

THE ENGINEERING TECHNICIAN

Vol. XVII

Southern Technical Institute, Marietta, Georgia, April 28, 1965

No. 8

Steve Boswell

Wanted: Action!

At the risk of seeming repetitious, I would like to make a very subtle suggestion. Let's abolish the Student Council!

What good is it doing? No one ever hears of any action taken by the Council or sees any results of actions taken at the meetings—if there are any actions taken—and many of the members don't even attend the meetings. Our Student Council even has to struggle to get a quorum (2/3 of the members) which is required before the council can transact any official business brought before it.

The Student Council has the potential of being the most useful, influential, and powerful organization on campus. It could do more for the students and the school than any other organization on campus.

The Constitution and By-Laws of the Student Government of Southern Technical Institute, a document which is the legal framework by which the student government is supposed to operate, states very specifically the duties and the responsibilities of the Student Council and emphatically states that they shall perform these duties.

These duties were listed in this column in January.

Legally speaking, the Student Council is the governing body of our student government. It has complete legislative, executive, and judicial authority within the limits established by the Constitution and the legal framework of the Southern Technical Institute . . . and yet what does the council do with this relatively great authority . . . nothing, literally nothing.

Other schools have had this same problem — some have completely done away with their student government; others have made their student governments strong and useful.

The Student Councils at many schools sponsor fund-raising activities and use the profits to sponsor folk and classical concerts with famous name personalities.

Many Student Councils have trial boards which hear and decide cases of various student offenses; this has proved to be very valuable when properly handled.

It should be obvious that it would take more than going to a meeting for an hour once every two weeks to achieve these ends. It takes work and lots of it. Our Student Council has not shown itself to be overly anxious to do anything . . . of any greater significance than having a few small signs put up on campus. If this is to continue to be the case, why waste the time to go to the Council meetings? Why not just abolish the student council and use the time that would have been spent in a meeting for something useful? Perhaps our new Student Council has the answers to these questions. . . . I certainly hope so!

STI Goes All Out For Technician's Day An Estimated 2,000 See Campus Display

An estimated 2,000 person turned out to view the Southern Tech campus and various departmental exhibits on Engineering Technician's Day, last Sunday, according to Professor W. S. Newman, faculty adviser of the sponsoring club, Circle K.

State, county, and city dignitaries, industrial representatives, school administrators and teachers, parents of STI students, and members of the general public visited the campus during the afternoon.

The crowd of people, evidently answering the call to tour the campus during the Open House event made through the various news media in the area. Governor Carl Sanders issued a proclamation naming Sunday as Engineering Technician's Day in the State of Georgia.

The visitors were able to see the award-winning departmental exhibit displayed by the Civil Department. The display consisted of a model highway curve, a water treatment plant model, a display of surveying instruments, a polariscope, and a machine crushing concrete cylinders and beams.

The Math Department won the non-technical award for the best display in the Basic Studies Division. This exhibit consisted of a mechanical calculator, a large abac-

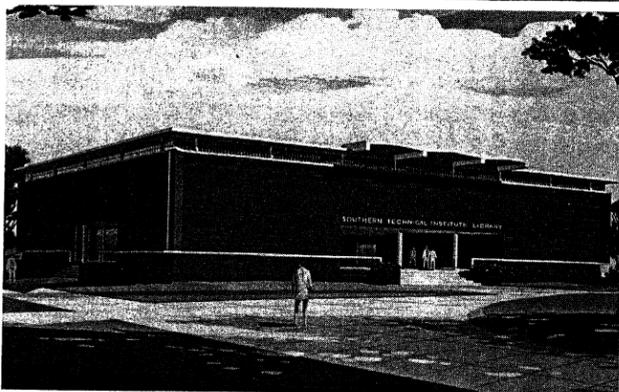

us, and individual course displays depicting typical problems solved by students in each course.

Other exhibits were a maze of individual models and drawings in separate displays with special lighting effects, AET; a complete production line manufacturing an object, MET; a closed-circuit television station, EET; a film and driving reactions tester, IET.

"The purpose of Technician's Day was to familiarize the public with this school and what we do here and to interest new students in engineering technology as a field of study," said Newman.

He added that he hoped that an Engineering Technician's Day would again be held next year or at least two years from now.

Special invitations to Technician's Day were sent to parents of STI students, selected industrial companies, county and city officials and high school teachers, and high school counselors in the Atlanta area.

Rendering by Cleveland M. Cail, AIA

New Library To Be Most Beautiful Building At STI

"The new library will be, undoubtedly, the most beautiful building on campus," says Director Hoyt L. McClure.

Preparations are being made to construct a new, ultra-modern library in the area southwest of the present dorms. The two-story structure will contain 26,000 square feet of usable space and will cost in the neighborhood of a half million dollars.

The first floor will contain a lobby, check-out area, study rooms, and a computer room, equipped with a computer available to both student and faculty members. Heating and air-conditioning units will also be housed on the first floor of the building.

The main portion of the library will be on the second floor. This floor will be able to handle 30,000 to 50,000 volumes. There will also be areas for study provided.

The lobby on the main floor will be covered with terrazo, giving it a marble-like finish. Areas of heavy use, such as around shelves and passages, will be covered with long-lasting vinyl tile. "The remaining floor will be carpeted, giving the

building a plush look," said Mr. McClure.

STI's new library building will literally be without any dark corners. Each corner will be made of glass blocks. Glass blocks will also be placed along the tops of the walls in order to increase lighting.

Another unique architectural feature will be the fountain located in the lobby. The entire building will be centered around this fountain. Bruno Infrona, the Italian associate architect, will make the fountain his project.

The architect in charge of designing the building is Cleveland Cail of Marietta. A builder is chosen by the Board of Regents on the basis of bids. "With luck," said McClure, "the library might be ready for Fall 1966."

STI's Alumni Association will soon begin a drive to raise \$50,000 for books. According to Mr. McClure, the financing required will be \$50,000 a year for four to five years to obtain an adequate number of books for the library.

A staff of two librarians, a secretary, and several student assistants will operate the new facility.

Circle K faculty advisor, Mr. W. S. Newman and AET student, Larry Little, inspect one of the architectural models that was on display during Technician's Day.

Miss STI Crowned As New Miss DeKalb Co.

Miss Susan Griffiths, the recently chosen Miss Southern Tech, won the title of Miss DeKalb in the annual Jaycees' sponsored contest April 3.

Miss Griffiths successfully competed for the crown of Miss DeKalb in a field of 20 contestants. During the course of the contest she also won the bathing suit and evening gown divisions.

For talent in the contest, Miss Griffiths did an oriental dance and an acrobatics routine.

As winner of the Miss DeKalb contest, Miss Griffiths received a \$1,000.00 scholarship to the school of her choice, a full scholarship to the American Professional Talent Academy, a twenty-five dollar gift certificate, a three-foot, two-inch tall

Miss DeKalb Trophy and the bathing suit and evening gown division trophies.

The new Miss DeKalb will be making guest appearances in the metropolitan area in the near future. All arrangements will be made by her manager, a member of the DeKalb County Jaycees.

Miss Griffiths is automatically entered in the Miss Georgia Contest this June.

Matthews, Kamps New SC Officers

The Student Council elected Tim Matthews and John Kamps, president and vice-president, respectively, for the spring and summer quarters at the April 1 meeting.

Other officers are James Barre, freshman representative from the EET Department, secretary, and Greg Kane, freshman representative from the GET Department, reporter.

Matthews is from Decatur. He is a member of the STI baseball team, Monogram Club, Eta Alpha Gamma, and Tau Alpha Pi.

Kamps, from Ripon, Calif., is treasurer of Gamma Phi Kappa.

Exchange Profits Used For Booth

Profits from the Circle K Club Book Exchange will be used to build an information booth for Technician's Day which will be held April 25.

According to Charles Lee, club secretary - treasurer, the exchange was a success. Lee said that over 136 books were sold, an improvement over the number of books sold winter quarter.

New STI Sign Is Near Reality

Tentative plans to erect an 8-x 11-foot STI sign at the entrance of the campus are near finalization.

This marks the end of a two-year long battle between STI and Ga. Tech officials concerning the design, size, and location of the marker.

Funds to build have been requested and at the present time work is expected to begin in approximately one month.

The sign will be in the form of a brick wall with a concrete border. The exact wording has not been definitely decided; however the most prominent feature will be "Southern Technical Institute," probably horizontally stepped.

The sign was designed by C. R. Orvold, head of the AET Department; R. L. Myatt, instructor in the CET Department; and E. J. Muller, head of the Drawing Department.

EDITORIALS

Pacem In Library Non Est

According to Webster's New Collegiate Dictionary, a library is a room or building where a collection of books is kept for reading and reference, and a librarian is a person in charge of (in charge of meaning having the responsibility, control, or supervision of) a library.

be asked a second time, he is usually asked to leave. Such a condition as this is a vital and necessary part of a library, and it is indeed unfortunate that such a condition does not exist in our library facility, for without it, much of the library's value is never realized.

Not only is our library subject to much noise, but also to too large a percentage of lost, unreturned, and stolen books. We have a very small library and the loss of many books, especially in any one category, results in a serious deficit in reference material. A solution to this problem would be to have all books leaving the library checked at the exit.

In our library no such precaution is taken and a person could easily remove unchecked books from the library.

STI will have a new library in the near future. It is obvious that we already know how NOT to use a library, and that the time to learn how to use one is long overdue.

With Regrets To The Future

When archaeologists dig up the Southern Tech campus ninety-odd years from now, let's hope that in the rubble of slide rules, cracked cement, and half-petrified pine trees that they do not find our restroom walls.

and only half-witted intelligence. In fact the level of intelligence shown would hardly challenge a second grader.

We certainly do not have to worry about even equalling the quality of a low-grade sex magazine — our poor taste and artistry will be seen to that.

Perhaps we should give thanks to the alert crew of maintenance men who strive daily to ensure us that our posterity will not find out what damn poor taste we really have.

Suggestion Box

To a. d. monishment

I suggest that the doors leading to the pay stations in Building 3 not be locked so that dormitory students can have access to the phones after school hours.

This sounds like a good idea. As far as we can see, there should be no objection to leaving the outside doors unlocked while the doors to the building itself remain locked.

Why are some papers burnt and torn?

Depends on what papers and who burns and tears them.

Your April 1 edition was very good.

Thank you.

Why not more news about the fraternities?

Maybe if the fraternities did something we would have something to write about.

Dear Boswell,

It sure gets lonely in here. Besides that, it's so cotton-picking dark in here I can hardly see. How do you expect me to keep this place clean with trash dropping in all the time, and through my crack in the room? With all this trash on the floor and a crack in the roof, one might think I lived in a suggestion box.

a. d. monishment

Dear a.d.,

Your attitude is belligerent. Think positively — at least you are not always lonesome.

Who Me? But I Go to STI

Physics to do . . . gotta finish those drawings . . . another survey trip tomorrow . . . lost that damn T-square . . . wish my parents would hurry and send that check . . . more physics.

Viet Nam? Oh yea, they are having a war over there. No, sorry I can't answer that question about gas. I know gases don't have any definite shape or volume, though. Learned all about it in chemistry. Oh—gas warfare. No, I really don't know much about the situation. I have to study, so I don't have time to read newspapers much.

Say, you really like the guys in our fraternity. We aren't a big national frat but we have fun. What do we do? Well we really don't do anything actually. We all are always so busy.

No, I haven't read the Head. Oh, it's the Fountainhead. By Ayn Rand, huh? If it's a great novel about a weird kind of architect I guess I should read it. But I don't have time.

Sure, it would be great to have big name bands here for concerts or dances, but I can't get involved with that. I stay busy. Doing What? Oh, I don't know. I guess I study too much.

Of course I like Southern Tech. It's fine. No, I don't worry about contributing. Guess I'm just here. . .

What gave you the idea I'm living in a vacuum? So what if I am? I like it. It's comfortable. Nothing demanding or pushing.

Well I gotta go. Sorry you don't think I've got a good attitude about anything. But why should I worry? Who am I to do anything anyway? After all—this is the world's greatest I-don't-give-a-dam school.

Spring Quarter Or

Flunk Now and Avoid the Rush

IT'S SPRING QUARTER—FLUNK NOW AND AVOID THE RUSH Ahhhh! sweet mystery of life. Why didn't I take that tour of Mexico—ahh, but that would have meant missing Spring Quarter at good old Social Teatimes, Incorporated.

And what, pray tell, under Helios, is better than STI when it's Spring? (Don't say it.) All across our fair land, fine keen young minds are stirring beneath the fog of a dismal Winter term, refurbished with the thought that this is the time of the year when life itself begins anew. Now is the time when all aspiring intellectual students seek new and challenging adventures in their endless quest for knowledge: peeling grapes . . . eating grapes . . . telling grape jokes . . . making up more grape jokes . . . getting tired of grape jokes . . . going down to Atlanta International Airport and flying 10,000 kites on Saturday afternoon so you can have your very own reprimand from the FAA to hang on the wall along with your diploma . . . THINKING UP PLACES to tell your profs to go, and what to do when they get there . . . PRAYING TO ZEUS (god of nothing in particular) . . . being surprised to find that your parents aren't really overjoyed to learn that "they" are going to let you go to summer school this year . . . praying to Mars (god of race riots) . . . raising hell with the goatshed because the slopchute ran out of branch water and you had to drink beer last week . . . LYING ABOUT YOUR success with your blind date last week . . . praying to VENUS (it pays to be particular) . . .

. . . appraising the beauty of 8 A.M. surveying class students wiggling and appraising the dignity of the campus . . .

Yes indeed—these are the true signs of spring—along with the contributions from Mount Olympus: the never ending conquests of the Konsolidated Khlorphyll Killers (of the Barfy's Grangers) in their efforts to eliminate plant life from the campus (last quarter they won the battle of the Parking Lot Islands) . . . And the building contractor with Spring Fever who forgot to include doors to the thrones in the heads of the new dorms—for all the world to see?—or is this a civil rights case?—or is this in order to facilitate the determination of the state of occupancy of each unit? back home they taught us to knock on doors . . . But this is Spring Quarter. Shall we complain? NAY! Shall we study? NAY! WE SHALL OVERCOME (the irrespressible desire to accomplish anything at all). FIN.

Letters To Editor

Student Complaint: Cafeteria

Editor, What does this school think we are—millionaires?

Mr. Editor, is there anything that can be done about this situation? Between the bookstore and the cafeteria, I may go broke before the quarter is gone. I may even have to scream "DISCRIMINATION" to President Johnson. Who knows, some one may stage a 50-yard march from the dorms to the goatshed.

First, we get hit with the bookstore and its outrageous prices and then with the "slop shop's" high-priced fungus and now it's the new cafeteria.

Editor:

I'd like to know just what is coming off around here. What is happening in the cafeteria?

Students living in the dorms have meal tickets, but they are actually paying \$12 to \$14 per week for food. This may not be bad for them, but what about students who do not buy meal tickets? Many, like myself, live in the metropolitan area and it would not be feasible to buy a meal ticket. Prices on the food there are ridiculous!!

I like coffee; I have a meal ticket. If I want coffee at lunch as my second beverage, I have to pay for it because the people in charge said, "Two teas only." It is hard enough to drink one. Colored water is expensive! The people in charge also said, at the beginning, "Two eggs, any style. How many of you have felt rather sick from that powdered mess? The style they come in has not been named yet (Thank Goodness!)."

Some of us eat both breakfast and lunch at the cafeteria (when we can afford it). Others just eat one meal there because they can't afford a second.

All I really want to say, if you are paying for two beverages, you should demand your choice; and if you are paying for eggs, you should get REAL eggs.

A typical breakfast—eggs, dipped with an ice cream scoop (one dip if you are lucky), grits, bread, meat, and beverage—will average about \$.80. Two eggs, grits, toast, meat, and coffee can be purchased for less than \$.60 at Jiffy.

Sincerely, Greg Kane

You as students of a college should take an active part and also try to get your friends to do so. The school, before it will be able to benefit the students, will have to have the students doing their best to help the school.

Ed. Note: The eggs are REAL, at least to begin with.

Technical Education Lacking In Emphasis On Other Areas

Since coming to Southern Technical Institute, I have noticed several things which to me should be overcome before a student can graduate from STI. I really think some of the students of STI are uneducated in some aspects. Perhaps the student does not know where he is lacking, but to others it is very obvious.

I am trying to say that the student needs more background in social studies, economics, and business law, not to mention a few more. The school does not require all departments to teach these subjects, but they are offered to the students.

easier to complain about things; however, the very reason of the complaint probably originated from his lack of initiative.

The other day I was talking to one of the students in Mech. and I asked him who was "Sir Winston."

When a student graduates from high school and goes on to college he assumes responsibility even though he may not realize that he is doing so. A college student is expected to take active part in student government as well as to support his school. STI as a college lacks greatly in its student participation. There is nothing I can do or nothing the school can require the students to do, but as for me, I would much rather take an active part in school life and know that I have done my best to help STI.

"Sir Winston who?" the student replied.

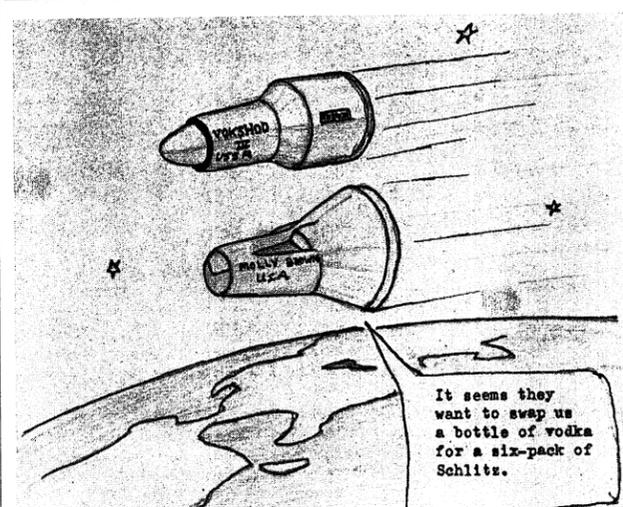

You as students of a college should take an active part and also try to get your friends to do so. The school, before it will be able to benefit the students, will have to have the students doing their best to help the school.

During the rest of the conversation I asked several other questions such as: what is the difference between common and preferred stock or first and second mortgages, and what is the new inheritance and luxury tax which will affect all of us? Granted everybody is not expected to know these subjects, but if one is going to make any money, file income tax returns, or live in the modern world, he should be familiar with economics and business law.

If the subjects are offered, why not take advantage of them? Is it too much for the individual to try to better himself in education rather than settle for what is required?

An STI student does not see any need to do anything but attend classes. There is no need for the student to exert himself and vote or participate in school functions. It is

Anyone Wishing To Be On The Engineering Technician Staff Next Year Should Contact Staff Members And Come in And Help On The May Issue—The Final Issue of the Year

"Deputy Dawg" Rides Herd, Keeps STI Safe and Secure

By Louise Cox

Nothing is more disgusting after a hard day of classes than to find a little slip of white paper with the words "See Dean Maddox" neatly tucked under your windshield wiper. And right when you were ready to leave the campus and call it a day.

"Parking is secondary," said Sgt. William T. Richie, author of that ticket, about his work as campus security officer.

Sgt. Richie says that maintaining security on the campus is his primary concern, and parking violations are a secondary consideration in his day's work.

Sgt. Richie explained that keeping the campus secure involves protection of school property and cars parked on it, keeping unauthorized people off the campus, and making sure all property is in working order and good condition. "We want to keep everything functioning properly to educate the student."

In the process of performing his "secondary" duties, Sgt. Richie issues an average of seven tickets a day, bringing in about 18 dollars in fines. He said the most common offenses are parking in reserved places and on the streets.

Sgt. Richie has been working as the security officer for the STI campus for three and a half years. He works a 12-hour day, five days a week.

Three Added To S. Tech Faculty

Lee H. Armstrong has joined the Math Department. Armstrong came to STI from Fla. State where he received an M.S. degree in mathematics and was a graduate assistant.

George W. Bruce, acting head of the Electronics Department at Gaston Technical Institute, will replace W. O. Spaeth in the EET Department next year. Spaeth will retire from STI at the end of this school year. Bruce was graduated from Ga. Tech with a B.E.E. degree and has worked as an engineer for the Electronics Communications Company in Florida.

Jessie W. Ellington will assume the duties as head of the TET Department when Professor J. I. Alford retires at the end of the contract year. Ellington, who has a B.S. degree in Textile Engineering from Ga. Tech, comes to STI from Piedmont Cotton Mills where he was assistant superintendent.

STI Applies For 'Surplus' Land

STI has applied for land declared surplus by the Air Force. This property has approximately 1,700 feet of frontage on South Cobb Dr., adjacent to the campus.

"This would be a wonderful addition to the campus if we can get it," stated Director H. L. McClure. "If we continue to grow," he said, "we'll run out of space before too long."

McClure cautioned that the procedure for obtaining surplus land is a complicated one that requires passage through several defense and federal agencies.

McClure also pointed out that this land is practically all that is available for future campus expansion. The other property around the campus is developed and would be expensive to procure.

The price of surplus land is not set. It could range from the very lowest cost to the current market price.

"I know the students tease me and call me nicknames but I don't mind," he said goodnaturedly. "Their favorite is 'Wyatt Earp'. A lot of times people think that is my real name so I answer to it too."

"Sometimes they play jokes on me," he added. "Once I left the keys in the jeep and when I got back they were gone. Just had to get another switch put on."

"And sometimes they write tickets to me," he went on. "I get all kinds of notes to 'See Dean Maddox'."

"I like it here fine," said the sergeant. "The school has put trust in me to handle the students and the job. I feel at home here and will keep on working as long as they'll let me."

"All we ask of the students is a little cooperation and to think of the other fellow," Sgt. Richie said.

Cafeteria Serving 1000 Meals Daily

As general manager of the cafeteria, Charles H. Davenport works with a staff of 18 to serve the students and faculty three meals a day.

"I try to have beef, chicken, pork, and fish every day," he said. As for the other foods involved, Davenport plans them so as not to be repetitious.

Davenport has been at STI for eight years. Before coming here, he worked at Emory University and in several restaurants.

"I learned by experience," he said of his position. "I've been in the food business for 35 years, ever since I was 11 years old," he qualified himself.

The cafeteria operates on its own funds, with no support from the state. "We try to break even," the manager said.

As for business, the view is not too optimistic at this point. "We'll go in the hole until we get more people eating here," Davenport stated.

Sloppy Dressing Outlawed By Delaware Student Gov't

(ACP) — Enforcement of year-old dress rules in University of Delaware dining halls has resulted in a rash of student criticism.

The Delaware Review commented: Colleges should have no need for dress regulations. Individuals on the college level hopefully have developed enough good taste to know how to dress properly.

At this university, however, students come to meals in sweat shirts and dirty jeans, go to see administrative officials unshaven and without coats and ties. They excuse themselves by saying that each person has a right to dress as he pleases. After all, so the argument goes, "If you can't have freedom at a university, where can you?"

A university represents the acme of human knowledge. The propagation of that knowledge in effect demands a rigid conformity to which few object. But when demands are made of students to conform only slightly to widely accepted social standards, they become rebellious and scream "individuality."

They hide behind the cry of non-conformity and are either too lazy or crude to care about their appearance. In such cases a few students degrade the whole student body and it becomes necessary for a controlling body to step in.

A year ago the Student Government Assn. did step in and after lengthy study presented a set of regulations which were approved by the Senate.

No response came from the campus — because the regulations were not enforced. This semester an enforcement clause was added. Students who came to meals improperly dressed would receive a warning letter explaining that their meal tickets would be suspended if they refused to follow the rule.

Only then did people begin to complain. The apparent lack of personal dress standards on campus made student government action necessary. Such minimal requirements are hardly an infringement of individuality.

First New Dorm Opened Mar. 29

The first of several planned dormitories opened this quarter with all but a few rooms occupied.

According to Director H. L. McClure, the new building is the first completely air-conditioned dormitory to be built by the University System of Georgia.

Besides air-conditioning, the dorm features laundry equipment, an intercom system, several vending machines, a student lounge, a color television set, and a cafeteria located in the basement.

The dormitory has capacity for approximately 186 students. The rooms are designed to accommodate two men each. Each occupant has his own drawers, closet, and storage space.

The rooms have concrete block walls, asphalt tile floors, and acoustical ceilings. Metal desks, closets, and cabinets are built in one side of the room.

Cost is \$105 a quarter for board. Each resident is also required to buy a meal ticket which costs approximately 135 dollars a quarter.

There is a minimum of restrictions on the students living in the dormitory. Each floor has two student advisers.

Spring Enrollment Falls 10 Per Cent

Enrollment for the spring quarter took a slight decline from that of the winter quarter, according to L. Y. Bryant, Registrar.

This quarter shows a 10 per cent decrease as enrollment fell to 991 from the 1102 winter attendance.

Mr. Bryant stated that the spring and summer quarters are always below the fall-quarter peak.

Of the 991 STI students, which includes night school enrollment, 120 are non-residents of the state and six are coeds.

Scholarships Go To STI Students

Seven STI men have received scholarships which total to 1100 dollars.

Hubert M. Howell, GET, received a scholarship for three quarters from the Marietta Lions Club.

Frank A. DeZoort, EET, and Thomas M. Graham, CET, received scholarships for one quarter from the Smyrna Lions Club.

Bobby B. Ragan, MET, received a scholarship for one quarter from the Marietta Kiwanis Club.

Benny J. Dunn, CET; Richard F. Pharr, and John F. Smith, AET, received quarter scholarships from the Regents.

Hornets' Tim Matthews Ready For Final Season

By Rick Shaw

Tim Matthews has returned as first-string catcher for STI's Green Hornets after being chosen to the All-State team last season.

Matthews is not only good behind the plate, but at the plate. The husky, 6'-1", 190-pound catcher batted .417 to lead all players in the state his freshman year.

While at Decatur High School, Matthews was chosen All-Region catcher. During the summer he played for the Decatur American Legion team. He has also played for the Decatur Amateur team and coached a Babe Ruth baseball team.

He turned down a baseball scholarship at Oglethorpe University to enroll in the Air Conditioning Department at STI.

Matthews is not only active on the playing field but also in campus activities. He belongs to Eta Alpha Gamma; Tau Alpha Pi, honorary fraternity; and the Monogram Club

for lettermen. He was also elected president of the Student Council for this quarter.

Concerning this year's baseball team, Matthews seemed optimistic. He considered the Hornets a "dark-horse" in Region 8, but considered them good contenders for the state or division crown. "Rainy weather hurts us every season," he concluded, "but with some hard work we can make it."

He said he considers Coach Lockhart the finest coach he has ever played for, besides being one of his greatest friends.

What about pro baseball as a career? "Well," replied Matthews, "it sounds good, but I haven't had any offers yet."

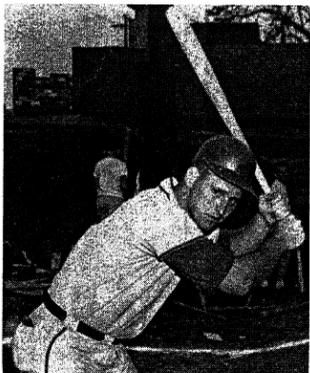

Photo by Jenkins
Catcher Tim Matthews looks toward outfield ready for action.

Hornets Sting Middle Georgia In Doubleheader

STI's Green Hornets gained sole possession of first place in the conference standings with their twin victories over Middle Georgia on April 17.

The first game of the doubleheader went scoreless until the top of the third. A sharp single into right field by Middle Georgia's Elliot scored a runner from second for the first score in the game.

Neither team scored again until the top of the sixth inning. Middle Georgia's Orman led off by being walked. A sacrifice bunt sent Orman to second. A Texas League single by Bryant and an error on the Hornets' shortstop put men on first

force out at home, and the bases were loaded with one out. An electrified crowd witnessed STI's Byers take three straight balls before Middle Georgia called time and sent in a new pitcher. The new, fast-baller threw the fourth ball and walked in the tying run from third.

A scoreless eighth gave way to a thrill-packed ninth. Middle Georgia lost two scoring opportunities thanks to quick Hornet infielders.

Photo by Shaw

The Hornets came to bat faced with a 3-3 tie. Jordan and Matthews both reached base safely. Pitcher Don Morris once again foiled Middle Georgia's hopes by singing in the winning run.

Morris, the winning pitcher, struck out five, walked three, and allowed only six Middle Georgia hits.

Middle Georgia pitchers gave up twelve hits.

A determined Hornet squad put down Middle Georgia's batters 1, 2,

3, in the first inning of the second game. A flurry of singles and a stand-up triple by Morris gave the Hornets a 3-0 lead in the bottom of the first.

Both teams exchanged hits until the third when David and Goliath—(Morris and Matthews) opened up for two more Hornet tallies. Morris had a double.

Middle Georgia scored in the fifth on a Hornet error. The Hornets retaliated as Mike Evans scored from third.

Hornet first-baseman, Rick McLarty scored STI's last run in the bottom of the seventh. He scored from third on a Morris single.

Robert Jordan was the winning pitcher. He struck out seven. The Hornets racked up ten hits in their 7-1 victory. Pitcher Don Morris led the hitting attack for the Hornets by pounding out a 6 big hits—2 triples, a double and 3 singles. He was 6 for 10 in the series. Catcher Tim Matthews followed Morris with 5 hits for 10 times at bat.

URGENT! HELP WANTED!
 Desperate Architectural Student needs experienced architect to design a mid-city motor hotel (for Arch. 223) due April 20, 1965. Contact student in Rm. 274, IMMEDIATELY.

SPORTS MACHINE
\$325.00

 The Honda Sports 50's price is only half the story. It's a gas sipper: 200 mpg. Flashy but sturdy: over 50 mph from 4-stroke 50cc OHV engine.
 Other virtues: 4-speed transmission, manual clutch, cam-type brakes. Sheer fun to own.
