

## Community Leaders Form KJC Foundation

On Thursday, April 17, a group of twenty-three community leaders gathered at Kennesaw Junior College to discuss plans for a foundation which would stimulate interest in the growth and improvement of the college.

The result of this meeting was the organization of the Kenne-

saw Junior College Foundation, Inc., a non-profit organization with membership dedicated to the educational opportunities offered by Kennesaw Junior College.

The purpose of this foundation, as expressed by its twenty-three charter members, is to operate exclusively for chari-

table, educational, literary, and scientific purposes. The foundation is to create scholarships and endowments, to supplement salaries of faculty members, and to do any and all things pertaining to the best interest of Kennesaw Junior College.

This foundation is also to provide an effective means

through which interested individuals, groups, organizations, and agencies may give support to Kennesaw Junior College.

The foundation is to actively support conferences for high school counselors, open houses, and recruitment of students. It is also to support the visit of distinguished lecturers from

other colleges to our campus and to stimulate interest in financial aid programs for students.

It is hoped that this foundation can stimulate a desire to investigate campus problems and solve them, thus leading to future growth and improvement for Kennesaw Junior College.

Kennesaw Junior College

Gerald Martin

Barbara Baker

Beverly Butler

## Gerald Martin Elected President Of KJC SGA

The 1969-70 Student Government officials for Kennesaw Junior College have been selected.

Gerald Martin has been elected president of the SGA over his opponent, Jose Serano.

Mr. Martin, who is a third quarter freshman at KJC, is very active in all phases of campus life. He has recently been elected president of the Circle K and he is an interested member of the Civitan Club and the KJC chapter of SEA. Gerald is also an

active participant in the intramural program.

The new vice-president of the SGA is Mike Mauldin. He is a graduate of Marietta High School and serves as news editor of The Sentinel. Mr. Mauldin was a freshman senator in the 1968-69 SGA. Mr. Mauldin was opposed by Robert Haynes in a close race.

The office of secretary was uncontested in this election. Barbara Baker was unopposed and is the new secretary of the

SGA.

Beverly Butler has won the office of treasurer, defeating Patsy Goodson and Patsy Young. Miss Butler is a graduate of Osborne High School and is an active participant in the intramural program.

The biggest race came in the selection of the five sophomore senators. After much campaigning, the following students have been selected to serve as senators: Tyron Copeland, Joan Gibbs, Doug Johnson, Josh Langston, and Lee Purdue. Marena Godwin also ran for the senatorial position.

Only a total of 319 students participate in the voting for the 1969-70 SGA officials. Obviously this is a poor showing. These people who were elected will act as official spokesmen for the students at KJC next year.

The Division of Natural

## 1969 Commencement Will Take Place June 13

On Friday, June 13, the second commencement exercises of Kennesaw Junior College will be held. Graduation will begin at 8:00 P.M. in the Physical Education Building. Over fifty students are expected to participate in these exercises.

These students have completed the necessary course requirements and have petitioned for degree through the Office of the Registrar.

A schedule of information regarding graduation has been made available to all graduates. During the week of April 28 through May 2, candidates for degree were required to check their status for graduation, sign the diploma list, and be measured for caps and gowns.

Early examinations will be given to all candidates during the week of June 2 through June 6. All students will receive individual exam schedules from their instructors.

Student Rules and Regulations states, "a student who has a single deficiency between him and graduation will be permitted one re-examination not later than 72 hours before the commencement exercises." Students should see the instructor involv-

ed regarding re-examinations which will be taken on June 9 and 10.

All incompletes will have been cleared by June 11 and the students will check their eligibility for graduation by June 12.

Students will be required to pay a \$5.00 fee for the rental of their caps and gowns. These caps and gowns can be picked up in the Student Services Building from 8:00 A.M. to 7:15 P.M. on Friday, June 13. At 7:15 P.M., graduates will assemble in room G-2 of the Natural Science Building to prepare for the graduation exercises. Students will be expected to return their caps and gowns to the Student Service Building immediately after the ceremony.

Former Governor Carl Sanders will be the commencement speaker. This leading figure in Georgia politics is expected to present an interesting and thought-provoking address.

Following the ceremony, President and Mrs. Horace W. Sturgis will entertain the graduates at a reception to be held in the Student Services Building.

The public is cordially invited to attend the commencement exercises.

On Thursday, May 29, at 11:00 A.M. in the Seminar Room of the library, Kennesaw Junior College will present its first Honors Day Program. This event will be the climax of much interest and planning on the part of many of the students and faculty at Kennesaw Junior College.

The students who will be honored during the program have maintained an excellent record during their residence at Kennesaw Junior College. Each has earned a cumulative grade point average of 3.5 or above and has also earned over sixty quarter hours of work at Kennesaw Junior College.

The sixteen students who have been selected to participate in the Honors Day Program are Larry Adams, Eloise Diane Barron, Dorothy G. Bradley, Jane

Melinda Burgess, Wanda Eve Callahan, Martha Dell Carney, Miriam F. Cartee, Helen Kay Franklin, Priscilla Harrison, Patricia Jean Lewis, Linda Lou Millsap, William Vinson Peek, Cynthia Ann Skidmore, Margaret Ruth Smith, Betty Dorothy Thom, and Dennis Ray Woodfin.

These students have not only established their interest and ability in academic pursuits but have also been essential members of many of the most active clubs and organizations on campus.

Among these students are student government officials, presidents of Mu Alpha Theta, newspaper columnists, and intramural participants. Many of them have also maintained positions of employment while carrying full course load requirements. In effect, each of these

students has reaped a well-rounded education at Kennesaw Junior College.

The Honors Day Committee is composed of Dr. John C. Greider—chairman, Mrs. Opal Cosey, Mr. Woody Norman, Mrs. Charlotte Hayes, Mr. S. F. Roach, and Mrs. Judith Larsen. Dr. Derrell C. Roberts, Dean of the College, is Chairman of the Honors Day Review Board.

Each of the students to be recognized on Honors Day will receive a Certificate for Academic Excellence from Kennesaw Junior College. The college seeks to honor these students who have achieved academic distinction; the Honors Day Program is part of that recognition.

All students and faculty members are invited to attend this program.

## Comment on the human race

If there is one distinct characteristic that separates man from the ape, it is the ability to feel gratitude. It is the definite sign of maturity in an individual, regardless of age, when he begins to exhibit thankfulness toward someone after he has benefitted from some favor, gift, or kindness. And yet there are those who, in the words of an articulate man I once knew, "gorged themselves at the bountiful table of life but, like the cloven-hoofed beast, never lift their eyes in gratitude to the givern of the gift."

Over the years, I have felt distinctly humbled by the harshly accurate description of man in his most insensitive stage of development, a stage through which some never pass. Man begins his existence as a feeble, ineffectual creature who yells loudly for fulfillment of his needs. He is oblivious to the comfort or convenience of any being except himself, and as he grows in physical strength and manual dexterity, he grabs anything that strikes his fancy with complete disregard of consequences. Later, he is taught to say "thank you," but at first he only parrots his instructions. It is a long time before he feels in his heart any emotion which resembles gratitude. All sensible parents recognize that the lovable little barbarians who are their children are not born civilized, but if they truly love their offspring they do their best to correct this primitive condition. The parents freely give a great part of their own intellectual, emotional, and financial resources toward this end. They literally give up years of doing as they would like to mold their children into useful, happy, creative individuals who will be capable of making a contribution to society.

It is obvious that a substantial number of such parents are sending their children to Kennesaw Junior College, for here at KJC we have a curious phenomenon, curious by comparison with some of the other colleges and universities across the nation. We have a body of students who are, for the most part, punctual in their class attendance, respectful toward their professors, open and friendly toward each other, careful of school property, and patriotic toward their nation. In contrast to some schools where the student is haunted by the fear that, regardless of his efforts, he will get the old shaft, the KJC student is certain that his faith in his fairness and impartiality of his instructors is justified.

Although there may be no simple answer that will explain this great difference between KJC and some other riot-torn, besieged hall of learning, we can try to analyze its meaning. Can the stability of this institution be credited to the leadership of its president and his faculty or is it due in part to its peaceful location? No doubt these are important factors, but the one which towers significantly over these is the student body itself. The great majority in this group know why they are here. They have a dedication and purpose of their own and they intend to pursue their course as evenly as possible toward their goal. This accounts for their courtesy, their spirit of cooperation, and their pride in their college. Gratitude for one's blessings is the true mark of maturity. It is the hallmark of civilization.

## Electoral college system is inadequate to elect President

Ever since the election of George Washington as President in 1789, our country has used the Electoral College as the method for selecting Chief Executives. Many favorable features offered by this system made its establishment very convenient and practical. Our Founding Fathers conceived the idea of election by a body of electors as a compromise to satisfy the small states who feared domination by large states. Because the Electoral College gave the small states two electoral votes for their two senators, the small states felt that they had an electoral advantage which popular vote alone could not give them. Moreover, our early leaders generally agreed that voters living in scattered and isolated areas would benefit from the assistance of electors, who, being better informed, could make a wiser choice for President. At the time that the Electoral College was created, these arguments were certainly logical; however, they do not necessarily prove valid in our modern, space-age world. Because the elector system produces three very undemocratic effects, it defeats the purpose intended by the Founding Fathers.

First of all, the Electoral College disfranchises millions of voters. Because the defeated candidate or candidates in a

state get none of the state's electoral votes, the votes of the people who voted for these defeated candidates do not count. For example, in California in the 1960 election Richard Nixon received only .5 percent more of the popular vote than did John Kennedy; nevertheless, the members of the Electoral College from California gave Nixon a shutout victory. This example alone demonstrates the misleading totals of the Electoral College votes. Because the Electoral College votes elect the President, the people themselves play a subordinate

All opinions expressed in this newspaper are the thoughts of the authors of the articles and editorials involved and do not directly represent those opinions held by the administration or newspaper staff of Kennesaw Junior College.

role in the election of their highest leader. In effect, the electors are middlemen between the people and the Chief Executive—middlemen who are no longer needed. Unlike the people voting in our country's first elections, voters today are informed of candidates and issues through extensive, modern means of communication. As a result, the voters themselves have the opportunity to be as qualified to select a President as are their representatives, the electors.

Second, our system gives more weight to some votes than to others. Contrary to the contentions of small states, large states really hold the key to a Presidential election. In studies conducted by John F. Banzhaf, a prominent Washington attorney, it has been proved that large states exercise inordinate power under the Electoral Col-

lege. Banzhaf's reports show that there is one electoral vote for every 75,000 voters in Alaska, one for every 260,000 in Arizona, and one for every 400,000 in California. These figures seem to indicate more power for the less-populated states; but actually, a voter in Alaska, Nevada, or Delaware can influence only three electoral votes while a single voter in New York can influence forty-three.

Third, the Electoral College permits selection of a candidate who has fewer popular votes than his opponent. On fifteen occasions we have elected a President who did not have a plurality of popular votes; on three occasions we have denied the Presidency to a man who had more than half of the popular votes. Furthermore, results of an exhaustive study of the Electoral College published by the Fordham Law Review show that it is possible for a candidate to win a majority of the electoral votes with less than one fourth of the total popular vote. Because such minority Presidents obviously do not reflect the will of the majority of voters, their election is essentially an undemocratic process.

It seems, then, that by keeping the Electoral College in its present form we are merely perpetuating a government tradition established in and for a very different era. With the changing times have come new ideas and circumstances which permit either a new election process or some modifications in the old one. It is a fact that most of the reasons behind the establishment of the Electoral College no longer exist. Therefore, it should be obvious that the first step toward a more modern, democratic system of government is either reform or abolition of the present Electoral College—an eighteenth century institution in a space-age world.

Josh Langston

## Fail Sneeze

It appears to be the same old thing. . Spring again, you know. One must be prepared to meet the advance of kind old Sol. . . and sunburn; lovely spring showers. . . and floods; beautiful night air. . . and Hay Fever.

Obviously, Hay Fever is nothing new. In fact, it has been with us for many years, and has caused misfortune for as long as it has been here. Think back, if you will, to the days of merrie olde England, when King Henry II (the one who had the run-in with Mr. Becket) was busy gallivanting around the country, relieving the naughty lords of their ill-gotten holdings, killing off the evils of a plague-torn society, and thrashing out tons of goodness from mere pounds. The point is missed. This dissertation concerns Hay Fever.

Old Hank was a tragic victim. It was, in fact, this terrible dread of the fever, or "Sneezing Sickness" as he called it, that caused him to make desperate flights into the country to evade the demons of "Nature's Nostil." Happily, many advances have been made since those days. The following is a blow-by-blow account of the war on this most dreaded of illnesses.

It is recorded (Boswell-Smythe, 1427) that many an adventurous personnage was forced into his accomplishments by the fever, rather than by an over productive "courage" gland. King Edward III of England is a good example of this. He was an unfortunate man who was terribly ashamed of his condition. He was so ashamed that he tried to cover up his retreat from ragweed infested England by attacking France. He made long-range plans, of course, before trying to do this. The result of his ruse was the Hundred Years War. One cannot conjecture fairly as to whether or not young Ed planned on causing as much trouble as he did.

As exemplified above, not all of the accomplishments made as a result of the anti-sneeze campaign were beneficial to man.

Indeed not, but some were of great value later on. As an illustration, one need only remember the voyages of some of the Portuguese and Spanish explorers, notably Magellen and Columbus. It was shown that both these men suffered violent attacks of sneezing, nausea, watery eyes, and headaches whenever they came into contact with hay, ragweed, goldenrod, or any of the byproducts of these. Consequently, these brave men took to the sea in order to avoid the illness. The records clearly show their accomplishments.

Further examples may not be needed, but they are supplied anyway.

What was it that made the Russian Czar Ivan so terrible?

The French kings Henry IV, Louis XIII, and Louis XIV, were all Bourbon rulers. But what made them turn to alcohol?

History vividly details the sad side effects of Hay Fever or "Sneezimus Maximus" as the Romans called it. Even today, we are still at war with this age-old enemy. And as usual, the side effects are at times more disastrous than the malady. For evidence, one need only watch television in his home to be bombarded with jingles, rhymes, songs, and the most assinine tests ever devised by man for measuring the suffering and consequent recovery of the afflicted. How many times have we been hypnotized by the man who has been strapped into a chair and can only effect his release by breathing into a "scientifically designed breathing bag"? How many times have we sat placidly by and watched two men try to get air through their noses when glass containers filled with cotton are blocking those precious "breathing passages"?

The whole answer to our problem seems rather obvious. If we want to avoid the near torture of watching those men suffer over and over again, perhaps we should attempt to ignore the disease rather than prolong the agony it causes.

### Letters to the editor

## Student praises recent SGA election process

Dear Editor:

For once someone is going to write to this newspaper to praise something instead of to put something down. I'm speaking specifically about the Student Government elections here that are being held this week. For the first time, that group of individuals who is supposed to represent the feelings of all the students is showing a little organization and leadership ability. In other words, I think their way of conducting these elections is just great!

With the use of computer cards and the fact that actual voting areas were set up, voting was for the first time legitimate. That business in the past of grabbing someone as they came in the Student Center and making them sign a ballot whether they wanted to or not

Sincerely,  
John H. Peterson

Mr. Charley Dobson discusses circuitry with new members of Mu Alpha Theta and Mrs. Linda May.

## Mu Alpha Theta initiates 16 new members

During the last meeting of Mu Alpha Theta, the honorary mathematics society, four students from Kennesaw Junior were initiated into this group.

### KJC receives federal grant

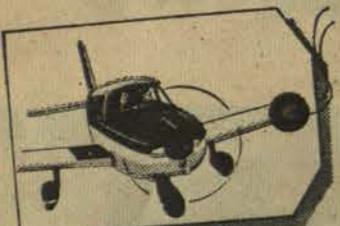

A federal grant of \$2,471 has been awarded to Kennesaw Junior College to aid students from low-income bracket families.

Seven students will be selected for the grants which will take effect fall quarter, 1969.

The grants will range from \$200 to \$1,000 for each academic year with a maximum duration of four years.

Kennesaw Junior College will match the grant which has been provided by the Department of Health, Education, and Welfare dollar for dollar.

### Try-a-flight Special: \$5.00

These outstanding students were Charles Delay, Medaro E. Sanchez, William H. Tidwell, and Lindsey Tippins.

Mr. Charley Dobson, instructor of physics at Kennesaw Junior College, was the guest speaker at the meeting. He spoke on the topic of Boolean Algebra, a concept in revolutionized electronic circuitry.

Mu Alpha Theta, the only honorary society on campus, was also host to another initiation ceremony on Tuesday, May 6. Mr. Donald Sparks, instructor of mathematics at Kennesaw Junior College, was the guest

speaker.

The new members who were initiated at this second meeting were Pat Dugan, Carolyn Elliot, Gloria Galloway, Regenia Green, Andrea Higgins, John Lamer, Myra Medford, William Mussara, Franklin Periello, Mrs. Anna Smith, William Tippins, and Dennis Woodfin.

Mu Alpha Theta is one of the most active organizations on campus. Under the leadership of president Priscilla Harrison and Mrs. Linda May, advisor, the club has been active in providing tours for the benefit of area high schools.

Josh Langston performs for Kiwanians in recent Circle K activity.

## Circle K remains active by participating at state convention

Seven members of the Kennesaw Junior College Circle K Club attended the annual Circle K convention at Savannah, Georgia, on April 18-20. The seven members of the club who attended the convention were Gerald Martin Chad Keith, Mike Kelly, Jerry Flender, Tyron Copeland, Mike Burns, and Mike Anderson. Also attending the convention were the Circle K Club's sweethearts, Vicki Holt, Patsy Young, Susan Land, Hatchet, Stucket, and Bitchet.

The convention started Friday with the registration of all club members from colleges all over the state in the Desoto Hilton of Savannah. Later there were contests for best club, single service, scrapbook, and best secretary. The climax of the evening was the Keynote Banquet where the speaker was

Ronnie Hudson, Past President of the University of Georgia Circle K. On Saturday, there were workshop discussions and the President's Dinner, at which George T. Smith, Lt. Governor of Georgia, was the speaker. There was a Governor's Ball after the banquet where awards for various achievements were given. On Sunday members there were workshop discussions and the President's Dinner, at which George T. Smith, Lt. Governor of Georgia, was the

speaker. There was a Governor's Ball after the banquet where awards for various achievements were given. On Sunday members elected new club officials. The highlight of the evening was the Governor's Farewell Luncheon where an address was given by Ralph E. Slay, Kiwanis Governor.

The Kennesaw Junior College chapter of the Circle K learned about new projects and activities which will aid the campus and community.

## Teacher evaluation taken by SEA

On Thursday and Friday, April 24 and 25, the Student Education Association conducted a poll to grade the teachers in twelve different areas. The purpose of this poll was to allow the students to voice their opinions about teaching methods and to let the teachers know in what areas they need improvement.

Each student was asked to grade each teacher under whom he has studied at Kennesaw Junior College. All grades are to be averaged and posted on the door of the Student Services Building. The teachers having a 3.0 average or better will be published in the next issue of

The Sentinel. Also, the teacher with the highest average will be announced as "Outstanding Teacher" at Kennesaw Junior College on Honors Day.

Students were urged to fill out a grade sheet. This grading system will show the teachers what the majority of students feel about different areas of their individual teaching. Such areas as grading system, communication with students, and preparation of class lectures were on the sheet.

This was the students' opportunity to have a voice in expressing their feelings about the ability of the teachers here at Kennesaw Junior College.
