... and so ends an era ... an era begun in abandoned barracks at the end of a world war ii airstrip in Chamblee to a modern facility in Marietta ... an era that produced 2000 graduates and championship athletic teams ... an era that saw successes and achievements, fun and frolic, motorized bathtubs and painted rocks. All this with a fine two year program in engineering technology ... now we must, in a way, begin again, for now we are a full-fledged four year college—and, building on what we have achieved in the past twenty-two years, we must meet the challenge of our future—simply to become the best four year engineering technology college—anywhere.
