

# THE ENGINEERING TECHNICIAN

Vol. XVI

12

Southern Technical Institute, Marietta, Georgia, April 24, 1964

No. 8

## EDITOR'S COMMENTS

By Lewis A. Edge, Jr.

A popular gripe among the students here is that we don't get any benefit from being affiliated with Georgia Tech. Many opinions and stories are floating around . . . some of them based on fact and some on hearsay.

In an attempt to get the facts straight in my mind, I visited Director Hoyt McClure attempting to find out whether or not we really benefit from our affiliation, and these were the results.

### TANGIBLE BENEFITS

We have the use of their library and may check out books by presenting our STI student identification cards.

Since we do not enjoy any other material privileges of a regular Georgia Tech student, our student activity fee is \$5 compared with a Georgia Tech student's \$11, and it is divided among the three non-academic activities—the *Technician*, the *Technician's Log*, and the Athletic Department here on campus. None of our student activity money is used by Georgia Tech.

### INTANGIBLE BENEFITS

The way we do and don't benefit materially from our affiliation is relatively clear-cut, and a solid dividing line can be drawn. It is in the intangibles that we have more difficulty in determining where we stand.

Some say that being affiliated with a four-year engineering college adds a great deal of prestige to our degree. It is also said that our curriculum can be more up-to-date with the needs of industry when we have a full four-year engineering college to consult.

According to Director Hoyt McClure, we do indeed benefit a great deal in this way. He feels that perhaps at a later date, Southern Tech might be able to dissociate from Georgia Tech, but now we still need the "big helping hand," . . . though perhaps less now than we did during Southern Tech's pioneer years.

### SHORTCOMINGS

The benefits we receive are not without disadvantages however, and it is up to you to decide for yourself, whether or not you are better off.

This school is run on a remote control arrangement. Other colleges and junior colleges in the Georgia University System, which are not extensions of other colleges, report directly to, and are governed directly by the Board of Regents.

Our Director McClure reports to Mr. L. V. Johnson, Director of the Engineering Extension division, who reports to Dr. Edwin D. Harrison, President of Georgia Tech who finally reports to the Board of Regents. The rulings by the Board of Regents follow the same path in reverse before they get to us. That's why there's so much red tape involved in getting things done . . . especially something that involves the approval of the Board of Regents. Permitting campus-wide fraternities here is an example of something that will have to be considered by the Board of Regents.

According to Director McClure, Georgia Tech has been extremely cooperative and this might, some-

## Calendar of Events

April 21—Gordon Military College baseball game  
April 23—Ga. Tech Freshmen baseball game  
April 25—Ga. Military College baseball game  
April 29—Ga. Southwestern College baseball game  
April 30—Ga. Tech Freshmen baseball game  
May 4-5-6—State Championship Play-offs  
May 8—End of deficiency report period  
May 10—John Marshall University baseball game  
May 14-15-16—Region VIII Play-offs in Florida  
May 22—Last day for dropping a subject with a "WP"  
June 12—End of term  
June 13—Graduation exercises

## Southern Tech To Have Second Dormitory

A second dormitory for the campus of Southern Technical Institute, with facilities for three hundred men, will soon be under construction, according to predicted scheduling of school officials. The loan approval for the necessary funds was given in December, 1963, and the State Board of Regents gave its final approval for the architect to proceed with finished drawings and specifications at a March, 1964, meeting. The plans should be in the hands of prospective bidders at a date in the immediate future.

This new dormitory is in addition to the one now under construction, which will provide accommodations for 186 men, and includes a dining hall. The second dormitory will be a four-story building, and will

## The Wrecking Wrecker

The STI physical plant recently acquired an Army surplus wrecker for moving heavy objects and pulling up tree stumps, and it has certainly lived up to its name.

Not long after it arrived on campus, the parking brakes failed, and it rammed into the door of the maintenance building.

The first brake failure triggered another, and Mr. Jack Petee's personal car crashed into the wrecking machine.

The initial cost of the huge "like new" wrecker was \$75, but it may cost more to keep it here.

Physical Plant employee Mike Thompson is dwarfed beside the huge machine.

Photo by Bailey

## Name the New Wrecker; Win a Parking Place

A "Name the Wrecker" contest is being sponsored by Mr. Jack Petee of the Physical Plant, Dean Maddox, and the *Technician*. The prize . . . is the privilege to park in Dean Maddox's reserved parking place for a week without penalty.

The huge 7½-ton capacity wrecker, recently purchased from military surplus for use by the physical plant, will be parked near the front of the campus today and Monday to be viewed by students interested

in choosing an appropriate name for the monster.

A winning name will be chosen from entries by students here, on the basis of originality and appropriateness by a group of impartial faculty judges (to be announced later) picked by the *Technician* staff. According to Mr. Petee, the winning name will be painted on the wrecker for posterity to see.

Rules: The name must be submitted on a piece of paper at least 3 by 5 inches big. The entry name should be plainly printed on one side of the paper and the student's name and box number should be printed on the other side of the paper. Members of *The Technician* staff are not eligible. The deadline is April 28, 1964.

Place entries in Box 8073 with the entry name folded inside.

## New "Anticheat" System Proposed

A new system to help protect students here from any cheating which may occur is being studied by the faculty and administration.

The proposed system may operate like this. A student who is suspected of cheating by a faculty member is confidentially reported to Dean Maddox. Dean Maddox calls the accused student to his office and informs him that he was suspected of cheating by one of his instructors but does not tell the student which instructor was the accuser.

No official action would be taken, and the student would be presumed innocent unless he were reported again. A guilty student would have had his warning, and an innocent student would suffer no penalty.

Another proposal is to not inform the student that he has been reported once, but to investigate a student closely if he is reported more than once.

All of the information and reports would remain strictly confidential with the suspect, the accuser and Dean Maddox.

If the new system is enacted, cases in which there is positive proof of cheating would be handled the same way they are now.

## Log Goes To Printer

A Hornet showcase for 1964, the 1964 *Technician's Log* is coming.

The printer has the copy in his hands, and without any further difficulties the *Log* should be back for distribution prior to exam week in June.

A complete change in the *Log* design has been performed by a relatively small staff including John Jenkins of the Building Construction Department, Steve Dean of the Electrical Department, Robert Townsend of the Civil Department, and Johnny Cook of the Industrial Department. This year's editor-in-chief, W. D. Koempel, and the *Log's* new faculty advisor, Professor Blair, have headed this year's *Log* staff.

Professor Sojourner was the *Log* advisor prior to Blair's taking over as the 1964 *Log*-staff advisor.

## Locals Give 24 Scholarship Grants This Year

Over \$7100 has been set up in scholarship and scholarship-loan funds for Southern Tech students for the current school year according to the counselor's office. A total of 24 separate grants have been given for the fall, winter and spring quarters from the following sources: the Regents' State Scholarships, the Marietta Kiwanis Club, the Marietta Lions Club, the Marietta Rotary Club, the Marietta Optimist Club, the Smyrna Lions Club, the Marietta Masonic Temple Company and the Atlanta chapter of ASTM.

"There is still money available for the summer quarter," stated W. J. Glenn, Southern Tech counselor.

"Any student who is interested should check with me soon. We expect over \$10,000 to be made available next year and those applicants who wish to receive assistance for the fall quarter also need to see me. Generally, a minimum of a "C" average for two or more quarters plus the showing of need is all that is required for a scholarship-loan. The requirements for a grant from the Regents' State Scholarship fund are somewhat higher."

The students who have been approved for scholarship aid beginning spring quarter are: Stephen Berge Howard, Bainbridge, Regents' State Scholarship; Hearn Bennett, Perry, Marietta Optimist Club; Jimmy E. Lee, Citra, Florida, Marietta Lions Club; Bruce Bridges, Gainesville, Marietta Kiwanis Club; and Bobbie Gene Caton, Atlanta, Marietta Rotary Club.

## U. OF G. COEDS EXPRESS FRANK OPINIONS OF STI STUDENTS

By Steve Boswell

Ed. Note—We thought you would be interested in knowing what outsiders think of STI students. The opinions expressed here are those of the people asked, and do not necessarily reflect the opinions of the *Technician* or of the writer of this article.

An opinion poll was taken Thursday, April 9, at the University of Georgia Extension Division on the Southern Tech Campus, to determine the University coed's opinion of S.T.I. students.

The coeds were asked questions ranging from, "How do STI students impress you?", to What seems to be the attitude of the University of Georgia men toward your dating STI boys?"

## Rubber Check Writers Beware!

To assist the conscientious check writing students here, the administration employs every means necessary and available to it to help the local businessmen to get their money for student checks which may have been returned to them from the bank.

According to Dean Maddox, if a businessman calls the school, reporting that he has a student's check that has been returned, the student is notified and is given an opportunity to correct the error which caused the return of the check.

If the error continues to go uncorrected, credits are withheld and, in extreme cases, the student's enrollment is terminated.

These steps are taken to improve the relationship between Southern Tech and the community and to make it easier for scrupulous students to cash checks.

The first coed interviewed had this to say, "STI students are nice and courteous. They have been both helpful and accommodating."

Coed number two was more prolific, specific and critical. She stated that, "STI students are untactful, at least many of them are, but some of them are real sharp fellows." She also said that, "STI students need to carry shovels around with them or to stand on a table (when they talk)."

"They are schizoid (double personality)—one minute they are fun and the next minute they are gross!"

Coed number two had never dated an STI student but said that she had been asked and would like to date one.

She stated that this school builds the ego of every girl on campus because of the high man-woman ratio which results in much attention for the opposite sex.

When asked how University of Georgia men felt about coeds dating STI students she said "they think we're 'hard up'."

This coed considered the wearing of high school jackets to school "fruity".

A third coed interviewed said "The majority of students are nice but many of them have no respect

(Continued on Page 3, Col. 2)

## Enrollment Up This Year

The Registrar's Office has announced that the enrollment for the spring quarter has increased over the enrollment of the similar 1963 quarter. A total of 840 students are in attendance at STI this quarter; this represents a 4 per cent increase over the number of students here in 1963. Some 58 students registered for their first quarter here this time.

## Staff Comments

### WHERE IS THE HELP?

Several students have asked us to suggest that faculty members put their spring-quarter office hours on display for the students. In doing this, the students say that not only will the faculty members not be disturbed when they don't want to be, but that certain office hours will be of great benefit to the students. Many of them need help and haven't been able to find the instructors.

### THE 48-STAR, 50-STATE FLAG

We stopped to count the stars on our school flag and discovered that it had only 48. We understand that there are now 50 states in the United States of America and that each star on the flag signifies a state. Either we counted our states wrong, or we need a new flag.

### GEORGIA . . . GEORGIA

If the flag maker has any cloth left over after making us a 50-star United States flag, it would be nice to see the flag of Georgia flying underneath.

## Boycott Snack Bar Coffee

We have campaigned for a nickel cup of good coffee at the snack bar for four issues now, and the Ga. Tech snack bar management won't give us any indication that they have any intentions of reducing the price of their coffee or improving its quality. We have been doing a little research among the local restaurant owners and have discovered that it only costs a maximum of 2½¢ to brew a cup of coffee including sugar and cream that may be added. One instructor told us that he had saved \$15 or \$20 since the middle of this past January, by brewing coffee in his office rather than buying it from the Snack Bar. We tried some of his coffee, and it was better than the Snack Bar's coffee as well as being less expensive.

If the Snack Bar used the finest grade of coffee (which they obviously don't), they would be making a 100% mark-up per cup, selling it for only a nickel. The Ga. Tech Snack Bar management, by continuing its price fixing policies, has left you no choice but to retaliate by boycotting the Snack Bar's coffee until their coffee price is reduced to a nickel.

We, as a united student body, can leave the "non-profit" Snack Bar with no choice, but to reduce their coffee to a fair price or make no profit from it at all.

### ARE WE YELLOW JACKETS OR GREEN HORNETS

In several past issues there was mention of Southern Tech students wearing high school letters. Our stand on this matter was not a demand or a threat to the students; it was a suggestion that students think and decide about the problem themselves.

Now something new has been brought to our attention. Some STI students have placed Georgia Tech decals on their car windows. Now it is true that we are affiliated with Georgia Tech and that the Georgia Tech decal is perhaps more impressive. But we feel that these decals do not represent Southern Tech. And since STI seems to be the place these students are attending college, why can't they show a little pride in their own school?

We think these students should attend Georgia Tech if they are going to make believe that Georgia Tech is their college.

### WE'RE GLAD BUT SAD

The *Engineering Technician* staff is pleased that Professor Jesse Defore will have the opportunity to continue his studies, but regrets the fact that he will be leaving here after the summer quarter. While we are not aware of what his future plans will be after his graduate work at Florida State University, we are aware that we're losing one of the outstanding members of the STI faculty.

**THERE ARE A LOT OF WAYS TO BE A HERO. AN EASY WAY IS TO HELP SAVE A LIFE BY GIVING BLOOD. THE RED CROSS BLOODMOBILE WILL ARRIVE ON CAMPUS SOON. GIVE A PINT TO THE BLOOD BANK. IT FEELS GOOD TO KNOW YOU MAY HAVE SAVED A LIFE.**

## Letters To The Editor

*Ed. Note—Letters to the editor are welcomed. All letters must be signed, but names will be withheld on request. Deposit them in Box 8073 or leave them at room 265.*

To The Editor,

It is about time that a transformation was made in the dress of our students. The elimination of high school letters is needed for appearance and I would like to go a step further.

A good many boys who come to classes wearing blue jeans and black leather jackets should realize that in a short while they will be forced by custom to enter the adult world of more cultured dress.

I would suggest that these students cut their ducktail and Beatle hair and learn how to match clothes. Sloppyness is not "cool"; it is revolting and it should not be permitted outside of a Civil 214 lab. Southern Technical Institute is an institution of higher learning and it should not have the appearance of a reform school or be as sloppy as a common, low level, trade school. We graduate excellent technicians—let's dress the part!

Robert C. Townsend  
Civil Department

Dear Mr. Editor,

A number of people — students, other teachers, and employees on the STI campus—have been talking about a certain department head who keeps his office door locked twenty-two hours out of the day.

He may say, "Well that's personal business." This may be true, but is this man getting paid for doing his personal business at STI, or helping the students to learn? Personal business should be conducted elsewhere, or at least at other times.

We students pay our tuition to come to STI to learn. The teachers tell us that if our lessons aren't clear to come to their offices for extra help. How can we receive this extra help if the office is not open for us?

Yours truly,

A Disgusted Student  
(name withheld by request)

Dear Mr. Editor:

After lugging around a brief case weighing fifteen pounds for a quarter, I think one of the most helpful additions Southern Tech could make for the convenience of the students would be the installation of lockers. Everyone is cramped by having to carry a large load of books to class with him. Also, there is the possibility of losing important papers by having to carry so much material around with you. I think the installation of lockers would foster better grades and provide for a much more pleasant atmosphere for both students and teachers.

Sincerely,

Robert E. Good, Jr.

## EDITOR'S COMMENTS

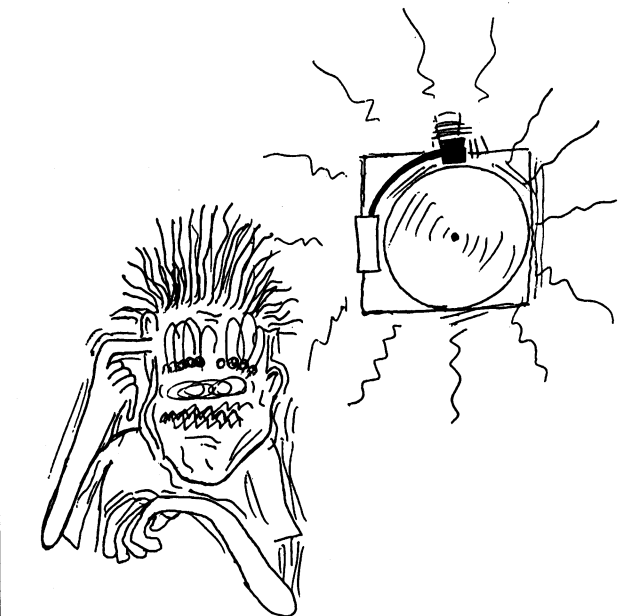

(Continued from Page 1)

what, offset some of the disadvantages of our "remote control system."

As it stands now, we are completely dependent on Georgia Tech for any money our school receives. Again, Director McClure feels strongly that Georgia Tech has been cooperative, and he feels that we wouldn't be better off financially on our own than we are under our present system. It is interesting to note that Southern Tech can't even write a check for 50¢ . . . all checks must come from Georgia Tech.

Even though we're an extension, the faculty members here do not have faculty status at Georgia Tech in all situations, and, therefore, do not enjoy the prestige of being fully associated with a four-year engineering college. According to Director McClure, this situation may change in the near future, and as a side benefit, our faculty members may once again be able to purchase, at a discount, tickets to Tech's athletic events.

Our Director feels that we should continue our affiliation despite its awkwardness. You are entitled to

## Save Our Hearing: Soften The Bells

by a. d. monishment

As I staggered to my eight o'clock class, my eyes bleary, my mind functioning even less than it usually does . . . oblivious of the surroundings, I was shaken . . . almost deafened, by an intense clanging sound emanating from a little black box above my head. In turning around and around, my eyes closed and my hands cupped over my ears in an attempt to stop the intense pain to my mental and physical capacities, I became so confused that I thought I was in a torture chamber and missed that eight o'clock class.

Naturally the absence went unexcused, despite my pleading . . . begging . . . groveling on the floor and other assorted contortions designed to bring sympathy from the "all-powerful" withholder of excuses.

To console my grief I visited the same spot to investigate who could do such a cruel thing at such an hour of the morning. As I glanced at the clock on the wall and noticed that it was 10:50, a similar intense clanging sound occurred again, causing blood to spew forth from my ears in great quantities. When I got the mess dried up from the wall and floors with my handy hankie, I got a closer look at the little black box and discovered that it had a circular dome over it with the words "Standard Electric Time" engraved in its center. I wondered then, if the time for torture had been standardized as have our women, cars and personalities. Who could be responsible for this? Are not our classes and labs torture enough? Do we have to suffer between classes too?

"This," I said, "warrants an investigation. Shall I write the President, or will a lower man on the totem pole be sufficient?" The lowest man I could find at the moment was Editor, whom I saw sweeping garbage into a can marked "Technician."

"What is that horrible clanging sound?" I said.

"Those are the class bells," replied Editor.

"What are they for?" I said.

"Well," said Editor, "they are a carry-over from the days when people didn't have any hands on their clocks, and the only way they had to tell time was to listen to a bell from great distances."

"But what if you aren't at great distances?"

"Well it gets kind of messy, doesn't it?" says Editor.

I turned and walked away in great contemplation. We could get rid of the bells . . . no . . . the students couldn't remember the good old days if they didn't hear the bells. But so loud . . . Do they have to be so loud? . . . Bang!! An Idea hit me. What if I went around stuffing the bells with foam rubber. It's worth a try! Quick! Out to my car . . . here's some foam rubber right under my seat covers!!! Grabbing a handful, I rushed back inside and stuffed a bell with foam rubber. The clock hands indicated that it was eleven o'clock and softly and pleasantly but very clearly I could hear the bell chiming the commencement of the next class.

Ergo!! That's the solution!! Stuff all of the bells with foam rubber! But I won't have any seats in my car if I do. Oh well, that's the job of the Physical Plant anyway.

your own opinion on the matter.

If you would like to know the reasons behind other existing policies or would like to know a particular fact about this subject which may have been omitted inadvertently, write a letter to the Editor.

A letter to the Editor is also a good place to air legitimate complaints about school policy. The administration reads your newspaper carefully, and I know of at least one letter to the Editor that got official action. Why not see if your letter can be the next one?

## Two STI Staff Members Awarded Fellowships

Professor Jesse Defore will be leaving Southern Tech in September of this year. Defore has received a fellowship for graduate study at Florida State University where he will work toward a doctorate degree in the field of higher education. Also receiving a fellowship for further study was Assistant Professor John E. Dunn who will pursue a Doctorate degree in Economics at the University of Georgia.

## Taylor Receives High Honor

Leonard H. Taylor, STI professor of Air Conditioning Engineering Technology, has been selected as an advisor to a technical institute in Pakistan. Taylor will serve for two years as a consultant at the Rawalpindi Polytechnic Institute, Rawalpindi, Pakistan.

Taylor's work with the Pakistan school is under the guidance of Oklahoma State University and the Ford Foundation. He will supervise development of an air conditioning program in the school at Rawalpindi.

In addition to serving Southern Tech as professor of air conditioning, Taylor has headed the college's department of Air Conditioning Engineering Technology. He has been at STI since the establishment of the college in 1948.

Taylor holds both a bachelor's degree and a master's degree in mechanical engineering from Georgia Tech. He is a licensed professional engineer in Georgia.

Definitions Of Happiness

Happiness is finding a ten-dollar bill in a letter from home.  
Happiness is having a prof. not show up for class.  
Happiness is having a University of Georgia coed wink at you.  
Happiness is not having an eight o'clock class.  
Happiness is killing two roaches with one stomp.  
Happiness is finding the north library door unlocked.  
Happiness is having a test called off.  
Happiness is spilling a cup of Snack Bar coffee.  
Happiness is getting an excused absence.

U. of G. Girl Opinions

(Continued from Page 1)

for the opposite sex." This coed said that women don't like slide rules being worn on belts—"It looks odd!" She didn't like dungarees either, and considers many STI students immature . . . "a bunch of babies" . . . and very friendly but not in a friendly sort of way. Coed number three is presently dating an STI student. When asked what she thought of students wearing high school jackets to school, she said she thought it was all right. In general she did not consider STI men courteous.

Coed number four thinks that STI students (for the most part) are industrious. She has dated one and is dating one at present. This coed does not like University of Georgia (Extension) men . . . considers the majority of them crude and childish.

When asked if she thought STI students are courteous, she answered in the affirmative with the one exception being when the boys form two lines just outside the women's restroom and wait for some poor defenseless female to make an exit.

Coed number four answered "yes" when asked whether she considered STI students friendly or not. She considers the wearing of high school jackets on campus childish.

The fifth coed, when interviewed, stated that she rather go to STI fraternity parties than University of Georgia (Extension) fraternity parties. (She'd rather fight than switch!) She views the University Extension's male students as group of "rich slob." This coed has dated, and still does date STI students.

The opinions rendered by the University coeds, as a whole, were to some degree, critical, but the results as far as the STI students are concerned, were better than expected.

The girls' opinions were, of course, as they see the STI student, without regard to the reasons behind such things as the wearing of dungarees, or slide rules on belts.

Southern Tech Television Gets New Equipment

Southern Tech received two new 21-inch television monitors in Room 462 this month. According to Mr. W. E. Burton, the new monitors, which replaced two smaller 17-inch monitors, will give a larger view of the demonstrations and lectures to the students enabling them to see the demonstrations more clearly. The 17-inch monitors will be used in a smaller class room in the Electrical Technology Building in the future.

STTV is using only one camera at the present time, but the station hopes to have another camera in the future. According to Burton, two cameras will enable two different pictures of the demonstrations to be shown at the same time on the monitors. The two pictures will split the screen, one picture on the left side and one picture on the right side of the monitor. Other special effects can also be shown using two cameras.

The station also hopes to get two new camera lenses, and a "film chain". A film chain is a unit which is used to show motion pictures on television. By using rotating mirrors in front of a camera, three different movies or still slides can be shown in rapid succession on the monitor in the class room.

Two electrical courses and one physics course are being taught via STTV this quarter, with more classes being planned for the future. STTV also hopes to have monitors in all of the class room buildings and to enlarge the studios in the future.

Professor J. J. Defore is teaching the physics course; Burton and Mr. W. O. Spaeth are teaching the electrical courses. Mr. J. C. Meintzer is the chief engineer and camera man. Student James Key is the control-room technician this quarter.

New Group Stands Together Against Female Trickery

A new organization has been formed for a select group of Southern Tech students. Designed to function off-campus, the new organization, called The Brothers of Bachelorhood, has been created by three members of Epsilon Pi Chi. According to

these three charter members, the organization will invite for membership only those who are in the Epsilon Pi Chi fraternity.

The By-Laws of the organization are these—Members cannot:

- 1) go steady
- 2) be engaged or married
- 3) date one girl more than five times in a row
- 4) call or date a girl under sixteen years of age
- 5) give away their fraternity pin or class ring
- 6) be reinstated after one violation of one of the above.

All new members must also be approved by the charter members. There are no dues.

One of these charter members stated that while he realized that the members will probably not be the world's greatest lovers, he did believe that by belonging to the organization one could show that he had not been trapped or caught by the trickery of the female species. He added, "A Brothers of Bachelorhood member could boast that he was not one of those spineless characters who had fallen into submission and life-long torment."

Ga. Tech Editor Is Fired

Ed. Note—Many of you probably heard this news on the radio several days ago. It seems that being Editor now-a-days is dangerous.

The student editor of Georgia Tech's campus newspaper, The Technique, has been fired for alleged bad taste in an April Fool's Day issue.

Dean George Griffin has confirmed that the student activities council unanimously recommended that Guinn Leverett of Molene be dismissed as editor.

Griffin says no further disciplinary action is contemplated. Other members of the Technique staff were reprimanded but permitted to continue their work on the newspaper.

What's New And Worthwhile

BOOKS

Seven Days in May . . . Knebel and Bailey

A bone-chilling thriller, based around a military plot to seize control of the United States Government. It is the type of novel which the reader finds hard to put down after starting it.

Thin Red Lines . . . James Jones

The author has done a superior job in depicting the feelings and emotions of infantry combat. Jones portrays vividly and compassionately the men and officers as they struggle for a mythical summit on Guadalcanal.

Hundred Dollar Misunderstanding . . .

You'll save 95¢ if you don't buy this book.

MOVIE

Lillies of the Field

One of the academy award nominees for the best movie of 1963. Also one of the lowest budget films ever to be nominated. It is a down-to-earth story of the struggle of a Baptist Negro to build a chapel for some poor but perserving Nuns. It stars Sidney Portier, who won the "best-acting" award for 1963 with this role.

Johnny Walker, Inc.

Exclusive clothing store for men and young men.

Visit THE TRADITIONAL SHOP for the latest in campus and casual wear.

Featuring brand names like; Hart, Schaffner & Marx, Kings Ridge, Jarman, Nunn-Bush, and Arrow.

Spring Quarter Sports

By Johnny Cook

**BASEBALL**  
Coach Lockhart and the managers of the baseball team believe that this year's team will be better than last year's team. Though the batting averages are a bit indecisive this time of the season, there is indication that some of the team are going to have good averages. Tim Matthews has the highest batting average on the team with a .458. Don Marlowe is next with .412. Ed Perkins and Jim Vaughn both have a .308 average. Gordon Military was predicted to be the toughest team STI will face this year. As of now, Southern Tech has won 5 and lost 1 in the conference. It looks as if the team will have another good year.

**TRACK**  
This year's track team will be coached by Mike O'Shea (B. C. Department-senior). Ed Hagan, Mike O'Shea, Harrell Hampton, and Bob Thomas are the only returning members from last year's team. Howard Davis, J. D. Davis, John Dixon, John D. Baisden, Carl Mingle-dorff, Gary Duncan, Ronald Frye, David Bacon, Michael Hollis, and Robert Hinton are all new members. O'Shea stated that the team will have a man for each event but that they were lacking in depth. According to the new student-coach, all persons interested in the track team are invited to Larry Bell Park in the afternoons to inquire about joining.

**TENNIS**  
The tennis team this year will be coached by Professor Harry Smith. While the team is not scheduled for regular season games this year, Smith stated that the team would play anyone interested. The main interest of the team is the State Play-Off in Statesboro on May 7, 8, and 9.

**GOLF**  
In the past, the golf team has been coached by Professor Lawson who is head of the Industrial Department. Because of Lawson's illness, the team will be coached by Coach Lockhart. At the present, the team has five members, and these are Michael Stowe, Godon Persons, Scott Marbut, H. D. Broome, and Paul Lions.

**BOWLING**  
The bowling league started another season Thursday, April 9. The league elected its president, Julio Schiffino, who has been in the league for several quarters. Robert Rawls was elected secretary and treasurer. Rawls was secretary and treasurer last quarter and was also on the first place team. The league meets every Thursday afternoon at 5:30 at Larry Bell Auditorium.

Monthly Math Problem  
Carreker Solves March Math Problem

Kenny Carreker of the Mech department was the first student to solve last month's math problem. This month's problem follows:

Joe Student has just returned from a trip around the world. He walked around the world at the equator. By doing some home work, he found out that the top of his head had traveled 45.8 feet farther than his feet. Assuming that he was bare-footed and the world was round at the equator when Joe made his trip, how tall is he? Give your answer to the nearest one half of an inch.

The person with the first correct answer mailed to Box 8028 will receive a \$1.00 prize for this month's problem. Students should indicate the time of mailing.
