefully provide the student body with improved content and layout.

Third, I realize this is college! And *The STING* is a college newspaper. College newspapers are to commercial newspapers as college radio is to commercial radio. That means that you're not going to get the molded, squeezed, strained, and nicely pressed that you get on the outside. I don't view college as the time for that necessarily. We're going to give you the news, but hopefully we'll keep you entertained, and get you stirred up about some issues you might not even care about otherwise.

Fourth, be on the look out for NEW features in the online edition, including video segments and increased interactivity.

I only ask the readers of *The STING* to tell us how we're doing this semester. If you like something, please tell us. It lifts our spirits and helps us realize why we stay up late in *The STING* office with coffee grinds and All-Star pizza as our only sustenance. If you don't like something, let us know too. We'll either try to change or give you a space to write your opinion.

TENNIS TEAM TRYOUTS

Tennis Team meets M-F 8-9:30AM at the tennis courts. Come tryout!.

Write Us!

Your letter could be here!

Consensus Editorial

We, *The STING* staff, would like to follow-up on an editorial written in the April 12, 2002 issue of *The STING* (Vol. 55, No. 2). It was entitled "SPSU -- Georgia's Technology University?" written by Zachary Jones. Of all the editorials *The STING* has published, this one in particular caused considerable negative feedback from some administration and was even unofficially cited as one of the articles SGA was reviewing in search for reasons to cut budget. Part of the article stated "With all our technology, why does the third bell not ring? Perhaps the most annoying thing I hear every day while traveling between classes is, ding ding ding, ding ding ding." Well, for all the stink the article made, you'd think that the belltower would be fixed by now. But, no. This semester we lost *another* bell! For Spring semester we'll be down to one, and new Summer semester students won't ever know there were bells! But, we, *The STING* staff, feel privileged to be among the few to hear the belltower in its dying days with its plaintive cry "ding ding, ding ding." Sad to say, it seems the belltower is going the way of the now-almost-forgotten Bathtub Races.

The local advertising rate of *The STING* is \$5.75 per column inch on paper; advertisements online are determined by number of pixels. Advertisements for service and professional organizations on campus are free, but a run-date is not guaranteed on paper. To guarantee one, ad rates are one half the local advertisement rate. Classified advertisements are \$25.00 for the first 25 words on paper; online classifieds are \$12.00 for the first 25 words. Advertisements must be submitted by the deadline printed below. To reserve space or for more information, contact *The STING* at 770.528.7310 or sting@spsu.edu.

LETTERS TO THE EDITOR

The STING welcomes letters praising or criticizing editorial policies or opinions. Letters should be typed or neatly printed, double spaced and should not exceed three hundred words. Letters must include a name, address, and phone number for verification purposes, but names can be withheld upon request. Unsigned or unverified letters will not be printed. *The STING* reserves the right to edit letters for style, content or size. All letters are run on a space-available basis. Please send all letters to *The STING*, Southern Polytechnic State University, 1100 South Marietta Pkwy, Marietta, GA 30060, or drop them in the box outside of our office in A252, or email sting@spsu.edu.

ORGANIZATIONS

Articles written by organizations to inform the campus of activities and events are welcome. Articles must be submitted in electronic format (email, disk) by the deadline printed below. Please limit articles to two hundred words. All such articles are subject to editing for style, content and size, and are run on a space-available basis.

JOINING *The STING*

Any student paying Activity Fees is eligible to join *The STING*, though final decision is made by the Editor-in-Chief. We prefer creative students who have passed English 1101. Come to our meetings Friday at noon, in A252, upstairs in the student center, or call 770.528.7310. *The STING*: It's not a job, 'cause a real job pays more.

DEADLINE

Deadline for the next issue is September 18, 2002. The issue will be released September 25, 2002.

SUBSCRIPTIONS

Subscriptions to *The STING* are \$10 per semester or \$25 an academic year. All subscriptions start with the first issue of the succeeding semester. Checks for subscriptions should be made payable to *The STING*.

PRICE

The STING offers to every student, faculty, staff member, alumni, and official visitor of Southern Polytechnic State University copies of each issue numbering up to 0.25% of the print run for the respective issue. Every copy above 0.25% is to be purchased according to a price set by *The STING*. Taking more copies of an issue than constitutes 0.25% of the print run of a particular issue is THEFT and a criminal offense.

“And Not To Yield”

JOSHUA SHANNON

One year ago, America changed forever. No longer could we look at the rest of the world with innocent eyes, eyes not used to seeing carnage at home. Instead, we watched in horror as the Twin Towers fell, and as the Pentagon was attacked. Later, we started marveling at the courage displayed on Flight 93 and of the rescue workers at Ground Zero. Through it all, we became a better and stronger country.

As we look back, we must ask ourselves, “Have we changed for the better?” The answer is a resounding, “Yes!” Before 9/11, I never thought that Americans, as a whole, could or would show as much love of country as was displayed in the days, weeks, and months following that hellish day. While I never thought that Americans would buckle under pressure, I did

feel that there was not a strong love of country; if we were ever attacked, I felt that we would go to war, but I knew in my heart of hearts that there would be no patriotic displays. Boy, was I ever proven wrong.

In the months that followed that terrible day, Americans would break into “God Bless America” seemingly at the drop of a hat, waving flags, wearing “United We Stand,” “God Bless America,” and similar T-Shirts. Some would argue that many of these displays of patriotism were just people caught up in the moment. They may have been right, but I ask that if that were the case, would it have gone on for as long as it did? Possibly, but superficial patriotism can only be carried so far and for so long. While the very strong

displays have long since gone, American flag orders are still on a backlog, and patriotic shirts are still being sold and worn.

The events over the past year tried our country unlike anything since Vietnam, if that. Yet through it all, Americans have been relatively united. The mood of the country can best be summed up in the last few lines of Tennyson’s poem, “Ulysses:”

“Though much is taken,
much abides; and tho’

We are not now that
strength which in old days
Moved earth and
heaven, that which we are, we
are;

One equal temper of
heroic hearts,

Made weak by time and
fate, but strong in will

To strive, to seek, to
find, and not to yield.”

the opinion to
y first object s
"The basis of our government
being the opinion to the people,
the very first object should be to
keep that right; and were it left to
me to decide whether we should
have a government without
newspapers, or newspapers
without government, I should not
hesitate a moment to prefer the
latter."

— Thomas Jefferson

Georgia’s SAT Scores Less Than Perfect: Way Less

ZACH BILES

You have probably already heard or read this, Georgia has fallen down to 50th place in SAT scores. Across the state, officials are looking for somebody or something to point at for this problem.

Sonny Purdue points to Barnes and says his education reforms didn’t work. Barnes holds up his hands and says my reforms are just now taking place. So who’s to blame?

Without doing any research at all, one could easily pass this off by saying “Georgia offers the HOPE scholarship, so any dum-dum with a “B” average can take the SAT and get a potentially free ride to college.” They could take this even further and say “Georgia is ranked lower because other state’s colleges and universities use the ACT over the SAT, and therefore we have more students taking the SAT.”

Wrong, wrong, and wrong! The report shows that we had a participation rate (percentage of high school students who took the SAT) of 65%. That sounds pretty good right? Well, if it were only ranked that way, we would be in 15th place (14th if you don’t count D.C.). It also goes on to show that our average SAT score didn’t change, it

remained 980 (verbal went down, math went up). So basically, Georgia students are still as knuckle-headed as they have always been. The only difference was that other states went up on the list.

Now this is rather odd. Are we in an uproar because our SAT average is only 980? Or are we in an uproar because we are ranked 50th? Unfortunately, it is the latter. We were perfectly content to have a mediocre SAT average, just as long as we were not in last place. Although, we have been pretty close to 50th, when we were at just 49th place in past years. Now the only one below us is Washington D.C. Perhaps that will hold us over for another year.

However, in doing this research some other interesting information was found. According to the College Board, in their statistics for Georgia, females had a higher GPA in every subject, and thus a higher overall GPA than males. Furthermore, of all the test takers asked where they ranked in school, 56% said below the second tenth percentile (Top tenth percentile, second tenth etc.). Then it goes on to say that of

the students, who responded, 51% had approximately a “B” average.

So, if a majority of students say they have a “B” average. Then why aren’t we showing better scores on the SAT? The reason might be the “dumbing down” of our public school system. How so? Let’s think about it for a second. Statewide, statistics are kept about the number of students who pass or fail for any given professor or school. When students start to leave a school because of a high fail rate, the school will become more relaxed on it’s grading policy. They will relax their grading because they need the money that students bring to their campus. Perhaps the teachers will take an assignment a little later than usual or that “D” will become a “C” and so forth. This may not be true for all high schools in Georgia, but it is rather prevalent.

This is not something you can ask them about either. “Oh sure, we relax our grading every year when the students start doing bad...”, you are just not going to hear that. It’s more or less an unspoken truth. Teachers know that if a whole class is failing, people

will view that as a reflection of his/her teaching. In some cases, it may be the teacher. However, despite the fact that it may not be their teaching, the teachers know that schools don’t like high fail rates because it discourages attendance to their class and or school. So, how is that problem solved? By “dumbing down” grading policies. Now, why haven’t you heard about this before? Ha!, Do you think students in high school are going to complain about higher grades?

Now, this isn’t exactly true for all schools. Some schools keep everything the way it has always been. Rather than being known as a tough school, they may just become known as a school for the top dogs. Only the best of the best need to apply.

So how can this problem be fixed? The solution will have to be one in which the teachers feel no pressure to lower grading policy, or perhaps will not need to. I’m sure our political leaders already have an idea on how they want to fix our school systems. Perhaps in a couple of years we may move up the ladder. As it stands now,

we’re on the ground looking at everybody else climb past us.

And for those who care, the following is just a few more tidbits for Southern Polytechnic students that was found in the information released by the College Board.

Did you know that 19.1% (8,379) of the students who took the SAT sent their scores to Georgia Tech? We all know that Southern Polytech rivals, if not beats, Georgia Tech in many areas. However, do you know what percentage of students send their scores to Southern Polytechnic? The percentage is only 2.8% (1,244). That’s almost 7 times fewer. That’s just sad, considering we used to be a part of Georgia Tech.

Fool! Do You Have Credit Card Debt?

ZACH BILES

Did you know that more students drop out of college because of credit card debt than they do of academic failure? That's the word from an article on About.com. But, you don't need to be one of those people. There is plenty of information out there to guide you out of debt. The following is one such item that you can find at www.Fool.com. The Motley Fool is known for its great financial advice and it's ways of being positively Foolish (being "Foolish" with an uppercase "F" is being smart with your finances). So, Without further ado, *The STING* brings to you The Motley Fool's 9 ways to getting out of credit card debt.

Getting Out of Debt 9 Ways to Pay it Back

You can throw them in the Cuisinart or discreetly chuck them into a garbage truck on your way to the subway, but that won't make the debt go away. Debt hovers like a carrion bird over a dying beast, costing you 18-plus percent compounded monthly, month in and month out. You can't wish it away. But you can pay it down with determination and the good graces of a few wealthy relatives (see tip No. 5). Here are eight ways to get out of debt:

1. Pay More than the Minimum

The first thing you can do is break the habit of only paying the minimum required each month. Paying the minimum — usually 2% to 3% of the outstanding balance — only prolongs the agony. Besides, it's precisely what the banks want you to do. The longer you take to repay the charges, the more interest they make and the less cash you have in your pocket. Don't play their selfish game. Instead, bite the bullet and pay as much as you can each month. If your minimum payment is \$100, double that to \$200 or more. Examine your normal expenses. You can find the money to do so. (For a gazillion ideas, check out our Living Below Your Means message board.) Skip eating out at lunch, and bring it from home instead. Eliminate desserts. Give up happy hour. We all have "luxuries," and you know what yours are. Make a few sacrifices, and you will find the extra dollars needed to increase your debt repayments dramatically. Those increased payments will save you hundreds, if not thousands, in interest payments. Plus, you will get out of the hole you have dug for

yourself much, much more quickly. Is it fun? No. But it sure is better than living a hand-to-mouth existence fearing bill-payment day each month.

2. Move Your Balances to a Lower-Interest Card

Next, take a long, hard look at all your credit cards. Pay particular attention to the one with the lowest interest rate. Have you reached the maximum limit on that card? If not, consider transferring a higher interest bill to that one. Many credit cards permit this, and it may make sense to use that feature. It's positively Foolish to trade an 18% debt for one at 12% at any time. Why not now when you're looking under every rock to find the bucks needed to eliminate those bills? You can also ask your current lenders to lower your interest rates. For details on how, check out Step 4: Re-Negotiate Your Rate.

Another way to transfer higher interest debt to a lower interest card is to take advantage of the promotional offers many banks use to entice you to their line of credit. You've seen the come-ons. "Transfer all your credit card balances to us and pay just 5.9% until January 1, 199X." It could be worth it to do so. The savings between 5.9% and 18% interest could mean substantial dollars to you. And the money saved in interest could then be applied towards principal each month, thus reducing your outstanding debt balance even further. Take care, though, before you act. Examine the offer closely. Look for the hooks. Will the interest rate after the introductory period be higher than you're paying now? If so, you may have to switch again at that time. That, in turn, could give rise to another surprise. Banks have caught on to the charge card hoppers who switch from card to card to take advantage of the low introductory rates. Many of these offers now stipulate that if you transfer balances from the new card within a 12-month period, the normal interest rate will be applied to all outstanding balances retroactively. That proviso could be a bitter pill to swallow for someone short on cash, and it certainly doesn't help the debt repayment schedule. Read the fine print, Fool.

3. Cash Out Your Savings Account

You could cash in your savings and investments and use the proceeds towards debt repayment. Yeah, no one wants to do that. But sometimes it's just Foolish to do so. Even when debt interest is at a rock-bottom 12%, your investments would have to pay more than 18% before federal and state taxes to equal that outflow of dollars. Pay off the debt, and it's the same as getting that 18% return without any risk on your part. The higher the interest rate on your

Credit Card Debt Got You Stressed Out?

debt, the more attractive repayment versus investment becomes.

4. Borrow Against Your Life Insurance

Do you have life insurance that has a cash value? If so, borrow against the policy. Yes, you're borrowing your own money. But the interest rate typically is well below commercial rates, and you can take your time repaying the loan. Do repay it, though. If you die before it's repaid, the outstanding balance plus interest will be deducted from the face value of the policy payable to the beneficiary. As a negative, that seems a small price to pay to get out of debt now, but it could be burdensome to your family or loved ones should you sleep the eternal sleep before paying it back.

5. Finagle Family and Friends

Perhaps your family or friends could help through a loan. Who else knows, trusts and loves you as they do? Unless you are really the black sheep of the flock, chances are you'll get a very favorable interest rate. They may even tolerate a late payment or two. But if you want to maintain the relationship, it's best to keep things on the straight and narrow by using some written agreement like a personal note. You should clearly establish the interest and repayment schedule in writing to avoid misunderstandings and hard feelings. And it goes without saying that you must be scrupulous about adhering to that schedule. Otherwise, you can forget the family reunions and birthday presents.

6. Get a Home-Equity Loan

Do you own your own home and have some equity that's accumulated through the years as you've paid off the mortgage? If so, now is the time to consider a home equity loan (HEL) line of credit for the maximum amount you can get. A HEL gives you a double whammy. First, you use the loan proceeds to pay down your debt, thus trading something like an 18% loan for a 9% loan. Second, most homeowners itemize on their income tax returns. HEL interest under most circumstances is a deductible item. In a 28% marginal tax bracket, that means the 9% loan really has an effective rate of 6.5%,

and that is probably the cheapest interest rate you'll ever see on personal indebtedness. The danger here is falling into the trap many people do. They get a HEL, pay off existing debt, and then ring up the charges on the credit cards all over again. Now they have the HEL to repay on top of the credit cards. The hole just got much, much deeper. Fools use the HEL to pay off the credit cards and then keep them paid off until the HEL is repaid.

7. Borrow From Your 401(K)

Do you participate in a 401k qualified retirement plan at work? Most 401k plans have a loan feature that lets you borrow up to 50% of the account's value or \$50,000, whichever is smaller. Interest rates usually are a point or two above prime, which usually makes them cheaper than that found on credit cards. Thus, 401k plan loans may be a Foolish option to debt repayment. Not only is the interest typically much lower than that on credit cards, the best part is you pay it to yourself. That's right, every dime in interest paid on a 401k loan goes directly into the borrower's 401k account, not the lender's. That lessens the bite even more. But there are some drawbacks. First, the loan and interest will be repaid with after-tax dollars, but the interest will be taxed again when you finally withdraw money from the 401k many years later. Additionally, you must repay this loan in five years or less. If you leave your employment prior to full repayment, the outstanding balance becomes due and payable immediately. If it's not repaid, that amount will be treated as a distribution to you. The tax man will tax you on that amount at ordinary rates. And if you're under the age of 59 1/2, you will also be assessed an additional 10% excise tax as a penalty for an early withdrawal of retirement funds. Accordingly, ensure any 401k loan can be repaid before you leave your job.

8. Renegotiate Terms with your Creditors

Okay, you've done all you can. Savings are gone, relatives have been tapped out, you don't have a home or 401(k) to borrow against. You feel like you're against that proverbial wall. The money just isn't there. Is bankruptcy the only way out? No way. Try pulling that ace out of your sleeve prior to taking that step. What ace? The threat of bankruptcy ace, of course. Let your creditors know your situation. Tell them that if you are unable to renegotiate terms, then you have no other recourse except to declare bankruptcy. Ask for a new and lower repayment schedule, request a lower interest rate, and appeal to their desire to receive payment. Faced with the prospect that you may resort to such a drastic

In the Next Issue... Economical Furniture Buying

step, creditors will do what they can to protect themselves against a total loss. Indeed, many will negotiate away the farm before they'll be willing to write off your debt. As lawyers love to say, everything is negotiable. Therefore, what have you to lose save time? It's worth a try. And if you don't wish to do this yourself, organizations exist who can do it for you. For details, see Step 9: Be Your Own Debt Doctor.

9. As a Last Resort, File Bankruptcy

What if you decide you can't pay down your debt using any of the methods listed above? What should you do? The absolute last resort is bankruptcy. Within Fooldom, we believe firmly everyone has a moral obligation to repay their debts to the utmost of their ability. There are times, though, when repayment may be impossible. In those cases, then, bankruptcy may be the only available course of action. Nevertheless, be aware there are significant drawbacks to using this avenue of relief. Your credit record will contain this information for 10 years, thus ensuring you will have a tough time obtaining credit you can afford during that period. Additionally, as odd as it seems, it also will cost you money to file for bankruptcy. Attorney and court filing fees will cost in the hundreds of dollars, and they must be paid to obtain the relief sought.

There are two types of personal bankruptcy relief, Chapter 7 and Chapter 13. Chapter 7 is straight bankruptcy that allows the discharge of almost all debts. Those that aren't discharged are alimony, child support, taxes, loans obtained through filing false financial statements, loans not listed in the bankruptcy petition, legal judgments against the petitioner, and student loans. While Chapter 7 relieves you of the responsibility of repaying most creditors, you may also have to surrender much of the property you own to help satisfy the debt. In general, though, you may usually retain your car, tools of your trade, your home and most personal property.

Chapter 13, sometimes called the "wage-earner plan," is different. Under Chapter 13, you keep your property but surrender control of your finances to the bankruptcy court. The court approves a repayment plan based on your financial resources that provides for repayment of all or part of your debt over a three-to-five-year period. During that time, your creditors may not dun or harass you for repayment. You also incur no interest charges on the indebtedness during the repayment period. When all conditions of the court-approved plan have been fulfilled, you emerge debt-free from the bankruptcy.

Washington Abandons Capital

MARK CAMPBELL

Chadds Ford, PA (Sept. 11, 1777) – A British force led by General Charles Cornwallis today flanked the 11,000 strong Continental Army at Brandywine Creek just 40 miles southwest of Philadelphia on the road from Baltimore. After a battle at Birmingham Friends Meeting House, Continental Army General George Washington ordered a retreat of his forces to Chester, Pennsylvania. The retreat opens the road to the new American capitol at Philadelphia for occupation by the 18,000 troops under the command of British General William Howe. Washington, who had outposts at Wistar's Ford and at Pyle's Ford, had hoped to engage the British forces at the high ground at Chadds Ford. Congress had tasked Washington to defend the capitol from Howe's troops which had landed at the head of the Elk River in Maryland on Monday, August 24th. The road from Baltimore to Philadelphia crosses Brandywine Creek at Chadds Ford.

War Department Breaks Ground

MARK CAMPBELL

Arlington, VA (Sept. 11, 1941) – Officials from the White House, Congress and the War Department broke ground today for a new office building on the site of Hoover Air Field. The three story design, conceived by Brigadier General Brehon Sommervell, will be laid out as a pentagon with an open air court inside the thirty-four acre footprint. When completed, the new building will house the War Department, currently dispersed in seventeen buildings throughout the District of Columbia. The War Department abandoned plans for the original site at Arlington Farms at the request of President Roosevelt. The White House expressed concerns that locating the proposed War Department Headquarters there would interfere with the view of the capitol from Arlington Cemetery. Residents of the Hell's Bottom community site are expected to sell their land to the government, with the possibility of condemnation proceedings if they do not. The old pickle factory and the race track are expected to be razed soon to make way for the new building. Officials with the War Department have said it is too early to tell whose name will grace the new building.

President Killed in Coup

MARK CAMPBELL

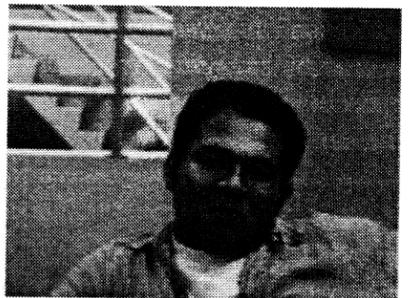

Santiago, Chile (Sept. 11, 1973) – Mortars, rockets and machinegun fire raked the Presidential Palace today, with troops from the Santiago garrison under the command of General Augusto Pinochet Ugarte storming the presidential offices. Popular Socialist President Salvador Allende Gossens was found dead from several bullet wounds. Allende, elected as the Unidad Popular candidate in 1970 with just 36% of the presidential vote, had come

under increasing criticism from U. S. government officials. Allende had nationalized industries and instituted land reforms.

In recent months U. S. government officials had blocked Chilean access to funds from the International Monetary Fund, the World Bank, and the Inter-American Development Bank. Government officials were unavailable for comment on the coup in the Chilean capitol.

Student Question

Where were you when you heard of the terrorist attacks of Sept. 11?

"At home watching television, thinking it was a movie, woke up 10 minutes ago."
--Jonathan Arias, ECET Sophomore

4,192 -- Rose Breaks Record

MARK CAMPBELL

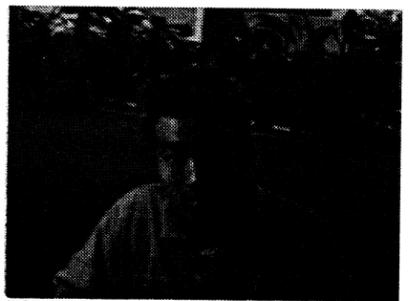

Cincinnati, OH (Sept. 11, 1985) – Cincinnati Reds' player-manager Pete Rose lined into left-center field at 8:01 PM tonight and hustled to first base to become Major League Baseball's all-time hitting leader. The first inning single, scored off of San Diego Padres pitcher Eric Show, broke Ty Cobb's record of 4,191 hits. Rose now holds the record at 4,192 hits.

Rose, who plays first base, pointed to the heavens after getting on base, honoring both his late father Charlie and the legendary Cobb. Streamers and confetti rained onto the field

at Riverfront Stadium as fireworks exploded above the heads of the 47,237 fans who had gathered for the much-anticipated event.

Cincinnati's most famous player learned the game on sandlots a mere ten miles away. Now age 44 and in his twenty-third season, Rose has established another record on a road likely to see him into baseball's Hall of Fame.

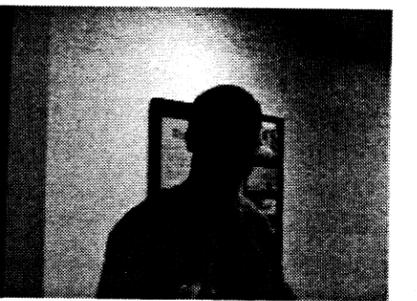

The Reds won the game 2-0 against the Padres. Cincinnati pitcher Tom Browning was the winning pitcher of record, with a save by right-hander Ted Power.

"Getting ready for school."
