

# THE ENGINEERING TECHNICIAN

Vol. XXIX

Southern Technical Institute, Marietta, Georgia, June 5, 1967

No. 9

## Student Council Starts Crash Service Program

Southern Tech's Student Council, having taken offense at being labelled a do-nothing organization in the last issue of this newspaper, is actively involved in trying to change its impression among the student body. The council has embarked on a program to improve student services.

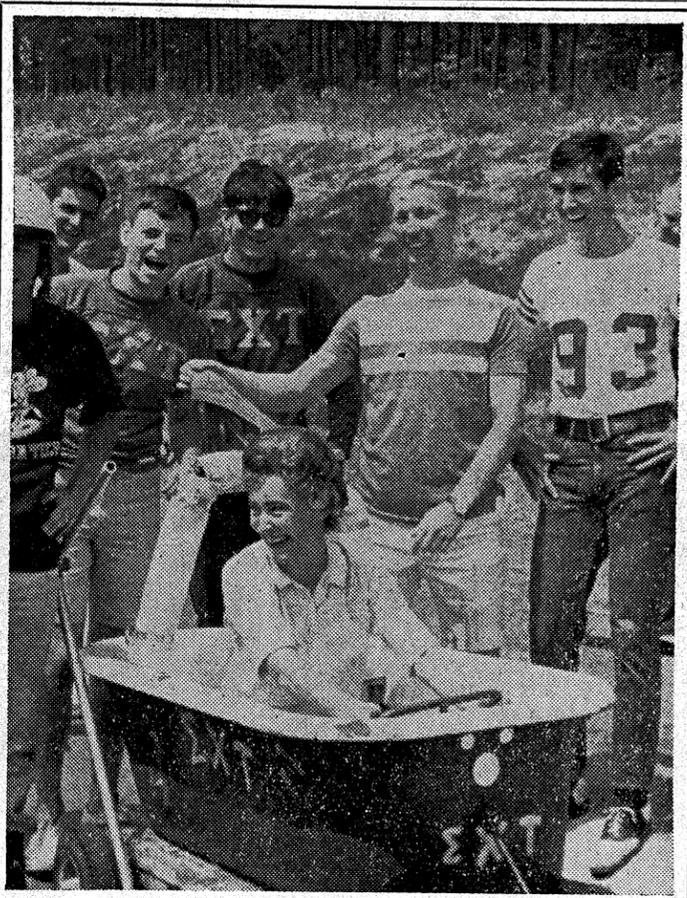

When asked what the council's goals are with this program, Council President Phillip Wade Buckholts explained, "The student council has been dormant entirely too long. We hope that, with the willingness and cooperation of the council members, we can get things moving around Southern Tech as far as student government is concerned. The students should have a voice in campus affairs which concern them. We intend to be that voice."

"With our present program to improve services, we hope to show the students that we are working for them. Many students have asked for a check-cashing service on campus. We are working out details of just such a service now and hope to have it ready for use by the students by next Fall quarter."

Chairman of the Check Service Committee, David L. Corley, explained that the service called for a basic fund of \$200 to be taken from the students' activities fund to back up the plan. The proposed plan would locate the service in the cashiers' office in the administration building. The service would be available to students during regular business hours of the cashiers' office. Corley explained that there would be a fine imposed for any check returned to the office and that grades would be withheld until the checks were taken care of. The plan is now before the Director for official approval.

The council has launched plans for a service which would prove to benefit both students and merchants of the area. What the council described as a "Merchants' Discount Card" is being planned to make available to the students a list of local and area merchants who give discounts. Southern Tech students' chairman of the Merchants' Discount Card Committee, David L. Corley, stated, "This will tell the students exactly where they can go for a good scout on almost anything they want to buy. The merchants are glad to cooperate because of the potential business involved."

Another project presently being pursued by the council is one to have the dormito-

Sylvia Trotter test-drives entry at STI's Second Annual Bathtub Race

ries dedicated and named and to eliminate the present "Number One" and "Number Two" names. When asked about this project, Committee Chairman Vincent L. Wojteczko explained, "If you are a dorm resident and have ever written to someone telling them where you live, you know the embarrassment of having an unnamed dorm. We hope to remedy this situation by naming them."

One of the dormitories is already dedicated and named. The senior dormitory has been dedicated to the late W. E. Norton, former dormitory superintendent for Southern Tech. The dormitory was dedicated shortly after Norton's death. The council is attempting to have the name attached to the east end of the building in the same manner that the other buildings on campus are identified.

The council has several other plans and projects that are still in the discussion stages. Included in these are plans for a registration-day dance next fall quarter. The equity of graduating-senior exemption from exams is being debated by the council in trying to decide if some changes in the present system are needed.

## Applications Are Ahead of Last Year

Applications for both summer and fall quarters are running slightly ahead of last year's numbers.

Mr. Glenn spoke to the senior class at Mt. Zion High School in Carroll County on Thursday, April 13.

## STI Exhibits at NLPGA Meeting

Southern Tech had a booth at the Trade Show of the National LP Gas Association at Chicago, April 28 to May 3. G.E.T. Department Head W. L. Thomas and five students showed slides and ran a tape recording explaining Southern Tech.

## Smith Attends Conference

Paul Smith attended the Cooperative Education Conference at Callaway Gardens, Pine Mountain, Georgia, May 22, 23, and 24. College co-op representatives from the Southeastern states exchange information and ideas at the conference.

## Sutton To Speak At Commencement

H. L. McClure, Director of Southern Technical Institute, Marietta, Georgia, has announced that Dr. J. F. Sutton, Director of Research at the Lockheed-Georgia Company, will be the principal speaker

at Southern Tech's commencement, June 10, 1967. Southern Technical Institute will graduate approximately 100 engineering technicians.

Dr. Sutton holds a Ph.D. in Mechanical Engineering from the University of Michigan and has been Director of Research at Lockheed-Georgia Company since 1962.

These will be Southern Tech's 19th. annual commencement exercise. They will be held in the First Baptist Church of Marietta at 10:00 a.m. on Saturday, June 10, 1967.

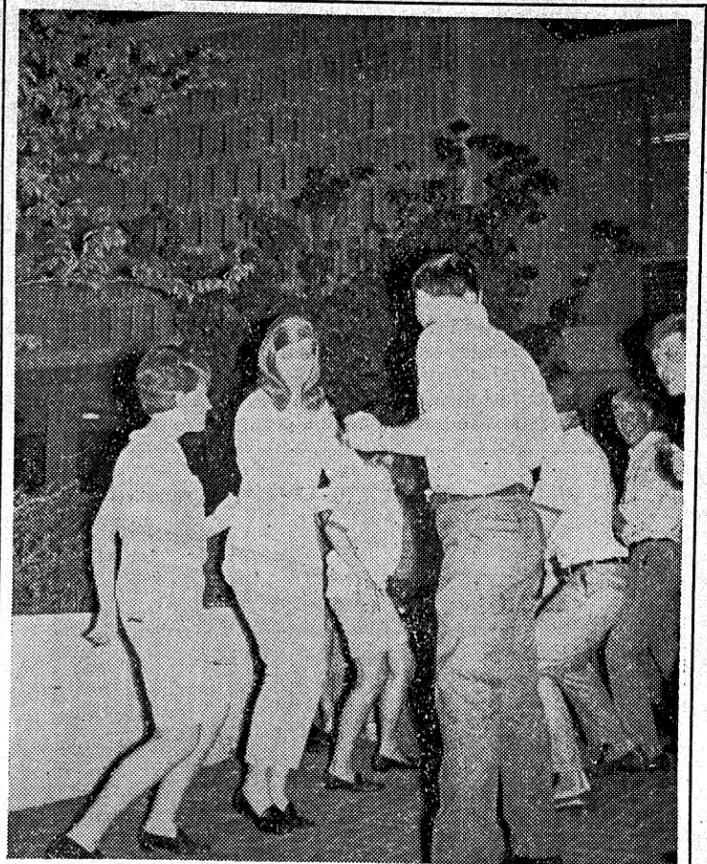

## Eller On 2-Year Leave To India

Mr. Herbert Eller, of the IET department, will spend the next two years in India working with the National Science Foundation.

His family will accompany him on the trip, and they plan to return in the fall of 1969.

Among his duties, Mr. Eller will oversee and coordinate a new phase of India's technical program. The project revolves about India's new group of technical schools.

Mr. Eller entered Piedmont Hospital on Friday, May 12, for surgery. He will be unable to go to India before the end of the spring quarter. He returned June 2.

Students rock out at Second Annual Block Dance.

## ATTENTION FACULTY

As announced by Yardy Williams International Business Machines Corporation has made available at no cost to Southern Tech a complete 1401 computer system to be used in a laboratory to assist in the development of the Electronic Computer and Control curriculum. The computer system will have the following pro-

gramming capability: Fortran IV, Cobol, 1401 SPS-Z, and 1401 Autocoder. Faculty members are invited to use the facilities, but the terms of the agreement with IBM prohibit the use of the computer in any profit-making venture. Faculty and staff are invited to see the computer center whether or not they plan to use the computer.

# The Inequity Of Exemption

by Wade Buckholts

Spring quarter, 1967 . . . a time of jubilation, a time of looking forward to the future; a time of graduation. Concealed beneath the jubilation and excitement of graduation is the careful, painstaking planning for commencement exercises. Commencement day arrives quickly and passes even more quickly. Its necessity as a part of college life and its chronological nearness to the end of the quarter have combined to create a situation on Southern Tech's campus that demands investigation and reevaluation.

In order to have grades posted early for those graduating seniors participating in the commencement exercises, spring-quarter graduates are either exempted from their final exams or are given their exams early. This decision is left to the discretion of the respective professors. This gives the professors the opportunity to compile final grades for the students early so that the students will know where they stand academically.

This system has worked very well since its establishment. Exams in many cases have been omitted for spring quarter graduates and in other cases have been administered earlier than usual. Whichever course chosen by the professors, the outcome has been beneficial to both the students and administration. Grades have been submitted early to the administration, all records completed, and commencement has always been conducted successfully. Everyone concerned has benefitted by the use of the exam-exemption system; or have they?

The system, in its effort to expedite commencement preparations, has overlooked a very important part of the student body. Namely, those seniors graduating in quarters other than the spring quarter. These seniors, because they graduate in a quarter when commencement exercises are not held, do not receive the privileges afforded spring-quarter graduates. These students deserve the same share of special privileges as any other graduates.

If these students comprised a small minority of the annual graduates, it might be understood if they were inadvertently shunned. But they do not comprise a minority; quite to the contrary, non-spring graduates often outnumber spring graduates. In the Summer of '66, seventy seniors graduated. They were followed by 55 graduates in the Fall quarter and by 71 last Winter quarter. These students combine to give 196 non-spring graduates. This spring quarter, 116 seniors are expected to graduate. This year 69 per cent more non-spring graduates than spring graduates have finished their studies. Can these students be ignored?

The present system of exam exemption for graduating seniors has worked well. It has proven itself to be worthwhile, but it just has not been carried far enough. It should be extended to include those seniors who graduate in quarters other than spring quarter. If the system is beneficial when applied during spring quarter, would it not be four times as beneficial if applied year-round?

Installing the exemption plan in all four quarters would benefit administrators by partially relieving the deluge of grade computations that flood the records office following every quarter. Records personnel could post graduates' grades a week early, as they do in the spring quarter now. This early posting of final grades would benefit the graduates by letting them know early if they can accept that job offer, or go ahead and sign up with Uncle Sam. Most graduating seniors, regardless of the quarter in which they are graduating, could put the extra week gained by not having to take exams into good use. If they have accepted a job, the extra week could be used to relocate and get settled in their new homes before beginning work. If military service is forthcoming, the extra week could be used to rest up for the rigors of boot camp.

Whatever the individual uses of the time gained, it, along with the advantages offered to administration, fully justifies the installation of a year-round exam exemption system. The system's installation would effect a needed removal of a system of inequity from Southern Tech's campus.

# Goodbye, So Long, Farewell

by GREG KANE

The Engineering Technician, with this issue, completes another academic year of service to the students, faculty, and staff of Southern Tech.

I am satisfied with the results of the past three quarters, but there is ever so much room for improvement.

Student participation is not a crime, and a student body the size of ours should have no trouble turning out one hell of a paper.

Letters to the editor shouldn't have to be so few and far between. Students should take an active interest (if nothing else) in what is going on.

Campus clubs take up long periods of time making fools of freshman pledges. If each club would use the slightest amount of this time to present notes of interest to the paper, a very impressive club page could be put together.

September will start the ball rolling again, and the editor will probably find that there is more space on the paste-up sheet than copy to fill it.

The reason or reasons for the interest gap is a mystery

to me. If you aren't satisfied with your writing talents, just submit notes to us. Anything that interests you might also interest others. A note on a piece of paper could easily be expanded into a story that will be of interest to many.

The immediate staff members of The Technician have done well with what they had to work with. More student interest will expand the field of material, and a quality publication will result.

At this time, I would like to extend my personal thanks to Professor A. J. Hunkin of the English department. As faculty advisor, Mr. Hunkin has contributed the guidance necessary to make technicians look like amateur journalists.

I would also like to thank Mr. Bates for the great pleasure of his company, and even more so for his fascinating documentary on the dangling participle.

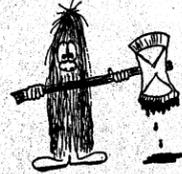

My associate editors, Wade Buckholts, and Roger Hicks have done a fine job this year, and I consider it a pleasure to have had them on the staff.

Dolly Copeland, my beautiful feature editor, has done a very fine job this year; don't have to tell anybody how nice it is to have her around. Dolly's personality more than makes up for her typing ability.

Michelle Muller has done a fine job of circulating the TECHNICIAN through the state and the nation. Thanks, Michelle.

If I missed anybody who believes he should have been mentioned, please accept my apology and give yourself a pat on the back.

I hope we can see more individual participation in the Fall, but until then, THE TECHNICIAN wishes everybody a pleasant and enjoyable summer.

A. D. Extends Graduation Gradulations

# Southern Tech And The Foreign Students

by Fabio Castro

In the last few years Southern Tech has been a growing center of education for foreign students. Actually there are 28 enrolled, most of them are full time students. According to a survey recently taken, the following countries are represented: Israel, Colombia, India, Nicaragua, Venezuela, the Philippines, El Salvador, the Dominican Republic, and Argentina.

Southern Tech is not a big school but it is widely known and recommended even out of the U. S. This is due to the technical education offered which is badly needed in developing countries. Most foreign students have similar reasons for coming to STI; such as to improve their position in the job they are holding back home, or just to receive a good education.

It is natural when changing environments to have good and bad impressions. In the case of foreign students, the change is quite big. The impressions that most of them have is excellent, with a few minor exceptions.

Such things as lack of consideration by some instructors, no counseling or advice specifically for foreign students, and the quality of cafeteria food, are among the exceptions.

to new and different ones.

In general, the impressions toward the people of the U.S. are very good. Of course people behave in similar manners all over the world.

The customs are probably the biggest difficulties among foreign students. For them the hardest part is to change the way of thinking toward certain things, and to adopt

Considering more specific the problems they have face, we can see that language is the main one.

Following graduation, some foreign students are going back to their country to work for the company that sent them; others will practice their career in the U.S. then go back to their home country.

FACULTY ADVISER—Alfred J. Hunkin

The Technician Needs You

# Southern Tech Forum

Dear Mr. Editor:

I have talked to a lot of students here at Southern Tech who have been discussing the idea of having the snack bar open on Saturday and Sunday. Many students have to stay here during the week end and the cafeteria is not open then. On the week-ends the students could eat at the snack bar and the school could raise money this way. This would be a good inexpensive place for students to buy their meals. I hope you will agree that this is a worthwhile idea.

Sincerely,  
Interested

I agree. Ed.

Dear Editor:

Your publication has an important story to tell—about college students working with disadvantaged youth this summer.

As Chairman of the President's Council on Youth Opportunity, I have written the enclosed open letter to college students urging them to participate in community projects aiding disadvantaged young people.

I ask your help in publishing my letter and supporting its message editorially. Your call for student involvement, student volunteering, student service can make this one of the great constructive stories and achievements of the year.

You can also help by focusing interest on specific projects in your area in which students can serve. The Mayor's office, the local Community Action Agency and the voluntary organizations coordinated through the United Fund can inform you about summer programs. The booklets I have enclosed give the names and addresses of people to contact for Federally aided programs such as Head Start, VISTA, and the Job Corps which need student volunteers. Your paper can make this information available to all interested students on your campus.

Won't you consider today how your publication can foster student participation in community summer programs? Write to me if you need further information—Washington, D.C., 21500—and please send me copies of your articles or editorials, so that I can inform others of what you have done.

Sincerely,  
Hubert H. Humphrey

We will consider the matter of our next meeting. Thanks.  
Ed.

Dear Mr. Editor:

I would like to commend the teachers of Southern Tech for the fine job that they are doing. I feel that they are the best staff of teachers we could ask for.

They are very understanding and always willing to help students.

The students of Southern Tech should respect them and be very grateful for the great influence they will have on their lives.

Jerry Purser

And a solid gold Brownie button for you! Mr. Ed.

Dear Mr. Editor:

Don't you think that the registration process in STI is inadequate? Most STI students think so. Along the year each quarter, registration causes confusion, trouble, boredom, and weariness among fellow students.

We know this is not the first complaint that you have heard about this problem, but we want some immediate action by the responsible individuals.

It is impossible that this famous and wonderful college is not able to solve this particular problem.

We will be very happy if STI authorities try to consider and to solve this troublesome process in the near future.

Very truly yours,  
I.S.

Dear I. S. your interest in various campus situations is greatly appreciated by THE TECHNICIAN. Ed.

Dear Mr. Editor:

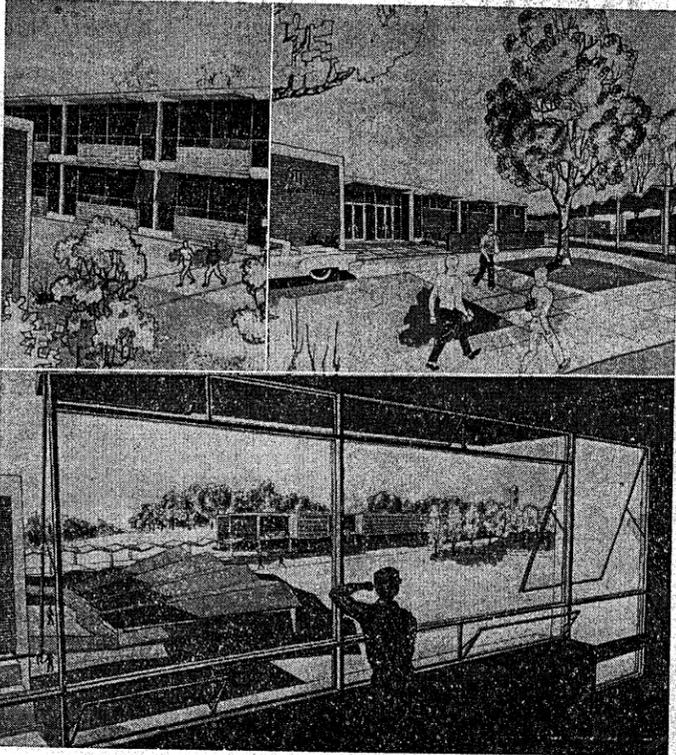

Sad is the word to describe the state of student interest and activity at Southern Tech. There are numerous organizations on campus but the majority of them could be classified as "do-little" groups.

Persons having graduated from college were asked once what they had gained most in college. Most said they held the leadership, maturity, and participation in campus organizations higher than they did any educational achievements. I am sure Southern Tech is no more behind than many other colleges in magnitude of student activity, but STI could be greatly improved.

STI students have the talents and capabilities to make campus life much more interesting and enjoyable. All it would take is a small amount of motivation.

Sincerely,  
D.I.B.

The problem is quite obvious, however, you as a student, must take the first step. Ed.

Dear Mr. Editor:

Southern Tech grounds are very well kept and very attractive to one's attention, but there is one objection I have to the grounds in rainy weather.

Sidewalks here and concrete walks are very sufficient near the classroom buildings, but there is only one which goes from the administration building to the dorms. Another one is needed from the dorm directly to the electrical building, and even for more convenience, another from the dorm to the civil building.

On rainy days the grounds near the dorms are quite messy and the placement of walkways in the above-mentioned places would be a great comfort to the STI students.

Sincerely,  
Robert H. Hawkins

There will be construction started on those walks as soon as the new library is finished. Until then, wear your swim fins. Ed.

have a chance to get something to eat.

Sincerely,  
Hungry at Night

Study, Did you say study. Are you a bridge major? Ed.

Dear Mr. Editor:

Whatever happened to the "Elective system" at Southern Tech?

The meaning of the word "elective," as stated by Webster is: "an optional course in a school curriculum." A student understands "elective" as a point average builder. Southern Tech's officials know we have many who need to build their point average, and especially at time of graduation. But nobody ever hears of elective courses and many do not know what one is!

We repeat, what happened?  
 $E=mc^2$

Well, Yes. As a matter of fact but . . . No Gee Wiz . . . I don't know. Ed.

Dear Mr. Editor:

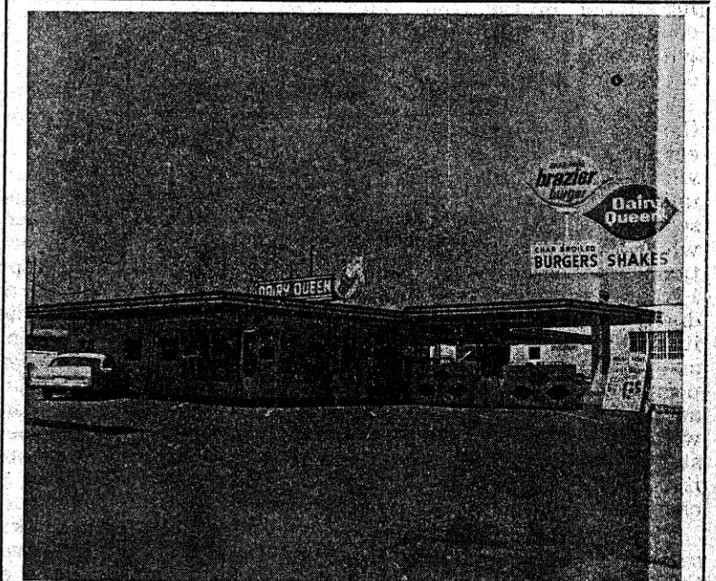

I was very disappointed when I learned that Technicians Day would not be held this year. Much has been written about Marietta's opinion of Southern Tech and I believe that Technicians Day is an excellent time to not only show future students the type of work that we are doing, but to show the people of Marietta that we are an engineering college and not just another trade school.

Sincerely,  
Larry Small

We agree, but the matter lies in the Administration Building. Ed.

Dear Mr. Editor,

Why doesn't the Snack Bar stay open at night? If it stayed open until about nine or ten o'clock dormitory residents wouldn't have to go out for food. This would allow more time for study. Also, night school students would

# EET's IBM 1401 Computer Ready

PROGRAMMER'S CONSOLE ON 1401

In the last issue of the Engineering Technician there was an article announcing the installation of the IBM 1401 computer. In this article I will explain the purpose of each unit.

The main control unit for the system is the 1401 Processing Unit. This is the unit which controls all the other units in the system. It also serves as the location in which all the arithmetic functions are carried out. The 1401 can add two 5 character digits in 0.000230 second. In its own memory unit, known as core storage, it has the capacity of storing 4,000 characters. The 1406 Storage unit, with its 4,000-character core storage, extends the capability of the system to 8,000 characters.

The 1402 Card Read Punch serves as the main input to the system by means of punched cards. It can read these punched cards at the rate of 800 cards per minute. The punch unit of the 1402 can serve to output data in the form of punched cards at

the rate of 250 cards per minute.

The 1403 Printer serves as the main output unit. It prints by means of a chain of type which is continuously rotating. The 1403 can print 10 one-hundred thirty-two character lines in one second.

Serving as auxiliary storage are the three 7330 Tape Units and the 1311 Disc Storage Drive. The 7330 record data on 3/4" magnetic tape much like a home tape recorder records music. The data are recorded at a density of 560 characters per inch. This means that a total of 14 million characters can be recorded on a single reel of tape. The 1311 Disc Storage Drive records data on a series of magnetic discs, which are shaped much like records. These discs revolve at 1200 RPM and have the capability of storing 2 million characters.

The first IBM 1401 was installed in 1960. The system normally rents for \$4,000 to \$8,000 per month.

## Holladay Speaks At AAJC Workshop

Hap Holladay will speak on curriculum at the Workshop of civil engineering technology consultants. The Workshop is a project of the American Association of Junior Colleges to set up a program to aid junior colleges that want to initiate civil engineering technology curricula. About forty people will attend the Workshop May 17, 18, and 19.

## Summer Registration

Southern Tech will register for the summer quarter on Monday, July 3. Registrar L. Y. Bryant, in reminding students of this date, pointed out that misunderstandings have arisen about the date.

"In selecting the date for registration—more than a year ago—we wanted to avoid losing any time," Bryant said. "In a program as tightly packed as ours, we can't afford to waste a day."

Bryant said he had heard that some students and perhaps a few faculty members had thought that Monday, July 3, would be a holiday. The next day, July 4, will indeed be an official school holiday, Bryant pointed out. Students will then return to college to start classes on July 5.

## Special Programs Offered

This summer Southern Tech will run a number of special institute - programs. College officials have announced special institutes or other programs for The Tumpane Company, Inc., Southern Railway System, and city planning aides.

Starting dates for the programs are as follows: The Tumpane Company (actually, Commonwealth - Tumpane Company, Limited) June 12; planning aides—July 5; and Southern Railway System—July 10.

Since 1913 SERVING THE NEEDS OF A GREAT AND GROWING COMMUNITY WITH HIGHEST QUALITY MATERIALS

W. P. STEPHENS LUMBER CO.  
Stephens Quality is your best assurance of Economy

## Southern Tech Plays Host To Visiting Groups

Two rather large groups of visitors will be on the campus, one group on Tuesday, May 16, and the other on Thursday, May 18. The Tuesday group will be from the Spartanburg County Technical Education Center, Spartanburg, South Carolina. On Thursday from 2:00 to 4:00 p.m. approximately forty persons from a Civil Engineering Workshop in Atlanta will inspect the C.E.T. Department

at Southern Tech. The Workshop in Atlanta is sponsored by the American Association of Junior Colleges, Washington, D.C.

Approximately twenty-five seniors from Central High School, Carrollton, Georgia accompanied by their counselor and two other faculty members, toured Southern Tech on Wednesday, April 26. Bill Glenn helped to arrange the visit and was the STJ host.

## Student Council Minutes

The Southern Tech student council met Thursday, May 18. At the last two meetings of the council a quorum was not made but several items of the agenda were discussed. These included the possibility of obtaining a student discount system from Marietta merchants; and the idea of originating a check cashing system on campus. Finally clarification was made concerning dedication of the Southern Tech dormitories.

At the previous meeting of officers were elected. The May 18 meeting met a quorum and the council voted on and passed the Constitution of the campus radio station, WSTB. Meeting of May 11, 1967 11:40 A.M.

Meeting was called to order by President Buckholts. Roll was called. Quorum was not met.

Minutes of the last two meetings were approved.

Discussion ensued on:

- (a) Reprinting Constitution
- (b) Dorm Restrooms (Towels, etc.) Martinez will talk to plant manager
- (c) How to secure better attendance
- (d) Senior exemption other than the spring quarter (A petition would have to be presented to the faculty and administration.)

Motion was heard for adjournment.

Meeting was adjourned. Respectfully submitted, David Corley Secretary

## McClure Serves As Vice Chairman

Hoyt McClure is a member of the Southern Association team which evaluated the Norfolk Division of Virginia State College April 23-26. As vice chairman of Region I of the ECPD Engineering Technology Committee, McClure participated in the accreditation inspection of Waterbury State Technical Institute, Waterbury, Connecticut, and the Thames Valley State Technical Institute, Norwich, Connecticut, from May 7 through May 12.

## Half-price to college students and faculty: the newspaper that newspaper people read. . .

At last count, we had more than 3,800 newspaper editors on our list of subscribers to The Christian Science Monitor. Editors from all over the world.

There is a good reason why these "pros" read the Monitor: the Monitor is the world's only daily international newspaper. Unlike local papers, the Monitor focuses exclusively on world news — the important news.

The Monitor selects the news it considers most significant and reports it, interprets it, analyzes it — in depth. It takes you further into the news than any local paper can.

If this is the kind of paper you would like to be reading, we will send it to you right away at half the regular price of \$24.00 a year.

Clip the coupon. Find out why newspapermen themselves read the Monitor — and why they invariably name it as one of the five best papers in the world.

## Profs Teaching In India During Summer Quarter

Professors Ralph P. Youngblood and Edgar T. Fowler of Southern Technical Institute, Marietta, Georgia, are teaching in India this summer. They are participating in summer institutes for staff members of Indian Polytechnic schools. These institutes are co-sponsored by the National Science Foundation and the U. S. Agency for International Development. Professor Youngblood will teach electronic theory and applications in Allahabad from May 15 to July 15, 1967. Professor Fowler will teach civil engineering technology in Bhopal from May 1 to July 1, 1967.
