

WHAT'S IN A NAME??

SOUTHERN TECH

FEBRUARY 26 1974

Trained wild animals and beautiful girl performers will be important elements in the varied performance of Hanneford Circus when it appears in the STI Gym on Wednesday, February 27, 1974. With an impressive array of new features, the 1974 program of this popular circus promises to be the strongest in its history.

This is sponsored by the STI Student Government Association. Performances are at 4:30 and 8:00 p.m.

LETTER TO THE EDITOR:

Did you know that the Office of Safety and Health of the U. S. Government has set a level of 90 decibels (noise) as the maximum exposure for an eight hour period? The maximum exposure for 110 to 115 decibels is approximately 15 minutes. If my memory is correct, 120 decibels is considered the "threshold of pain" and if a deer were exposed to this level for very long, he would die!

How about your "dear"? Are you being fair to her? I did not have a decibel meter at the dance, but my ears started hurting and I left for quieter pastures. If it had not been raining, the best spot for listening would have been about 20 feet from the front door, at the edge of the pavement. I am not griping about "Liberation", they have some good sounds, but I would like to enjoy instead of suffer.

Suggestion: I don't know how much of the students' money was used to hire the band, but I imagine some pretty sophisticated stereo equipment with amplifiers plus a varied selection of "sounds" could be purchased and used for dances. It might also provide a decent public address system for the gym. Then, future student activity money could be used to promote the presence of more girls - which would attract and allow more participation by a majority instead of a minority of the student body. OR - the money could be used to increase student services or provide financial aid to students in need.

Think about it! Renting a band is like renting an apartment. The landlord profits, you don't!

One student's opinion. What's yours?

A RESOLUTION

WHEREAS: There has been a large new bulletin board installed on the outside wall of the lab building, near the post office, and

WHEREAS: The purpose of this board was to eliminate the need for putting posters and notices on doors, windows, and walls all over the Southern Tech Campus,

THEREFORE LET IT BE RESOLVED, that no one or no organization shall be allowed to place posters, notices, etc. on anything other than a bulletin board, and

LET IT BE RESOLVED, that the Judiciary Board shall handle any violation

LOG

The yearbook needs photographers with home darkrooms. If interested, contact Joe Deadwyler in the Log Room or at Box 8121. This is a paying position.

B.R.A. BRIEFS

Butch Ballenger, Chris Bearden, and Ray Davis entered SME's "Big John" and "Little John" in the SCCA Slalom last Sunday. Driving "Big John" Butch ran the best time for bathtubs with a 3919 second run. Chris drove Big John for a 41.2 second lap to take second. Big John made no more runs due to a very SICK engine. Ray had his share of problems with Little John. Air bubbles in the fuel line cut down Little John's responsiveness a tad. Ray still managed two runs of 42.9 seconds and 42.8 seconds. Holt Rogers has informed me that Big John's engine is still under intensive care but is expected to pull through.

All right all of you Hot Shoes. Tubs will be allowed to run in the gym parking lot ONLY. If you wish to practice starts, stops, Sharp turns, and dodging cars notify Dean Van Gorder and Chief Howard at least a day in advance.

The scales are fixed (I hope!). Talk to Mr. Cuba and set up an appointment to have your tub weighed.

I am now working on an exhibition run at the Atlanta "450" March 24. If your tub is together and you are interested in trying some Southern type racing (floor it and turn left) give me a call.

HELP!! The Bathtub Safety Committee is having trouble obtaining hay bales for spectator protection. If you know where we can obtain some hay bales contact me by phone or box.

The picture album has been sent to Wide World of Sports so keep your fingers crossed.

NEWS FLASH -- The Lions Club has an engine at last. (I think that was what they called it).

There will be a meeting February 28, 1974.
