

## MR. JOHNSON WELCOMES NEW STUDENTS TO STI

As Director of the Southern Technical Institute, I wish to welcome all of you to our school and to congratulate you for your wise decision to continue your education. You are preparing a better future not only for yourselves and your families, but for your community, state, and country as well.

You are making a considerable investment in time as well as money for your education. But education cannot be sold by the pound, gallon or bushel; so whether you get the most or the least for your time and money depends on you. Take full advantage of our excellent instruction and specialized equipment. The record you make here is a measure of your future success—make it the best record possible.

In addition to the theory and know-how of your technical field, you will need to develop the ability to write and speak effectively, the knack of organizing and directing the work of others, and the ability to work with and influence your associates. Extracurricular activities are important in developing these abilities; they are a vital part of your college education, and you should take an active part in them.

The faculty and administrative officers and staff are always at your service. The Department Head of your specialized field is your academic counsellor. Feel free to go to him for advice and counsel at all times.

I sincerely wish all of you a successful and happy sojourn at Southern Technical Institute.

L. V. JOHNSON

## STI Becomes 'Coed' Again As Miss Sarah Melton Enrolls

Things are going to brighten up, men, because, starting the fall quarter, there will be another coed on the campus at S. T. I. Her name is Sarah Elizabeth Melton, and she is the winner of one of the William Pratt Heath-Coca-Cola Scholarships. The other winner, Wilbur Noles, is already attending school here.

Following are a few pertinent facts about these people. Miss Melton is from Statesboro, Ga., where she graduated from high school in 1949 with an average of 95 for the four-year period. She attended Georgia State Teachers College for one year, and her physics professor states that she has a very keen interest in science, particularly the side related to a technician's training. The professor also states that during her three quarters she was at the top of a class of 35 people.

Mr. Noles is from Aragon, Ga. During his time in high school he played basketball (Coach Johnson, take notice) and was a staff member of the school paper. His high school transcript shows one "B" and the rest "A's," which fact

bears out the statement that his I. Q. is rated at 126. Mr. Noles is on his own now, but in September the scholarship will take part of the load of his expenses.

The Coca-Cola Scholarships are awarded to students on the basis of their scholastic standing, their character and integrity, and their need of help of this sort. So far only two have been awarded, but two more are to be given if suitable applicants can be found. The amount of the award is approximately \$225 per year, which is applied to the student's tuition.

## Technician Staff Doubles In Size

The Technician has finally received a much needed shot in the arm! Yes, as the masthead will indicate, many new members have joined the staff recently in the largest mass participation move that this writer has witnessed in some five quarters here at STI. The men who joined the staff and participated in this issue of The Technician are Hugh Edwards, Henry A. Smith, Truman Calhoun, L. W. Schilb, Charles Pettett, Jesse Bagwell and Jay Eaton.

That isn't all either! While the above men have already become active, there are several other students who have expressed the desire to become associated with the paper in the near future!

These students are certainly to

## SE Fair Exhibits Show School Work

About the first week in October the Southern Technical Institute will be represented at the Southeastern Fair for the third consecutive year. Exhibits from the various departments will be on display as an example of the school's function and progressiveness.

Featured in these exhibits will be several model homes from the Building Construction Department. These models will be well illuminated by indirect lighting and will have moving parts in them. The Industrial Department will feature plant layout using miniature models. The Mechanical Department will feature projects made in the sheet metal, general metal, and wood shops such as screw jacks, jigs and electric grinders. The Radio Department will have on display a color organ and a television set along with other electronic equipment.

The Gas Fuel Department, the most recent addition to STI courses, will be represented for the first time. Various companies have contributed to this department, for exhibit, parts of new equipment recently invented for use in Gas

## Fall Term Begins September 25; New Men To Total 150

Registration Tips Offered To All Students; Three New Instructors Employed

STI school bells will knell the passing of the summer quarter on September 9, and after a brief recess things will again come to life on Monday, September 25, which date marks the beginning of the 1950 fall quarter.

Registration will begin at 8:00 o'clock in the morning. All students registering for the first time will report to Room 8, Building 13. Students with transfer credits report first to the Registrar, then to Room 8. All returning students will follow the same procedure as followed during previous quarters.

Registration day is a busy day. Get registered and avoid a penalty. There is a penalty for late registration of from \$2 to \$5 depending on the number of days the student is late.

The calendar for the fall quarter is as follows:

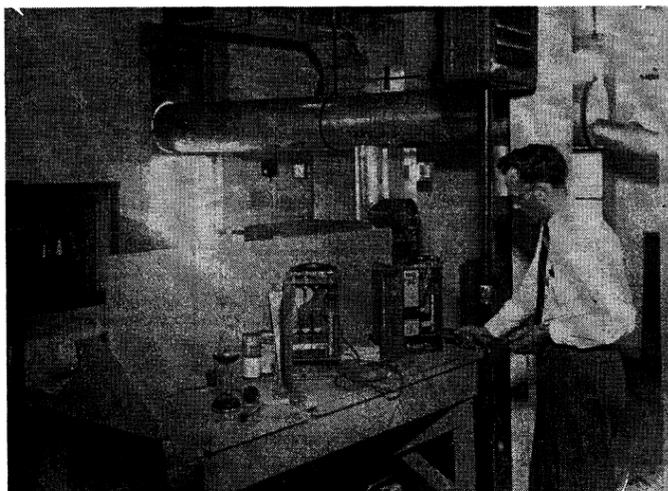

- September 25—Registration.
- September 26—Classes Begin.
- September 30—Last day for registration.
- September 30—Last day for adding subjects to study list.
- October 17—Last day for dropping subjects without penalty.
- November 4—End of deficiency report period.
- November 23-25—Thanksgiving recess.
- December 16—End of term.
- December 17—January 1 inclusive—Christmas recess.

According to Mr. John D. Sewell, Assistant Director, Southern Tech is expecting about 150 new students. This number will bring the school enrollment up to about 400. Many of these new students will be from other states.

Among the many new faces there will be three new instructors: Mr. Robert W. Hays in the English department, Mr. Richard Freeman in the Mechanical department, and an additional teacher, yet to be selected, in the Industrial Department.

Mr. Hays will replace Mr. Terrell E. Greene, head of the English department, who will leave STI at the end of the summer to teach and continue his work for the Doctor of Philosophy degree at the University of Southern California. Mr. Freeman will take the place of Mr. D. G. Klatt, who has resigned to return to his home state of Wisconsin.

## Department Head Taylor Demonstrates Gas Fuel Equipment

## Mr. Robert Lynch To Deliver STI Commencement Address

81 Students Will Be Awarded Diplomas In Exercises To Be Held At 11 A.M. September 9

MR. R. S. LYNCH  
Commencement Speaker

Mr. Robert S. Lynch, president of the Atlantic Steel Company, will deliver the commencement address at the Southern Technical Institute graduation exercises to be held on the school campus on Saturday morning, September 9, beginning at 11 o'clock.

On this day STI will award diplomas to 81 seniors in seven technological fields. Fifty-five of the graduates, however, finished their work at STI on June 10 and are now working in various industries throughout the country. Twenty-six men will complete their work at STI at the end of the summer quarter.

Georgia will be represented by 69 of the graduates. Twelve members of the class are out-of-state students.

### BC Department Leads

The Building Construction department has the largest number of graduates, 18. The Heating and Air Conditioning department has 16; Mechanical, 16; Electrical, 13; Electronics and Radio, 9; Industrial, 6; and Civil, 3.

Southern Tech alumni will number 224 at the end of the summer quarter.

Mr. Lynch, the principal speaker on this occasion, is an outstanding example of a man who worked himself up through the ranks. He is also a man of wide interests and participates in many activities.

In 1920 Mr. Lynch started to work as a laborer, shoveling sand in the Open Hearth Department of the American Sheet and Tinplate Company. He later worked as third helper, second helper, and first helper operating open hearth furnaces.

Continued on Page 3

## Councils Rule On Ring Purchases

To place a real value upon the STI ring and to make the wearing of it an honor, the Student Council recently recommended and the Administrative Council approved a set of regulations which go into effect immediately.

From now on the following requirements must be met before a student can purchase a school ring:

1. He must be in his fourth quarter of work and past the pre-registration date for work of his fifth quarter.
2. He must give reasonable assurance that he will complete his course of study at Southern Tech.
3. He must present to the Treasurer a form from the Registrar which states that he meets, at that time, all requirements for the purchase and for graduation.
4. In case of students with advance credits the purchase will be permitted in the quarter equivalent to the fourth as for other students.

Student Council members pointed out that heretofore students who had passed very little work at Southern Tech had purchased rings and worn them and thereby had decreased the value of the ring. So that the ring would become of real significance to those qualified to wear it, both councils decided that restrictions were needed and that those passed upon would achieve the purpose desired.

## Scholarships In Gas Fuel Boost STI Enrollment

The Gas Fuel Technology Department should have some outstanding students enrolled for the fall quarter. Eleven scholarships have already been awarded students by companies dealing with gas fuel, and more will be given by other companies as soon as the details can be worked out.

Scholarships are awarded on a competitive basis; therefore only the best qualified men will be selected.

The vast expansion of the gas fuel industry has created a shortage of qualified technicians.

Positions with the gas fuel companies will be open to all grad-

## The Technician

Published monthly by the students of The Southern Technical Institute, Chamblee, Georgia.

(The Southern Technical Institute is the Georgia Institute of Technology's two-year, coeducational, boarding unit located at Chamblee, Georgia. STI was established in March, 1948, to train technicians for industry in these eight fields: Building Construction, Civil, Gas Fuel, Electrical, Electronics and Radio, Heating and Air Conditioning, Industrial, and Mechanical.)

The Technician welcomes criticisms, suggestions, and contributions, but insists that these communications be signed and limited to 300 words.

### Attention, New Students!

## Some "If's" and Antidotes

On Page 1 Director L. V. Johnson welcomes fall quarter students to Southern Tech and gives them some friendly advice. Editors of The Technician wish to add, from the student's viewpoint, a few words of greeting especially to the new enrollees and make several suggestions which should prove helpful to them.

We are most happy to have you in Southern Tech. In choosing STI, you have acted wisely, for no other school in the Southeast can give you in 18 months' time the specialized, technical, thorough training which you will receive here. No other school can prepare you as quickly for a good position in industry as STI. You will find here the best of equipment, instructors, and methods of teaching. To these major advantages are to be added the opportunities to participate in all the extracurricular activities that other colleges offer.

Naturally, you will have problems—some major, some minor. For a while you won't know where to go for what, or whom to see for this and that. Hoping to be of service to you, The Technician posed a number of "If's" which do arise and attempts to give assistance in each imagined case.

If you become ill—Drs. Kerr and Mendenhall, offices in the Chamblee Hospital, are at your service—free. Call on them. If you must be hospitalized, you may use the Ga. Tech infirmary free for two weeks.

If your veterans affairs become entangled—See Miss Westbrook (Bldg. 24, Room 11); what answers she doesn't know she can find out in a jiffy.

If you are absent from a class—See Mr. Bryant, the Registrar (Bldg. 24, Room 11). Some reasons for absences are acceptable; many are not. Have a good excuse; explain it to the Registrar and then fill out the proper forms.

If you are called into any branch of the armed service—See Director Johnson; he'll help you all he can.

If you become of draft age while in STI—See Mr. Carroll (Bldg. 24, Room 12) and fill out the required forms.

If you desire to change your course of study—If a non-veteran, first get written permission from your parents, then approval from the course adviser whose department you are leaving and the one whose department you are joining; carry all to the Registrar. If a veteran, get both course adviser's permission; then see the Registrar and Miss Westbrook.

If you have problems concerning your course of study—See your Course Adviser.

If you wish to drop a subject—Get written approval from your Course Adviser; then see the Registrar.

If you want to change your subject schedule—Consult your Course Adviser and then Mr. Paul Lewis (Conference Room, Bldg 24).

If you have transfer credits to validate—See Mr. Bryant.

If you wish to withdraw—If a non-vet, obtain written permission from your parents first; then get from Mrs. Lomox, the Treasurer, the withdrawal form, and obtain all signatures required on it.

If you are failing—Work harder. Try to analyze your difficulty and correct it. Seek extra help from your instructor. Talk matters over with your Course Adviser. Don't give up!

If you are homesick—In this matter as in seasickness or love-sickness, we are stumped. Try being more active, working harder, forgetting yourself, talking to a friend—or maybe one of our attractive secretaries can console you.

Do your part by cooperating; study some every day, but participate in more than one phase of school life; make STI and its staff serve you by utilizing them to the fullest. The best of luck to you!

## Technician Staff Doubles in Size

Continued from Page 1

be commended for their participation in a very important campus activity, for, in addition to their making The Technician a better paper, they are broadening their education here at Southern Tech. To these new men and to the old members of the staff who have kept the paper going, the editors and faculty advisers to the paper say "Thanks!"

George Fries, Ted Knight, George T. Davis, Troy Gullette, T. H. Nichols, J. S. Anderson, W. J. Litaker, and J. T. Morris.

Riddle! Riddle!

What is it that a dog does that man steps in?

Answer—Pants.

## Miss Hudson Becomes Mrs. Purdy; Glenn Dewberry Earns Promotion

Miss Barbara O. Hudson, only co-ed ever to graduate from Southern Technical Institute, became the bride of Mr. Alfred J. Purdy, STI graduate in Heating and Air Conditioning, in what witnesses described as a simple, very beautiful ceremony held at Sacred Heart Church on Saturday morning, August 12.

Alumni will recall that these two technicians met in October of 1948 while both were in school at STI. Alumni will also recall that they lost little time in letting each other know that "you were meant for me." From the looks in their eyes as they sat in chow hall everyone predicted that something serious and matrimonial was cookin'. It is

GUESS WHO'S IN THE RESERVE!

## War Talk Ceases To Be Gay As STI Men Begin To Answer Call

"You still here, Pete?"

"Why, Jack, I thought you'd be in Korea by now!"

"What's the latest dope on your squadron, Nick?"

Yes, that's the kind of talk that's being tossed about the campus right now among the many veterans and reservists. Southern Tech, like all colleges, has its share of veterans, and with the Navy base nearby, the school is also loaded with active Navy reservists.

The talk at present is generally light-hearted and gay in mood, but underneath it all there's a certain grimness that indicates just what a Naval order from Washington could mean.

Have you noticed how the conversations on the campus have suddenly returned to experiences of

World War II? A few weeks ago a fellow rarely mentioned his experiences in the service—the subject was almost forgotten. The Korean war has changed all that, however. It has revived memories that were dimly fading—some unpleasant, many pleasant.

One of the gems evolving from the war talk to appear on the campus recently is credited to Stephen Peters. It seems that Pete, an active Navy reservist, went down town the other day to see if he could fanagle a commission somehow. It seems that the idea had occurred to some other fellows, also, for Pete received the following broadside from the Chief Yeoman: "Ten million men want ten million commissions! All chiefs and no braves! What a hell of a war this is gonna be!"

## Covering The Campus

With Henry A. Smith

### GREETINGS, FOLKS!

As you observe this column, the first thought which might come to you is, "Has John Vanko come back to write this article?" And you are justified in your thinking, since it was Mr. Vanko who brought this column into being. He tended it in its early stages, but since his departure it has been somewhat of a castaway. Although the efforts of this new writer (using the term loosely) do not compare with those of Mr. Vanko, it is the opinion of your present columnist that this column should not be forgotten, and it is hoped that he can do justice to his fellow students.

\* \* \*

### OUTINGS HELD

It seems as though the summer makes for many outings, and STI students are as eager as any beaver, since three clubs have recently ventured into the great outdoors. The Tau Alpha Pi had an initiation party July 15 at the Tech Y. M. C. A. Camp. Four new members underwent a formal initiation. They were William B. Grant, Edward J. Howell, Walter J. Litaker, and

John C. Stambaugh. All members' families and dates were present and all enjoyed food and games.

The Heating and Air Conditioning Club had a wiener roast July 22 at Mr. Ringsmith's home, which is a nice country home with a pond for boating and swimming. Wives and dates of the members were present, and all enjoyed games and eats.

The Mech Club had a barbecue at the Ringsmiths' home on August 8. Besides the food and games some even enjoyed an involuntary swim. Seems as how some of them were out in a boat and it overturned.

\* \* \*

### THAT CADENCE COUNT

For the past few weeks there has been a little commotion from the Navy side of the fence with their recruit training program. Since their drill field is located behind Building 13, activities there provided a pastime for students between classes. It brought back memories of yesterdays to many, and to many more it provided the thought of possible things to come. But now since their recruit training is finished there'll be no more "cadence count" to drown out the profs, and school life will continue as before.

\* \* \*

### CAMPUS LINGO

Those all too often expressions you hear on the campus: "What's for chow?" "Same ole stuff!"; at the volley ball games, "I don't know what to tell you!"; Anything which cannot be described in so many words is a "monster."

\* \* \*

### RELAX WHILE EATING

Seems as how all this griping about the chow hall situation produced some results. Remember those days when you almost became hump-shouldered while eating? Well, those days are gone, for how long remains to be seen, since comfortable chairs and tables of the right height have been substituted. At least you can relax now while eating.

The Technician understands that Glenn received a substantial in-

# Many STI Clubs Offer New Students Much Pleasure, Profit

LYNNWIN W. SCHILB

NOTE — Feeling that all STI students—new and old — would profit from knowing what clubs exist at Southern Tech, what their objectives are, who leads them, when and where they meet, The Technician called upon Reporter Lynnwin W. Schilb to prepare the following directory.

New students especially are urged to acquaint themselves with these organizations, plan early to join one or more, and enter with enthusiasm into this phase of STI school life.

## TAU ALPHA PI (TAI) Honor Society

The purpose of this club is to provide an incentive for a higher standard of scholarship among the students of the Institute, to promote participation in activities and athletics, and to work to raise the standards of STI.

To become eligible for this society a student must have completed 30 hours of work and have maintained a grade average of 3.0.

Meetings are held the second and fourth Thursdays of each month in Room 8, Building 13, at 4:00 P.M.

Officers of TAI are Frank Creel, president; Curtis Compton, vice-president; and Bob Carson, secretary.

## ALPHA BETA (AB) Architects and Builders Society

This society was formed to promote interest in architecture and construction, to promote fellowship among students of the department, and to work to establish a reputation for STI.

Only Building Construction students are eligible for this organization after they have completed one quarter's work.

This society holds weekly meetings in the Builders Lounge, upstairs in Building 12, at 12:15 P.M. each Tuesday.

"Bob" Carson is president; Walter Litaker, vice president; Bobby Kellough, secretary; and Wrenn Creel, treasurer.

## IOTA TAU (IT) Heating and Air Conditioning Club

The Heating and Air Conditioning Society was established to further the interest of the students in the department and to provide a meeting place to promote fellowship and good will.

Heating and Air Conditioning students may become eligible for this organization by applying for membership at the club lounge.

Bimonthly meetings are held in the lounge on the main floor of Building 8.

Officers of the club are Jim Gaylor, president; Frank Creel, vice president; and Hugh "Red" Edwards, secretary.

## CAMERA CLUB

This club is open to any member of the student body who is interested in photography.

The purpose of the club is to provide darkroom facilities for camera fans and to provide a meeting place for students who have a mutual interest in photography.

Meetings are held two times a month in Room 8, Building 13.

At the present time Frank Richards is president; Charles Larson, vice president; and Frank Blair, secretary.

## INDUSTRIAL TECHNOLOGY CLUB

To promote interest in Industrial Technology, the students of this department formed the above named organization. They also strive to promote fellowship and participation by the students of the department in athletics and other activities.

Industrial Technology students are the only ones that are eligible for membership. Prospective members may obtain full particulars from any of the following officers of the club: John Stambaugh, president; Henry Wilkerson, vice president; and H. D. Harrison, secretary.

This organization meets every second and fourth Tuesdays in Room 7, Building 24.

## RADIO CLUB

If you are interested in the fundamentals of radio, electronics, and television, you are urged to be present at the next meeting of the Radio Club. This club provides recreation, amusement, and valuable information for its members. This club is the proud owner of an amateur radio station (W40MC) and is planning a dormitory station at the present time that will operate within the boundaries of STI.

Students who have a genuine interest in radio are urged to attend the weekly meetings of the club. This club is open to all students.

Officers of the club are as follows: Neal Browder, president; Harry Batastini, vice president; Harold Brown, secretary.

The club meets every Thursday at 12:30 P.M. in the auditorium of Building 8.

## MECHANICAL CLUB

The purpose of this club is to promote and establish a profitable interest in Mechanical Technology and to promote sports and other activities for the members of the department.

The club is limited to Mechanical Technology students who have completed one quarter or more at STI. Any student that is eligible may obtain more information from one of the officers of the club.

The club meets the second and fourth Tuesdays of each month in the Mech lounge on the main floor of Building 11.

The President is Lawrence Southerland; vice president, William Grant; secretary, Jack Bishop; and treasurer, John Anderson.

## MONOGRAM CLUB

This club has as its purpose the development of sportsmanship and athletics at STI.

To be eligible for membership an athlete must earn a letter in an intercollegiate sport.

Varsity athletes act as department coaches for intramural athletics and also act as officials for intramural contests.

Officers of this club include the following: John Stambaugh, president; Jim Dodrill, vice president; Byron Vowell, secretary.

This club meets in the Conference Room, Building 24.

## ELECTRICAL CLUB

To provide an incentive for Electrical Technology students, the Electrical Club strives to promote interest in the electrical field.

This club is open to Electrical Technology students, who may become eligible for membership by applying to one of the following officers: Henry A. Smith, Jr., president; R. T. Waters, vice president; or B. E. Tharpe, secretary.

Meetings are held at least twice a month in the Electrical Technology lounge, Room 6A, Building 12.

## SOCIETY OF CIVIL TECHNICIANS

The Society of Civil Technicians strives to stimulate more interest in Civil Technology and provide a meeting place to promote fellowship within the department.

To become eligible, a student in Civil Technology must have completed one quarter's work and must show a genuine interest in furthering the reputation of the department and the Institute.

This club meets on Thursday morning at least twice a month at 9:00 A.M. in the Civil Lounge, Building 13.

The following officers will gladly supply a prospective member with

# Mech Club Eats, Makes Merry At Ringsmiths' Home

Stag and drag or just drag? That was a question that came up at the Mech Club meeting when plans were being made for the B. Q. We like the presence of the ladies but this was, "Where gentlemen get together," and destined to become one of those notorious "stag parties."

The place? Mr. Ringsmith, a former instructor of Southern Tech, extended us an invitation to hold the party at his place, Belle Acres. It was a very appropriate place with very pleasant surroundings. There were trees for those who like a nice shady spot and a lake for the more athletic type who like swimming and boating.

## Food, Cooks Galore

Bunn, DeVane, and Tatum were among the advance party, and we have them to thank for the delicious barbecued pork, beef, and chicken. They were the ones who got things started. Of course there were others who came a little later and lent a helping hand. Mr. Fowler is handy with the barbecue sauce, Huie can surely swing an ax, and you would be surprised at the way Mr. W. F. Lewis can shake a french fry basket.

At last, yes, at last the call that everyone had been waiting for resounded through the hills — the same call you'll hear when the Chuck Wagon cook is ready. "Come and get it!" You should have seen the scramble for Mr. Geeslin's trays and the twinkle in the members' eyes as they drooled at the sight of the food that was waiting for them. They didn't stop at the first serving nor the second either, and it seemed good to see the boys drift back and sample a little more of the food.

# MINUTES OF STUDENT COUNCIL PUBLISHED FOR STUDENT BODY

July 25th Meeting of Student Council Meeting called to order at 4 P.M. by the President of the Student Council, Mr. Schilb. 3 absent, 13 present.

A report from departmental clubs on the activity point system. The Iota Tau and Electrical Clubs approving the system. The Civil Club opposed.

## Mr. Lynch Speaks At Commencement

Continued from Page 1

Mr. Lynch moved to Canton, Ohio, where he worked in the blast furnace of United Alloy Steel Corporation, and later operated electric melting furnaces as first helper and melter of alloy and stainless steel.

He was later advanced to Assistant Superintendent and then to General Superintendent of Operations of Alloy, of the Stainless Steel Division of Republic Steel Corporation's plant at Massillon, Ohio.

In 1944 Mr. Lynch came to Atlanta as General Superintendent of operations at the Atlantic Steel Company. He was appointed vice president in 1946, and in January of the following year was elected to the presidency of the company.

At the present Mr. Lynch, a very active man, is a director of the Atlantic Steel Company, the American Society for Metals, the Kiwanis Club of Northside Atlanta, the Atlanta Athletic Club, and the Atlanta Chamber of Commerce.

He is a member of the American Society for Metals, the Association of Iron and Steel Engineers, the American Iron and Steel Institute, the Atlanta Athletic Club, the Capital City Club, and the Peachtree Golf Club.

A discussion was made on staggering the Student Council elections to prevent a complete new council from having to take over with no experienced members. Motion made and carried to appoint a committee to draw up a means of staggering the elections.

The Civil Club submitted a constitution revision. The main part changing the name of the club to The Society of Civil Technicians of the Southern Technical Institute.

The Radio Club submitted a new constitution for approval by the Student Council. This new Constitution was approved. The requirements for the purchase of school rings were discussed. It was decided that new restriction should be put on the purchase of rings. This to be done to preserve the value of these school rings. A letter was written to Mr. Maddox stating the desired restriction. This letter is to be submitted to the Administrative Council for approval.

Meeting adjourned at 5:20 P.M.

Frank M. Creel  
Secretary & Treasurer  
August 8th Meeting of  
Student Council

Regular meeting of the Student Council 8-8-50 called to order at 4:15 P.M. by the President, Mr. Schilb. 12 members present, 4 absent.

A discussion was held on the Publications Committee as called for in the Constitution. It was decided that because there are only two campus Publications it would be desired for the heads of these publications to report and ask help directly to the Student Council.

It was moved, seconded, and carried that an amendment be made in the Constitution, deleting Sections 3 through 8, Article 8. This part dealing with a Publications Committee.

A report was made on the desires of the Student Council concerning the Activities Committee and school activity funds.

The Activity Point System was further discussed and it was decided that the system must be acted upon as written, other than the distribution of the points to keep the System from becoming just a rule that would do neither the school nor the students any good. It was decided that the system would be a good one if the students themselves would accept it as written.

Meeting adjourned at 5:10 P.M.

## Athletic Field Now Ready; Intramural League Revised

Those of you who are old timers at Southern Tech have probably already noticed that the "Red Dust Bowl" across from the gym has been renovated and is now a green pasture awaiting the arrival of the fall quarter's intramural football schedule. The field has been completely graded and sowed with grass and is now in excellent condition. This football and baseball field has been "in the future" for the students at STI since the school opened and at last it has become a reality, so there should be a renewed spirit and a brighter outlook for everyone concerned.

The intramural league has been divided into eight teams to give each department a team of its own and to create more interest in this phase of athletics. More games have been scheduled than in the

past in order to give each team the opportunity of playing every other team in the league at least one time. The standings will be calculated on the same basis as baseball standings, and since time will not permit a playoff, the team in the number one spot at the end of league play will be deemed campus champion. With this in mind, be sure to turn out and help your department team on its way to the top spot in league standings.

The games will be played at 4:30 P. M. on Monday, Tuesday, Wednesday, and Thursday, beginning October 2 and ending November 25. For any additional information, contact the intramural manager for your department or Coach Frank Johnson. Below is a complete schedule for the fall quarter.

### Intramural Football Schedule Fall Quarter, 1950

| Monday         | Tuesday        | Wednesday       | Thursday       |
|----------------|----------------|-----------------|----------------|
| Oct. Thermos   | Oct. Surveyors | Oct. Mechs      | Oct. Petrols   |
| 2 Builders     | 3 Execs        | 4 Generators    | 5 Electrons    |
| Oct. Mechs     | Oct. Thermos   | Oct. Surveyors  | Oct. Petrols   |
| 9 Electrons    | 10 Generators  | 11 Builders     | 12 Execs       |
| Oct. Petrols   | Oct. Builders  | Oct. Thermos    | Oct. Surveyors |
| 16 Mechs       | 17 Execs       | 18 Electrons    | 19 Generators  |
| Oct. Execs     | Oct. Electrons | Oct. Petrols    | Oct. Thermos   |
| 23 Thermos     | 24 Builders    | 25 Generators   | 26 Mechs       |
| Oct. Electrons | Oct. Thermos   | Nov. Builders   | Nov. Open      |
| 30 Execs       | 31 Surveyors   | 1 Generators    | 2              |
| Nov. Execs     | Nov. Electrons | Nov. Petrols    | Nov. Open      |
| 6 Mechs        | 7 Surveyors    | 8 Thermos       | 9              |

## Much Expected Of Harriers In Fall When Vets Return

Griffin, Tatum, Gullette,  
And Wall Of Last Year's  
Team To Provide Nucleus

The cross-country team at Southern Tech has heretofore been the outstanding intercollegiate team, and from all indications it will continue to be in the limelight when fall arrives. Four lettermen—John Griffin, Jack Wall, Webb Tatum, and Troy Gullette—will be back to represent STI at the meets and to give the freshmen a few vital pointers on "How to Win Fame on the Cinders." With a year's experience behind them and with the aid of several former high school hill and dalers expected to enroll this fall, these boys should be able to bring home the bacon.

### Big Squad Needed

If you can run three miles, or even one hundred yards, the welcome mat is out to you to try out for the cross-country team. Coach Johnson is hoping to have one of the best cross-country teams in the history of the school this fall, and this can be done only by having a good squad to pick from. Don't be afraid to come out just because you have never done any running because several of our former lettermen had no experience before coming to Southern Tech.

The time and date for practice will be announced in the near future, and Coach Johnson will be very pleased to see a big crew of long-winded boys who would like to sprint through the hills and dales.

## Scholarships In Gas Fuel Given

Continued from Page 1

uates of the STI Gas Fuel Department. All scholarship winners are expected to enter some phase of the gas fuel industry after graduation.

Scholarships given by companies of Georgia are for \$540; out-of-state scholarships are for \$990. Both pay for tuition and other incidental fees. The students will have to pay for their room and board only.

Some of the students and their sponsors are Lawrence L. Parlett, Mechanicsville, Md., sponsored by Parlett Gas Company, Waldorf, Maryland, and Neal Allen Dauphinee, sponsored by Dauphinee Distribution Association, Hyannis, Mass.

One scholarship has been split between two students of Ambrose High School, Ambrose, Ga. The qualifications of the two students were so nearly equal that it seemed unfair to choose between them. If the program of these two students at Southern Technical Institute is satisfactory, they can be assured of additional funds for the completion of their second year.

The gas fuel industry has a special interest in the Gas Fuel Technology Department. They worked closely with officials at the Institute in establishing the Gas Fuel course at Southern Tech.

Mr. John D. Sewell, assistant director, has indicated that the awarding of Gas Fuel scholarships is just beginning to get underway. As soon as details can be worked out with the gas companies, he expects several scholarship winners to be enrolled each quarter.

## Bright Forecast For Basketball Seen As Large Enrollment Looms

Southern Tech is making a determined bid to become one of the outstanding powers in the Junior College Intercollegiate Basketball Conference this fall and get revenge for some of the defeats of last season. In the past, the lack of student participation and student support has been the leading factor in Southern Tech's failure to stack up with other schools on the junior college level. However, the outlook is much brighter this fall than it has been in the last two seasons.

The large enrollment expected for the fall quarter should bring with it a number of former high school stars who will aid the cause and a few G. I.'s who will be a credit to the athletic program. Along with these athletes will come many new students who will be on hand to root for "Ole STI" and give the boys more to fight for.

### New Athletes Expected

In addition to the new athletes expected, several members from last year's varsity squad and "B" team will be back to supply the experience that is so drastically needed on any basketball team. Among those who will return this fall are John Stambaugh, Joe Rette, John Griffin, "Buck" Sims, Jim Dodrill, Byron Vowell, John Daniel, and Sol Siegel. With these veterans from last season and the newcomers, STI should be a top contender no matter who is on the schedule.

According to Coach Frank Johnson, several new teams have been added to the schedule and these, along with some of the teams played last year, should afford the students at STI a well-rounded basketball program.

### "B" Team Also

Besides the varsity basketball

team, Southern Tech also has a "B" team that affords the "not quite good enough" basketball players a medium through which they can get in the show and strut their stuff for STI. The "B" team has, in the past, given many good performances on the hardwood, and Coach Johnson is expecting a good squad to take the floor for the pre-varsity games.

The call is out for all students who think they can make history in a basketball uniform, so don't be bashful fellows; be there for the first day's practice, at 4:30 October 2, at the STI gym, and maybe you too can become a "Green Hornet" and help Southern Tech on its way to a successful basketball season.
