KJC To Receive Facelift

Kennesaw Junior College's new student center is tentatively scheduled for completion by Winter Quarter, 1975. The building will consist of two main floors enclosed in glass housing a bookstore, cafeteria, snackbar, kitchen facilities, dining rooms, student clubs and organizations

offices, Counseling Services Offices, television, pool and game rooms, along with many other recreational areas.

A new warehouse and maintenance building is included in the construction project for KJC. These are presently under construction on the north side of the campus.

Rock Eagle Hosts KJC Leadership Conference

By Renee Matherne

The 1973 Leadership Conference held at Rock Eagle 4-H Camp centered around a theme of Communication. The Conference was held September 10-12 and was directed by the Institute for Directed Change and Renewal, a group of consultants from West Georgia College.

Beginning Monday afternoon, a brainstorming session took place to find what direction the Conference would go. It was decided by the student participants that Communication was the most important element in accomplishing their set of goals.

During the Monday evening sessions, the group began a discussion on problems as they would relate to KJC. They discussed where and how the communication would break down between students, faculty, and administrators.

Tuesday morning, everyone broke up into special interest groups to discuss the pros and cons of the group's particular topic. The topics included intra/extra-mural sports, college community spirit, and education as pertaining to good jobs and learning experience.

On Tuesday afternoon, each person was given material to evaluate himself as a leader.

The discussion resolved that each situation often needs a different type of approach.

The final discussion on Monday morning brought out a test case to bring together all of what had been learned and how to relate it to KJC.

Many things were learned at the conference but there was more to the three days than workshops. The remainder of the time was filled with swimming, canoe trips, visits to the Rock Eagle, a social hour with the faculty, and other activities involving student and faculty participation.

Ackerman Resigns

Robert H. Ackerman, dean of Kennesaw Junior College for three years, has become editorial associate on the staff of the Atlanta Journal.

"Dean Ackerman's leaving will be a great loss to Kennesaw Junior College," Dr. Horace W. Sturgis, President of KJC, said. "He has made many outstanding contributions to our college during the past three years and has helped to guide us through some significant developments in the history of the college. He will be greatly missed by the faculty and his many friends and colleagues."

"We are pleased that Dean Ackerman will be joining one of the outstanding organizations

in our community where he will be able to use many talents in a new capacity."

Before coming KJC, Ackerman was associated for twelve years with Florida Southern College as chairman of the history and social science divisions.

Ackerman's previous newspaper experience includes four years as associate editor of the "Florida Times-Union" and eight years with the Orlando "Sentinel-Star."

Ackerman received his bachelor's degree in philosophy from Rollins College, Fla., in 1950. He also holds the M.A. and Ph.D. degrees in history from American University.

Nurses Cite Plans

To begin the new school year the Kennesaw Student Nurses Association hosted a reunion coke party on Friday, Sept. 14 for the returning Pre-Nursing students. They also hosted a luncheon on the same afternoon in the private dining room for the nursing faculty.

On Monday, Sept. 17 the SNA hosted a "Get-Acquainted Party" for all the new Pre-

Nursing students.

Other proposed activities include a Health Fair and a seminar on Venereal Disease which are to be jointly sponsored with the Public Health Department. The dates have not been determined but are to be announced soon. All students, faculty, and administrators are welcome to participate.

Kennesaw Student Government Association Fall Quarter Senatorial elections will be held on Oct. 8 and 9.

Vacant positions include ten senate seats and three positions on the Entertainment Committee. The executive position of Vice-President of SGA will also be open due to a vacancy that was filled temporarily for Summer Quarter.

Senatorial candidates are required to file a written petition with the office of the Dean of Student Affairs no later than 12 noon on Oct. 1.

Students wishing to run for ice President must be enrolled for a minimum of 10 quarter hours and must have earned a minimum of fifteen quarter hours at Kennesaw prior to taking office with a 2.0 average or having earned a 2.0

average for the preceeding two quarters. Qualifications for running for the office of Senator are the same as those required of an executive office candidate except that a beginning freshman may run. However, a first quarter freshman assuming the position of Senator must have earned at least a 2.0 average after two quarters in attendance.

Greetings From the President's Office

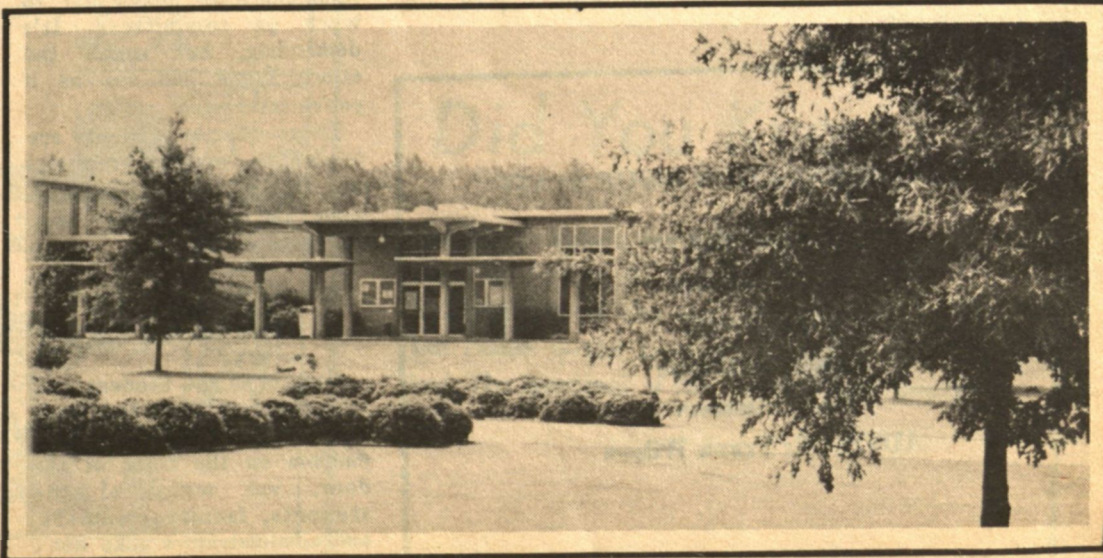

Dear Student:

It is a pleasure to welcome you to Kennesaw Junior College and I hope your experiences as a college student will be especially rewarding. We are glad you have chosen Kennesaw, and we wish you success and enjoyment as you work toward the academic and personal goals you have estab-

lished for yourself. I look forward to seeing you on the campus and the opportunity of becoming personally acquainted with you.

Cordially yours,

Horace W. Sturgis
President

Leadership Confusion

By Renee Matherne

The Leadership Conference at Rock Eagle could be termed by the forty students who attended, a very valuable learning experience. But what about the other 98% of the Kennesaw Junior College Student body? How much of the conference was brought home besides the "morning after feeling?"

The lack of a more uniform schedule gave the people who will become leaders a chance to prove their potential. However, for those that came only for a "free ride," it became practically meaningless.

I feel that when a large sum of money is spent of the Student Activities Fees, more students should be given the opportunity to participate and the quality of selection should be more demanding.

Prior to the conference, relatively little was known about it except that one does exist. The "old" KJC students who have not been involved in the elite structure received no information concerning the conference. At orientation the new students were told that there was a conference, but not enough information was provided to encourage much participation.

The theme of the conference, Communication, was a farce. The break in communication became so bad that at one point some people felt it necessary to leave the discussions because their views were not being considered. In another instance, one group complained about the actions of another group among themselves, but did not voice that complaint at the general sessions. Now they will all return to Kennesaw with smiling faces and communications in such a shape that there will be much improved understanding among all.

I hope that I am wrong about the viability of the 1973 Leadership Conference. However, it is not up to me to hold those persons accountable for the time and money spent at Rock Eagle. It is up to the students who paid for the conference with the mandatory Student Activities Fees.

Shop Talk

The Sentinel begins its eighth year of publication with this issue and we would like to take this opportunity to welcome the new students to our campus.

The Sentinel is Kennesaw Junior College's only official newspaper. It is designed to be a sounding board for student interests, activities, and opinion. It is our hope that you will be interested enough in the school and in what's going on to continue to use **The Sentinel** for these purposes.

This issue comes to you in a rather unusual manner. You may have noticed that there are no titles in the staff box. At present, **The Sentinel** positions are all vacant. Any student may apply for these positions, though a keen interest in the newspaper is stressed rather than merely an interest in any monetary consideration which accompanies a position.

Paid positions now vacant (all) include: Editor, Managing Editor, Business Manager, and Photo Editor. There is also a grave need for reporters, typists, ad staff, and other positions. Regretfully, none of these are paid positions. The ad staff, however, does receive a commission on ads sold.

There will be meetings for all interested students in **The Sentinel** office in the Student Services Building at 12 noon on Thursday, September 20, and 1 p.m. on Friday, September 21.

Can SGA Shed Their Veils of Insecurity
And Overcome the Foes of KJC? Will Our Heroes Triumph?

By Kathy Sherlock

Hang In There

The greatest good you can do for another is not just to share with him your riches, but to reveal to him his own.
—Cardinal Suenens

Kennesaw Junior College has in its student body an unbelievable potential to become the finest school in the University System. Every student a member of the SGA and the officers and senators of the Student Government Association work daily to improve your school life. You pay the officers of SGA and should hold us accountable but, we need your help!

Each quarter we try to help new and transfer students over the first quarter obstacles in our orientation program. We try to "reach out" and assure students that they belong.

The SGA needs your help to maintain a personal and meaningful contact with all students. There will be a Senate election in October when 10 senators will be elected to represent the student body. Their main job is to serve as communication links, and to work on committees. It's demanding, but worth the effort. Come and see us if you're interested.

Every quarter students are needed to work at registration. One day per quarter isn't much and your course cards are reserved for you.

We are trying to help if you have transportation problems. There will be maps of the metro area set up with names and phone numbers of people who live in your area and who are willing to set up a car pool or let you ride with them. There is also a number to call if something unusual happens and you are "up the creek" without the proverbial paddle and need a ride on short notice. That number is 428-4279.

We have a book exchange set up for students who want to buy used books when none are available in the book store — or if you want to sell a book write your name, address, and phone number along with the title, author, and how much you'll sell it for on a 3 x 5 card and turn it into the SGA office.

Student Government desperately needs students who will volunteer 2 hours a month to answer the phone in the SGA office. This is to be able to make more services available to you.

ATTENTION, NIGHT STUDENTS! We would like to help you by letting you know when your classes will be canceled so that you don't have to come all the way out here for nothing or sit around

for 2 hours for your next class. Get together with your class

and write your names and phone numbers where you can be reached during the day and turn it in to the SGA office. We will ask faculty members to call us when they can't make a class—then we will call you.

Remember there is free coffee in the Student Center after 8:30 paid for by the SGA.

There will be elections in October to select three people, to serve as the permanent members of the Entertainment Committee who will represent the wishes of the students in selecting and planning entertainment for the coming year.

Other permanent committees of the Student Government Association are: Student Aid, Publicity, Academic Improvement, and Constitutional Review. A planned committee to begin this fall will be Health Services. If interested in any of the above, please let us know.

In order to survive and to be a Student Government Association, we need your input. What do you think needs to be changed? Give us some suggestions and advice — alias FEEDBACK. Our new policy of Grade Appeal is now in effect thanks the initiation of Student Government, the support of the students, and the votes of the faculty.

Together—we can get it together!!

Health Services Mythical

Located in the Student Services Building, there is a small room with a large Red Cross emblem on the front of the door, yet many of the students, faculty members, and administrators alike don't even know that the room is

there or even what its purposes are.

There is a large poster sign placed just in front of the room giving the specific times which the room is open. However, it is locked more than it is unlocked. The sign requests

that persons utilizing the room sign the clip board located therein. The problem with that is that you have to look on top of the six foot metal

PROBLEM: communication/belonging.

SOLUTION: interrelate/get it together.

The Successful Side of HEAP

The Higher Education Achievement Program begins its third year of operation at Kennesaw Junior College today. The aim of the program is to improve the college's performance in serving students from population groups with limited access to higher education.

One quite frankly would have to read the entire 177 pages of the annual report for the period covering July 1, 1972 through June 30, 1973 of the Higher Education Program to see the success and impact in which this program has made to the educational progress of the students which it has served.

Recognizing the fact that before the program was ever implemented here at KJC,

there was those among the faculty and administrators that could not visualize the necessity for such a program. There still remain some of those doubters.

The Annual Report carried in its contents some of the negative reports as were received from questionnaires formulated by the HEAP staff, from the various faculty members. It did however, contain the favorable reports, which in many instances proved to show a greater percentage than the negative ones.

It was interesting to note that during the winter and spring quarters of the 1971-72 year, that HEAP students attempted 94 courses in the college, accumulating 8 credit hours with grades of "A," 63

credit hours with grades of "B," 113 credit hours with grades of "C," 88 credit hours with grades of "D," 82 credit hours with grades of "F," and withdrawal from 20 courses. A record lower overall than the records of all Kennesaw students. Since that time, however, former HEAP students have been more successful in the college.

The HEAP brochure carries a quote by a former HEAP student, Ms. Jeannie Haney, who stated: "I have been a student in the HEAP and now I have a grant which is helping pay my way through college; so that one day I can say, look! what the yesterdays of the HEAP program have done to my tomorrows!"

Health Services

Continued from Page 2

cabinet in order to locate the clip board.

Once you walk into the room, there is a reasonably comfortable cot and the large six foot two-door metal cabinet supposedly for the storage of supplies; however, there are no supplies to be found, not even a bandage.

This problem exists all over the campus. We have been told that there are medical kits located in each of the Division Offices. True, yet they are in a blind corner, which would result in extra effort on the part of an individual who is unfamiliar with the Division Office to locate the medical kit.

Should one fall in the Social Science Building, and the fall result in a head injury, and

the Division Office Secretary is out to lunch, and the knowledge of the medical kit is unknown to others, what then? I'll tell you what. One must dash quickly over to the Natural Science Building, to the Nursing Office, explain the nature of the accident (time lost), dash back and if possible treat the person who lay bleeding.

Students, faculty members, and administrators should join together and push for a more efficient Health Services at KJC. Should one life be risked at the cost of inefficiency?

The Student Nurses Association has and is presently requesting assistance in providing and updating health services for all at KJC. We wholeheartedly support them in this effort.

New Faculty Joins Kennesaw

Thomas H. Keene, Joseph T. Laemmle, and Fay Hunter Rodgers have joined the faculty of Kennesaw Junior College. Keene will be instructor of history, Laemmle will be assistant professor of instructor of chemistry, and Ms. Rodgers will be a business administration instructor.

Mr. Keene was formerly a teaching assistant at Emory University, where his major duties included teaching a survey course in western civilization. He is a member of Pi Gamma Mu, national social science honorary society, and the Southern and American Historical Associations.

Mr. Laemmle, who has been a teaching assistant and assistant research chemist at Georgia Tech, has co-authored ten publications on organo-

metallic reactions. He received his bachelors degree from Bellarmine College, Ky., and the M.S. and Ph.D. degrees in chemistry from Georgia Institute of Technology. He is a member of the American Chemical Society.

Ms. Rodgers previously taught at Atlanta Baptist College. She has also been employed by the University System of Georgia and by James Industries, Inc.

Ms. Rodgers received her bachelors degree in business administration from Georgia State University in 1966 and is presently a candidate for a doctorate from GSU.

She is a member of the American of Women Accountants, the American Accounting Association, and the American Institute of Decision Sciences.

Business Administration Offers Career Program

Beginning with the Fall Quarter of the 1973-74 academic year it will be possible for students to earn an Associate Degree in Business Administration by following the Business Administration Career Option Program outlined on pages 44 and 45 of the 1972-73 college catalog.

The career option program differs from the transfer option program in several important points:

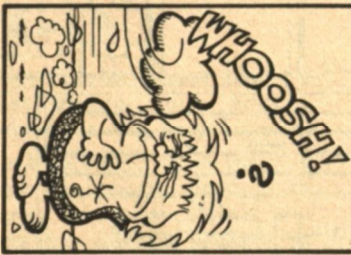

1. It includes more courses in the Business Administration Economics area than the transfer program does, thereby giving a student a greater preparation in his major area.

2. It requires fewer courses in the Humanities and Natural Science/Mathematics areas, thereby allowing for the greater concentration in the major area of Business Administration without increasing the total number of courses required for graduation.

3. All courses required within the program are specifically applicable to a business career or are required in order to earn a degree from any college in the University System of the State of Georgia.

System of the State of Georgia.

4. Some of the electives within the career option program are courses that are normally taught at the Junior or Senior level in most four-year colleges and universities: these courses carry a BAC (Business Administration Career) number rather than simply BA (Business Administration). Since these BAC courses are Junior/Senior level courses, most four year colleges will not accept them for transfer credit because they were taught at the sophomore level. However, for those students who do not intend to transfer to a four-year college, or for those students who are primarily interested in an increased knowledge of the business area, these BAC courses offer an excellent means of broadening their preparation for business. Student who are in the transfer option program may take any BAC course if they so desire; however, they do so with the knowledge that the course will probably not be accepted by a senior college for transfer credit.

Did You Know?

- That KJC's colors are Black and Gold.
- That the Owl is the campus mascot.
- That Montage is the name for the Yearbook.
- That Share is the Literary magazine.
- That The Sentinel is the campus newspaper.

Kennesaw Adds Applied Music

Kennesaw Junior College received approval from the Board of Regents in June to establish a new major for the preparation of teacher assistants under the existing Associate of Science degree program, effective in the 1973 Fall Quarter.

This two-year career program is designed to prepare para-professionals to work as teacher assistants in the elementary and secondary schools in the areas surrounding the College.

Authorization was also given

by the Regents to establish an Applied Music Fee of \$40.00 per credit hour, effective Fall Quarter 1973.

The Applied Music Fee will be levied in addition to the institution's matriculation fee, for students who receive one-half hour of individual music instruction each week for the academic quarter. This fee is designed to be equivalent to \$8.00 per hour of individual instruction, and similar to that charged by other University System institutions which offer applied music classes.

MUSIC PROFESSOR PAUSES

Jones Named Asst. Dean

David M. Jones, Assistant Professor of English, has been named to the new position for Assistant Dean of KJC.

A graduate of Emory University with a B.A. in English, Mr. Jones earned his M.A. at the University of Georgia.

He is a member of the South Atlantic Modern Languages Association in the Southeastern Regional Conference on English in the Two-Year College, the Robert Burns Club of Atlanta, and the Delta Tau Delta Fraternity.

Mr. Jones has served on the Kennesaw Junior College Academic Council, the Humanities Division Curriculum Committee, and as faculty advisor to The Sentinel.

Mr. Jones joined the faculty in 1966. Prior to coming to Kennesaw, he served as an instructor at the University of

Georgia for five years, and was a teacher and administrative assistant at the Lovett School in Atlanta for six years.

His publications include "Clifford Anderson Lanier," an article appearing in the Georgia Review, and "School is Too Social," which appeared in the Atlanta Journal.

He was recently selected to appear in the 1973 edition of "Outstanding Educators of America."

Book Review: Vonnegut- Soggy Cereal Or Crunchy Toast

By Gary Simmers

Slurp, slurp. Chew. Masticate. Swallow? The question is can you swallow a portion of Kurt Vonnegut? Vonnegut is about something, all right, but few people really know exactly what.

In **Breakfast of Champions**, Vonnegut comes across as being full of... Vonnegut. Vonnegut says in his preface that his book is "a sidewalk strewn with junk." He says he is trying to empty his head of all the junk as his fiftieth birthday present to himself.

Vonnegut has probably written the all time great American novel. The **Gone With The Wind** of new wave

fiction. (Forgive me, Margaret) It is a book full of mystery, science fiction, sex, violence, and pornography. Most of all... it's gutsy.

Midland City: the average American city. Peopled with, more or less, average Americans. This is Vonnegut's setting.

Actually, **Breakfast of Champions** is a cop-out. Vonnegut - critic-philosopher paints a picture of the American image that is vastly different from Mom, Dad, and Apple Pie. He creates an America without purpose, characters without meaning, without relevance. It is a

negative approach to the planet Earth. However, Vonnegut-critic-philosopher does not offer any solution. Maybe he feels there isn't one, or maybe he's saving it for his next birthday.

At any rate, **Breakfast of Champions** is a gutsy, relevant piece of new wave fiction written with the perfect dash of Vonnegut and a pinch of Philboyd Studge.

No synopsis. Not much of the story. That's right. I read the damn thing. You want to know the story, you read it. Anyway, you'll probably enjoy it. I did.

God's Forever Family

ATTN: Invitation to all new and returning KJC students.

God's Forever Family, a fellowship of Christian Believers on the Kennesaw Junior College Campus, wishes to extend an invitation to students who desire association with other Christians for the purpose of furthering the Good News of God's wonderful Son, The Living Lord, Jesus Christ. We are united in mind and Spirit to effect the Kingdom of God: in our own lives; in the Family of God, His Church; in the student community; and in every area of the life experience - "

"...unto the uttermost part of the world."

In the light of God's Word, the desire of God's Forever Family is to lift up Jesus Christ in and through our lives unto the end that many will see Jesus and have their own

personal encounter with Him; that we, as believers in Him, may come together in the

unity of the Holy Spirit and in the bond of peace; and that we may sit together at Jesus' feet, learn more from Him, and discover God's ultimate will for our individual lives.

God's Forever Family meets:

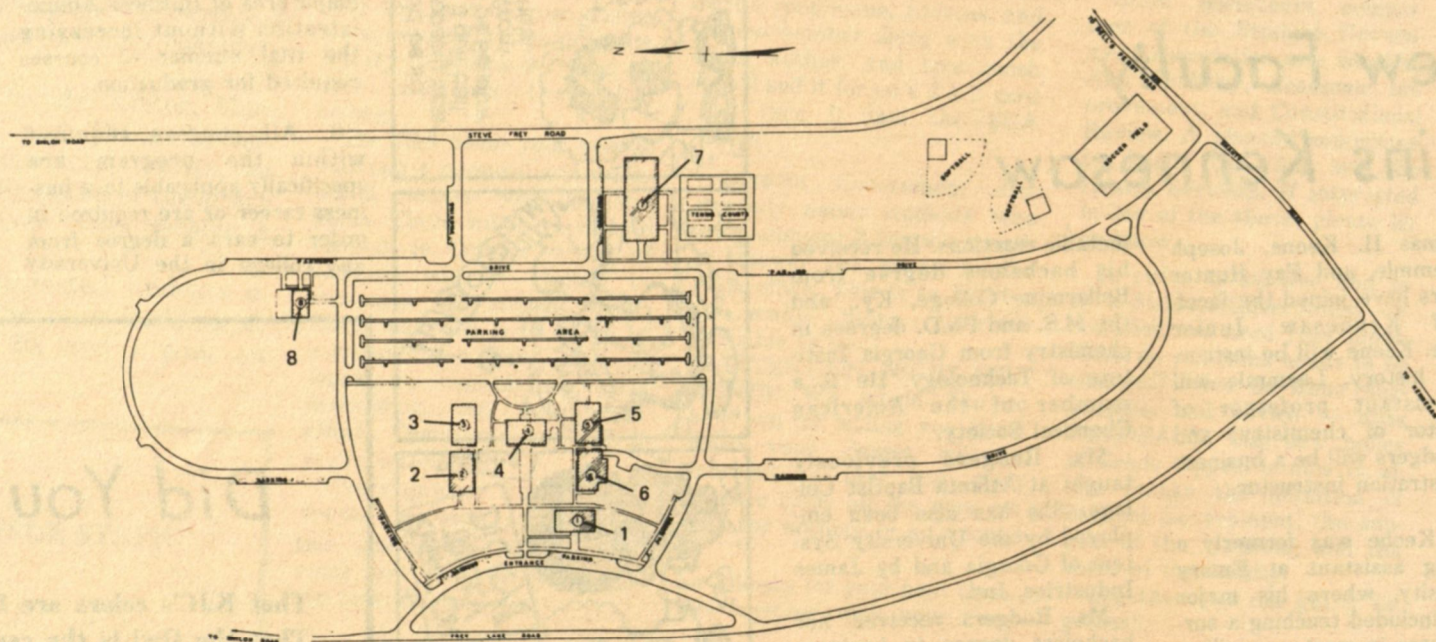

Friday at 12:00 in the Private Dining Room.

Wednesday at 2:00, Video Teaching Tapes, in Social Science Building, Room 127.

A Quotation

"A free press is the unsleeping guardian of every other right that freemen prize; it is the most dangerous foe of tyranny... under dictatorship, the press is bound to languish and the loud-speaker and the film to become more important. But where free institutions are indigenous to the soil and men have the habit of liberty, the press will continue to be the Fourth Estate, the vigilant guardian of the rights of the ordinary citizen."

—Sir Winston Churchill

Counseling Office Moves

The Counseling and Placement Office at Kennesaw Junior College provides professional counseling services which are designed to aid all students in the educational and career decision making process.

The Counseling and Placement Office, located in new offices in the Humanities Building, Rooms 215-220 (422-8770, ext. 203), provide counseling services on a walk-in and appointment basis.

WHERE ARE YOU GOING?

The Counseling and Placement Office exists for the prime purpose of helping you decide where you are going (career, educational, personal-wise) and how you are planning to reach your goal after graduation.

As part of the counseling process you will meet with a counselor who can help you identify your concerns, provide educational - career

information, assist in identifying resources which may aid in resolving career, educational, and personal concerns.

COUNSELING HELPS CHOICE OF A MAJOR

A sound educational choice (such as the selection of a college major) or career decision should include the consideration and thoughtful evaluation of factors that would effect potential success with your major or career.

Factors explored with a counselor include understanding your personal and vocational interests, values, and aspirations, strengths and weaknesses, and personality traits and their relationship to making a good decision.

To assist you in clarifying your educational and career interest patterns, the Counseling and Placement Office provides a variety of career interest inventories, life value and goal inventories, and per-

sonality inventories that can provide helpful insight to a better understanding of yourself.

In addition to the initial interview, both individual and group counseling sessions are available for students who may benefit from them. Such concerns as career direction, employment opportunities, effective study techniques, successful test taking, personal growth and development, among many others are explored.

The Counseling and Placement Office maintains a career library containing senior college catalogs, government test applications, job listings, career resources, and personal growth materials.

Counselors follow the progress of each individual with whom they have interacted throughout the academic year, and are available to offer assistance at any time.

New Counselor Comes To KJC

The Counseling and Placement Office has added to its staff Ms. Diane Elizabeth White, as a counselor.

The pretty Ms. White received her B.A. from Howard University, Washington, D.C., and her M.A. from Stanford University, California.

She comes to Kennesaw from Spelman College, where she was Program Coordinator of the Health Careers Office and Health Careers Counselor. She has previously worked as an Administrative Assistant to the Director of Family and Community Services Division of the Atlanta Housing Authority; teacher in the East Bay Skill Center; Counselor with the Neighborhood Youth Corps, San Mateo, Calif.

Ms. White, has numerous academic awards and honors

among which are; academic scholarships to attend Stanford University, and Barnard College; High School Class Salutatorian; first place winner of an essay contest concerning the handicapped; appeared on the cover of JET magazine for achievements. The article was entitled "Bright future for Bright Students."

Reproductive Health Center Opens

We are pleased to announce the opening of the Atlanta Center for Reproductive Health, Inc., a not-for-profit medical facility established to provide comprehensive clinical care, education, and research in the area of reproductive health.

The Center will offer safe, inexpensive and thorough medical service (initially preg-

nancy testing, contraception and first trimester abortion), disseminate the most recent educational material and information, conduct workshops and training programs, and maintain on-going clinical research to continually improve its services. Visits to the Center for evaluation of the services are encouraged and can be arranged by calling 404-802-8083.

Double Celebration For Kennesaw Library

(PIO-KJC) The Kennesaw Junior College Library had two reasons to celebrate in June — the college received its 50,000th volume and the head librarian, Robert Greene, received his doctorate degree.

The 50,000th volume to be received by the college is "A History of Seafaring," edited by George F. Bass.

"Fifty thousand books is an unusually large number for a junior college library," Dr. Greene noted. "The American Library Association standards suggest about 30,000 books for a school the size of KJC."

In the college's first three years the number of books increased over 10,000 volumes each year. In recent years the figure has been slightly over 2,000.

"Now since we have got the basic collection, we can afford to be more selective," Dr. Greene noted. "We are putting more money into audio-visual and non-print material such as micro-film."

"All libraries have micro-film," he continued, "but we have an unusual amount for a junior college — close to 6,000

reels of film and 14,622 microfiche, or sheets."

The microfiche consist primarily of the "Library of English Literature" and the "Library of American Civilization." Dr. Greene described them as collections of basic, but fairly rare materials.

Although the library continues to grow at rapid rate, advance planning will insure that it experiences few growing pains.

"Last year we put in enough shelving to accommodate 100,000 volumes," Dr. Greene said, "so we're only half-filled now."

Dr. Greene has been with the college throughout its seven-year history except for a two-year leave of absence to work on his doctorate. He did his research at Georgia Tech, studying the faculty use of the microfilm library catalog system used by the school.

While studying, Dr. Greene received assistance from the KJC Foundation and from a fellowship grant from the Department of Health Education and Welfare.

Serving as head librarian in

University System Conserves Energy

By Peggy Lewis

Each of you is well acquainted with the energy crisis facing the country today. Under the leadership of Governor Carter, Georgia State Government has undertaken a State-wide energy conservation plan.

Gov. Carter states that we must reduce our energy demands in the immediate future before Georgians begin to suffer as others have from energy shortages. He's encouraging Georgia citizens to adhere to a voluntary personal

Dr. Greene's absence was Martha Giles, currently associate librarian.

Dr. Greene delivered his dissertation at Florida State University and received his Ph.D degree on June 9. Previously, he received a B.S. degree from Bowling Green State University in 1954 and a M.L.S. from Florida State in 1959.

conservation program, it is important that State government also make every effort in this direction.

Governor Carter thinks we can most profitably concentrate on reducing the consumption of motor fuel and believe that a reduction of at least 10% in this area is a reasonable goal.

The University System Energy Conservation Plan will involve a three-fold approach:

1. An educational process for faculty, staff, and students.
2. A "public relations" process in its environment, which keeps the energy crisis before the constituency of each of its installations and institutions.
3. A practical guide to energy savings in the college environment.

To initiate this three-fold approach, each installation and institution of the University System of Georgia will take the following steps immediately in an effort to conserve power:

GENERAL POINTS

1. Encourage people to ride mass transit or car pool when possible. Also promote bicycling and walking.
2. Discourage out-of-state vacations and encourage staying at home.
3. Discourage all unnecessary automobile travel on state business.
4. Encourage people to turn off lights and electronic equipment when not in use.
6. Consider efficient lighting and temperature requirements in planning space utilization.

The University System plan recognizes that responsibility for energy conservation lies primarily at the institutional level. Authority to make the administrative changes necessary to conserve fuel and power resides at the institutional level. Each chief administrative officer will be advised of his responsibilities in this regard and will be asked to report on the actions he has taken.

Orientation Special: That Certain Day

By Peggy Lewis

It was August 8, 1973. That certain day was to contain the introduction to an experience, one which would aid in my decision for my long or possible short stay at Kennesaw Junior College.

When I first walked through the door of the Student Center I was greeted by an Orientation Schedule, a pamphlet on Rules and Regulations, and an envelope containing various information to which I would refer to during the day.

It was 8:30 a.m., and I was sitting in the middle of a crowd of about fifty people. This was to be one of the smallest orientation sessions. About the first six rows of chairs were vacant. Everyone was asked to move up. As I looked to the rear I could see that the seats were rapidly being filled. I then moved up to the third row, when I suddenly realized that I had left my Rules and Regulations pamphlet at my old seat, or dropped it while walking toward the front. Just which one, only the pamphlet will know. That! I thought was a good start.

The General Session began with Duke Conley, Counselor, introducing Kathy Sherlock, President of the Student Government Association to each of us. After her nice welcome, she introduced us to the President of the College, Dr. Horace Strugis; then to Dr. David Harris, Acting Dean of the College; Dr. Carol Martin, Dean of Student Affairs; Mr. Thomas Rogers, Registrar; Financial Aid Officer, Mr. Tom Patterson; Controller, Mr. R. Hopkins; Mr. Frank Wilson, Coordinator of Student Activities; Mr. Larry Howland, Director of Auxiliary Enterprises, and Ms. Mary Fleming, Counselor.

Renee Matherne, was also introduced and stated the fact

that the campus newspaper, **The Sentinel**, needed help, and that there would be a meeting at 10:00 a.m., Aug. 21 in the Sentinel office for persons interested in working on the newspaper staff.

When 9:15 a.m. rolled around we went to Room 202, in the Humanities Building, where the English Placement Test was held. After the 45 minute test, we were given a 30 minute break and was provided with a free coke, before the next phase of the schedule was begun.

We then moved to Room 122 of the Social Science Building for the Math Placement Test. Completing that 45 minute test, we were informed of the math courses available for the majors in which we were interested in. It was at this point that I believe I changed my major about three times.

At 12:45 p.m., we broke up into groups and questioned the student leader to which we were assigned, after asking questions on anything that bothered you, we had another break.

The schedule was drawing to a close, but before it was over we were given academic counseling, a phase designed to help us get ready for registration. Whatever the major was, there was a room in which to go where a faculty advisor awaited to help you.

So it was now 3:30 p.m., and we went back into the world and the settings from which we had come that morning. The Orientation session was complete and interesting and I had the opportunity to meet a lot of nice people and get a first hand knowledge of Kennesaw before the big rush. Orientation was an advantage that aided me, and I'm sure many other students, a great deal.

STUDENTS ATTEND ORIENTATION SESSION

New Courses For KJC

(KJC-PIO) A new degree program for teacher assistants and new courses in applied music and physical education will be offered fall quarter at Kennesaw Junior College.

The teacher assistant program was developed as an integral step in a career ladder allowing for subsequent teacher certification. It is designed to prepare graduates to qualify as para-professional teachers in Georgia Schools and to prepare those students who wish to continue at a four year institution to do so with a minimum of credit loss.

Major courses of instruction will include child development, reading, and instructional media. The degree to be awarded to students completing this program of study at KJC will be Associate in Science in Teacher Assistance.

New applied music courses will be available this fall for students wishing to study

piano and voice. Music 130, 131, and 132 will offer one 25-minute private lesson per week throughout the fall quarter, while Music 133 through 135 will offer two 25-minute lessons per week.

Voice lessons will be available through Music 140, 141, and 142 which involves one 25-minute lesson per week. Music 143 through 145 will include two lessons per week. A special fee will be charged for registration in applied music courses.

Introduction to Physical Education, a course designed primarily for physical education majors, will also be initiated this fall. This course will emphasize the trends, practice, and problems in the areas of administration, foundations, curriculum, physiology and test and measurement in the field of physical education. In addition, skills, personal characteristics, and profession-

al qualifications needed by the physical educator will be stressed as well as the employment situation and professional ethics.

Also for the first time this fall, two physical education activity courses will be offered to night students from 6 p.m. to 8 p.m. They are Beginning Golf, Mondays, and Beginning Tennis, Tuesdays.

Thomas H. Rogers, registrar and director of admissions at KJC, has announced that developmental courses in Math and English will also be available to both day and night students.

"If you're in doubt about your chances in college, try these courses," Rogers urged.

Returning students will register Sept. 14. Fall quarter registration for new students will be Sept. 17.

For further information, contact the office of admissions at KJC, phone 422-8770.

P.E. COURSES ADDED

Beginning Fall Quarter, 1973, two Physical Education Activity Courses will be offered in the Evening Program. These courses are: P Ed 103, Coed Beginning Tennis, 6-8 p.m. every Tuesday; P ed 104, Coed Beginning Golf, 6-8 p.m. every Monday.

In addition, P Ed 260, Introduction to Physical Education will be offered for the first time this fall. This course, scheduled at 10 M W F, carries three credit hours and is designed primarily for Physical Education Majors. Physical Education 142, Coed Handball, scheduled to meet at 8:00 T W Th, will be completed on Nov.

1. The purpose of meeting three days per week is to avoid cold weather later in the quarter.

Please note that Physical Education courses carrying three and five credit hours do not count as part of the six Physical Education activity courses required, with the exception of P Ed 222, Water Safety Instructor, (three activity credit), and Recreation 173, Camping and Outdoor Recreation, (one activity credit).

NOTE: If interested in intramurals, watch for intramural information to be available soon.

BSA Prospectives

By Eddie Jackson

The new school year brings additional students to the Black Students Alliance. According to Clarence George, President, the BSA has taken a long hard look into the future for the directions in which the organization shall move.

Among its list of planned activities will be the ratification of a new constitution for the BSA, which was written by Eddie Jackson. The new six-page constitution which contains a Preamble, Duties and Responsibilities of Officers and By-Laws for the organization, is regarded as one of the best constitutions for a KJC student organization.

A "Black Awareness Orien-

tation," is tentatively planned for fall quarter featuring several noted speakers, to be announced at a later date.

"Share Thanksgiving," is slated to be one of the BSA's major projects, and it is hoped that all of KJC's faculty members and students will participate in this venture to clothe and feed many underprivileged persons within the area.

The celebration of Dr. Martin L. King Jr., Birthdate and Assassination Anniversaries, Black History Week, and a jointly sponsored conference for "Black Cultural Development," with other area colleges.

"Soul Explosion '74," has been selected as the theme for a massive talent exposition to

be directed by Eddie Jackson, which shall feature a variety of talents displayed by KJC students, ranging from creative dancing to musical groups, poetry to single acts, and fashion modeling with many others presented winter quarter.

George, related that an insight into Black Art, will also be on the list of activities for the organization, as a part of its campus contribution to Cultural affairs. When asked just how effective this activity should prove to be? Clarence stated, "We are the best organized organization at KJC, we are a progressive organization, one with vision. We invite all KJC students to join us."

Math- Science Scheduling

The scheduling of several courses in the Natural Science and Math Division will be of interest to a number of students.

Biology 203, botany will be offered this fall with preference given to students who graduate in June. Also, students needing to take Biology 226, Vertebrate Zoology, in addition to Botany should take Botany fall quarter.

Math 141, Computer Science will be limited to one section for fall quarter to allow for several unexpected changes in the computer system.

The Calculus sequence beginning with Math 103, Analytical Geometry and Calculus, will start for night students fall quarter. This will be the only opportunity for eligible night students to start this sequence this year.

IMPORTANT DATES FALL QUARTER

Classes Begin	Sept. 18
Class Change Period	Sept. 19-20
Last Day for Dropping a Course without Penalty	Oct. 29
Last Day to Withdraw from a Course	Nov. 15
Last Day to Withdraw from College	Nov. 26
Final Examinations	Dec. 3-6
End of Fall Quarter	Dec. 6

Parking Problems?

With the influx of new students, there is to be an increase in automobiles on the campus this fall. Finding a place in which to park may very well be one of your adjustment problems.

The construction of the new Student Services Building has taken up some three hundred

parking spaces. KJC's Student Government Senator, Clarence George, won the endorsement of the Senate and the approval of the SGA, for his proposal of

establishing the Kennesaw Buddy-Ride System. The "Buddy Board" will be constructed in front of the Student Services Building, and it is hoped

that the majority of KJC students will utilize it.

The Security Force will be constantly checking cars for parking decals issued by the Controller during the first week of classes. Each vehicle operator has the responsibility of purchasing a parking decal which costs \$4.00 for the academic year.

Professor Goes to Europe

Dr. Bowman Davis will be attending the International Conference on Hymenolepidae in Warsaw, Poland. It is to be held September 15-17.

Dr. Davis will be presenting certain aspects on information

concerning the reason why tape worm parasites go to certain hosts. He began his work five years ago for a dissertation doctrine. Dr. Davis continued his work because he was fascinated by the para-

sites and thought they were a "fun group to work with."

There will be other Parasitologists there from Russia, Belgium, Poland, and other neighboring countries. This is to be Dr. Davis' first trip to Europe.

KJC-STI PRESENTS JOINT CONCERT

The Student Government Associations for Kennesaw Junior College and Southern Technical Institute, will be sponsoring a joint concert on September 28, 1973, at 8:00 p.m., on the Southern Tech campus.

Vince Vance and the Valiants and Bloodrock, will be the featured artists.

This concert is open to all KJC and STI students with I.D. cards.

HEAP Bus Returns

Bus service from Atlanta to Kennesaw Junior College will again be provided this fall for a small charge. The bus will follow a schedule suitable for students enrolled in the Higher Education Program, however, any student in the college who can follow this schedule may ride the bus.

Beginning on the morning of September 17, 1973, the bus will follow this schedule:

7:50 A.M.

Leave Steed & Patridge Shell Service Station, 321 Ashby Street, S.W.

7:55 A.M.

Pickup at the northwest corner, intersection of Ashby and Hunter Streets.

8:00 A.M.

Pickup at the intersection of West Lake Avenue and Mozley Drive (just across I-20 from Gordon Road)

8:03 A.M.

Pickup at the Atlanta Resi-

dential Manpower Center, 239 West Lake Avenue (near the intersection of West Lake and Simpson Road)

8:07 A.M.

Pickup at the northeast corner, intersection of Simpson and Hightower Roads (near Frederick Douglass High School). The bus will follow Hightower Road to Bankhead Highway and pickup at the entrance ramp to I-285. It will then proceed to I-75, right on Highway 41, Marietta Four Lane, and then to KJC.

The bus will reverse this schedule in the afternoon leaving Kennesaw Junior College at 5:00 p.m., Monday-Thursday and 3:00 p.m. on Fridays and ending its run at 321 Ashby Street approximately one hour later.

This schedule is subject to revision for the convenience of the majority of the students wishing to ride the bus.

Students boarding the bus in Atlanta will pay a fare of 35 cents for the one-way trip to campus. A second fare of 35 cents is payable in the afternoon for the return trip to Atlanta from the campus.

Questions about this schedule should be directed to Ronald Carlisle, Coordinator of the Higher Education Achievement Program at 422-8770, extension 236.

Volunteer Probation Course Offered

By Renee Matherne

On September 25 a five-session course will begin to train persons interested in becoming a volunteer probation officer. The program will meet on every Tuesday and Thursday including the date of Sept. 25 and 27, Oct. 2, 4 and 9. Meeting time will be from 7:30 - 9:30 in the Cobb County Judicial Building on the 4th floor, Superior Court rooms. The course is outlined as follows:

Sept. 25—Welcome and Introduction—What to expect from the course and what is expected of you as a student volunteer.

Sept. 27—Session on the basic techniques of communicating with the offenders.

Oct. 2—The Adult Offender
Oct. 4—The Juvenile Offender

Oct. 9—Summary of the course and ceremonies conferring of certificates for completing the course and swearing in as probation officers.

There is no charge for this course. If anyone is interested they should call Kennesaw Junior College—422-8770, Ext. 234 or Marietta-Cobb YWCA, 427-4611.

The director of Volunteer Probation is Mr. Bernard Pyle and his office is located here at Kennesaw in the Social Science Building. For those interested in working in his office on campus, go to Room 212.

Give your time and be a friend of someone who needs you. Become a volunteer probation officer.

SENTINEL Organizational Meetings

Thursday -
Sept. 20, 1 p.m.
Friday -
Sept. 21, 1 p.m.
Sentinel Office
Student Center

Clubs and Procedures

A number of professional, special interest, and service clubs and organizations are available to Kennesaw students and membership in these organizations is encouraged throughout. They are organized under the supervision of the Student Government Association and the Dean of Student Affairs. The following clubs and organizations have been organized and are considered to be active as of the date of this publication:

Student Government Association, Black Students Alliance, Canoeing Club, Chess Club, Kennesaw Forum, Drama Club, God's Forever Family, Mu Alpha Theta, Music Club, Sentinel, and Share.

Any student interested in forming a new club or organization should follow these procedures:

1. A group of interested students decide that they wish to form a student club or organization. Membership must include at least ten Kennesaw Junior College students.

2. The students seek a faculty member who will serve as faculty advisor to the proposed club or organization.

3. Students with guidance from faculty advisor, prepare written statement of the purposes of the proposed organization and draft a Constitution for the organization.

4. Elect temporary (may become permanent) officers for the proposed organization.

5. Submit six copies of the Constitution for the organization and a statement of the purposes to the Dean of Student Affairs.

The purposes and practices of the proposed club must be constructive and compatible with the standards and objectives of the college.

All student organizations are subject to all rules and regulations of Kennesaw Junior College.

Among the list of new clubs that may be formed this quarter is The Future Law Students, which Dr. George Beggs has consented to become the Faculty Advisor, and the Collegiate Civitan along with the Veterans Clubs, are hoping for strong reorganization.

Books Bugged

One of the library's most attractive features has also been the cause of one of its continuing and most perplexing problems. The free and easy access to library material provided by unguarded doors and open book stacks has also limited the protection and control given to these materials. Consequently, books have been taken from the library without first charging them at the circulation desk. Some of these books were simply borrowed and later returned. This caused a problem because the books were missing from the shelves with no record of their whereabouts. Other books were taken from the library and never returned. The cost of replacing these missing books is approximately \$5,000 per year.

A new book protection system designed to prevent book thefts and unauthorized borrowing of library material has been installed in the library. The new system will check all library materials leaving the library to determine if they have been properly checked out. If materials have not been checked out properly, the borrower will be stopped and asked to go to the circulation desk. The system should cause little or no inconvenience to library users since they will not be stopped at library exists to have books checked and it will not take any more time to sign for books to be borrowed. Thus, it is expected that the new system will provide better control and protection of the library collections without limiting access to these materials.

Hall In HEAP

(KJC-PIO) A new mathematics instructor has joined the staff of the Higher Education Achievement Program, he is Thomas R. Hall.

Mr. Hall previously taught at Jacksonville State University, Alabama, and at Emory University in Atlanta.

He matriculated at King College in Tennessee, where he received his undergraduate degree. He continued his education at Emory University, where he received the M.A. degree in mathematics.

He served as the 1973 Chairman of the Mathematics Department for the Governor's Honor Program, State of Georgia.

Mr. Hall is an accomplished basketball player and commercial pilot, he is immensely interested in computers, and plans to implement computer mathematics into the HEAP curriculum.

SAC

The Kennesaw Student Government Association Officers' have taken vital roles within the Student Advisory Council to the Board of Regents.

The Student Advisory Council was established by action of the Board of Regents in March 1968, to provide a vehicle by which elected representatives of the student bodies of the institutions could discuss goals and problems of the University System with members of the Board of Regents and the staff of the Board. The Council was to "meet twice annually with the Chancellor and the members of his staff, and once a year with the Board members," according to the minutes of the March, 1968 Regents' meeting.

Each month as the SAC holds its two-day meetings on

college and university campus's within the system. KJC's Student Government Officers attend and represent our school in the decision and policy making.

At the July meeting which was held at Georgia State University, KJC's Senator Renee Matherne was appointed to the position of State Press Secretary and Chairperson of the Intern Committee. President Kathy Sherlock moved from the position of Acting Chairperson of the Junior Colleges Committee to Chairperson of the newly created Faculty Evaluation Committee. Vice-President Eddie Jackson became the Chairman of the Junior Colleges Committee, and Liaison Officer for SAC.

New Library Hours

Due to limited use of the Library on Saturdays, the Library will be closed on Saturdays. However, because students have shown a decided preference for library use on Sunday, Sunday hours have been increased. The hours that the Library is open weekdays is the same as last year. The new library schedule is as follows:

Monday — Thursday	8 a.m. to 10 p.m.
Friday	8 a.m. to 5 p.m.
Saturday	Closed
Sunday	2 p.m. to 7 p.m.

Carlisle Takes Helm

The Higher Education Achievement Program begins its third academic year today, with Dr. Ron Carlisle as its new Coordinator. The previous two years were administrated by Stewart Phillips, who has joined the staff of the Southern Association of Colleges.

Dr. Carlisle received his B.A. from Emory University, 1966 (major in religion); attended Teachers' College, Columbia University, 1966-67; PhD in mathematics, Emory University, 1972.

He has received numerous academic awards, including an NSF undergraduate research fellowship grant, award as Rotary Club Outstanding Emory Graduate, Woodrow Wilson and Danforth graduate fellowships, and ESEA and NSF graduate research train-

eeships.

He has served as a Peace

Corps volunteer and as an associate director of the NDEA Summer Institutes for Elementary Mathematics Teachers of the Disadvantaged Youth, Emory University, 1966, 67 and in 1968; has taught mathematics in the Governor's Honor Program, State of Georgia (1969); has held for four academic years graduate teaching assistantships at Emory University; and has served as mathematics consultant, to schools in several states including Georgia, New York, Ohio, Pennsylvania, and Virginia; is an accomplished musician who continues to be very active in concerts in the Atlanta area; has served as visiting lecturer at Emory.
