Institute Students Form Honor Society

Vol. 1
Chamblee, Georgia, November, 1948

Temporary Student Council Is Busy Perfecting Organization

Definite steps were taken in a meeting of the student body on Thursday, October 28, toward setting up a permanent, effective student council at The Technological Institute.

After Mr. V. J. Barnum and Mr. R. L. Wilkinson, faculty advisers, had explained the purpose of a student council, the students grouped into three groups according to the subjects they were studying. Each group elected two representatives to make up the student council.

The fourteen representatives, gathered with Grady B. Wells, acting chairman, and Jack Tyler, acting secretary, are meeting twice weekly to draw up a constitution and by-laws, which will later be ratified by the student body. Permanent council members will be elected after ratification of the constitution and by-laws.

Among the functions of a student council, according to Mr. Barnum, are improving the student body, managing student elections, improving the school appearance, setting up campus politics, directing student activities, among proofreaders, Mr. Herron presented deli-

Students, Faculty to Enjoy Thanksgiving Rest, November 27-29

On November 25, the Technicians who had as yet been selected by the society.

The Technicians wishes everyone a safe, happy, bountiful holiday period.

Fussell, Hudson Named Editors Of Yearbook; Fast Progress Made

Robert Fussell, of Macon, and Barbara Hudson, of Atlanta, were elected yearbook editor and associate editor, respectively, at a meeting of the annual staff on Tuesday, October 26.

Mr. Fussell, who is a third-quar- ter student of electrical technology, graduated from Macon's Lanier High for Boys and attended the University of Georgia one year before entering The Technological Institute. Miss Hudson, an honor gradu- ate of Macon High Brown of Atlanta, is an outstanding first-quarter stu- dent of building construction.

At the same meeting the follow- ing officers were elected: T. T. Wells, of Macon, photographer-editor; Wade Woodward, of Decatur, art editor; Smith Smallwood, of Macon, feature editor; and George Fris, of Savannah, busi- ness manager.

Other members of the staff are A. J. Purdy, J. E. Turner, Tom

Considerable progress toward planning the design and content of the book has been made. Contents to decide the name and cover de- sign were still in progress when The Technicians went to press. Rep- resentatives of the printing and engraving companies selected to publish the book met several staff members on Monday, November 1, to give them instructions and mate- rials for constructing the dummy which will be used in planning the layout.

The photographer who will take the individual pictures has been selected. Each student is asked to pay the $1.00 charged by the pho- tographer, since the funds allotted to the annual from student activi- ties fees are barely sufficient to pay for printing and engraving. Every student is encouraged to have a picture taken.

G. H. Harrison, Atlanta, Chosen To Editorship of Technical Review

G. H. Harrison, a resident of Atlanta and a student in Mechanical Technology, was elected editor of The Technological Institute's weekly magazine, The Technical Review, at a meeting of the faculty and the staff at a meeting held on October 25.

Mr. Harrison, who successfully served as advertising manager for the previous issues of The Institute's school paper, was elected business manager of the magazine by the faculty and the staff.

Other students who were chosen for important positions at the same meeting were G. Guggino, news editor; Robert Fussell, sports editor; H. Alan Nolen, feature editor; and T. T. Wells, circulation manager.

It was decided that these positions should serve for nine months, handling all issues through June, 1949, and that elections for 1949-50 will be held training. A temporary staff will be set up for the summer issues.

News Briefs

G. E. A. Meeting

Director L. D. Johnson, Assistant Director J. D. Dew, and all mem- bers of The Technological Institute fac- ulty attended the meeting of the Fifth Georgia Engineering Asso- ciation, which was held in Decatur on November 5.

While in general meeting these staff members were thrilled to hear the announcement that The Insti- tute was the first G. E. A. unit in the state to report 100 per cent membership and payment of 1948-49 dues.

Harrington Baby

Marcie Gayle Harrington, 6-pound one ounce girl was born to Mr. and Mrs. Harrington, of Piedmont, on October 4, 1948.

The new arrival is the fifth in a long line of proud fathers. Mrs. Harrington passed deli- cately to the ladies and choice cigars to the men in the institution staff.

The Technicians editors extend congratulations,

Recent Publication

The Technicians staff, as has en- hanced the official Honor Roll and the names of all students mak- ing this list will be published about two weeks after the end of each semester.

To achieve this honor, students must have a minimum grade point average (this average may be found by dividing the viding the credit hours into the honor points per credit hour). To be considered, a student must carry a minimum of 15 honor hours at each quarter and have no failures. No carrying 15 credit hours and additional non-credit hours may be considered if he has no failures and has a 3.6 average on college work. His record must be kept up to date.

To date, twenty-nine students have made the official Honor Roll by fulfilling all requirements. Nine of these men appear on both the spring and the summer lists, which are given below.

Spring Quarter

Adams, James E.; 3.6; Alexander, Blason E.; 3.1; Byrns, Robert C.; 3.2; Byrd, Jack J.; 3.3; Charles, James E.; 3.5; Craven, Howard T.; 3.0; Daubay, Robert H.; 3.8; Goggon, William G.; 3.4; Hill, James G.; 3.6; Lay- ton, William N.; 3.8; Wells, Charles W.; 3.9; Thomas, T. 4.0.

Summer Quarter

Adams, James S.; 3.2; Alexander, Elamour P.; 3.5; Anderson, Norman R.; 3.5; Black, Edwin H.; 3.9; Byrd, John M.; 3.1; Carter, Howard T.; 3.5; Daubay, Robert H.; 3.8; Davis, Haskell H.; 3.0; Dicken, Otto J.; 2.8; Fries, of Tattnall; Robert H.; 3.5; Goggon, William G.; 3.2; Har- rand, John B.; 3.7; Hay, John R.; 3.5; Gray- ham, H. 3.2.

Harris, Billie H.; 4.2; Kiser, Rob- ert H.; 3.4; Lee, James E.; 3.1; Leverett, John L.; 3.5; Mallett, Al- len B. 3.1; Moseley, Edward A.; 3.5; Morrison, James P. 3.1; New- man, Jass D.; 3.2; Rankin, William H.; 3.4; Windham, William C.; 4.0.
Carter's Cognitions

I am bewildered. For several weeks I have lost in a series of forums. There is no formula for each and every one of these that I have stated in my physics book in eight different ways. It is too much for a simple man.

After five weeks of this, I very often feel only "dozy" and great people with "Continuum" or "Green" instead of the customary "Good Morning" or "Good Evening." Realizing that this could be come the following: I ask of the teachers how one could go about studying physics, and still win more. To my credit I let it be known to him when he answered that understanding would come suddenly like a light being turned on. He did not even swear until he had gone and then very quietly in a dignified manner.

I thought at one time it would be a joy to read the story of Archimedes. While in the tub, Arch had another thought, another question—"Is it true there was how long is a rope?"—when

Scribe Morison Digs In And More Than Sketches Instructor Bryant

By James F. Morison

According to Instructor L. Y. Bryant himself, the Stark, that malicious, too willing co-worker and descendant of besides helping his parents' doer, did not-as he thought-one big head, one big window, and 44 years ago. The work must have forgotten to let down his landing gear when he landed and must have held his cargo into a head-fall, because Professor Bryant tells us he "was liked to go to school when he was young."

Tires Mechanics

Be that as it may, the fact that he was thrown among mechanics at an early age seems to have affected his career, since he tells us that he worked for five years as an auto mechanic before he finished high school.

While still in high school, the youthful Bryant played at end in football, at center in basketball, and behind the plate in baseball. He says that he played a "fair" game in each sport, but he fails to specify whether he refers to ability or ethics.

Likes Writing

At some stage of his early career, he discovered that a pen could be used for purposes other than as a receptacle for lead and ink, became interested in writing. He studied journalism for three years at Morey University and received a degree in Journalism in 1938.

During those four years, he participated in athletics as a "nonentity," at least so he says. None of the current rule books indicate the position or game in which a nonentity plays, but a 1914 Web.

**Technicians Play 28 Basketball Games—15 at Home, 13 on Road**

Coach Frank Johnson, energetic, genial mentor of The Technicians, announced an official, full basketball schedule of 28 games, 15 at home and 13 on the road.

The season opens with a double-header in The Institute’s gym at Lawson General Hospital on Wednesday, December 1. The venue will battle Oglethorpe University in the main event, and the Lorelei Ladias, the Technicians’ adopted girls’ team, will play Gainesville High School girls in the preliminary attraction.

All preliminary games will begin at 11:00 A.M., with the varsity games following at approximately 1:30 p.m. Admission prices for adults will be 60 cents, tax included; 30 cents for high school students. All children under six years of age, when accompanied by parents, will be admitted free.

Sh: “Are I the first girl you ever kissed?”

He: “Now that you mention it, I do look familiar.”

**Quintet ‘Adopts’ Lorelei Ladies; Many Double-Headers Scheduled**

The Technical Institute has entered the field of athletic competition with quite a “bang.” Since the completion of the gym, basketball practice has been held daily, and now our varsity is ready to challenge the best in the league.

But that’s not all! The Technical Institute has “adopted” a local “girls’ team,” the Lorelei Ladias. This same team has been to the National A. A. U. tournament in St. Joseph, Mo., a number of times. They also placed third in a national softball tournament held in Phoenix, Arizona, a few weeks ago.

Perhaps the reader is wondering how The Technical Institute ever managed to procure the services of this nationally known quintet. Mr. Frank Johnson, the athletic director, summarised the situation when he said, “Mr. Lough, manager of Hertz Company of Atlanta, had a fine team but no gym; we had a fine gym but no girls’ team.”

Realizing the crowd appeal of a double-header, Mr. Johnson sought to acquire the services of this team. Thus negotiations began, and now The Technicians have an outstanding squad to play the preliminary for all their home games.
