

# THE ENGINEERING TECHNICIAN

Vol. XVI

Southern Technical Institute, Marietta, Georgia, February 20, 1964

No. 5

## Editor's Comments

By Lewis A. Edge, Jr.

If you have followed the progress of this paper from the preceding years to this one, you have probably noticed that there have been many changes. Your newspaper has a new masthead . . . one that doesn't imply that we are some kind of trade school . . . and it has a new editor-in-chief . . . one who believes the paper shouldn't be a faculty journal.

In the last few issues, most of the effort has been concentrated toward making this a student publication, which can become the voice of the STI student body.

Students are now writing most of the editorials and feature columns which fill the space formerly occupied by the work of faculty members. The editor's job has become an active, rather than a passive position . . . a position of authority and responsibility.

Several humorous articles have replaced the serious columns of print which have appeared in previous issues, and more such articles are to come.

Now that I am taking over the job of Editor-in-Chief of this newspaper, I would like to express my appreciation to our former Editor-in-Chief, Dennis Weaver, and to our relatively new faculty advisor, Mr. Ted McClure, who initiated, and worked hard to maintain the change this newspaper has undergone.

They pioneered the trend (which I plan to continue) toward publishing a newspaper the students want to read.

More students on the newspaper staff will fill the newspaper with material more like what the students want. This newspaper should be a collective effort of all concerned, with each staff member sharing the work and the rewards of his efforts equally so that the full responsibility of publication does not fall into the hands of one student or faculty member as it has in the past. This is the only way the newspaper can maintain the student viewpoint.

I would appreciate your telling me what you think of the paper . . . constructive criticisms, especially, will be welcomed. Give any of our staff members news in which you think the students will be interested. Join our staff if you think you might enjoy newspaper work. Experience is not necessary. We need more writers, proofreaders, cartoonists, and reporters. You need a newspaper that represents you, the students.

Let's get together and work together toward publishing a student newspaper that is on time and is interesting.

### CAMPUS-WIDE FRATERNITIES

Why not allow all of the social fraternities at Southern Tech to be campus-wide?

The Technician staff and I took a survey of 13 percent of the students and faculty members and we discovered the following:

FAVORING CAMPUS-WIDE FRATERNITIES		
Faculty	Fraternity members	Non Fraternity members
13	76	25
OPPOSING CAMPUS-WIDE FRATERNITIES		
Faculty	Fraternity members	Non Fraternity members
0	8	7

Assuming that this poll could be projected over the entire faculty and student body with accuracy, 87.7 percent of the students or about 877 students and faculty members would favor this change. This should indicate to the administration that some kind of action needed. I had several students tell me, during the survey, that they were not pursuing the same course of study that most of their friends at STI were, and that they didn't understand why their course of study should dictate which social fraternity they pledged. I don't understand this either! Take, for example, a student in the Mechanical Department who would like to pledge a social fraternity. He has the choice of pledging his departmental fraternity or none at all, even though his interest may be in another fraternity on campus. There are many men on campus in this unnecessary dilemma.

The healthy competition between campus-wide fraternities during the pledge period would bring the student and fraternities closer together. The fraternities would be better because of greater choice of pledges and the student fraternity members would improve because they were able to pick with whom they would like to associate, rather than having no choice of anything except whether or not they want to pledge their respective departmental groups. A larger portion of the students would join fraternities and the larger memberships of the fraternities would enable dues to be reduced or activities to be increased.

The only people who I think are against this proposal are those who are against the expansion of social fraternities, or students who want someone in our administration to make up their minds for them.

To me, our present situation is like an election where there is only one candidate . . . and you either vote for him or you don't vote at all.

### STAFF MEMBER THREATENED

One of our staff members was threatened physically about an editorial that appeared in the last issue of the Technician. Physical threats against me or any of the staff are childish and futile. It wouldn't be fair to any of our readers to allow ourselves to be coerced into not printing facts of interest to the students.

I don't expect everyone to agree with all of my editorials and it is, for this reason, a letters-to-the-editor column is provided.

The proper way to disagree with this paper editorially is to write a letter to the editor and give it to any of our staff members or to me personally, or slide it under the door of room 265. The letters must be signed, but names will be withheld on request. You may find it interesting to read opinions opposing mine on the fraternity issue in the letters-to-the-editor column of this issue.

## Health Department Inspects Snack Bar

February 11, at the request of the Technician, Mr. C. F. Costigan, Public Health Sanitarian for the Cobb County Health Department, inspected the Southern Tech Snack Bar to determine whether or not all of the county's sanitary regulations were being observed.

According to Mr. Costigan, the walls and ceilings were dirty and the equipment needed a thorough cleaning. Mr. Costigan also pointed out, that the refrigeration in the pie and salad cabinets was inadequate in that the temperature was above what is considered by the Health Department to be sufficient for proper preservation of the food contained in them.

The Southern Tech Snack Bar has been operating without a food handling permit and did not qualify for one during the inspection February 11. The overall score for the inspection of the Snack Bar was 88 percent out the 100 percent score required for a food handling permit.

Further investigation by the Technician revealed that, at the time of inspection, eight of the Snack Bar employees did not have up-to-date health cards and that three of those eight had never registered with the Cobb County Health Department.

Mr. Costigan stated that despite the lack of cleanliness of the walls and ceilings and of the equipment, the dishwasher was in excellent condition and was operating exactly as is recommended by the Health Department. He also says that there is nothing seriously wrong that a thorough cleaning will not correct and that he will return to the Snack Bar in about two weeks to see if his recommendations have been carried out.

Several students had expressed to the Technician staff members that they had some doubt about the sanitary conditions of the Snack Bar and these comments triggered the investigation. (For editorial comments on this subject, see page 2.)

Miss STI Miss Ginger Ray 1st Runner-up Miss Paulette Brand 2nd Runner-up Miss Kathryn Anderson

## Petite Brunette Wins Miss STI Crown

Nineteen-year-old Miss Ginger Ray, representing the Epsilon Pi Chi fraternity, won the crown of Miss Southern Tech of 1964 at the annual Valentine Dance on February 8. The Alpha Beta Sigma-sponsored dance was held at the Atlanta Municipal Auditorium Sky Room.

Miss Ray was selected from a field of ten contestants, all representing various campus organizations. Judges for the contest chose the new Miss STI on the basis of a combination of beauty, personality, and poise.

Miss Ray, the daughter of Mr. and Mrs. Robert Ray of Palmetto, was escorted to the dance by Steve Dean, freshman in the EET Department.

The new Miss STI replaces Mrs. Donna Crowder, who relinquished her official duties as Miss STI of 1963 by placing the crown on the

new queen. Professor Harry Smith, master of ceremonies at the dance, presented Miss Ray with a spray of roses from Alpha Beta Sigma.

A graduate of Campbell High School in 1962, Miss STI works in the office of Southern Bell Telephone Company in Atlanta.

Miss Paulette Brand, 21, was given the honor of 1st runner-up in the contest. She was sponsored by the Technician and Technician's Log. She was presented with a loving cup by the master ceremonies, Miss Brand, from Smyrna, was escorted by W. D. Koempel, senior in the EET Department. She is employed by the Lockheed Corporation.

Alpha Beta Sigma's candidate for Miss STI contest was Miss Kathryn Anderson; she was awarded the 2nd runner-up position. She was escorted by Robert Dixon.

Other fraternity candidates were as follows:

Alpha Mu Sigma . . . Miss Carol Watkins, 19, escorted by Chaffin Wesley.

Circle K . . . Miss Barbara Leatherwood, 19, escorted by Benny Brooks.

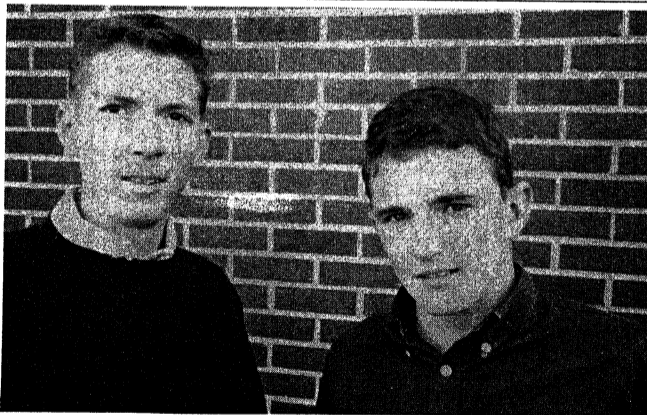

Gamma Phi Kappa . . . Miss Lola Caldwell, 25, escorted by Charles Lee.

Iota Tau . . . Miss Leah Howle, 16, escorted by Jerry Hammock.

Sigma Chi Tau . . . Miss Brenda McDonald, 18, escorted by Sammy Lord.

Tau Epsilon Sigma . . . Miss Sharon Kelley, 19, escorted by Bruce Schoonover.

Sigma Delta Phi . . . Miss Barbara King, 18, escorted by Randall Bradford.

W. D. Koempel — Senior President Woody Jones — Freshman President

## Students Elect New Class Officers

W. D. Koempel was elected president of the Senior Class by a narrow margin in the run-off election on Thursday, February 13. Koempel defeated Mike Samples for the second time in class elections. A year ago, in another run-off contest, Koempel defeated Samples for the presidency of the Freshman Class.

Serving with the new president will be Terry McDaniel, who did not have to go through the strain of a second election. He was elected

on the first balloting on February 6.

Koempel is well known for his campus activities. These include the positions of Editor-in-Chief of the Technician's Log, president of Epsilon Pi Chi, and news editor of the Technician. He states that during his term in office he will work for an active student council, campus-wide fraternities, and improvements in campus spirit. His home is in Tampa, Florida.

Winning the presidency of the

the Freshman class was Woody Jones of Smyrna, Georgia. Jones is a second quarter student in the Civil Department and is a member of Sigma Chi Tau and the Student Council. He says that he would like to see school spirit brought to a higher level and that he is going to make himself available to all of the students and club representatives.

Philip Eric Altman from Tavares, Florida will serve with Jones as Vice-President of the Freshman Class. Altman is a member of the Boosters Club and was elected social chairman of Alpha Beta Sigma.

## Staff Comments

### HEALTH DEPARTMENT ASSURES STUDENTS

The Cobb County Health Department gave the *Technician* a tremendous amount of cooperation in the investigation of the Southern Tech Snack Bar's sanitary conditions and we of the *Technician* staff would like to thank Mr. Costigan and all of the other people who are connected with the Health Department. They were of material service to us and to you the students in assuring us that proper food handling practices will be observed at Southern Tech.

### NEW SNACK BAR MANAGER NOT TO BLAME

Your editor spoke with Mr. C. H. Davenport, the Snack Bar's manager, and he assures us that he is doing everything within his power to correct the conditions that caused the investigation. It should be mentioned that Mr. Davenport had just taken over the manager's job the day before the inspection and was not responsible for the conditions which existed. Mr. Davenport was what might be termed, "a victim of circumstances," and we of the *Technician* staff would like to assure him that we support any programs, that he initiates, towards cleaning up the Snack Bar.

### PUT MISS STI IN THE LIMELIGHT

Now that the Miss STI contest is over and the winner selected, we think that it's time for the STI students to consider whether or not they are going to sit around another year and let a lot of good publicity for Southern Tech go to waste. We suggest that the students here show more interest and support for their new representative than they have in the past. In previous years the responsibility of Miss STI was given to the administration and faculty. What functions should she take part in—the county fair, radio programs, campus events—all were left up to these people. Miss STI represents you—the students—and she's your responsibility.

Students should ask her to every campus event that occurs; they should escort her when she is on campus.

They should invite her to every Southern Tech event—athletic events, dances, parties . . . the whole works! A few strings could be pulled and she even could be invited to community gatherings—and always as an STI representative. In short, let's put the new Miss Southern Tech in the limelight every chance that we get.

### COFFEE, COFFEE, EVERYWHERE AND NOT A DROP WORTH A . . .

We notice that the coffee is still lousy and still a dime.

### THANKS TO MR. SPAETH

The creator of the new masthead and the regular cartoon artist for your paper is Mr. Bill Spaeth. It is not an effort at all to say that these creations of his have been well done. Anyone who draws knows that these things are not produced in a minute or two: many hours of exacting work are required. For these hours and for his interest in pleasing students, the staff says thanks.

## High School Letters Are For Kids—Not College Men

When a high school kid becomes a college man, he should put away childish things. This campus looks like a high school football convention between classes when many students here appear on the walkways and streets wearing their high school letters on jackets and sweaters. As far as we know, most high schools don't tolerate such a conglomeration of letters and most colleges we can think of have some kind of ruling that forbids the wearing of high school and other college letters on their campuses. Whether or not we make such a rule, we as individuals should show more respect for the *Southern Tech* letters than to degrade them with sweater and jacket letters that belong back in their own high schools.

## Letters To The Editor

Ed. Note—Letters to the editor are welcomed. All letters must be signed, but names will be withheld on request. Deposit them in Box 8073 or leave them at room 265.

Dear Editor:

I adopt as my opinion that if the possible 22 campus organizations were to open their doors to any enrolled student of STI, I would not investigate more than three.

In our catalogue these organizations exist at Southern Tech for the purpose of providing fellowship, fun and opportunities for training in leadership, social and personal development. They also provide for participation in creative projects.

So far I have heard several students talk about club parties and I have been to one pre-acquaintance party where alcoholic beverages were acceptable. Several of the old members and future members were drunk. So if these are the methods they use to teach leadership, fellowship, fun and creative projects. I do not want any part of it.

I want to say one more thing; over half of the members at STI claim to be Christians but I shall say that half of them don't go to any church. This would be a good creative project for some fraternity or department club. This would also increase the school spirit.

I'm not going to apologize for the previous statements because these are the impressions the club gives me.

Name withheld

Editor,

In the American College Dictionary a library is defined as a room, group of rooms, or building in which books are kept for reading, studying, or reference. Out of three dictionaries, not one of them defined a library as a place to hash over yesterday's basketball game, last period's physics quiz, or who had the fastest time at the drag strip last weekend. A library, especially one such as ours, is meant to be used for studying and I, for one, find it rather difficult to study when there is an excessive amount of noise and distraction around.

Anyone who wishes to talk or "shoot the bull" can find plenty of room in the snack bar or in Room 273. There they can talk as long as they can find anyone who will listen to them.

Most students come to the library to study. It is a small minority of students who cause the objectionable noise. This problem has been growing and something should be done about it now!

Steve Boswell

Editor:

I think you're trying to turn the *Technician* into a scandal sheet.

Concerned reactionary

Editor:

Your editorials are so long there isn't any room for the news. What happened to the Alumni Column? You ruined the best part of the paper.

Mrs. A. Lemmons

Editor:

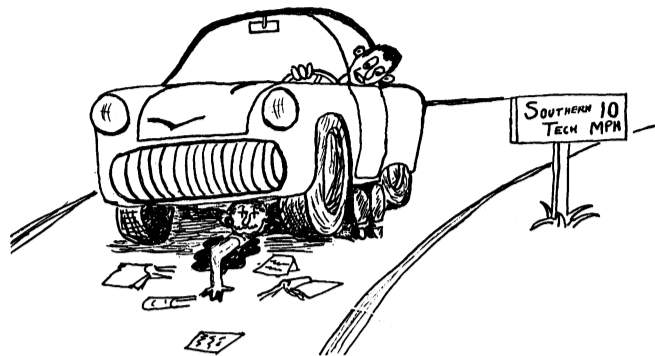

Whar did u git the idear that we coulident spel rite on our pousters. I make moste of em myself an their all korect.

Frat. Publicity Chairman

Editor:

Your newspaper is too conservative. Why not give the administration a verbal blasting?

Advocate of Action

Oh! Excuse Me . . .

## Don't Come In The Back Way

by a. d. monishment

When I first visited this institution many years ago, with plans of pursuing one of the courses of study here, I accidentally became confused in Atlanta traffic and instead of getting to Marietta via the four-lane as I was instructed in the STI brochure, I arrived from the rear and saw the dorms.

When I mentioned to our registrar during the interview, how awful the dorms looked on the outside, he laughed a fiendish laugh and told me that they were "nice" on the inside. I had read in the catalog where it said "how nice the dorms are" and after being taken on a guided tour of the campus to see all the nice new buildings and much of the impressive laboratory equipment in the various departments, I just knew the dorms couldn't be as bad as they looked from the outside.

When I asked to see the inside of the dorms, the registrar made some special hand signals to an instructor accompanying us, and the instructor jumped in his Riveria and drove off.

The registrar smiled at me . . . honest, he did smile . . . and we drove off to see the dorms. The instructor who had left us earlier, greeted us at the door of one of the apartments and invited us in.

"This is a typical apartment," he said, treading across the carpeted floor and seating himself on a long plush sofa. "I think you'll enjoy it here".

Needless to say, I was impressed. He showed me the Hi-Fi, Television, my own private bedroom and tile bath, air conditioning, and a new electric stove and refrigerator before we went into the den to sit down.

"All this for \$70 a quarter?" I said.

"I don't know how its done," the registrar said.

"All this time," I said, "I thought these were as rotten on the inside as they look from the outside."

"Weren't you fooled," said the registrar as he laughed another fiendish laugh.

"Yes, I guess I was," I said.

I took the four-lane route going back because I couldn't wait to tell my mother and father what a nice place I'd have to stay in.

On registration day I drove back up here, paid my \$70 plus a \$25 deposit on the Hi-Fi, and went to get situated.

The same instructor invited me into the same apartment I had seen before, and gave me a key and a number.

I tripped down the little hill to my place, and when I opened the door, I was horrified. Someone had pulled up my carpet, along with pieces of the concrete, leaving scars all over the floor.

The TV and Hi-Fi were gone, and four people were already in my own private bedroom. The tiles were all gone out of the bathroom floor, and the electric stove had a flame.

Through a hole in the wall I could see four more people were trying to sleep in the den, and I was sure there was some mistake. When confronted, the instructor told me that the eight people in the apartment were my servants and that they would replace the stolen carpet and TV set and Hi-Fi and bathroom tiles for me just as soon as a new shipment came in.

For some reason, I don't think they are my servants because they won't do what I say, and they never clean up, and they never did get my carpet and my bathroom tiles and the TV and the Hi-Fi set back.

One of these days I'm going to complain about the service here . . . Maybe I'll get my \$25 deposit back anyway.

## The Creative Writer's Tale

A long time ago in the kingdom of Nod

There lived a younge man who worshiped no god.

He had a goode wife and three little brats

And all lived together as wretched as rats.

The man was knowne as a great sharpe-shooter

But he hunted wilde game on a motor scooter—

A terrible thing . . . So un-Hemingway!

When people do that, it's a black black day!

But the worst thing he did,—under the sun—

Was shoot a goldfishe with a B.B. Gun.

Ah, such truths! . . . here for the gleaming!

Ah, such deep and wonderous meaning! . . .

## You've Got Me Outnumbered, But I Think I Can Make It

by Lucia Nelson, Coed EET

A few years ago on a visit next door, I was asked by my neighbor to catch hold of "that gadget" on his garden tractor to see if it was going to run when he cranked it (yep, I grabbed the spark plug). A couple of years later at camp I stood on wet ground, barefooted, attempting to connect two wires to a shortwave radio for an antenna which appeared only to be attached to the metal louver on top of the cabin (these turned out to be "hot", 110-volt street lamp wires that fired up in my hands when I touched them together). Other incidents such as these have prompted me to study electronics as a measure of self-preservation. And I enjoy tinkering with electrical apparatus. Weird? Maybe, but what the heck?

To be honest, I didn't know that I'd wind up being the only female student forlornly roaming the Southern Tech campus.

Registration was one heck of an experience, especially when I had to go through the draft procedure. (So far I've not received a notice from Uncle Sam.) That day several persons, thinking I'd obviously gotten lost, directed me to the University rooms.

The first day of classes, too, was fascinating. One of my professors came into the class, announced the name of the course, and added "of Southern Technical Institute." There was a pause, and everyone looked around waiting for me to get up and leave. Two other professors called the roll by calling me "Mr. Nelson." In my public speaking class we were to give impromptu speeches, and as I stood before the class the professor announced my topic was to be "The Draft." Did I feel panicky? By then, I was unsure as to whether to stick it out at Southern Tech or not.

A few students, however, indicated that they didn't mind my being here by offering to let me come cook for them, do their homework, get them dates, etc. Thrill!

Yes, there have been times when I would have liked to shed my fe-

male composure and "belt" a few people. For example, in one class, this gentleman who sat behind me blithely pinned a sign on my back. It's best that I don't elaborate on how it read. Other jokes like this have caused my face to be red more than once . . . Guess I'll get used to this type of thing—as well as being called Lucius and Sam once in a while.

Seriously, you "guys" are great, and my only regret is that there aren't more girls interested in technical study at Southern Tech. My plans are to stick with it if I can survive the courses, jokes, and your choice of vernacular.

## ETTX Tours Honeywell

Epsilon Pi Chi sponsored a tour of the Honeywell electronic data processing center in Atlanta, February 3. Mr. Larry Matthews, field service representative for the Atlanta area, hosted the Honeywell-800 demonstration.

Matthews, a 1959 graduate of Southern Tech and a former Epsilon Pi Chi member, opened the invitation for all students interested in seeing the Honeywell-800 data processing system in action.

A demonstration illustrating the capabilities of the Honeywell-800 showed to the group the speed and accuracy of data processing systems by Honeywell. The Honeywell-800 is able to return the requested information in a time lapse of six microseconds.

The tour of the Honeywell center served as a prelude to the representative to be sent by Honeywell to interview March graduates interested in data processor systems.

## Ham Club Visits FCC Station

The Southern Tech Amateur Radio Club toured the FCC monitoring station at Powder Springs, February 12.

Mr. Jack J. Aaron of the FCC conducted the tour, which included demonstrations of the measuring techniques employed to locate stations and to determine if they are operating according to regulations.

## Toastmasters

By Patrick D. Kehoe

Toastmasters is an organization that helps its members achieve social poise and the ability to think on their feet. Its purpose is to help a person improve his speech and talk before a group.

The night's program is composed like this: The meeting begins at seven o'clock and the toastmaster of the evening is introduced. His role is to keep the meeting alive. The toastmaster will then introduce the table topics chairman who gives members of the club topics on which they must speak for two minutes. These topics are completely unrehearsed and unprepared and can be anything from the quite serious to utter nonsense.

When table topics are complete, there is a ten minute break followed by the two featured speakers of the evening. After the speakers have finished their discussions club business is discussed and the meeting is adjourned.

**Editor's note:** This space is available to campus-wide organizations so they may explain their programs and the purpose behind them. If you would like for the STI students to be better acquainted with the functions of your club, submit an article to the editor (Box 8073) or drop it by Room 265.

## Get Your Girl On A Mean Motorcycle

by B. O. Crevice

Are you fed up with the parking situation? Do you have to walk all the way from Lower Slobovia on cold mornings in order to get to class? Is there nothing in your wallet anymore except traffic fine receipts? **The Daily Toreador**, college newspaper for Texas Technological College in Lubbock, Texas, advocates that college students get motorcycles to solve these problems.

This is the latest bit of madness to come from those European countries who have people who drive worse than Atlantans on Peachtree Street. Actually there are advantages other than the parking! If you want the acceleration of an XKE or the economy of a Volkswagen, then the motorcycle is the thing for you! Southern Tech even has hooks for hanging up your helmets and goggles. You could always wear the goggles in class anyway: some of the instructors do already. Girls always clamor to ride on motorcycles: the only problem that you'll have is finding the girls in the first place.

To treat this subject with justice though, one is forced to point out the distinct disadvantages. The leather jacket will, of course, arouse the suspicious of the local agents of the law, but as long as you keep the zip-gun taped under the seat and not in the zipper pockets, you can get away with it. There is always the problem of stopping in a hurry too. One student was riding up the 4-lane, trying to get his drawing assignment ready for class, when he hit a hole in the road. When he woke up, he was in Nashville and in the back of a trailer. The whole affair wouldn't have been so bad if the horse in the trailer hadn't stepped through his spokes. The student got an unexcused absence too.

Another student was whirring around in downtown Atlanta when the motorcycle went into a manhole . . . He came up in Decatur six days later . . . and it took him three days to get back to the campus. He got an excused absence, so you figure that one out.

But one does not have to be the madman of the 4-lane, slosh around in the sewers, or be Steve McQueen to enjoy a motorcycle. Someone is even coming out with a repellent for road dust: it should be in the STI Bookstore any day now.

## Tau Alpha Pi Candidates

Tau Alpha Pi, honorary fraternity, has released the names of students eligible to pledge. The requirements are that a student must have been on the dean's list two consecutive quarters, have maintained at least a 3.0 overall average, have never failed a subject, and have no permanent offenses on record.

The following have met these requirements:

Brannon, William L.	Jones, Bennie W.
Brown, Roy T.	Judkins, Terry L.
Buice, John M.	Koempel, William D.
Calhoun, John W.	McDaniel, Terry O.
Carr, Ronald I.	Meeks, James D.
Corbitt, Raymond W.	Roach, Patrick W.
Hinton, Robert D.	Smolik, Vincent E.
Holley, Donald K.	Soloman, Arlyn C.
Gloer, Orian T.	Spruell, James A.
Field, Walter C.	Weaver, Dennis
	Temples, John T.

## Feature Column

### What's New and Worthwhile

#### MOVIES

**Dr. Strangelove, Or: How I Learned to Stop Worrying and Love the Bomb.** A brilliant satire about nuclear war; in fact one of the best comedies in years. The story is based on Peter George's novel *Red Alert*, and features Sterling Hayden, George Scott, Keenan Wynn, and Peter Sellers in a triple role: President of the U.S., assistant to an air force general, and Dr. Strangelove, a former German scientist employed by the U.S.

**Point of Order** is a documentary movie based on the television coverage of the Army-McCarthy hearings. The theme of the story is the undoing of Senator Joe McCarthy in his latter years.

**Dead Ringer.** If you happen to be a Bette Davis fan from way back, this movie will have genuine appeal, for the old gal plays a dual role. But since they happen to be identical-twin sisters, this requires no special make-up staff. It does pose some problems for the cameraman, however, when they appear in scenes together. This doesn't last long—only until one Bette kills the other Bette. But wait. This is getting ahead of the story. At one time Edie and Maggie (the twins) had been in love with the same man. Maggie finally won out, leaving Edie with the feeling that all was lost, especially since the man was quite wealthy. After hubby dies, and Maggie is left with all that dough, Edie comes up with a clever scheme. After putting a bullet in Maggie's head, she dresses the corpse in her (Edie's) clothes, and plants the gun in her hand. She then assumes the role of Maggie, and falls heir to her fortune and her fate.

#### BEST BOOKS

**The Wapshot Scandal,** by John Cheever is a sequel to *The Wapshot Chronicle*. This novel moves the Wapshot family into the 20th century with a combination of comical and tragical results.

**The Spy Who Came In From the Cold,** by John le Carre. Excitement galore fills this story of international spying in the cold war.

**James Forrester,** by Arnold A. Rogow. The career of this uncommon man is both fascinating and bizarre. The author attempts to find the answers to explain why such a brilliant career should have come to such a tragic end.

### Math Problem Too Tough

#### THIS MONTH'S EASY PROBLEM

Tom, Bill, Jack, and John went to the parking lot in a daze, after finishing one of Professor Carter's quizzes. When they arrived in the parking lot, they found they all had 1959 Impalas, the only Impalas in the street. One car was black, one was red, one was white, and one was green.

Tom, Bill, and Jack figured out which car belonged to whom. Can you?

Not one of the boys could remember which car was his. Tom knew his car was either green

or red. Bill knew his car was either green or white, and that Tom's car was either green or black. But John was so dazed he could not think.

Last month's problem was not answered. The correct answer was 21. Mail answers to box 8028 or bring them to Room 265.

### Jordan Leads In Scoring

By Steve Dean

Robert Jordan, playing in his first season with the Southern Tech basketball team, has become one of the top Georgia junior college scorers. In fact, during the past three weeks Jordan has headed the list of top junior college scorers in average points per game.

Jordan's average this season, after 18 games, is 22.3 points per game. A bad game, scoring-wise, against Young Harris last week might cost Jordan the lead in the junior college circle this week. In addition to this, he is nursing a bad ankle, which, according to Coach Lockhart, may not be ready for action before tournament time, the last of this month.

But if the season were to stop now, Jordan would have broken one long-standing record at Southern Tech—the individual game scoring record of 40 points set January 4 against Augusta College. He has scored 401 points this season and needs 163 more to break the season scoring record.

Jordan came to the Green Hornets from Cherokee High School in Canton, Georgia, where he played four years of basketball. During his junior year, he averaged 14.8 points per game; he increased this average in his senior year to 18.7 points per game.

Needless to say, Coach Lockhart is looking forward to Jordan's senior year at STI, when even more spectacular playing is expected from him.

### Industrial Dept. Leads Intramural

The first half of the intramural basketball season has ended with the Industrial Department in the lead. If they hold this lead for the next five games, which constitute the second half, they will become the STI Champions. The Building Construction Department has a fair chance to beat the Industrial Department out of the first place slot in the second half. If this happens, according to Coach Lockhart, play-offs will be played on a date to be announced later.

The standings at the end of the first half are

Department	W	L
Industrial	5	0
Building Construction	4	1
Civil	3	2
Textile	2	3
Mechanical	1	4
Geeches	0	5

### Bowling Teams Play Thursday

Half way through the season the bowling league standings reveal a very close race. Prior to the games bowled on February 20, team two had the edge over team six and the overall standings were as follows:

Team	W	L
2	19	5
6	15	9
1	14½	9½
8	14	10
3	10½	13½
7	9	15
5	8	16
4	7	17

The bowling league is well represented in all departments of Southern Tech. Each quarter a new league is opened to any student interested in participating.

Team members for this quarter are as follows:

Team #1 G. Smith, V. Velazquez, and J. Schiffino.

Team #2 R. Rawles, J. Cook, and W. Shigley.

Team #3 J. Cardenas, and L. Brown.

Team #4 G. Carreras, and J. Stafford.

Team #6 S. Axon, F. Watson, and J. Scott.

Team #6 D. Parker and M. Pope.

Team #7 D. Warnock, J. Boatwright, and R. Adams.

Team #8 G. Pearsons, R. Nobles, and T. Jones.

League competitions are each Thursday evening at 5:30 p.m. at the Marietta Lanes on the 4-Lane. The League president Stan Axon and secretary Robert Rawls invite all interested in viewing the team to come out each Thursday night.
