

THE Technician

A Unit of Georgia Tech

Vol. XII

Southern Technical Institute, Chamblee, Ga., September 21, 1959

No. 1

Mrs. Mildred Wilson Is Appointed As New Placement Director

Mrs. Mildred T. Wilson, who has been serving as Acting Placement Director since the resignation of Mr. Wilkinson, is now the official Placement Director of Southern Tech.

This does not come as a surprise, for Mrs. Wilson is doing an excellent job. She maintains a close and friendly relationship with the prospective graduates as well as with the alumni. This is evidenced most forcefully by the many compliments expressed about her and her work at the annual alumni banquets.

Mrs. Wilson gives each prospective Southern Tech graduate individual attention and help in seeking employment. She further tries to keep in touch with them after they are employed; and she even helps them seek other employment if for some legitimate reason they aren't satisfied with their initial job.

Mrs. Wilson conducts an annual salary survey of Southern Tech graduates. This survey is based on replies from approximately forty percent of the alumni. It is used extensively by counselors and by

MRS. MILDRED WILSON

industry, and is one of Southern Tech's most valuable compilations.

In addition, she must keep a close liaison with the prospective employers and keep them ever interested in Southern Tech's product—the engineering technician.

It takes quite a personality to accomplish all of this, and Southern Tech is most fortunate in having such a person.

Good luck, Mrs. Wilson!

Harold B. Stewart Tops Summer Point Averages

Sixty-two Southern Tech summer quarter candidates for graduation completed their work on September 11, and are now taking their place in industry. They will receive their diplomas next June at the annual graduation exercises.

Heading the list scholastically, with a 3.81 point average, is Harold B. Stewart of the Mechanical Technology department. By bettering the required 3.60, his point average entitles him to graduate "with highest honor."

Electronics and Communications led the field with fourteen candidates and Mechanical Technology,

a close second, had thirteen. Heating and Air Conditioning had ten; Civil, nine; Building Construction, eight; Industrial, seven; and Gas Fuel, one.

Over four hundred young men enrolled on July 6 for the Southern Tech summer quarter. The total reached 417 at the end of registration week according to Mr. L. Y. Bryant, registrar.

Of the 417 students, 322 were native Georgians, but among the 95 non-residents were students from many Latin-American countries. Thirty-one percent of the students were veterans of the military services.

Paul Reed Appointed New Editor Of The Technician

A native of the Lone Star State, Texas, Paul Reed has been chosen as the new editor in chief of The Technician.

Reed calls Azle, Texas (near Fort Worth), home and was graduated from Azle High School. He attended, briefly, Arlington State College and Baylor University, and is a veteran of the U. S. Army Air Corps.

No novice in industry, Reed has six years experience with Southwestern Bell Telephone Company in Fort Worth, as a construction lineman. He also served overseas for five years with Arabian American Oil Company in Dhahran, Saudi Arabia, as a supervisor in the communications department. His chief function with Aramco was the training of Saudi Arab nationals in outside telephone plant construction.

As a Building Construction major at Southern Tech, Reed is presently enrolled in his fourth quarter and expects to graduate in September, 1960. Another prospective de-

EDITOR PAUL REED

McClure Greets Student Body Reports Progress On Marietta Campus; Advises Participation In Activities

The new campus of the Southern Technical Institute at Marietta is rapidly approaching the end of its planning stage and is on the threshold of becoming a reality. The final detailed drawings and specifications are in the hands of Georgia Tech and the Board of Regents, and we are hopeful that construction can begin before the first of the year. It is now estimated, however, that we will not be able to occupy the new campus before September 1961.

The land owned by Southern Tech for its new campus totals 116 acres, which is about 100 acres more than we now occupy.

We are hopeful that by the time

DIRECTOR H. L. MCCLURE

this is being read that Building 23 will be available for Southern Tech. Building 23, which includes the gymnasium and auditorium, is

sorely needed by Southern Tech. DeKalb County has promised to lease the building to STI as long as it is needed. However, the county is as yet awaiting clearance from Washington for its use of the building. We are also hopeful that the parade grounds and tennis courts back of Building 23 will be available to us.

If Building 23 is made available to Southern Tech, we plan to move the library into that building. Tentative plans are being made for a student lounge in Building 23 also.

TO ALL STUDENTS:

We of Southern Tech are delighted that you have chosen this college to prepare for your life's work. Welcome to the campus.

Your decision to come here was important to you. However, your efforts during the next two years are of much more importance to you because your record and your experience at Southern Tech may very well determine your economic destiny for the rest of your life. The importance of your academic achievement is not to be denied, but the importance of learning how to supervise, live with, and work with people is second to none.

Obviously, the ability to live amicably with people does not come entirely from textbooks, nor do the leadership qualities you need. The principles involved may be learned in class, but the development of these principles must depend upon extra curricular activities, such as athletic programs, school publications, and the many societies and departmental clubs.

At Southern Tech you will find a faculty and staff anxious to help you develop into a well-rounded engineering technician, and adequate physical facilities to do the job. The rest is up to you.

We extend to you our best wishes for a pleasant and rewarding stay at Southern Tech.

Sincerely,
H. L. McClure
Acting Director

Patton Is Given Surveying Honor

The Georgia Association of Registered Land Surveyors honored Joe D. Patton, an outstanding college student surveyor, at graduation exercises for Southern Technical Institute this year. Mr. J. H. Smith, of Thomaston, president of G.A.R.L.S., announced this honorarium of \$35 for the student showing the most promise in surveying classes at STI.

Smith specified that the choice of the recipient was based on grades made in surveying courses, interest in surveying, and general aptitude for professional work as a surveyor. A committee of three Southern Tech instructors, all of whom are members of G.A.R.L.S., selected the candidate. Mr. J. H. Smith, presented the award at graduation exercises on June 13.

Army Supervisors Enrolled At STI

Twenty civilian project supervisors from the U. S. Army have been sent to a Georgia college for an intensive short course in mathematics, technical writing, and blueprint reading. The twenty, all from the Army Transportation Supply and Maintenance Command, attended Southern Technical Institute in Chamblee, Georgia.

Brigadier General William B. Bunker, Commanding General of the TS and MC headquarters in St. Louis, delivered the opening address to the trainees at Southern Tech on Monday, July 20. General Bunker pointed out that the trainees had been selected for their experience and ability. The courses at Southern Tech increased their efficiency.

COURSES PREPARE SUPERVISORS

General Bunker's command was responsible for the supply and maintenance of Transportation Corps equipment, including rail, harborcraft and aircraft. Project supervisors from his command were given increased duties in engineering and contractor-liaison. Southern Tech's short course helped prepare them for their future work.

Also present at the opening address to the first class were Colonel H. D. Brown, Transporta-

(Continued on Page 3)

Ervin Represents Circle K At International Convention

Gerald L. Ervin, Circle K member of Southern Tech, attended the 1959-1960 International Circle K Convention at Delaware, Ohio, August 26-28. Hosts for the convention were Circle K Club of Ohio Wesleyan University and the Kiwanis Club of Delaware, Ohio.

This convention of college Kiwanians is the fourth international convention to be held. Honored dignitaries present at the convention were: P. B. White, Mayor of Delaware, Ohio; Dr. D. A. Lockmiller, President of Ohio Wesleyan University; R. W. Thal, Chairman of International Committee on Circle K Clubs; and Mr. Fay McDonald, Director of International Circle K Clubs.

The motto for International Kiwanis, Circle K, and Key Clubs, "We Build," was exemplified through each function of the convention. Building through fellowship was displayed in the fellowship luncheon where all delegates had the opportunity to meet the officers of the International Kiwanis, Circle K Club, and distinguished visitors. Singing by the convention members and guests brought closer ties between each club and between the Canadian and American delegates. A barbecue dinner at a local country club presented excellent opportunities for

sports, from boating to ping-pong, and enjoyment of finely prepared food, compliments of the Delaware Kiwanis Club.

MAJOR GENERAL LIGON ADDRESSES GROUP

Building through gain of knowledge was certainly displayed by the delegates. The address of Major General Elvin S. Ligon, Jr., Director of Personnel Program, Office of Deputy of Staff Personnel USAF, Washington, D. C., presented an excellent opportunity for delegates to learn the role our servicemen are playing in our nation.

GERALD L. ERVIN

The Technician Needs You

By PAUL REED

Greetings, everyone—students, both old and new; faculty and alumni—from your "brand-new" editor and staff of *The Technician*. Permit me to elaborate briefly on the purpose and need of our newspaper and at the same time, appeal to you for your aid and assistance in supporting it.

The school paper has long been recognized as an integral part of a well-rounded school life. By properly interpreting the newsworthy events in the life on the campus, students with an impulse toward publication writing are provided with an outlet for expression. A pride, so vital to school spirit is stimulated. Thus, the newspaper is one of the most important phases of a school's activity.

Writing has always been one of our most useful and widely used forms of communication. Newspaper reporting is one of the most exacting; it is one of the most criticized; yet, it is one of the most widely read forms of writing. Those of you who delight in accepting a challenge, have a desire to get a "toehold" in the journalism field, and feel that you would like to promote good will on the campus are all cordially invited to come to *The Technician's* office. You will find that your school grades will benefit from this extra training, and at graduation you will be one more jump ahead of others who might have not seen fit to further develop their writing ability.

The Technician staff, always striving for the highest standards of the good publication, looks upon our paper as being a professional undertaking. Every phase of the work—coverage, content, writing, and make-up—are carefully executed. This operation should be a team effort though and not the doings of a select few. All too often, a little clique gains control of a paper and use it in their own little selfish way. This sort of situation can easily defeat the very purpose for which the paper should exist. Let's all help to avoid an unhealthy situation of this type by making sure that the newspaper is a campus-wide undertaking for the enjoyment of all.

Registration, Parking, And Traffic Regulations

Cars to be parked on the campus or dormitory areas must be registered and have a Southern Tech parking decal showing in the lower right hand corner of the windshield.

The fee for car registration for dormitory students (Dorm 19, Dorm 20 and Dorm 41) is \$2.00. For others the fee is \$3.00. This fee may be paid along with the other fees. Then the receipt for the fee can be presented at Coach Lockhart's office, Room 8 of Building 24, or to Dean Maddox's office Room 13 of Building 24 where you will be given a parking decal after you have filled out the registration cards. Decals to be issued Tuesday, Wednesday, Thursday and Friday.

If your car which is registered should break down making it necessary for you to come to school in an unregistered car see the Dean of Students for a temporary parking permit, or park that car off the campus, on the South side of Sixth Street or on the East side of Hardee Avenue, but north of the residences on the East side of the street.

Should your decal become illegible, flake off, or your windshield has to be replaced scrape off the remains of the old decal, and take them to the Dean of Students office and get a new decal. If you lose your decal it will be necessary for you to buy another one. If the decal is put on the windshield properly it will be hard to lose it.

Penalties and fines for violating parking and traffic regulations are as follows:

	1st	2nd	3rd
1. Speeding on the campus (over 20 mph)	\$5	\$10	Appropriate disciplinary action
2. Parking in non-parking areas	1	2	3
3. Parking so that more than one place is used	1	2	3
4. Parking on sidewalks (any time of day or night), driveways, and near gates	1	2	3
5. Double parking	1	2	3
6. Parking in spaces allotted to faculty members and other campus personnel	1	2	3
7. Parking in spaces allotted for visitors	2	3	4
8. Parking on lawn areas	2	3	4
9. Dormitory students parking the regular campus between the hours of 8:00 a.m. and 4:00 p.m.	2	3	4
10. Operating or possessing a car on the campus without a permit, failing to properly report change in auto license tag number, giving false information, and/or falsely registering a car.	\$5 to \$10 and subject to Disciplinary Action		
11. Failure to stop at stop signals	2	3	4
12. Reproducing or defacing a parking decal	25		
13. Any violation exceeding the third shall be subject to an additional	\$5 and/or Disciplinary Action		

You are to give whatever tag number is on the car at the time it is registered. When you receive a new license number, you are to report the new number to the Faculty Parking Committee within forty-eight hours after receipt of same.

When you receive a parking ticket report to the Southern Tech Business Office not later than the next school day following the date of the notice and pay the fine set for the offense listed. Failure to do so will increase the fine and/or cause disciplinary action to be taken.

Decals will be issued Tuesday, Wednesday, Thursday and Friday. They should be on the car by Monday, September 28.

The Green Hornet —

This publication is the most recent to be added to the information-bearing communications and is perhaps second in importance to the catalogue, for it contains not only an overall view of STI life and work but the Student Rules and Regulations as well. You can hardly live in peace, harmonious relations, and freedom from infractions unless you know the contents of this important handbook.

Alumni Corner

By MILDRED T. WILSON

Promotion For C. Neel Hoskins, Alumni Association President

Neel (IND'55) has been Personnel Director with American Art Metals Company since graduation and was recently promoted to Ass't Works Mgr. He now will be responsible for not only the personnel department but the entire manufacturing division (personnel, production control, fabrication, traffic, etc.). He has been more than interested in STI graduates and has employed at least ten of our alumni for various departments in his organization. Neel says even though his promotion will remove him from day-to-day personnel activities, he will continue to seek STI men, whenever possible, to meet their existing requirements.

Many letters have come in since the last issue of *The Technician* I can't begin to tell you how much I appreciate your keeping in touch by your letters, phone calls, and personal visits. I am especially appreciative to those of you who graduated in '49 and the early '50s. But—after you have written one, don't stop there, write a note to us from time to time to let us know what you're doing.

LETTERS FROM: ROBERT CLAYTON (MECH'56) Service Engineer with Minneapolis-Honeywell in Columbia, S. C., writes a very newsy letter and asks for Southern Tech catalogs for four prospective students. He met KEN HOWARD (E&C'57) who is with Remington Rand Univac at their Cannon Mill Installation in Kannapolis, N. C. BOBBIE PERRY (H&AC'58) writes a long overdue note to say that he is now employed by Brown Engineering Company in Huntsville, Alabama. TOM WELCHEL (E&C'59) went with FAA (Federal Aviation Agency) in Wilmington, N. C., and likes his job very much. He and his family live on a quiet street with beaches not too far away also they get to do a lot of fishing in the creeks in inlets that are all about them. CURTIS COMER (MECH'53) is now working as a Test Engineer for IBM in their Lexington, Kentucky testing laboratory. He says he attributes his good position to the training received at STI. EDWARD D. BASS (E&C'57) is still with Carter Oil Company and is living in Fort Smith, Arkansas. ROBERT H. CRUMLEY (BC'57) who is with Enterprise Wheel & Car Corp., Bristol, Va., recently returned from a two-week cruise to Africa with the Naval Air Reserve. ALBERT WINTERS (BC'57) was also on this cruise. Crumley writes that they had a wonderful time and saw many things they had only seen in books before. They also visited Rome, Italy, for a couple of days during the cruise. GLENN A. RHOADS (GF'58) writes that he is happily situated in St. Petersburg, Florida, with Houston Texas Gas & Oil Corp. RICHARD BRYANT (H&AC'54) is now a Sales Engineer with Buensod Stacey, Inc., Charlotte, N. C. RUDI WANKE (MECH'58) sends greetings from Bavaria the "Southland" of Germany. Rudi is continuing his education in Germany. He has made many trips since his arrival in Germany but two of his most interesting are the one he made to Innsbruck, Austria, and the other a week end of mountain climbing in the Bavarian Alps. . . one breath-taking experience followed another. I wish I could include all of Rudi's letter. JERRY DRYDEN (E&C'58) another Remington Rand Univac employee is assigned to the scientific computer installation at McClellan Air Force Base, Calif. His training in St. Paul, even though it was very

rigorous, was very interesting and fascinating. He says the logical ability of the computer is at times almost unbelievable. He was kept very busy in St. Paul but not too busy to find a wife. He married Ruth Balken on April 25 in Minneapolis. DAVID MCKINNEY (MECH'55) is now living in Greenville, S. C., and is with J. M. Tull Metal & Supply Co. He is very anxious to organize an alumni chapter there. If you live in the Greenville-Spartanburg vicinity get in touch with Dave. HARRY ZAGGER (GF'57) sends in his annual communique—says he's been sort of busy but that he's just plain lazy. Harry is Resident Manager for Marengo Corporation in Birmingham. He would like very much to hear some news from the Gas Fuel alumni—so send it in, we'll publish it. STANLEY D. HOWELLS (IND'57) is Superintendent for McElrath-Stewart Lumber Company, Macon, Ga. Stanley has been giving some serious thought to organizing an alumni chapter in Macon. He thinks a chapter there could help in many ways—such as: talks to prospective students, look for possible job openings in that area for our current graduates and perhaps help Mr. McClure on College night at Lanier High and other high schools in that immediate vicinity. Won't you please contact Stanley and get this organization under way? MARVIN T. HEARST (E&C'57) writes for a list of alumni in the Washington, D. C., area. He states that a few STI alumni had a picnic in April and OTIS AMASON (E&C'58), JOEL WALLACE (E&C'58), DON GROVES (E&C'56), JUDSON RITCH (E&C'58) attended. CARL W. BOLDEN (H&AC'58) is still with Newport News Shipbuilding and Dry Dock Co., Newport News, Va. JOSEPH BLANKENSHIP (BC'59) has accepted a job with Beaman Engineering Company in Greensboro, N. C. Says he is enjoying his job immensely. Joe, we have two more alumni coming your way (with Beaman) this quarter. I believe that will make about six or seven now employed there. HOWARD CALLAWAY (E&C'58) with Remington Rand Univac is assigned to a computer installation at Capital Airlines in Washington, D. C. He says the airline reservation operation is really a complicated one. VICTOR ALOISIO (BC'57) who is with Aetna Insurance and Casualty Company writes that he too enjoys *The Technician*. THURSTON ANDERSON (E&C'57) writes that he is well satisfied with his position with Western Union and feels that he has an excellent future with them. He informs us that MAX DANIELS (E&C'57) and PAUL ORTIZ (E&C'57) will be going to Spain soon; HAROLD WENER (E&C'55) is now in England; ROBERT SJULSON (E&C'58) will go to Germany this month. Thurston hopes to go to Germany soon also. DON AASER (H&AC'54) writes that he is looking forward to the annual alumni banquet and thinks the Na-

val Officers' Club would be the place for it. Don, the Navy has finally deactivated the base here in Chamblee so we will have to find another location. We hope we will have twice as many to attend this year as we did last year. A note from NICK DIXON (IND'57) says to keep the newsletter and *Technician* coming. Nick is now with American Industrial Clay Co. in Sandersville, Ga. HAROLD R. LEE (BC'56) is still employed with the Engineering Division of Post Engineers at Ft. Benning, Ga. Harold writes a bit of news for the corner—he is not a single man anymore but happily married to Carol Lane of Phenix City, Alabama, on June 27 of this year. DONALD E. STOVER (E&C'56) says he really enjoys *The Alumni Corner* and hearing from old friends of days gone by at STI, since it is impossible to keep in touch with each one individually. He thinks that all of you should take time out now and then to write a note at least—he says he's guilty too (and he is). Donald is another at Vitro Labs, Inc., Eglin Air Force Base, Fla. CHARLES JACOBS (E&C'59) arrived a week earlier than Donald and they are in the same section. DON JANES (MECH'58) is now a Test Engineer with Aero Supply Manufacturing Company, Cory, Pa. Don and his wife, Daisy, had a wonderful trip recently. They went up the Welland Canal, Niagara Falls, then on to the Thousand Islands and Lake Placid, N. Y. Don is very happy in his work says it's just exactly what STI prepared him for. He feels he is gaining some very valuable experience. JULES ABRAHAM says it doesn't seem that almost two years have passed since he left Southern Tech and that he is just now getting around to writing me a letter. Jules is with Western Union, Philadelphia, Pa. but lives in Barrington, N. J. Says it is really a pleasure to live in Barrington—the neighborhood reminds him so much of Savannah and, of course that is why he enjoys it so much. J. R. RITCH (E&C'58) writes that he is enjoying his work at REA in Washington, D. C. and that they have an addition to their family, (Beverly Elaine, May 17.) A note from FRED C. McDOWELL (BC'55) lets us know that he is being discharged from the Air Force in October. He entered the Service when he graduated. Fred, come on by the placement office when you're "free" and we'll help you locate just the right job.

ANNUAL BANQUET

Complete plans for the annual banquet of the STI Alumni Association will be announced in the next issue of *The Technician*. Make your plans NOW to attend. See your October issue for final date.

Promotions Approved By Board Of Regents

Nine college professors in Georgia's University System are wearing smiles which not even the thought of approaching final examinations can erase. The nine members of the faculty at Southern Technical Institute in Chamblee, have just received notice of their promotion in rank for the coming academic year.

The Board of Regents of the University System of Georgia have approved recommended promotions of the nine as follows: Albert L. Steinkamp, from associate professor to professor; Robert C. Carter and William Hurst, from assistant professor to associate professor; Gideon Nahari, Harold R. Nurse, Edward L. Reese, and Turner M. Sullivan, from instructor to assistant professor; David E. Hamrick, from special lecturer to assistant professor; and John E. Dunn, from special lecturer to instructor.

The academic rank of professor, referred to as "full professor," is the highest teaching rank to which a college professor can usually be promoted. Steinkamp's promotion thus represents an unusual distinction. In addition to his elevation in teaching rank Steinkamp was re-

cently promoted to an administrative position, that of head of the Industrial Technology Department. L. V. Johnson, director of Southern Tech, announced that the promotions will become effective at the start of the fall quarter of this year. Southern Tech, a unit of the Engineering Extension Division of Georgia Tech, offers the Associate in Science degree in eleven technical fields.

Biographical information on the nine promoted professors is as follows: Albert L. Steinkamp, Smyrna, BS and MS, Purdue University; Robert C. Carter, Chamblee, BEE, Georgia Tech—and professional engineer in Georgia; William Hurst, Atlanta, BS, University of Alabama; Gideon Nahari, Atlanta, BAE, BIE, Georgia Tech; Harold R. Nurse, Atlanta, BA, Cornell University; Edward L. Reese, Gainesville, BS, Georgia Tech—and licensed land surveyor in Georgia; Turner M. Sullivan, Decatur, BS, BBA, University of Georgia; David E. Hamrick, Chamblee, AS, Southern Technical Institute, BEE, Georgia Tech; John E. Dunn, Chamblee, BS, Georgia Tech.

MR. J. I. ALFORD
Head of Textile Dept.

First Textile Graduates Placed

The first graduates of the department of Textile Technology received their diplomas in June. They have been placed by Mr. J. I. Alford, head of the department.

Cleveland B. Digby, who was sponsored by the Bibb Manufacturing Company at Porterdale, Georgia. He went back with them.

Ronald D. Griffin, from Anderson, South Carolina, went with Utica-Mohawk Mills, Clemson, South Carolina.

E. Andy Martin is with his sponsoring mill, The Dundee Mills at Griffin, Georgia.

Leslie H. Odom is with the John P. King Manufacturing Company, Augusta, Georgia.

Three of these young men were sponsored by the mills which they are now on training programs with.

Ronald D. Griffin was unsponsored—the only one that had to seek a job. He had several very attractive opportunities, but chose to go with Utica Mohawk Mills, a unit of the Deering-Millikan Company. It is one of the largest integrated textile companies in the world.

"There is a tremendous demand for textile technicians," said Mr. Alford.

STI Radio Club To Offer Program

The STI Radio Club joins all the other organizations in welcoming the new and returning students to Southern Tech. An interesting schedule has been planned by the Radio Club to develop an interest in electronics.

Some of the things planned are a demonstration by Motorola on the newest commercial equipment; a tour of Emory University's research department; and other activities which would interest men in radio and electronics.

W4OMC, "the voice of Southern Tech," will soon be heard on the higher frequencies, mainly the 28 MC, 21 MC, and 14 MC bands, with hopes of going higher. At the present, a transmitter on the low frequency "ham" bands, 500 watts on both AM and CW with the big transmitter, and a 50 watt transmitter, for the novice, are the pieces of equipment The Radio Club has for club use. W4OMC is also active as A4OMC on the MARS network.

Several members of The Radio Club hold commercial licenses and will be more than happy to help anyone desiring help. The Radio Club extends an invitation to anyone interested in radio to join them in his pursuit of electronic education.

Present members of The Radio Club are: Ronald E. Holmes, president; Harold Roberts, vice president; Nick Skoglund, secretary; Bennet Narmore, treasurer; Doug Horne, publicity chairman; Jack Bentley, J. H. Middelton, William Nolen, R. H. Tooke, and Eddie Moore.

Student Council To Elect Officers At Next Meeting

The last Student Council meeting of the summer quarter was held on September third. That day was slated for the election of officers for the following two quarters, but this idea had to be shelved because of a shortage of new members. Most of the meeting consisted of discussion on recommended methods for instilling new spirit and tradition.

All departments who have not elected new Student Council representatives are urged to do so as soon as possible. Remember, each department is qualified for two representatives (one Senior and one Freshman), each of which is entitled to one vote in the Student Council. The members shall be elected to serve two quarters and a point average of 2.00 or better.

Highlights of the past quarter include proposals for ratification of the constitution and stimulation of school spirit by possible wearing of "beanies" by first-quarter

freshmen and other ways to start a little tradition here at our school. The possibility of presenting a proposal for student evaluation of the instructors was also discussed.

Outgoing officers are Carl Carter, E & C, president; Pete White Industrial, vice-president; and Leon Rutland, Industrial, secretary-treasurer.

To serve on the Student Council is an honor and a privilege, and it certainly should be considered a such. All departments are urged to use great care in their choosing of representatives; elect someone who you feel will give you good representation at all meetings. Remember, too, the Student Council does not set any policies here at Southern Tech; it merely presents proposals to the Faculty-Student Activity Committee.

The first meeting of the fall quarter falls on October 1; be sure your representative is there to help elect officers.

Sandy Springs Kiwanis Given Facts As To STI

Mr. Hoyt L. McClure, Director of Southern Tech, was the guest speaker at the weekly meeting of The Sandy Springs Kiwanis Club, August 14. J. R. Taffe, past president of Southern Tech Circle K Club, introduced Mr. McClure.

Mr. McClure presented an "eye-opening" address on the job Southern Tech is doing to prepare students for most needed positions in industry in the South, as well as positions throughout the United States and foreign countries.

In his speech, Mr. McClure included an analogy of a blacksmith of former years. The blacksmith needed very little help; maybe his apprentice was all the help he used. If the blacksmith lived in our present day, he would find indus-

try quite complex. All manufactured items, from washers to huge buildings, are designed by engineers, and manufactured by skilled personnel. The technician, a graduate of Southern Tech, is the mediator between the engineer and the skilled laborer.

A technician must be qualified to take the engineer's idea from the drawing board, understand it and translate the idea into a finished product, by using the skilled laborer.

The Sandy Springs Kiwanis Club and the Southern Tech Circle K Club express their appreciation to Mr. McClure for his interest in the work of both clubs, and for his very enlightening address at Southern Tech.

Helicopter Exhibited At Southern Tech By Army

The U. S. Army and Southern Technical Institute cooperated in a demonstration of the free world's largest tandem-type helicopter on Saturday, August 22. Members of the general public interested in army aviation were invited to inspect a Shawnee-type helicopter on that date. The display opened at 1:30 p.m. on the Southern Tech campus in Chamblee.

This summer Southern Tech has been training a group of civilian supervisors from the Army Transportation Supply and Maintenance Command in St. Louis. Four of the trainees were on hand at the demonstration to explain technical features of the helicopter.

A group of 350 persons prominent in education, industry, and government attended to inspect the Shawnee (the H-21C), which was designed to carry 18 passengers. Included in the static demonstration was a tour through the helicopter with army guides available for answering questions.

Anyone wishing to see the helicopter came to the administration building of Southern Tech, adjacent to the Atlanta Naval Air Station in Chamblee.

The Army Transportation Supply and Maintenance Command cooperated with Southern Technical Institute in displaying the helicopter. This aircraft, better known as the "Shawnee," was on public exhibition at Chamblee Air Station, adjacent to the campus of Southern Tech. Aircraft enthusiasts, regardless of age, were invited to come to the Southern Tech Administration Building for a guided tour through the "chopper."

Besides the large helicopter, Army authorities displayed two propeller-driven monoplanes used for reconnaissance and liaison. A small Bell helicopter was also available for a static demonstration and public inspection.

Editor Reed

(Continued from Page 1)
gree candidate, PHT (Putting Husband Through, to the uninitiated), in the Reed household is his wife, Iona. Iona (Yeary) Reed is a native of Tulare, California and is a graduate of The University of California School of Nursing.

Tentative plans following graduation call for a Reed Construction Company in Azle or, just very possibly, Tulare.

Army Enrolled

(Continued from Page 1)
tion Supply Officer of Atlanta General Depot; Dr. A. L. Ducoffe, of the Georgia Tech Aeronautics Department; L. V. Johnson, Director of Georgia Tech's Engineering Extension Division; and H. L. McClure, Director of Southern Tech. Southern Tech is a unit of the Georgia Tech Engineering Extension Division.

The army group remained at Southern Tech until the close of the present quarter on September 11.

"In re this matter of Good Taste," said Mr. Funk to his secretary, "take a definition."
"Taste: sensations . . . excited . . . by the . . . action of the gustatory nerves . . ."
"And add this," put in Mr. Wagnalls. "Taste: the faculty of . . . appreciating the beautiful . . ."
"That," said Mr. Funk, "wraps it up. Mr. Wagnalls, will you join me in a Coca-Cola?"
"So good in taste . . ."
"And . . . in such good taste!"

SIGN OF GOOD TASTE!

ALL STARS DOWN BC—SCORE 20-6

The Southern Tech All Stars beat the league leading BC department softball team Tuesday, 20 to 6, in a game that was played in rain and on a muddy field.

The All Star sluggers proved too much for the BC team as they pounded out a total of 20 runs against BC's pitcher, Newman, and relief pitcher, Lisle. Harry Lockhart led the All Stars in hits with 5 hits in as many times at bat.

Wayne Lisles was the big stick for BC, homering in the 2nd inning with no one on base.

Wayne Peacock allowed BC 3 runs in the first three innings, and Ray Daggert who relieved Peacock in the 4th allowed only 3 more runs to BC in the remaining innings.

INTRAMURAL FOOTBALL

INTRAMURAL FOOTBALL
 Intramural Football will begin as soon as possible after the fall quarter begins. All departments planning to enter a team should sign the list as soon as the quarter begins.

VARSITY BASKETBALL

Varsity basketball practice will begin about October 12. All boys planning to go out for the team should see Coach Lockhart before that date if possible.

A schedule of 24 games is being made up at the present time. Southern Tech competes with Junior Colleges and freshmen teams in Georgia and Florida and is a

member of the Georgia Junior College Athletic Association.

INTRAMURAL SOFTBALL

The Building Construction department won the intramural softball title for the 1959 season with a perfect record of five wins and no defeats. H&AC placed second with a 3-2 record. Three teams finished in a tie for third place with records of 2 wins and 3 losses. These three teams were Civil, Army, and the faculty. Mech finished with a 1-4 record.

FINAL STANDINGS

	Won	Lost
BC	5	0
H&AC	3	2

CALENDAR 1959-1960 Fall Quarter, 1959

- September 21—Registration for "new" (beginning) and "old" (returning) students. Orientation for beginning students.
- September 22—Classes begin for returning students. Orientation continues for beginning students.
- September 23—Late registration fees apply. Classes begin for beginning students.
- September 26—Last day for registration. Last day for adding a subject to study list.
- October 24—Last day for dropping a subject from study list without penalty.
- October 31—End of deficiency report period.
- *November 26-November 29—Thanksgiving recess.
- December 19—End of term.
- *December 20-January 3—Christmas recess.

STI Bookstore Offers Textbooks And Supplies

The Southern Tech Bookstore, located on the first floor of the Administration Building, is operated by the Georgia Tech College Inn, a unit of Georgia Tech, and is maintained by Tech to give the students a convenient place to buy their books and supplies.

During the first week of school, the store operates as two units. One room is open for the sale of books only, and another room for the sale of supplies only. After the first week of school both books and supplies are sold through the supply store.

In addition to selling all of the textbooks and supplies that a student will need in his schoolwork, the STI store sells sundries, such as cigarettes, candy, toilet articles, STI jewelry, and reference books.

During the last two weeks of each quarter the students can either sell their used textbooks to the bookstore or they can leave the used books with the bookstore to be placed on the shelves for sale at any price that the student wants for the books. In the latter case, the student remains the owner of the books.

The STI store will be open from 8:00 a.m. until 4:30 p.m., and the clerks will be glad to help the students find their books, and supplies.

A man stands on a bridge and drops a pebble into the river below. He hears a splash in 86 seconds. Approximately how high is the bridge from the river?

General Information For Students

Daily Schedule-

Every school day begins at 8 a.m. and lasts until 5 p.m. unless some special scholastic obligation carries beyond that hour. You are, however, required to be in school and at class only when the particular subjects you are carrying are scheduled. Other periods are considered "off" or "free," and you may study or do whatever you feel will be the most profitable to you. The day's schedule, other than Thursday's, goes like this —

1st Period 8 a.m. to 8:50	6th Period 1:10 to 2:00
2nd Period 9 a.m. to 9:50	7th Period 2:10 to 3:00
3rd Period 10 a.m. to 10:50	8th Period 3:10 to 4:00
4th Period 11 a.m. to 11:50	9th Period 4:10 to 5:00
5th Period 12:00 to 12:50	

It should be helpful to know that all theory-lecture classes are 50 minutes net in length; whereas all practical-shop-lab sessions are three hours in length.

Thursday's Schedule And Club Hour

Because of the Club Hour, from 12:45 until 1:20 on Thursdays, at which time campus organizations and activities meet, a special schedule is operative on all Thursdays. You should observe carefully and become accustomed to the following special schedule.

Thursday Club Day Schedule

1st Period 8:00 to 8:45	Club Period 12:35 to 1:20
2nd Period 8:55 to 9:40	6th Period 1:30 to 2:15
3rd Period 9:45 to 10:35	7th Period 2:25 to 3:10
4th Period 10:45 to 11:30	8th Period 3:20 to 4:05
5th Period 11:40 to 12:25	9th Period 4:15 to 5:00

Cafeteria And Meals

The school cafeteria and the money you pay for board provide for you three meals per day, six days per week — Monday through Saturday. These are served according to a rigid schedule; and your obligation is to be on time for them and thereby avoid forfeitures and any unpleasantness which might result from being late. Since meal hours do vary slightly the safe procedure is to check the bulletin board in the dining hall and watch the "Weekly Bulletin" for the schedule prevailing in a specific quarter.

The dining hall is not allowed to extend credit; therefore, all cafeteria meals must be paid for by cash or meal tickets. Dormitory students are given a reasonable time by which they are required to obtain meal tickets and put them in use.

Meal tickets cannot be used in the Snack Bar.

Weekly Bulletin

Though the Weekly Bulletin is less permanent in nature than other school communications, it is no less important in the affairs of the student. Frequently the Bulletin is used to reach directly and more immediately students whose affairs are irregular or have been disrupted. The Bulletin should be read thoroughly for general announcements and for individual notices.

The Technician

The Technician is the school's monthly student newspaper and carries in every issue essential information pertinent to your conduct and welfare. Read The Technician for fun and enjoyment surely, but do not overlook the valuable information it contains. Anyone interested in the promotion of The Technician should contact the editor or Technician office.

Student Council

The Student Council is composed of two representatives from each department — one a senior and one a freshman — elected by the department they represent, and two representatives from the dormitory, elected by the dormitory students. Each representative is elected for a term of two quarters. To be eligible to serve on the Council, a student must have an overall point average of 2.00 and must not have any permanent offenses.

Neighborhood Churches

Very few people of intelligence, character, and genuine concern for society's destiny deny the power of the Church in the lives of our people today; and the large majority contend that its influence and activities should be intensified and extended. Southern Tech holds to this view and favors every measure which will help to draw more of its students into the Church and hold the ones in it who are already there.

Feeling that most Southern Tech students desire to continue their church activities while in school here, editors of The Green Hornet provide a list of churches of all denominations in the Chamblee-Brookhaven-Doraville area. These churches invite you to join them and participate in their social, educational, and religious programs. A warm

Departmental Clubs

Employers are constantly seeking graduates with well-rounded personalities and the ability to get along well with other people. While you are at Southern Tech, you will have the opportunity of developing your personality and forming valuable friendships by participating in departmental and campus-wide extracurricular activities.

Each department has a club whose membership is limited to the students in the department. You may learn the details of your department club by contacting a member of the club or by attending a meeting.

ALPHA BETA—for members of the Building Construction Department.

SIGMA CHI TAU—for students of Civil Technology.

EPSILON PI CHI—for the Electrical and Electronics and Communications Departments.

GAMMA PHI KAPPA—for those who are studying Gas Fuel.

HEATING & AIR CONDITIONING CLUB — for the Heating and Air Conditioning Department.

IOTA TAU — for students of Industrial Technology.

ALPHA MU SIGMA — for members of the Mechanical Department.

BIRTHS

(Continued from Page 4)

Company. DONALD McCORD (BC '56) now has a son, Michael, born in July '58. Donald is Assistant Construction Superintendent for the John W. Ahern Construction Company, Savannah, Georgia. JOSEPH W. RETTIE (IND'51) has about a nine months old daughter, Lee Ann. Joe is still with Lockheed as a Manufacturing Engineer. CHARLES A. LUKE (GF'55) has a new daughter, Camellia Anne, born February 28 of this year. Charles is a student at the University of Colorado. CAROL RUSHING (IND'57) has a daughter who was born December 11, 1958—Susan Blair.

Carol is a Plant Chemist-trainee for Certain-teed Products Company, Savannah, Georgia. CHARLES F. LOWERY (MECH'57) announces the birth of his son, Charles Wayne, who arrived March 11, 1959. Charles is an Engineer with Liberty Bell Manufacturing Co., Swainsboro, Georgia.

Do You Think for Yourself?

(SHARPEN YOUR WITS ON THIS!*)

If you saw a girl in a bathing suit on a ski slope, would you say, (A) "What—no skis?" or (B) "Cold?" or (C) "The pool closed three months ago," or (D) "Stay right here—I'll get the guard!"

A B C D

Do you think the statement "It's always darkest before the dawn" is (A) an astronomical truism? (B) a good reason for getting home early? (C) a piece of hopeful philosophy? (D) an argument for night watchmen?

A B C D

Do you think that a man who can pole-vault 16 feet but doesn't like to, should (A) go out and do it anyway? (B) keep the whole thing to himself? (C) do a bit of self-analysis on why he doesn't like to go so high? (D) have the bar set lower?

A B C D

When you choose a filter cigarette, do you (A) ask all your friends, and take their word for what's best? (B) take the one that makes the loudest claim? (C) investigate the facts, then use your own judgment? (D) go for the filter that gives you taste plus filtering?

A B C D

It's a wise smoker who depends on his own judgment, not opinions of others, in his choice of cigarettes. That is why men and women who think for themselves usually

smoke VICEROY. They know only VICEROY has a *thinking man's filter*—the filter with more research behind it than any other . . . the filter that changed America's smoking habits. And only VICEROY has a *smoking man's taste*.

*If you have checked (D) in three out of four questions, you're pretty sharp . . . but if you picked (C)—man, you think for yourself!

The Man Who Thinks for Himself Knows — ONLY VICEROY HAS A THINKING MAN'S FILTER . . . A SMOKING MAN'S TASTE!

Circle K Club

(Continued from Page 1)

tional defense, and the opportunity each American and Canadian has in the defense of our countries as civilians or servicemen.

ERVIN GIVES REPORT

Gerald L. Ervin reports, "I was most fortunate to attend this International Circle K Convention. My attendance would not have been possible if it had not been for the generosity and interest of The Sandy Springs Kiwanis Club, sponsors of Southern Tech's Circle K Club. With deep regrets, my friend and former fellow delegate, Randy Taffe, did not attend the convention with me.

"As a delegate, I had the opportunity to learn many facts about the functions of Circle K and Kiwanis Clubs. Facts concerning the real meaning of being a Kiwanian, how the national organization of the Circle K Club functions, and the services each club can do for its school and community were exemplified at The Fourth International Convention of The Circle K Club.

"This convention presented many opportunities to tell about Southern Tech. There were many inquiries concerning the location and the type of school of Southern Tech, and the roll Southern Tech's graduates fulfill in industry. It was evident that many people did not know the function of a technical school, but were quite surprised and pleased to know that Southern Tech is presenting this type of program needed in the South. Many delegates and visiting dignitaries expressed the need of similar schools in their section of our country."
