SGA Promotes Food Boycott

Jackson, Howland, and Hopkins Discuss Boycott

SGA Posts Election Results

The recent Student Government election, held October 8 and 9, resulted in the re-election of Eddie Jackson to the Vice-Presidency, election of ten senators, and a contested Entertainment Committee race.

The ten senators ran a no competition race. There were only ten candidates for ten positions. Those elected include: Charles Copeland, James Evans, Clarence George, Clyde Hart, Larry Hood, William Jefferson, David Mayben, Gary Riddle, Maxine Saless, and Randy White.

Mr. Jackson states that he plans to continue the policies he has implemented in the past few months.

The results of the contested Entertainment Committee elections were not available at publication. The conflict came when Hal Love, a can-

didate for the committee, felt that he had been dealt an injustice when his name had been left off the original ballot. In a split vote, the election board voted to void the first election. The new election took place October 15 and 16.

This new committee will plan the type of entertainment on and off campus in the following months. There will be another balloting during Winter Quarter for the selection of two additional members to the committee.

Army Band On Campus

Free tickets are still available for the October 22 Army Field Band, "Kings of the Highway," concert at Kennesaw Junior College.

The 8:15 p.m. performance in the gymnasium will offer a repertoire of classical, semi-classical, popular selections, choral arrangements, novelty numbers, and military marches.

The "Kings of the Highway" have given performances at London's

Royal Festival Hall, the Hollywood Bowl, the New York and Seattle World Fairs, and EXPO '67 in Montreal.

Tickets are available at the Kennesaw Junior College Bookstore; Ken Stanton Music Store on Roswell Street in Marietta; Sharpe's Music Store in Smyrna and Donaway Drugs in the Cartersville Plaza in Cartersville.

Ticket holders will be seated at 7:45, with the general public admitted five minutes later.

By Renee Matherne

On Friday, October 12, there was an attempt made by the Student Government Association to have the Student body boycott the snack bar and cafeteria.

The boycott, according to Eddie Jackson, S.G.A. Vice President, was warranted because of the increased food prices. Mr. Jackson claims it is no longer economical for students to stay on campus for lunch.

Mr. L. E. Howland, director of the Auxilliary Enterprises, felt that the boycott was unjustified and that the raise in prices was misunderstood. Many of the price raises came from rising food costs and an eleven week period when there are virtually no students on campus.

The boycott was also discussed with Mr. Roger Hopkins, Comptroller of the college, who stated that in the event of excess profit at the end of the first six months of operation there would

be a downward adjustment of the prices. He also warned in the event of a loss, that it too would cause price adjustments.

The University System Board of Regents' policy is such that it calls for each phase of the Auxilliary Enterprises to be self supporting. That means that the snack bar/cafeteria, bookstore, vending machines and parking must operate at some small profit. An examination of the financial statement of each place showed that the percentage of profit was small over all. The food services unit showed about one half of one per cent in profits.

Many students and members of the faculty participated in the boycott. Each should now examine his own pocket to find out how much ahead he really was after gas and other expenses have been deducted.

Election View Points

by Stanley Redd

In the recent election for Vice-President, Eddie Jackson was overwhelmingly returned to the Student Government's second most important position. He thus begins his own full elected term in this office, and we of the Sentinel would like to wish him well. However, we cannot and will not condone the mangled political procedure through which he was elected. We are referring, of course, to the untimely and senseless scene that occurred on the day of the candidates' speeches, October 4.

For those of you who were fortunate enough not to witness the event, the candidates for Senator and Entertainment Committee, as well as those for Vice-President were vainly casting their viewpoints on largely unreceptive ears. Then, to the dismay of the many veteran political observers, Geoffrey Baker, Vice-President of the Black Student Alliance, took the stand to publicly bestow the blessing of the BSA upon the incumbent candidate for Vice-President, Eddie Jackson. Soon afterward, all the stops were pulled as anyone desiring to do so was allowed to personally endorse the candidate of their choice. The final straw came however, when Ms. Kathy Sherlock President of the SGA, publicly announced her endorsement of Jackson.

The fact that all the endorsements were in favor of Mr. Jackson is relatively unimportant. What is important is that such a catastrophe was allowed to happen in the first place. The time of candidate speeches is a time to talk issues and present the facts. It is not a time to discuss personalities or blatantly campaign for any one candidate. The speeches are a forum to present to the voting public the issues and merits of the candidates, and to turn this fine institution into a common campaign party reminiscent of a Gene Talmadge Bar-b-Que is a complete disgrace. We sincerely hope that those in charge of such matters will take our criticism to heart and insure that such malpractice of the democratic process will not occur again.

Come Together by Charles Ball

To be either black or white is a great thing, and Kennesaw has the best group of blacks and whites of any college. As students, we need each other.

In the Student Services Building, however, one table is full of whites, and another table is full of blacks. There is no communication between the two, and that is not the way it should be. We who are black should come together with whites, and we who

are white should come together with blacks. Some of us may say that it's hard to approach someone of another race. That is not so. If you give it a try, you will find that you have a friend on the other side.

Don't make friends by their color. Make friends according to what they are and not according to what they can do.

Let's get it together before it's too late. We are the people let's be for the people.

Leadership Conference Poll Results

In a recent "Letter to the Editor" Mr. Eddie Jackson, Vice President of the SGA, invited the Sentinel staff to take a poll of students concerning the Leadership Conference.

There was a total of 255 students polled, 50 of whom were night students. The poll clearly shows that a new method of selecting participants in the Leadership Conference should be determined.

The following are the results of the poll.

I. What class do you belong to? FRESH 83 SOPH 167

II. Prior to this poll, did you know what the Leadership Conference was? YES - 74 NO - 176

III. Prior to this poll did you know that a Leadership Conference did exist? YES - 92 NO - 151

IV. If YES, what was your source of information? STUDENT QUESTIONNAIRE - 9 THE SENTINEL - 39 OTHER - Friends - 20, SGA - 9, Hearsay - 9

V. Have you attended this conference? YES - 13 No - 223

VI. If NO, would you like to attend if you knew more about the conference? YES - 130 NO 104

VII. Prior to this poll, had anyone asked you if you would attend? YES - 28 NO - 224

VOX POPULI

Dear Editor,

I'd like to respond to Mr. Jackson's letter to the editor last issue.

Mr. Jackson,

You'd almost have to be blind. You say you've come a long way to remove cliques and societies among students. If this is so how come a large number of students are afraid to walk into the Student Service building because they are not in one of the little groups that section themselves off from the other students. As far as I can remember this quarter I haven't seen you breaking your back to help the freshmen and newcomers to K.J.C. Mr. Jackson I challenge you to unite the students at K. J. C. and to make it a place where a student can walk in the Student Service building and sit where he wants and

talk to any student he wants.

Sincerely,
"OWL"

P.S.

I checked that spot on the activities sheet and nobody called me.

Dear Editor,

As a former student at this college I feel there is discriminatory enforcement of the parking regulations on campus.

I have been visiting friends at KJC for the past several days while off from work. Today, I parked by the student center in a zone marked 'Service Vehicle Only'. I parked in this spot because I saw another car which had been parked there several times previously.

This is an unmarked, unofficial car. It has a

faculty and staff parking decal which to my knowledge does not classify it as a service vehicle. The decal number is 2201. The license number of GJW 845.

This car was parked there before I came and after I left. This car is not a service vehicle and according to the sign is parked illegally. This car receives no ticket as certain others parked there do. I feel this is discriminatory.

I know of several students who were very unhappy with this particular incident and several others.

I will not be visiting here many more days and will not again park my car in this area.

I would ask that the administration look into this matter. As I have said, many students are unhappy about this situation.

Thank you for your kind patience.

Respectfully,
William A. Stennett

Hang in there

by Kathy Sherlock

I just can't believe that we have students on this campus who don't care whether or not another student has to drop out of school because he has no transportation.

I realize that most of our students have jobs, but isn't there anyone out there who would agree to give a student a ride at least to school? These people will be glad to help you with gas. If you can't help but know of someone who might, PLEASE let me know at 428-4279.

One student lives out Bells Ferry Road off Highway 92 in Oak Grove Estates. His first class is at 9 a.m.

One student lives one mile from Roswell, Georgia. His first class is at 10, but he will be glad to come early.

Two students live off Spring Road in Smyrna. Their first class begins at 8 a.m.

Two students live across from Southern Tech. Their first class is at 9 a.m.

The SGA needs students to volunteer to answer the

phone just one hour a week. A NOTE ON 4-YEAR STATUS FOR KJC:

I took the student petition down to the Board of Regents on the eleventh. The Cobb delegation ("Big Shots") showed up in full force! We gave a 25 minute presentation and had to leave. If and when I know anything, you'll be the first to know. By the way, if there are any students who did not sign the petition and want to, please come by the SGA office.

Thank you to those who voted in the election.

Parking Problems?

The situation in the KJC parking lot is now beyond description, and it seems to become worse every day.

Kennesaw students themselves are to blame for a good portion of the mess. Thoughtless drivers often leave their cars overlapping two parking spaces, leaving room for a motorcycle or very small car. Other drivers park their cars parallel to and over a foot away from the curb on both sides of the narrow drives in the parking lot. It is almost impossible for any car larger than a Volkswagen to maneuver between these obstacles. There are often

spaces in the lot that are extremely difficult to reach, because your car cannot make the turn between rows.

Boycott

On Friday, October 12, a group of students enacted a boycott on the cafeteria in the students Services Center. The prices there are the same or lower than in other drive-ins or restaurants in the area. If they were higher there would be good reason to join in the boycott.

I believe that Mr. Jackson and those who helped in the boycott were

If all Kennesaw students will consider the people who come into the parking lot after them, a lot of headaches will be avoided.

By Doneal C. Nicholson, Jr.

wrong, and I hope they realize this. After all, the purpose of the cafeteria is to give the students hot food at reasonable prices and to be convenient to the students. I believe that all of these purposes are being accomplished. Compare the prices here and those at other drive-ins or restaurants with the same quality of food, and you will see for yourself.

Counselor's Corner

by L. Goodman

THE COLLEGE GRADUATE 1980 JOB PROSPECTS

The large number of highly educated workers expected during the 1970's may end many long-time occupational shortages. Surpluses of elementary and secondary teachers, mathematicians, and life scientists may result if students continue to elect these fields in the same proportion as in the past. Tomorrow's college graduate may be reviving an old sport... a recently little understood phenomenon on campus known as a "job hunt." After a long period characterized by difficulty in recruiting enough highly trained workers, the decade of the 1970's promises a

rough balance between supply and demand for college-educated personnel. This is not to say that supply and demand will be in balance in all fields. Shortages are expected to continue in a number of areas... in the health fields particularly. Nevertheless, tomorrow's employers will be in a much better position to pick and choose between job candidates. More than ever before, it will be important for college students to choose their careers carefully and to obtain the best possible preparation for their work.

THE REASON. The Nation's colleges and universities now are turning out record numbers of graduates and are expected to continue to do so throughout the 1970's. The

number of persons earning a bachelor's degree will climb by two-thirds, and those earning the master's and doctor's degrees will double by 1980.

Based on past employment patterns, estimates are that about 9.3 million of the 13.3 million new degree recipients expected between 1972 and 1980 will enter the civilian labor force: 8.4 million at the bachelor's level, 900,000 at the master's, and approximately 18,000 at the doctorate level.

This supply of new graduates will be augmented by another 1.2 million persons with college level training who will come into the labor force between 1972 and 1980. These additions are expected to consist

primarily of women who delayed seeking a job but are expected to become available for work in the 1972-80 period, or who were working in earlier years but withdrew from the labor force. Thus, the new supply of college educated manpower expected to enter the labor force from 1972-80 will total 10.5 million.

The need for workers stems generally from two sources: employment growth in occupations and the need to replace workers who die, retire, or otherwise leave the labor force. But another factor is relevant in considering the need for college-educated manpower: rising job entry requirements that make a college degree necessary for jobs once performed by workers with lower

educational attainment. Assessing these three factors—growth, replacement, and rising entry requirements—it is estimated that 10.4 million new college graduates will be needed between 1972 and 1980: 6.1 million to take care of occupational growth and rising entry requirements and 4.3 million to replace other workers. Thus, an ample supply of graduates that is roughly in balance with manpower requirements seems in the offing for the 10-year period between 1970 and 1980. The large output of highly educated workers is expected to end many long-time occupational shortages and promises help for other occupations in which shortages may

Watergate Discussed

by Randy White

The first in a series of social science lectures was presented Monday, October 15, in the library seminar room. It featured Dr. George Beggs, chairman of the KJC Social Science Division, and Colonel Clifford E. Thompson, a Marietta attorney, speaking on the institutional and legal controversy.

Dr. Beggs, speaking on the institutional aspects, offered his view that, instead of cooperating with each other, the legislative and executive branches of government have carried on a struggle for power and have been in a deadlock since 1945. President Nixon has taken an arrogant attitude toward Congress. Since he is not strong enough to control it, he has tried to ignore it and run the government by himself as much as possible. The Watergate incident has given the Congress a chance to attack the Presidency and to gain stature at the President's expense. The outcome of the controversy will be better cooperation between Presidents and the Congress in the future.

since Presidents will hereafter be reluctant to ignore Congress.

Dr. Beggs also feels that Watergate will be morally good for the United States, because future politicians will hesitate to indulge in illicit campaign practices.

Colonel Thompson, speaking on the legal aspects of the incident, stated that the President cannot be prosecuted for any criminal offense and is immune to every court in the United States as long as he stays in office. Therefore, the Senate, which has the power of impeachment, is the only body to which the President must answer. If the President is removed from office, he may then be tried in court the same as any other U. S. citizen.

Concerning the tapes whose confidentiality is currently being challenged, Colonel Thompson cited numerous incidents since 1803 in which several different Attorneys General have upheld the right of a President to keep personal conversations and tapes confidential. Thompson pointed out that

Col. C.E. Thompson Speaks to Students

the House of Representatives refused to release private tapes in the Calley case and cited an instance in which even Senator Sam Ervin supported the Senate's refusal to release private tapes during a criminal investigation.

The lectures were followed by a question and answer session with members of the audience addressing questions to the speakers.

Palmer Receives Doctorate

Grady Palmer, assistant professor of physical education at Kennesaw Junior College, has received the doctor of education degree in physical education from the University of Georgia.

Dr. Palmer's degree places the number of earned doctorate degrees at 75 percent for the physical education department at KJC.

Palmer holds the bachelor of science and master of arts degrees in

physical education from Middle Tennessee State University. Prior to joining the Kennesaw Junior College faculty when the college opened in 1966, Palmer was a coach at Florida College and at White House High School in Tennessee.

His doctoral dissertation deals with the development and application of a health misconception test which was administered to students through the University System of Georgia.

Marijuana Could Be Harmful

Salt Lake, Utah-(I.P.) Marijuana users face a higher risk of chromosome breakage which could result in birth defects and cancer, according to the results of a recently concluded eight-year study by University of Utah scientists.

Dr. Morton A. Stenchever, chairman of the Department of Obstetrics and Gynecology, says the implications are that marijuana use induces the abnormal chromosome breakage and "persons using marijuana on any regular basis take the chance of having abnormal offspring or developing forms of cancer."

During the past three years, blood cultures from 49 individuals who used marijuana were compared with cultures from nonusers. In every 100 cells examined from users, the U researchers found 3.4 cells with chromosome breakage, while the nonusers registered a normal average of 1.2 damaged cells. "There wasn't much difference

between light users (those who used marijuana one time or less a week) and those heavy users (who took the drug at least twice a week)," said Dr. Stenchever.

Additionally, the research showed no difference between male and female users of the drug, nor between persons using mixed drugs as opposed to marijuana only.

Dr. Stenchever says his research also shows that "the blame that has been placed on LSD as a chromosome breaking agent may indeed have belonged to marijuana." He says that confusion results from the fact that individuals using LSD have also been using other drugs, notably marijuana.

The medical researcher said a study conducted elsewhere revealed that in 140 couples who had admitted to the use of LSD, 148 pregnancies led to the birth of 83 live children, eight of whom had major congenital defects. Out of the total 53 women had therapeutic abortions and

produced 14 embryos, four of whom had gross defects.

"These patients were using other drugs, but 100 percent of them used marijuana," said Dr. Stenchever, emphasizing that "marijuana must still be considered a candidate for the prime agent causing these reproductive problems.

Monday, October 22, at 8:15 P.M., the Army Field Band will perform in the KJC gymnasium. This highly lauded band will feature everything from classical music to choral arrangements; from popular selections to military marches.

The admission to the concert is free and if you wish to obtain tickets, please contact Mr. Frank Wilson.

Chemistry Classes Are Largest In Number

Dr. Frank Walker is handling one of the largest enrollments in Beginning Chemistry classes in the history of KJC. Almost one hundred students have enrolled in the two lecture sections and three lab sections of Beginning Chemistry 121, taught by Dr. Walker.

The crush is being handled by a system devised by Dr. Walker, who says, "I first devised the system three years ago, and it's evolved ever since." The system involved videotapes teaching laboratory procedure which may be seen by individual students as often as they like before and during lab. There are no restrictions on the operations by individual students. However, the tapes and equipment are not generally available to non-chemistry students, and they must stay on the second floor of the Natural

Science Building.

The use of the tapes allows "open" chemistry labs. An open lab is a lab which may be attended by a student outside of his assigned lab sequence with the consent of his instructor. The only restriction to this informal arrangement is that students assigned to that lab are given priority for desks and equipment. This allows for more flexible scheduling, in which a student may have lab on two separate days, instead of one three-hour lab each week.

One consequence of the larger classes is that the chemistry department runs out of equipment. New equipment must be made by Dr. Walker in the laboratories.

Dr. Walker says that his innovations have made chemistry classes more manageable in spite of the crush.

Student Aid Available

Several of the Federal grants have been completely exhausted for the 1973-74 school year, reports Student Aid Officer, Tom Patterson. The exhausted loans include the National Direct Student loans, the Supplemental Economic Opportunity grants, and

the College Work Study Program.

Increases in student demand are responsible for the swift disappearance of Study Grants, Mr. Patterson said.

The major grants and loans awarded to KJC for

this have totaled over \$63,000. In addition, a number of other scholarships and awards are available to KJC students. The most important of these are the Nursing scholarships and loans and the Law Enforcement scholarships and loans.

Clubs & Organizations

Black Student Alliance

The Black Student Alliance is an organization geared toward the welfare of the students at Kennesaw Junior College.

So far this year we have had three meetings. The first meeting was to really get things going. It was also a meeting where we planned our activities and possibilities of things we would like to do this year. Our next gathering was a get-acquainted social hour. This was to bring both new and old students together, and also to learn what they accomplished this past year in the BSA.

In our last meeting we were supposed to elect officers for the BSA, but we were unable to due to the low attendance at that meeting. On Wednesday, October, 17, 1973 our of-

ficers for the year 1973-74 were elected. (Ed. Note: Names not available for publication.) We did discuss the rules and regulations, along with the constitution for the Statement of the Proposal for the Revision of the Black Student Alliance.

So, at our last meeting we elected officers. We hope to bring in more new students in the future. If there is anyone who wishes to help or bring in problems of situations at KJC, we will be more than happy to have you.

Drama Club

The faculty advisor, Ms. Stephenson and the technical director, Doug Tant, held auditions October 10, for the fall quarter play, "The Glass Menagerie," written by Tennessee Williams.

Chosen for the cast were Judith Larsen as Amanda, Randall Lynn as Tom, Carolyn Skinner as Laura, and Doug Tant as Jim.

The play will be produced November 16 and 17 in the KJC gym at 8 o'clock. All are invited.

Choir

Tenors and basses interested in singing in the Kennesaw Junior College Choir, please see Mr. Boehm in Humanities room 115 or 125 as soon as possible. A concert is planned for November.

Tom Hayden Speaks In Atlanta

Tom Hayden and Jane Fonda were scheduled to speak at the Prairie Fire Book Center in Atlanta on October 13. Although Miss Fonda did not appear, Tom Hayden and a former prisoner in the Viet Nam War were present.

The main issue in their discussion was the Viet Nam Conflict. They stated that the war and American involvement in it are not over and suggested that

Americans should continue to protest against American intervention. Hayden views American actions as imperialistic and predicts that as soon as the United States conquers Viet Nam, President Nixon plans to move into China and then into the USSR.

About thirty to forty people were present at the discussion which lasted approximately two and one half hours.

Continued From Page 3

persist because of requirements for highly specialized graduate level training, lack of facilities, or comparatively low salaries. Many professional occupations have suffered from chronic worker shortages for many years, particularly teaching, engineering, physics, oceanography, chemistry, geophysics, and biomedical and health occupations.

OCCUPATIONAL ASSESSMENTS. Specific assessments indicate potentially sharp differences in the demand-supply situation among occupations. Elementary and secondary school teaching is expected to experience the most dramatic change in supply-demand conditions. Long a shortage occupation, teaching is about to undergo a sharp change in prospects: the aggregate supply is expected to significantly exceed demand if recent entry patterns in the occupation continue.

Professional health occupations should continue to experience shortages. The supply of physicians and dentists, for example, is expected to fall short of requirements because of the limited capacity of medical and dental schools currently in operation and scheduled to be in operation by 1980.

Engineers are also expected to continue to be in

short supply. If the number of engineering graduates

were to keep pace with the expected growth in total college graduates, the new supply would be adequate to meet projected re-

quirements. Recent trends, however, do not suggest this development as bachelor's degrees in engineering continue to become a smaller proportion of total

bachelor's degrees awarded.

In scientific fields, shortages of chemists, geologists, and geophysicists seem likely, but surpluses of mathematicians and life scientists may result if

students continue to elect these fields in the same proportions as in the past. However, since transfers occur quite frequently among these occupations, part of the supply-demand imbalances may be remedied by such transfers.

Other areas for which potential shortages are in prospect include counseling, social work, urban planning, and a variety of occupations related to the planning and administration of local governments.

The Counseling and Placement Office maintains a career library containing senior college catalogs, job listings, and career resource materials.

One of our major

concerns is that people frequently wait too long to consider their career options, and, therefore miss out on several good career opportunities. We can't do the thinking for you but we

are here to help you sort things out. Visit the Counseling and Placement Office, Humanities Building, Room 216, phone 422-8770, ext. 203. Make the most of what we've got to offer. IT'S YOUR FUTURE...

Heap Difficulties

The Kennesaw Junior College HEAP bus was stopped Friday, Oct. 12, and the driver arrested and jailed by the Georgia Public Service Commission. The commission charged that the bus was operating as a

leasing agency while licensed as a transportation agency, thus violating that license. There was also a question of whether or not the bus was adequately covered by insurance.

Louis Malone, the driver, was again arrested when the bus was stopped a second time on Tuesday morning, Oct. 16. Although the bus was impounded, it was allowed to complete the trip to Kennesaw with its 46 passengers. A bus from Trailways Bus Line took the HEAP students home that afternoon.

Jimmy Steed, the owner of the bus, met with his lawyers to try to release the bus from impoundment.

Pick Football Games

by Danny Hill

The Sentinel is going to pick eight games this week and they are Virginia Tech at Alabama, while Auburn hosts Houston. Kentucky at Athens going against Georgia, while Tech visits Tulane. LSU visits South Carolina and Tennessee will host TCU. As a special we're picking Los Angeles Rams vs. Minnesota Vikings game, along with the Atlanta Falcons vs. San Francisco game.

Last issue's predictors had only one perfect predictor, and that was Dr. Romar who 5 and 0. The rest of the predictors were four and

one, except Mr. Blumenthal who was three and two.

The predictors again go with Alabama over Virginia Tech. They split on the Auburn - Houston game, they go with Georgia over Kentucky. The predictors again pick Tech to lose, this time to Tulane. They say LSU will beat South Carolina and that Tennessee will come out victorious over TCU. They split once again on the Rams - Vikings. But, oddly enough they all predict the Atlanta Falcons to beat the San Francisco 49ers?

Flag Football Season Begins

by Danny Hill

The 1973 Intramural football season got under way with a real cliff hanger as the Roadrunners defeated the Barracudas 2-0. Jim Nash forced a safety on the Barracudas' quarter for the only scoring of the day.

In the second game the Roadrunners ran over the Gamecocks 21 to zip. Benny Green supplied most of the scoring punch with two touchdowns, but he had some help from Robert Payne who added a touchdown. Larry Wilson was also credited with a safety. Now the Roadrunners are 2 and 0.

Then the Gamecocks caught it from the Cheetahs, 18 to 7. The Cheetahs had three touchdowns, one each by Chip Jackson, Eddie Williams, and Vernon Maddox. The scoring for the Gamecocks was done by Frank Sartor who scored all seven Gamecock points. The Gamecocks now are 0-2.

The Pumas got their season off to an easy win by a forfeit from the Apes. But, the Pumas had a rough go as they had to battle for a 12 to 12 tie. Randy Waddle and Dennis Urhart scored a touchdown apiece for the Pumas. Vernon Maddox had the scoring punch as he put the two touchdowns on the score board.

In the early season standings the Roadrunners lead with two wins, no loses, and no ties. They are followed by the Cheetahs and the Pumas both have a record of one win, no loses, and one

tie. They are followed by the Gamecocks who have no wins, two loses, and no ties record. The early season scoring leaders are Vernon Maddox from the Cheetahs has three touchdowns for a total of eighteen points, he is followed by Benny Green from the Roadrunners who has two touchdowns for a total of twelve points.

It looks like a good football season as we have some very close games and some close standings so let's get out and see an intramural football game.

Aardvarks Win First Womens Volleyball Game

The first contest of the fall quarter women's volleyball season was held Monday, October 15, between the Aardvarks and the Robins. The Aardvarks won the set two games to none.

In the first game, the Robins won the serve, but never held the lead as they lost 15-7. The teams then switched sides of the net, and the second game began with the Robins opening up a quick 7-0 lead. At this point the Aardvarks finally captured the lead at 13-12 and went on to win 15-13, thus eliminating the need to play a third game..

Ten Aardvark team members, lead by captain Jackie Bankston, were present for the match while five Robins were on hand. Tracy Ash is the captain of the Robins.

Women's volleyball

competition will be held on Mondays with powder puff football games on Wednesdays. Other womens' activities recently started or starting soon include table tennis, cycling, and horseshoes.
