STI Becomes 'Coed' Again As Miss Sarah Melton Enrolls

There has been a great deal of talk and excitement among the students here at STI about whether or not we would have coed this fall. Now, with the arrival of Miss Sarah Melton, those worries can be put to rest. And not only is she a beautiful Miss America contender, but she also happens to be a student here! There was a lot of speculation about what she would study, but it was later revealed that she planned to major in Business Management. Her presence on campus has already brought a new level of excitement to the student body.

SE Fair Exhibits Show School Work

About the first week in October the students of the Southern Technical Institute will exhibit the work of the school to the public. The exhibit will be held at the T. N. Henson Building in the downtown area. The students will be exhibiting their work in all areas of the school, from woodworking to electronics. This is a great opportunity for people to see what the students are learning and to gain insight into the future of the school's programs.

Technician Staff Doubles In Size

The Technician staff has finally received a much-needed shot in the arm. More than ever before, the student newspaper is needed to keep the campus informed and up-to-date. The new additions to the staff have brought a fresh perspective and new ideas to the paper. The Technician is now a much more well-rounded and effective publication.

Departments Head Taylor Demonstrates Gas Fuel Equipment

The Gas Fuel Department, the most recent addition to STI, has been a huge success. The department has been well-received by students and faculty alike. The department features state-of-the-art equipment and is staffed by highly-qualified instructors. The department is expanding rapidly and is expected to continue to grow in the future.

Robert Lynch To Deliver STI Commencement Address

The annual STI Commencement will take place on Wednesday, May 8th, at 11 AM in the T. N. Henson Building. Robert Lynch, president of the Atlantic Steel Corporation, will deliver the commencement address. Mr. Lynch is a well-known executive and is expected to deliver an inspiring speech to the graduates.

STI Gives Lunch To Honor Alumni

The Alumni Association will host a luncheon in honor of the school's alumni on October 15th. The event will be held at the STI Dining Hall. The luncheon will begin at 12:00 noon and is open to all alumni, family, and friends. The event is a great opportunity to reconnect with old friends and to celebrate the achievements of the alumni.

Counsellors Rule On Ring Purchases

To place a real value upon the STI ring and to make the wearing of the ring more meaningful, the Counsellors recently recommended and the Administrative Council adopted a set of regulations which go into effect immediately. On the following requirements must be met before a student can purchase a school ring:

1. He must be in his fourth quarter of work and past the pre-registratio

2. He must be in good academic standing.

3. He must present to the Treasurer a form from the Registrar which states that he meets, at that time, all requirements for the purchase and for graduation.

In case of students with a provisional registration, the Counsellors recently recommended and the Administrative Council adopted a set of regulations which go into effect immediately. On the following requirements must be met before a student can purchase a school ring:

1. He must be in his fourth quarter of work and past the pre-registration date for work of his fifth quarter.

2. He must be in good academic standing.

3. He must present to the Treasurer a form from the Registrar which states that he meets, at that time, all requirements for the purchase and for graduation.
The Technician
Published monthly by the students of The Southern Technical Institute, Chamblee, Georgia.

The Southern Technical Institute is the Georgia Institute of Technology's two-year, coeducational, boarding unit located at Chamblee, Georgia. It was established in March, 1948, to train technicians in industries in three fields: Building Construction, Civil, and Industrial Technology (Mechanical and Industrial). The Technician provides suggestions, contributions, and criticisms but insists that these communications be signed and limited to 300 words.

Attention, New Students!
Several “Ifs” and Antidotes

On Page 1 Director L. V. Bryant welcomes fall quarter students. On Page 3 some friends of The Technician wish to add from the student's viewpoint remarks to the ideas made previously by the editors to make several suggestions which should prove helpful to them.

We are most happy to have you in Southern Tech. In choosing it you have chosen a school in which the future is bright. We hope you will do your best to equipment, instructors, and methods of teaching. To make these advantages are to be added the opportunities to participate in all the extra-curricular activities that other colleges offer.

Naturally, you will have problems—some major, some minor. For a while you will have to go for what, or whom to see for that and. Hoping to be of service to you, The Technician has read these materials in order to arise and attempts to give assistance in each imagined case.

If you become ill—Drs. Kerr and Mandenbush, office in the Counseling Office. Call at your leisure. If you must be hospitalized, you may use the Ga Tech infirmary free for two nights.

If your veterans affairs become entangled—See Miss Westbrook (Bldg. 24, Room 11); what answers she doesn’t know she can find out in a jiffy.

If you are absent from class—See Mr. Bryant, the Registrar (Bldg. 24, Room 11); some reasons for absences are acceptable; many are not. Have a good excuse; explain it to the Registrar and then to the Technician.

If you are called into any branch of the armed service—See the appropriate officer or official in charge; he will tell you all he can.

If you become of draft age while in STI—See Mr. Carroll (Bldg. 24, Room 12) and fill out the required forms of course of study. If a non-veteran, first get written permission from your parents, then apply for the benefits you desire. If a veteran, see the one whose department you are joining; carry all the things in the Register’s office that your course adviser’s permission; then see the Registrar and Miss Westbrook.

If you have problems concerning your course of study—See your Instructor or the Registrar.

If you wish to drop a subject—Get written approval from your Course Adviser. Then see the Registrar.

If you want to change your subject schedule—Consult your Course Adviser then see the Registrar.

If you wish to withdraw from the Roll—See Mr. Bryant. Should you wish to withdraw if non-veteran, you will have to fill out the required forms of course of study. If you are a veteran, get written permission from your officer then see the Registrar.

If you have problems concerning your course of study—See your Instructor then see the Registrar.

If you are failing—Work harder. Try to analyze your difficulties and correct them. Seek extra help from your instructor. Talk matters over with your Course Adviser. Then see the Registrar.

If you are active duty Navy reservist—See Mr. Bryant the Registrar.

If you are commissioned as an officer—See Mr. Bryant then see the Registrar.

If you are absent from class—See Mr. Bryant then see the Registrar.

If you wish to withdraw—If non-veteran, obtain written permission from your parents first, then get from Mrs. Lomax, the Treasurer, the withdrawal form, and obtain all signatures required on it.

If you are failing—Work harder. Try to analyze your difficulties and correct them. Seek extra help from your instructor. Talk matters over with your Course Adviser. Then see the Registrar.

If you are failing—Work harder. Try to analyze your difficulties and correct them. Seek extra help from your instructor. Talk matters over with your Course Adviser. Then see the Registrar.

As you observe this column the first thought which might come to you is, "Has John Yokans come back to write this article?" And you are justified in your thinking, since it was Mr. Yokans who started this column in the early stages, but since his departure it has been handled by the efforts of the new writer Mr. Glaze. Mr. Yokans, if you want to compare with those of Mr. Yokans, and you do not think that the columnist that this column should not be forgotten, and it is hoped that his efforts will do justice to his fellow students.

Glade Allen once declared, "My husband will never chase another woman. He's too fine, too decent, too old." Mr. Yokans, if you want to compare with those of Mr. Yokans, and you do not think that the columnist that this column should not be forgotten, and it is hoped that his efforts will do justice to his fellow students.

The Corn Crop
As It Was Gathered

These Linershicks! There was a young fellow named Sparks. Who drank till he ruined his kidney. He shriveled and shrank. As he drank, but had a good time doing it, didn't he?

In the same issue of the Southern Technical Institute, Chamblee, Georgia, Volume 8, Number 1, Summer 1950, there was an article on the importance of proper nutrition. The article was written by Dr. Charles Pettit, associate professor of nutrition at the University of Georgia. The article was entitled "The Importance of Proper Nutrition." It discussed the importance of proper nutrition in maintaining good health and preventing disease. The article was well-written and clearly explained the importance of a balanced diet. It was a valuable resource for those interested in nutrition. The author used scientific evidence and statistical data to support his arguments. The article was also readable and easy to understand. It was a pleasure to read and I would recommend it to anyone interested in nutrition.
MANY 511 Clubs Utter New Students Much Pleasure, Profit

LYNNWEN W. SCHILB

NOTE — Feeling that all ISTT students stand to gain much profit from knowing what clubs exist on campus, we have set out to inform the student body on the existence of the many 511 clubs. This information is gathered from the officers of the clubs.

The purpose of this club is to provide an incentive for a higher participation among the students of the Institute, to promote participation in activities and athletics, and to work for the establishment of the Standards of ISTT.

The club meets every week in Room 18, Building 9, at 12:30 P.M. in the auditorium of Mechanic Hall.

MACHINERY CLUB

The purpose of this club is to promote and establish a profitable incentive in the Mechanical Engineering Technology and to promote sports and other activities for the members of the School of Atlantic.

The club meets twice each month in the Mechanics lounge on the main floor of Building 11.

The President is Lawrence Southard; vice president, William Grant; instructor, Jack Bishop; and treasurer, John Anderson.

MONOGRAPH CLUB

This club has as its purpose the development of sportsmanship and athletics at ISTT. To be eligible for membership an athlete must earn a letter in a competitive sport.

Varsity athletes act as department coaches for intramural activities and also act as officials for instructional contests.

Officers of this club include the following: John Stanwalsh, president; Jim Davidson, vice president; and E. R. Worsley, secretary.

This club meets in the Conference Room, Building 24.

ELECTRICAL CLUB

To provide an incentive for Electrical Technology students, the Electrical Club strives to promote interest in the electrical field.

This club is open to Electrical Technology students, who may become eligible for membership by applying to one of the following officers: Harry A. Smith, Jr., president; R. T. Watkins, vice president; and E. T. Worsley, secretary.

Meetings are held at least twice a month in the Electrical Technology lounge, Room 6A, Building 11.

SOCIETY OF CIVIL ENGINEERS

The Society of Civil Engineers serves to stimulate more interest in Civil Technology and provide a meeting place to promote fellowship within the department.

To become eligible, a student in Civil Technology must have completed one quarter's work and must have made a genuine interest in furthering the reputation of the department and the institute.

This club meets on Thursday afternoon at least twice a month at 7:00 A.M. in the Civil Technology Building 13.

Athletic Field Now Ready: Intramural League Revised

Those of you who are old timers at Southern Tech from the 1949-1950 season will no doubt remember that the "Red Dust Bowl" adjacent to the gym has been renovated and is now a green pasture awaiting the arrival of the fall quarter's intramural football schedule. The field has been completely graded and seeded with grass and is now in excellent condition. This football and baseball field has been "in the future" for the students at STT since the school opened and at last it has become reality, so there should be a renewed spirit of brighter outlook for everyone concerned.

The intramural league has been divided into eight teams to give each department a team of its own and to create more interest in this phase of athletics. More games have been scheduled than in the past in order to give each team the opportunity of playing every other team in the league at least one time. The standings will be calculated on the same basis as baseball standings, and once time will not permit a playoff, the team in the number one spot at the end of league standings will be deemed campus champion. With this in mind, be sure to turn out and help your department team on its way to the top spot in league standings. The games will be played at 3:00 P.M. on Monday, Tuesday, Wednesday, and Thursday beginning October 2 and ending November 25. For any additional information, contact the intramural manager for your department or Coach Frank Johnson. Below is a complete schedule for the fall quarter.

Much Expected Of Harriers In Fall When Vets Return

Griffon, Tatums, Gallett, And Wall Of Last Year's Team To Provide Nucleus

The outstanding team at Southern Tech has herefore been the outstanding intramural team, and from indications it will come to be in the limelight when fall arrives with our leftover—John Griffon, Jack Wall, Webb Tatums, and Trey Gallett.—will be back to represent STIT at the meets and to give the freshmen a few vital pointers on "How to Win Fame on the Cinder." With a year's experience behind them and with the aid of several former high school hill climbers and killers expected to enroll this fall, the boys should be able to bring home the bacon.

Big Squad Needed

If you can run three miles, or even one hundred yards, the welcome mat is out to you to try out for the cross-country team. Coach Johnson is hoping to have one of the best cross-country teams in the history of the school this fall, and this can be done only by having good runners. Don't be afraid to come out just because you have never done anything running because several of our former letter winners had no previous experience before coming to Southern Tech. The time and date for practice will be announced in the near future, and Coach Johnson will be very pleased to see a big crew of long-winded boys who would like to "try through" the hills and dales.

Scholarships In Gas Fuel Field

Continued from Page 1

The intramural team at the STIT Gas Fuel Department is expected to enter some phase of the gas fuel industry after graduation. Scholarships given by companies of Georgia are for $400, out-of-state scholarships are for $500. Each pay for tuition and other incidentals. The students will have to pay for their room and board.

Some of the students and their sponsors are Lawrence L. Parlett, Methvenville, Md., sponsored by Parlett Gas Company; Waldorf, Maryland, and Neal Allen Daugh- nose, sponsored by Daughnose Distribution Association, Hyannis, Mass. One scholarship has been split between two students of Amherst High School, Amherst, Ga. The qualifications of the two students were so nearly equal that it seemed unfair to choose between them. If the principles of these two students to Southern Technical Institute is satisfactory, they may be assured of additional funds for the completion of their second year.

The gas fuel industry has a special interest in the Gas Fuel Technology Department. They worked closely with officials at the Institute in developing the Gas Fuel course at Southern Tech. Mr. John D. Sewell, assistant director, has indicated that the awarding of Gas Fuel scholarships is just beginning to get underway. As soon as details can be worked out with the gas companies, he expects several scholarship winners to be enrolled each quarter.

Bright Forecast For Basketball Seen As Large Enrollment Looms

Southern Tech is making a determined bid to become one of the outstanding powers in the Junior College Intramural Basketball Conference this fall and get recognition for some of the defects of last season. In the past, the lack of student participation and student support has been the leading factor in Southern Tech's failure to stack up with other schools on the junior college level. However, the outlook is much brighter this fall than it has been in the last two seasons.

The large enrollment expected for the fall quarter should bring it with a number of former high school stars who will add a lot to the STTI basketball team that affords the not infrequent "outfield" position in basketball.

Among with these athletes will come many new students who will be on hand to root for the Harriers and give the boys more to fight for.

New Athletes Expected

In addition to the new athletes expected, several members from last year's varsity squad will be back to supply the experience that is so desperately needed on any basketball team. Among those who will return this fall are John Stambaugh, Joe Ret- tagh, John Griffon, "Bush" Binn, Fred Gregg, Byron Versall, John Daniel, and Bob Siegel. With these four and a few others, the STTI basketball team at the end of the season is sure to turn out and help your department and Coach Johnson will be very pleased to see big crew of long-winded boys who would like to "try through" the hills and dales.

"B" Team Also

Besides the varsity basketball team, Southern Tech also has a "B" team that affordsthe "not quite good enough" basketball players a medium through which they can get to the show and strut their stuff for STI. The "B" team has, in the past, given many good performances on the hardwood and Coach Johnson is expecting a good squad to take the floor for the junior varsity games.

The call is out for all students who think they can make history in a basketball uniform, so don't be bashful fellows; be there for the first day's practice, at 4:30 Octo- ber 2, at the STT gym, and maybe you too can become a Green Her- net and help Southern Tech on its way to a successful basketball season.
