Fall Term to Bring 300 on September 27

Under the leadership of Director L. V. Johnson and Assistant Director John D. Sewell, The Technician for the fall quarter's work with the registration of students on Monday, September 27. Over 300 men and women are expected to enroll.

Public to Inspect School Facilities

Friday, September 3, has been designated as Open House Day at The Technical Institute, and a public has been invited to visit and inspect the school plant from 9 a.m. to 9 p.m. on that day.

Panel discussion on the faculty and staff of Georgia Tech, the Board of Regents, the high school principalships, the state, and the Associated Industries of Georgia has been arranged. A walk through the various courses offered by The Institute will be made.

The general public is cordially invited to come and visit the shops, laboratories, classrooms, dining hall, dormitories, and other facilities on the campus.

Tours Planned

To permit free access to all buildings, the school will be open from 7 a.m. to 3 p.m., and the faculty and staff will be on hand to answer questions, display equipment, and explain courses of study. A large number of people are expected to make tours of the campus facilities to learn more about the operation of The Technical Institute and the progress it is making toward meeting the demands of industry for trained technicians.

Calendar for Year

Shows 58 Holidays

The calendar for the 1948-1949 term at The Technical Institute is one of the most attractive in many years. Holidays mixed with the school work break the monotony of the year and give the student something to look forward to.

One pleasant feature this year is the school's spring holidays between the winter and the spring quarters. Breaking the summer vacation up so that the students get two weeks in September is also easy on the serve.

Fifteen more holidays to cover Christmas and New Year's Day, three days for Thanksgiving, and a day for the Fourth of July make a total of fifty-eight holidays during the school year, more holidays than a bank president gets. School is not back after all.

The school calendar reads as follows:

- Fall Quarter, 1948
  - Sept 27, Registration
  - Oct 5, Last day for registration
- Thanksgiving holidays
  - Dec 26, End of term
  - Dec 29, Christmas holidays

- Winter Quarter, 1949
  - Jan 3, Registration
  - Jan 4, Classes begin
  - Mar 19, End of term
- Spring Quarter, 1949
  - Mar 25, 9 a.m., Registration
  - Apr. 5, Last day for registration
- Summer Quarter, 1949
  - June 27, Registration
  - June 30, Classes begin
  - July 4, Holiday
  - July 8, Last day for registration
  - Sept 10, First day for registration

Three Students Make All 'A's; Twenty-Four Achieve 'B' Averages

That students at The Technical Institute can make good grades in spite of rigorous schedules is shown by the fact that three men made all 'A's in the spring quarter, and twenty-four others maintained 'B' averages.

Charles E. Sandfor, William O. Walton, and Thomas T. Walls kept their grades on the A level. Twenty AA grades and one A appeared on Mr. Johnson's record, and both Mr. Walton and Mr. Walls had four 'A's on their credit-bearing courses.

Regents Asked to Visit the Institute

As The Technician went to press, plans were being made to invite members of the Board of Regents and Colonel Blake Van Leer, President of the Georgia Institute of Technology, to visit The Technical Institute on September 17 for an inspection tour of the campus.

Chancellors Raymond B. Rety, Mr. Pope F. Brock, of Atlanta; Mr. John J. McDonough, of Rome; Mr. Rutherford B. Ellis, of Atlanta; Mr. Frank M. Spaldin, of Americus; and Colonel Van Leer were asked to be lunch at the school and visit the shops and laboratoric facilities now.

After the tour of inspection Mr. L. V. Johnson, Director of The Technician, was to give the visitors a formal report as to the additional equipment needed to permit efficient operation of the school to meet the demands of industry.
John Byrd Named Dormitory Leader

One of the musicians in Kay Ky-
ser’s “Collegiate Mystical Knowl-
edge” was crying about the fact that he just couldn’t get along with girls. He was telling his tale of woe to the engineer on the show. The latter assured him that he couldn’t worry any longer.

“I’ll give you a list of things to do,” he said. “And you’ll have further trouble.”

Here are the engineer’s instruc-
tions:

If she wants a date—meter.
If she wants to call—receiver.

If she wants an escort—conduc-
tor.
If she wants to be an angel—
transformer.

If you think she’s going out with others—interferer.
If she eats too much—redu-cer.
If she is wrong—rectifier.
If she is cold—heater.
If she wants a vacation—trans-
mover.

If the talks too much—inter-
mediary.
If she’s narrow in her views—
simplifier.
If she has wrong ideas—cor-
rector.

If she fires—eliminator.

—The Atlanta Journal

Student Activities

The fact that student activities play an important role in the curriculum cannot be denied. Although we cannot construct our studies, there is much which can be filled only by some outside interests. The very industries which were responsible for the failure of the French revolution afforded a shown preference for men who possess a well-rounded education; there is no place for the "book-
worm." Industry needs men who possess good grades through their training, but these men must necessarily have a variety of interests in order to make men of them. The Technical Institute is hastening to provide such activities as competitive sports, a newspaper, and social functions.

Librarian Opened in School Book Store

The Technical Institute librarian has been forced to offer to the students the use of the best books obtainable. The circulation department is temporarily being handled through the book store, and operates under standard library regulations. All books, except special reference books, may be checked out for four-
teen days. Included among this collection are modern and classic novels, humorous fiction, biog-
graphies, and special reference books.

The books are selected from the lists given in "Good Reading," ed-
ited by the Committee on College Reading, and on the recommenda-
tion and request of the boards of the various departments.

Reference Room Established

The reading and reference room is located in Room 9 of Building H. It contains a set of reference books, periodicals, handbooks of physics, chemistry, various types of engineering and also a variety of current magazines.

Other things are yet to be adopted. The name of the year-
book, the mascot, school songs, and so forth, for use at athletic events are yet to be developed. The general program of the school, with its responsibilities and the philosophy of the school, has a definite program toward developing the individual.

Other things are yet to be

Special Features
As I told you before, she is streamlined. Her body is small, but in good shape.

Student Activities Program Takes Effect September 27
Five-Dollar Fee Provides School Paper, Annual, Many Sports

Beginning with the fall term, each student at The Technical Institute will pay a fee of $5.00 a quarter to defray the expenses of an extensive student activities program. In return for his money the student will receive without additional charge the school newspaper, the yearbook, and athletic privileges.

An ambitious athletic program is being organized under the supervision of Coach Frank Johnson, acting athletic director. The Technical Institute will be represented in intercollegiate athletics by a basketball team only, during this first year of varsity competition. Other sports may be added to the program in the future as conditions warrant.

Many Sports Included
Nearly every sport will be represented in intramural competition between classes, dormitory sections, and other groups. Regular programs will include touch football, tennis, basketball, volleyball, horseshoes, ping pong, softball, truck and field, and golf.

Other opportunities for student activity will be on the publications staff, under whose efforts the school newspaper is published. This staff will also publish a weekly bulletin to be distributed in June of each year.

Suitable awards will be presented to students earning him by participation in the various activities. Varsity monograms will be awarded to athletes fulfilling the requirements of intercollegiate competition.

The best executive is the one who has enough sense to pick good men to do what he wants done, and self-restraint enough to keep from meddling with them while they do it.

Institute Plans Intramural Games
The full intramural program will include competition in touch football, basketball, ping pong, and horseshoes. All students interested in participating in this program are urged to form teams and elect a manager. It is suggested that teams represent classes, such as Electrical, Mechanical, Industrial, etc., or dormitory sections. A meeting of all managers is scheduled for 12:30 P. M., Tuesday, October 27, in the Library. Schedules, rules, and awards will be discussed at this meeting.

Directors Presented
(Continued from Page 1), in active duty in November, 1946, Mr. Sewell became Supervisor of Distributive Education for the Atlanta and Fulton County Schools.

In addition to his duties as Assistant to the Director of The Technical Institute, Mr. Sewell is Braves Training Officer for the Navy's Organized Reserve in this section.

Work Refreshed

BY ROBERT FOWLER

The Technical Institute, Chamblee, Georgia, has discovered a pretty co-ed running around this campus. Some of the boys have asked me about her; so in this article your reporter will try to tell you what he knows about her. She is Barbara Hudson, better known to her friends as Bobbie. She resides at 232 Howell Place, Atlanta, and is sweet seventeen. What most boys want to know is how she looks. To answer this question will be hard but to the best of my knowledge, here is the way she would describe herself:

Specifications
Model: 1962 streamliner.
Weight: 110 pounds.
Hair: Brown.
Eyes: Brown, the same color as her hair.
Height: 4'11" in.

She Can Cook
Boys, if you are looking around for a good wife, you need not look any further for she just loves to cook. Bobbie told me, "I chose this school because it was close to home and because I could not attend the main campus except at night."

She is majoring in building and construction. She said, "I will stay in this school and finish (I hope) if my grades will permit it."

Do not be bashful boys. Walk up to her and speak to her; she won't bite.

BUCKHEAD

BARBARA HUDSON
Our Coed
Legs: Smooth and pretty.
Arms: Short but strong.
Face: Oval, soft, and clear; dimples in each cheek.
Eyes: Like radar; they are tuned.
Personality: Attractive, even charming.

She Is Smart
She graduated from Brown High School, May, 1946. In high school she was a member of the Community Service Board, chairman of the Graduation Committee, and president of the Inter-Cultural Relations Club.

At the end of the school year she was given a War Bond for her service in the Community Service.

Her sports are basketball, football, and baseball. She also likes popular and semi-classical music.

Johnson Calls for Cagers October 3; Places Wide Open
Candidates for the first varsity basketball team to represent The Technical Institute are requested to meet in the Library at 12:30 P. M., Monday, October 6, according to an announcement by Coach Frank Johnson.

Plans for the season will be discussed, and it is hoped that a large number of candidates will turn out. Coach Johnson reminded all that players are starting "from scratch" and that all positions are wide open.

This first team to represent the school has a tough road ahead since none of the students have ever played together before, the system used will be new to most, and the opposition has the advantage of considerable experience from last year.

Coach Johnson, who learned his basketball at North Carolina State College, feels that The Institute has good material and that with experience the Techniques will give some of our opponents an "inertia" evening before the end of the season.

The Institute's Catalogue is Being Distributed Over the South

A new, 52-page Technical Institute catalogue covering every phase of the school about which a prospective student would desire information is now ready for distribution. Assistant Director John N. Sewell will announce. He urges anyone who is interested in full details of the school to write for one of these attractive, illustrated booklets.

Complete information concerning the establishment of The Technical Institute, its sponsors, faculty, purpose, the school calendar, entrance requirements, tuition and fees, the veterans program, housing and boarding facilities, student activities, etc., is included. All eight courses are presented in outline form by quarters, and each subject is described in some detail.

Accompanying these descriptions are pictures to give the student an idea of the type shop he will do his work in. Other campus scenes are included, as well as pictures of each member of the administration and the faculty.

Featured on the outside front cover is the school seal, on the outside back cover is a graphic presentation of different types of training offered at The Technical Institute, on the inside back cover is a map showing the location of the school— all the work of the instructors in drawing and art at The Institute.
