

Glee Club Is Off To Savannah!

Glee Club To Be Heard In Home Concert May 30

STI's students and faculty will have an opportunity to hear their Glee Club perform when the Singers appear in concert on Thursday, May 30, at the Club Hour in the Navy Theater.

Such good reports have come from cities in which the Glee Club has appeared on tour this spring and the season, according to Director J. J. Defore, has been such a successful one that the student body, the faculty, and the Singers themselves requested the special appearance at home.

The Glee Club has carried its 15-minute program of delightful popular and semi-classical music to Cartersville, McDonough, Covington, Rome, Macon, and Savannah, where performances have thrilled and pleased hundreds of high-school boys and girls.

This is the first year that so many appearances away from school have been made, and Director Defore expressed satisfaction over the increased activity and the overall success of the season.

Members of the Glee Club to whom STI students and faculty owe a debt of gratitude for their loyalty and fine performances are James Baldwin, Paul Bass, Robert Blackford, John Carr, Ronald Clark, Thomas Cliett, Larry Collins, Larry Colo, John Cooper, Barry Costenbader, Howard Davis, John Drakulis, Morris McClure, Allan McPherson, Reynolds Nel-

son (accompanist), William Owens, Willie Pettet, Bill Smith, Randall Smith, Wilfred Stucki, Gerald Thompson, and Prof. William Hurst.

Leaders Honored On Awards Night

At this writing many STI students and their wives or dates were looking forward to the annual Awards Night Banquet, scheduled for Friday evening, May 24, in the Green Room on the Southern Tech campus.

Invitations had been sent to approximately 100 students, who, through outstanding performance, had established their right to a pin, letter, certificate, key, medal, plaque, or some other form of recognition.

Faculty advisers, sponsors of campus organizations, and officials of the administration were to be on hand to pay tribute to the students who had done outstanding work in athletics, publications, Student Government, the Glee Club, scholarship, and leadership.

An excellent dinner, music, some humor, much fellowship, and many deserved compliments were the bill-of-fare for the evening. All were planned to help make

Failing Students Urged To Attend Summer Quarter

The summer quarter here at Southern Tech will begin with registration on Monday, July 1. Subjects in all eight curricula, including the beginning courses, will be offered as demand permits. Classes for all students will begin Tuesday, July 2.

Southern Tech's expected summer quarter enrollment is about 350 students. About 40 of the total enrollment will be new students.

The ruling that the STI Administrative Council has made for the past two years concerning students on probation will be in effect this year also. The ruling states that any student on probation who would ordinarily have been dropped from the rolls at the end of the spring quarter because of point average, subject failures, or failure to upgrade status may return this summer and do his utmost to remove his name from the probation list.

Open to All

The doors of STI will be open to anyone who desires to improve his grade status, or to complete his training earlier. The Council urges deficient students to take advantage of this opportunity to "balance the books" so that they may enter the fall quarter with a clean slate — no deficiencies or threat of probation hanging over them.

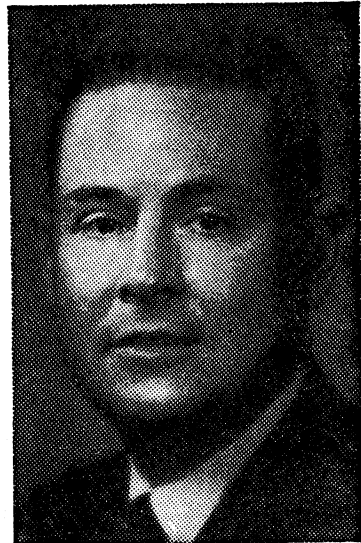

All other students, having had three full weeks of vacation, are also invited to return and continue their good work.

The summer quarter ends September 14.

Awards Night one of the outstanding events on the campus, as it justly deserves to be, since its major purpose is to honor those unselfish students who gave of their time and talents to make of Southern Tech a better school.

Southern Tech Graduates 251 in Exercises June 8

Dr. Judson Ward Is Principal Speaker; Ernest Albitz Is High Man With 3.89

Dr. Ward Commencement Speaker

Dr. Ward Speaks At Graduation

Dr. Judson C. Ward, Jr., Dean of the College of Arts and Sciences of Emory University since 1948, will deliver the baccalaureate address at Southern Tech's twelfth commencement exercises to be held on the campus at 11 A.M. Saturday, June 8.

Dr. Ward is a native of Marietta, Georgia, where he received his elementary and high-school education. He holds his A.B. and his Master's degrees from Emory University and his Ph.D. from the University of North Carolina. Social science was his major field of study.

Outstanding teacher, educator, scholar, and speaker and former college president and Assistant Chancellor of the University System, Dr. Ward has a vast store of knowledge and a wide range of experiences upon which to draw.

* The Southern Technical Institute's twelfth commencement exercises will be held on the school campus on Saturday morning, June 8, beginning at 11 o'clock. The public is cordially invited to attend.

Dr. Judson C. Ward, Jr., Dean of the College of Arts and Sciences, Emory University, will deliver the baccalaureate address.

Two hundred and fifty-one degrees will be awarded to men who have completed their requirements for graduation within the 1956-57 school year. Fifty-six finished their work in September, 1956; 48, in December, 1956; and 61, in March; and 86 June candidates hope to qualify for graduation at the end of this quarter.

15 from Night School

Fifteen men who will have completed their work at the Georgia Tech Engineering Evening School will also participate in the June exercises and receive degrees.

Other events on the program include presentation of the Georgia Engineering Society Award to Southern Tech's outstanding student of the year and recognition of the winner of STI's scholarship award.

Ernest L. Albitz, Gas Fuel Technology student from East Greenville, Pa., held the highest scholastic point average of all his classmates, an enviable 3.89.

This year's class of 251 increases the total number of Southern Tech alumni to 1,427.

Especially in the field of education has he held many positions of prominence and leadership.

Southern Tech officials feel that they are most fortunate in obtaining so capable, well-informed, fluent, and scholarly a man as Dr. Ward and urge all STI students, relatives, and friends to hear him.

Alumni Banquet Brought Back to Campus May 25

The Southern Tech Alumni Association was scheduled to hold its annual banquet in the Green Room on the STI campus at 7 P.M. Saturday evening, May 25.

A large crowd was anticipated, and they had an excellent meal, musical entertainment, a minimum of speech-making, and much good fellowship to look forward to.

Mr. F. Geeslin, dining hall manager, had established a menu of tomato cocktail, sirloin steak, creamed potatoes with brown gravy, broccoli, tossed salad, strawberry shortcake, hot rolls, and tea or coffee to satisfy the appetites of the guests.

Mr. Harry Kent, president of the Association, was to handle the meeting. He expressed the hope that a large group of graduates would attend, have fun, and participate in the two major matters of business to be brought up and discussed—the election of officers for 1957-58 and the Scholarship Fund.

Mr. Tom Nichols was vice-president of the Association in 1956-57, and Mr. J. O. Stewart, secretary-treasurer.

STI, State Highway Department Agree Upon Civil T Co-op Plan

The State Highway Department of Georgia, jointly with the Southern Technical Institute, has announced a new Co-operative Program, whereby high school students can combine on-the-job training with two years of college education in Civil Technology.

This new plan will offer high school students who want to build highways a very practicable opportunity to build their own future careers with the rapidly expanding State Highway Department of Georgia.

Under the Co-op Plan, qualified high school graduates will get valuable on-the-job training, the opportunity to help finance two

years of college, and an Associate in Science degree. Co-ops will alternate work quarters with the Georgia Highway Department and school quarters in Civil Technology at the Southern Technical Institute.

During his first work quarter, a student will receive \$240 per month. He will perform practical job assignments in the multi-million-dollar road building program. Thereafter, he will alternate work quarters with college quarters at the Southern Technical Institute. He will receive salary increases each succeeding work quarter as he becomes more valuable to the Highway Department.

At the end of his program the successful co-op will have earned

his accredited Associate in Science degree in Civil Technology. He will be eligible for a position with the Georgia Highway Department as a Civil Technician at \$385 per month. For the future, his training should qualify him to advance to positions of increased responsibility and higher salary through the Highway Department's excellent merit system.

The program will begin September 23, 1957, and will require about 2½ years to complete. Students who wish to apply should contact Mr. L. Y. Bryant, Registrar, Southern Technical Institute, Chamblee, Georgia; or Mr. Hunter Johnston, Public Information Officer, State Highway Department of Georgia, Atlanta, Georgia.

TECHNICIAN EDITORIAL

Deserve More, Better Conveniences By Protecting The Ones You Have

Recently there has been a great deal of abuse to equipment placed in the dormitory and in some of the other buildings—soft drink vending machines, telephones, washing machines, and the cigarette vendors. All of these machines are placed around the campus for the convenience of the students.

The older students will recall that last spring we had the use of four phones, two in each dormitory. The two additional ones were in the upstairs center section of the dorms. This year we have only two phone booths.

What happened? you are asking. All four phone booths received so much abuse last year that two of them had to be removed for repairs. As you know, these phones were never returned. This year the students can feel the effect of last year's misbehavior by having to stand in long waiting lines for the use of the phones.

So you say, "But all that happened last year; why can't we have them back?"

Of course, the answer is that we can have them back if the students want them. But, and here's the catch, the students have not told us that they want the additional phones returned. Now, I am not merely asking, What are you going to do about it? But, WHAT ARE YOU GOING TO DO ABOUT IT?

Let me offer a suggestion to be taken merely as such.

Better Care Urged

Since the phones are for your convenience, is it asking too much for you to take care of them? Most of you have a radio in your room for your own pleasure, and I am also sure that not one of you would drop it out the window or otherwise smash it. Then why so the phones?

Treatment of soft drink machines is another instance of damnable behavior. If these machines were treated with the proper respect, as old and as cheap as they are, proof would be demonstrated that you are worthy of something better. This something better is a drink machine that costs almost \$2,000. It is not a machine that merely colors your water for a nickel. Is not this something to work for?

Last week Mr. Geeslin had a juke box installed in the Snack Bar. Of course, this is only on a trial basis to determine whether or not this is something that the student wants.

This abuse of conveniences goes much further than I have indicated. What about your behavior in the rooms and hallways? Do you tinker with the fire hoses, alarms, or other safety devices? Just how much do you respect the other fellow's property? If you can give a favorable answer to these questions, then someday you will have the better things and appreciate them so much more than that ruffian down the hall from you.

Think about it. Do you want better facilities and more conveniences, or are you satisfied with things the way they are at present?

The Lost Present

By JAMES L. ROSE

"Lost—somewhere between sunrise and sunset—one golden hour, enjeweled with sixty diamond minutes. . ."

I don't recall who wrote the preceding, but it is something to think about.

Each morning when you arise, God gives you twenty-four of these hours—no more, no less. He knows how foolish man is. Man is wasteful, careless, and forgetful. What would happen if he gave man all his hours at once? How many hours would be lost, misplaced, and wasted?

How well man uses an hour is the foundation for the one that follows.

What Is An Hour?

What is an hour? It is a measure of time. Time is immortal. Time has always been here. Time is the main factor in each and everything you do. In most cases, you can not even realize that you are considering it.

Time wasted can never be made up. Once you waste or let an hour of time go by, it never returns. Another takes its place to be used and also passes, usually in a similar manner.

Time is valuable. It is the one thing that can not be purchased for a price, but it is the easiest to lose.

How do you use yours?

assistant manager called and asked if this guest were a lady.

"Hold the line," said the extrovert, "and I'll ask her."

Irate Wife to Husband, "Are you a man or a mouse? Come on, squeak up!"

Tech-Annes End Year's Activities With Dinner and Dance on May 18

Another year of successful club life for the wives of STI students came to a close when the Tech-Annes Club held its annual banquet on May 18 at the Officers Club of the Naval Air Station in Chamblee.

Members of the club and their husbands and sponsors and their husbands enjoyed an evening of dining, dancing, and fellowship.

To Mrs. L. Y. Bryant, who is retiring after serving as sponsor for three years, members of the Tech-Annes presented a beautiful silver serving tray.

Although the monthly meetings of the club will be discontinued

during the summer months, several activities are being planned.

The newly elected officers met recently with the outgoing officers at the home of Mrs. C. V. Maddox to discuss plans for the coming year.

Club officers for 1957-58 are Mrs. Vera Bettis, president; Mrs. Betsy Herndon, first vice president; Mrs. LaShon Johnson, second vice president; Mrs. Barbara Mattheis, parliamentarian; Mrs. Fay Floyd, recording secretary; Mrs. Ellen Rose, corresponding secretary; Mrs. Jean Robinson treasurer; and Mrs. Mitzi Thomas publicity chairman.

Gustavo Estenssoro, Bolivian, Tells How And Why He Came To STI

By GUSTAVO ESTENSSORO

I am a foreigner in this country, and I do not speak good English, and neither am I a writer; but I will try to tell you why and how I came to STI.

The first question people ask me is how I found out about STI. In almost every foreign country there

is an American Embassy. The Embassy gives information about all different schools and colleges in the United States.

When I finished high-school, my ambition was to come to the United States and study. I obtained information from the American Embassy in La Paz capital of Bolivia, about many schools. After writing to those schools and receiving many letters, the one that interested me most was the information I obtained from STI. After discussing it with my parents we decided for me to enroll in STI.

On August 30, 1956, I left my country, and I began my trip to the United States; I arrived on September 12, 1956, and enrolled.

I have been in this country for seven months. I have enjoyed my time here and hope that when I finish school at STI I will remain in the United States for a while and work.

I hope that some day I can do as much for the instructors and students at STI as they have done for me.

ideas in the South. You might come back South worth a great deal more than you would have otherwise. Go North, young man go North!

St. Lawrence Seaway Will Stimulate Industry, Create Thousands Of Jobs

By DONALD JAMES, Mech Student

In a little over a year from now one of the biggest construction projects the world has ever known, called the St. Lawrence Seaway, will be nearing completion and will open all of the five Great Lakes to 90% of the world's shipping.

Why this expenditure of nearly one billion dollars simply to bring ocean-going boats to Buffalo, Erie, Cleveland, Detroit, and Chicago? It's a matter of the simplest arithmetic. The cost of shipping a ton of freight, ore, or finished products by water is one-eighth that of shipping by rail. In our modern competitive production and our cost analysis study, we, as engineering technicians, can appreciate the tremendous potential that will be brought about by this seaway.

Industrial Heart of U. S.

The Great Lakes Region has always been the industrial heart of America for several reasons: (1) cheap water transportation, (2) natural resources, especially fresh water and coal, (3) concentration of population, (4) invigorating climate, (5) nearness of markets. Now suddenly reduce

shipping costs in this area to about 12% of what it has been in the past.

It is only natural that this area, as predicted, will see one of the world's greatest industrial expansions in the near future. Starting some time ago most Great Lakes ports began to prepare for their share of the future by increasing dock, harbor, and channel facilities. A vast amount of cheap hydroelectric power will also be available as a result of this huge project. That alone will be another boost to attract industry.

The southern shore of Lake Erie is to be especially recommended for future job opportunities for the following reasons. Take the basic industries of chemicals and steel. The ores of the world can be brought the closest to the richest coal fields in the world by cheap water transportation at a point on the south shores of Lake Erie. Only someone with imagination can foresee what potential this means.

Advantages Are Many

STI Folk Attend L-P Gas Meeting In Chicago, Ill.

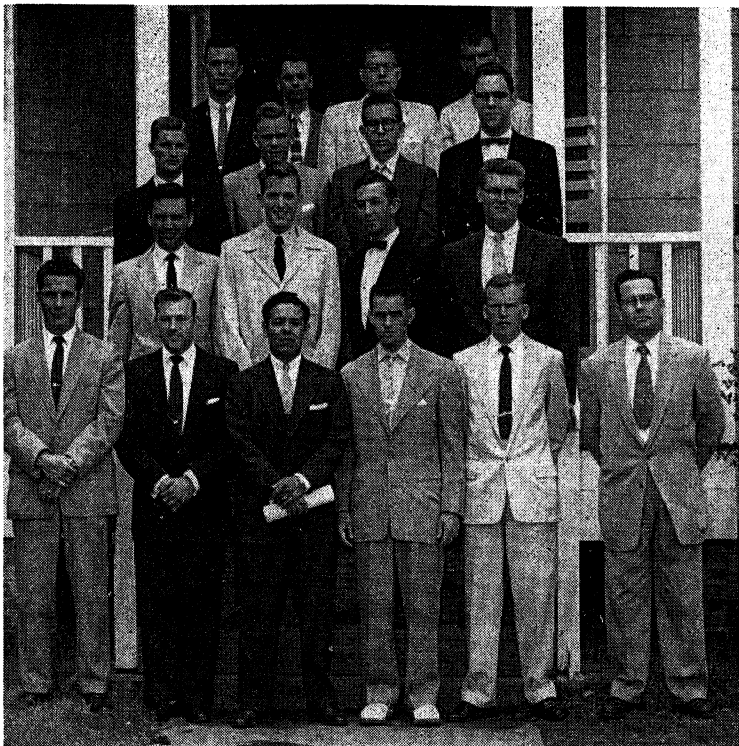

Mr. E. A. Clifford and Mr. W. L. Thomas, of the Gas Fuel Department, and three students—Tom Slade, Abe Neufeldt, and Saul Katzowitz—attended the L.P. Gas Convention held this year in Chicago on May 12-15 at the Conrad-Hilton Hotel.

Southern Tech entered and manned a booth at the trade show. A framed "course outline" was on display as well as a map showing the location of Gas Fuel alumni.

The attendants upon the convention consisted of L.P. Gas producers, marketers, equipment manufacturers, and appliance manufacturers.

This convention was educational and gave the graduating seniors a chance to talk to prospective employers. It also helped promote the Gas Fuel Department.

Mr. Thomas went by plane, Mr. Clifford by train, and the students by automobile.

Tau Alpha Elects Davis, Admits 16

Members of the STI Alpha Alpha chapter of the Tau Alpha Pi Honor Society recently initiated into the organization 16 new men who had met the scholastic and other requirements. These new members appear in the picture above.

Members of the organization also elected P. M. Davis to replace Danny Lane as president. Other officers chosen were Walter Walker, vice president; Julius C. Malsby, secretary-treasurer; and William V. Devereaux, public relations officer.

Toastmasters Elect Officers, Formulate Plans For Banquet

The Southern Tech Chapter of Toastmasters International has made good progress thus far this quarter under the leadership of President Howard Davis and with the advice of Mr. A. L. Steinkamp, faculty sponsor.

Officers are elected for a six-month term. Since these elections were held this quarter, a new slate of men will be in order for the fall quarter. Present officers are Howard F. Davis, president; Robert E.

Moore (graduated student), educational vice president; Henry L. Slocumb, treasurer; Howard Calloway, sergeant-at-arms; Paul M. Bass, secretary; and Bernal D. Heinmiller, administrative vice president.

Plans have been made for the quarterly banquet, which, for a change of pace from Robinson's Tropical Gardens, Leb's, Legion Posts, and the like, will be held at Mr. Steinkamp's home.

Yog Sehgal, Native Of India, Thinks Southern Tech Very Friendly, Helpful

By YOG RAJ SEHGAL

Respected faculty members and fellow students, I am proud of the opportunity I have been given to express my impressions about Southern Technical Institute and on the whole about the United States of America.

Before I write something, I want to introduce myself to you. My name is Yog Raj Sehgal. Before I came to the United States, I was working in the Government of India Central Public Works Department as a section officer (electrical) at New Delhi. My job involved transmission and distribution of electrical energy.

I have gained much experience from Southern Tech in my field. This school is better equipped than many technical schools in India, and also the standards of this school are much higher than many schools. The teaching staff of this school is highly qualified and experienced. The most unusual thing I have noticed here about the teaching staff is that they take interest in every individual student in his difficulties about studies. The students have to work very hard to get through this school. According to my survey, the average student of this school studies about 12 to 13 hours a day.

Departmental clubs help students to know more about their chosen fields. The Toastmasters Club is doing a very good job to train students to speak before groups of people. I was once invited to attend the meeting of

this club. I was very much impressed by the students' speeches and discipline during the meeting.

Gains Much at STI

The staff of Southern Tech and students have been very friendly to me. I never felt throughout my stay here that I was studying in a foreign country. Studying in this school has given me quite a good idea about the teachers and students of the USA. In short, I have gained a lot being here, more than I could gain in any other school in the USA. I am proud that I have been a student of Southern Tech; but the most interesting thing which happened by chance is that Southern Tech and I were born on the same day; that is, we came into existence on the same day, March 24.

When I was in India, I used to read about the United States and people of this place from magazines, newspapers, and books. But now I feel I did not have the true picture of this country. Everything over here is unexpected to me. People over here are more sympathetic, hospitable, and fond of peace.

I am very grateful to my sponsor, Mr. Kendall Weiseger, who gave me this great opportunity to come to this country and study here. By doing this, he has greatly helped my family, my community, and last but not least, my country. I do not think I will ever come across a man like Mr. Weiseger with such a great personality and high thoughts.

Before I close I want to thank

all faculty members and students of this school who made my stay here more interesting and educational. I am especially grateful to Bryant and Mr. Halstead who helped me a lot during my stay here. Mrs. Bates helped me a lot in avoiding my home sickness.

I wish the best of luck to Southern Tech, all faculty members, and students.

Albitz Tops Class Of 251 With 3.89

Ernest L. Albitz, a native of East Greenville, Pa., and a graduate in Gas Fuel Technology in the March, 1957, class, leads his 250 fellow graduates in scholarship with the excellent point average of 3.89.

Ernest is entitled to receive the scholarship medal presented each year by the school to the student who achieves the best scholastic record. Also his name will be engraved on the school's Scholarship Plaque. Ernest's name was also one of the two submitted by STI officials to the Georgia Engineering Society as a candidate for their annual award.

Robert L. Huguen, an E&C student from Hartford, Ala., pushes Mr. Albitz closely with a 3.85 average.

Among the 250 are 15 students who will graduate in June "with honor" or "with highest honor," since they have achieved the 3.30 necessary to win the first honor or the 3.60 required for the second. An additional 17 students made the STI Honor Roll by graduating with an overall average of 3.00 to 3.29.

There follows a list of these outstanding students arranged by quarters and rank in their particular graduating group.

Name	Course	Average	Rank	Honors
September (Summer) Quarter, 1956

Hornet's 10-2 Record Earns Place In League Play-Off

West Georgia, Truitt-McConnell Win; Causey Leads Mates in Many Phases

By TYLER SEYMOUR

Coach Harry Lockhart's Southern Tech Hornets closed out their baseball season with a record of ten victories against two losses in regularly scheduled Georgia Junior College League play.

The only two teams successful in defeating the Hornets were West Georgia College and Truitt-McConnell.

Their 10-2 record won second place in league standings for the Hornets and made it possible for them to participate in the post-season playoffs to determine the champions. Other participants were Georgia Southwestern (10-0), South Georgia College (6-2), and Georgia Military College (6-3).

Southern Tech was to play South Georgia in a two-games-out-of-three series to determine who would meet the winner of the series between Georgia Southwestern and Georgia Military College.

Final Conference Standings

School	Won	Lost
Ga. Southwestern	10	0
Southern Tech	10	2
South Georgia	6	2
Ga. Military College	6	2
Abraham Baldwin	7	5
Truitt-McConnell	4	4
West Georgia	2	2
Brewton-Parker	4	8
Middle Georgia	3	10
Gordon Military	1	7

Statistics reveal that STI's Bobby Causey perhaps leads the League in more departments than any other player. Bobby is ahead in 2-base hits, with eight; in 3-base hits, with three; in runs scored, with 14; and in total bases, with 37. He also leads in Southern Tech hitting, with an average of .403.

Al Summerford, with 13, ran Bobby a close second in runs scored in League play. And STI's Frank Babbitt leads the League in runs batted in, 15, and in stolen bases, 16.

Bobby Mathis was STI's second-best hitter of the season, with the enviable average of .344. Both Moog and Trogdon got a home run each.

Complete Batting Summary

Player	AB	H	Pct.
Causey	57	23	.403
Mathis	29	10	.344
Babbitt	50	17	.340
Bryant	3	1	.333
Moog	50	15	.300
Summerford	52	16	.300
Nix	11	3	.273
Seymour	22	6	.272
Howell	38	9	.237
Trogdon	45	10	.222
Kelly	12	2	.166

Students Enjoy Keen Competition In Spring Intramural Activities

By WALLACE V. DAVIS

VOLLEY BALL

—After a slow start the intramural volley ball tournament developed into a tight, three-team race, with Macon, E&C, and Circle K proving to be the strong teams.

Both the Macon and E&C teams swept their first five games of the tournament. Both teams are tied for first place, and the winner of the game between Macon & E&C, May 21, was expected to produce the tournament champs. However, the strong Circle K team, which lost a hard fought battle to Macon earlier in the tournament, was given an outside chance of "taking all the marbles" if they can beat the E&C team May 23.

The game between Macon and E&C May 21 will be doubly interesting because the winner is almost assured of becoming the intramural champions for the year. At the present time Macon and E&C are running neck and neck for the most points in all intramural sports.

GOLF

—The recent golf tournament held at Southern Tech received a big turnout with lots of interest. Some 16 members of the faculty, staff, and student body participated. After many hard fought matches, the field had been narrowed down to three. A. Ten-

nille and Lawrence Colo, both members of the student body, play May 27, with the winner meeting Mr. R. L. Myatt, of the Civil Department, in the finals June 3.

TENNIS

—Eleven students entered the tennis tournament. At this writing all but five participants had been eliminated. In the remaining matches Jimmy Drakulis was to meet Frank Babbitt, and Jimmy Dorough was matched against Dave Herrington. The winner of these two matches will then meet to determine who would play Hugh Lord for the championship.

Good Sportsmanship

By Irvin S. Cobb

Try always to be a good sport. By this I mean, to be a good sport not only in your games and in your studies but in every situation which arises between you and anybody else or anything else.

It's not always so easy to do this as it may sound. Sportsmanship means that you must always go in to win, but to win fairly. If you win, try not to be a greedy winner; if you lose, be a game loser and not a quitter. Don't whine over the result or sulk, but make up your mind to wait for the next chance and try harder than you tried the first time.

Technician Receives ACP First-Class Honor Rating

The Technician, STI's monthly student newspaper, won a First-Class Honor Rating (very good to excellent) in the Associated Collegiate Press' 55th All-American Critical Service. The paper scored 1,560 points, only 40 short of the 1,600 necessary to make All-American.

The four issues of the fall quarter—September, October, November, and December—were entered in the contest.

Material was judged very critically by experienced journalists in all phases which go to make up a newspaper—coverage, content, and physical properties.

The judges complimented The Technician editors highly for the neatness and good looks of the paper, its layout, its headlines, and its coverage, which they termed excellent. They suggested by way of improvement more features, more editorials dealing with real school problems, and a more objective tone.

Albert L. Martin was editor of The Technician throughout the time the fall quarter issues were produced. He was assisted by Quentin M. Halsey, James G. Cook, James Greene, France Allegood, Bobby Bruner, William Carlson, James Cole, Larry Farrahar, Ronald Hasty, Jeff Huff, Pat Hulsey, Emil Lenzi, James Saville, and Volney Smith.

In previous years The Technician has won in ACP judgments two All-American ratings, four First-Class ratings, and one Second-Class.

Trackmen Spring Surprise By Taking Second Place

Southern Tech's track team placed second in the state's first junior college track meet, which was held in Macon on May 4. In

so doing it added a new trophy to STI's collection and proved that it takes more than limited facilities, time, and practice to defeat the will to win.

Students and faculty should be very proud of the showing Coach Lockhart and his men made in the school's behalf in Macon.

STI men took three first places, two second places, five third places, and two fourth places—to total 32½ points and cop second place. Incidentally, South Georgia College won the meet with 80½ points.

Three First Places

First place winners were Reynolds (GF), high jump, 5' 9½"; Rivers (H&AC), discus, 124' 8"; Davis (Ind), javelin, 145' 7".

Second place winners were Rivers (H&AC), shot put; and Summerford (E&C), 440 yd. dash.

Third place winners were Causey (BC), broad jump; Babbitt (H&AC), 220 yd. dash; Davis (Ind), mile relay; Lemon (E&C), mile; Herrington (Ind), pole vault.

Fourth place winners were Davis (Ind), 440 yd. dash; and Causey (BC), 220 yd. dash.
