Southern Technical Institute
Marietta, Georgia 30060

SEPARATE?

By: Michael L. Renfroe

As you have probably heard by now, Dr. Vernon Crawford, Chancellor to the Board of Regents of the University System, recommended that Southern Tech become a completely separate institution from Georgia Tech. The Board immediately placed this item at the head of the agenda for their December 13 meeting in Atlanta. Chancellor Crawford was applauded by several of the Regents for finally taking action on an issue that has been festering for years. This means that the next step is for the Board to approve or disapprove Dr. Crawford's recommendation. It seems very likely that the Board will approve separation. Now what?

First, many thanks are in order. Thanks to the students who supported the separation movement. Though barely noticeable at times, daily progress was made. Thanks to past and present Student Government Associations who kept the "separation talk" going when it seemed that it had died down. Thanks to the faculty, who made the single most contributing factor with their overwhelming vote for separation. Thanks to the Administration who were instrumental, for me at least, in decamouflaging the important issues to be considered and putting some of the more emotional issues into a proper perspective. Thanks to the

staff at Southern Tech for without their support we would not be able to survive separation. Thanks to Southern Tech Alumni Association and the Southern Tech Foundation who were just the kind of pain-in-the-neck that Georgia Tech and the Board of Regents needed to prompt action on our problems. Thanks to the businessmen of Cobb County for their recommendation and support for without the community's acceptance, separation would be fruitless.

Next, we should prepare ourselves for separation. We can best do this by remembering three things:

1. From this day forward we will be

forming the image that outside people have of Southern Technical Institute based on how the students, faculty, staff, and administration conduct themselves and their affairs.

2. We can no longer blame Georgia Tech for anything that goes wrong here.

3. Any change that is made should be made for the betterment of Southern Tech.

In closing, I offer my thanks and congratulations. You're almost there. With one hurdle left to clear (the Board of Regent's approval) it's time to start looking ahead. Good luck Southern Tech.

TIME TO COOL DOWN

The students at Southern Tech have once again demonstrated their ability to handle a difficult situation with poise and maturity. Feelings of anger, frustration and anxiety (on all sides) have been addressed in a restrained and responsible manner. Despite news media intervention and numerous inflammatory occasions, there have been no violent confrontations and no one has been physically injured. There have been, however, many spirited and intense discussions about the current international crisis, its background, its immediate ramifications and its possible impact on the future of world history.

The college campus has a long and venerable tradition of free and responsible inquiry, debate, discussion including peaceful and non-disruptive protest and dissent. This tradition is matched with an equally strong tradition of protecting the campus from disorderly or disruptive

actions which interfere with the rights of others, teaching, learning and other campus activities. These principles are strongly reinforced both in the student life regulations of Southern Tech and the Statement on Disruptive Behavior issued by the Board of Regents of the University

System of Georgia.

It is reasonable to assume that Southern Tech students will continue with their commitment to patience, perseverance and self discipline during this difficult period.

Charles E. Smith
Dean of Students

Dear Editor:

After reading your editorial in the November 12 issue of the STIng, I felt that I should make some corrections for the benefit of those students who did not witness the flag burning incident. I do not pretend to know the original reasons for the actions you termed "malicious nonsense." Perhaps they were intended to attract the attention of the public eye to Southern Tech. The incident did not, however, convert our school into the public's latest "black eye." It is my opinion that the feelings expressed by the radical flag burners are a mirror image of the mood of the general public.

After the news media left the scene, small groups of students broke off to have individual debates. Both Americans and Iranians discussed their feelings toward the problems between the two nations for the first time. There was anger expressed mildly in some groups. Anger that is talked out between two opponents is much less harmful, however, than anger that is bottled up inside an individual. I feel that in the long run good came from the demonstration.

Perhaps you would have taken a different view of the incident had the STIng been notified that it was going to take place. Your article might have carried some clout if you had not let your real source of anger slip out in the very first paragraph.

Mike Stowe

Dear Editor:

I can guess the general feeling of the Iranian situation here on campus. I personally feel we, the Americans, should send the Shah back to Iran and let the Iranians take care of their own problems. I also feel that we should send some armed troops to help persuade the camel jockeys to free our American brothers and sisters.

Another point to ponder is the oil cut off. Who needs their oil? There are other OPEC nations from which we can buy oil. I also feel we should cut off their food supply and let them try to eat their oil and sand!

I also would like to urge everyone on campus not to turn to violence to help solve the problem. This type of action would only make matters worse for those of us on campus.

As for the flag burning last week, who really cares?

Bert Ogeltree

LETTERS TO THE EDITOR

Dear Editor:

Your editorial is strong evidence in support of American apathy and disillusionment. It appears that you sincerely believe that governments are not directed and guided by its citizens. You stated, and I quote, that, "the problem with Iran is not between us and the Iranian students but our government and the government of Iran." Throughout history, the common man has ultimately made the final decision. True, the Boston Tea Party did not stop the British from attacking, but it sure did get the message across and that was and is our intent. I

would also like to know when you consulted Dr. Beasley about the conditions of students that we hurt by standing up for what we believe in. We are citizens and will do anything, including legal protest, to protect and stand behind our country. How can you seriously believe that President Carter is not receptive to the demands and protests of the people he serves. Mr. Editor take your head out of the sand and align your allegiances with those you support or wind up rotting while sitting on the fence.

Ray Robertson

Dear Don:

I've just tip-toed through your "from the Editor", not knowing if I should laugh or cry. I've complained about propoganda from the Iranian's here on campus, but now you are re-producing it as well.

You have taken a little over a quarter page of The STIng to assert "assumptions", not coming even close to the issue. I'll point a few out for you, for your edification, of course.

1. "Bee hive of publicity seekers" - your keen ability to read hearts and minds of the "seekers" is going to waste publishing the STIng. I'm sure with that kind of talent the London Times is the least for which you should settle, editor that is.
2. "our campus media was not even notified". I apologize, Don we won't hurt your feelings again by leaving you out of the activities. Sorry!!
3. "Will it free the hostages in Tehran?" - Perhaps, but that isn't the issue. The issue is such things as; free expression, letting ourselves be heard, taking a side, standing up and being counted, letting the people on campus who ignore tolerate, condone, or instigate such acts as the terrorism now going on in "OUR" embassy know that there are some people who must be reconed with, if necessary.
4. "few irresponsible radicals" - Don, now really. You know as well as I do (don't you) that part of our responsibility as citizens in a Republic as ours is to be verbal, communicative, and letting our individual opinions be known. You did know that, didn't you? However, if

sounding off is irresponsible - call me irresponsible.

5. "expelled from school and deported" - I've heard the same tune sung, Don, however the lyrics were a little different and I believe the Carter administration is singing along with us "radicals", "instigators" as well. The law should be upheld by expelling and deporting the ones who break our laws.

6. "semblance of forethought" - Well, I've "forethought", "after thought", and even "between thought" on this one and the students who invaded our sovereign facility in Tehran have thrown down a challenge to every

American, (By the way, Don, that includes we students; you too) and indeed to every civilized human being on this crazy plant. The students there (no matter how wrongly treated by their king in the past do not have the right to incarcerate, impeach cause stress and duress or threaten the lives of others, even though citizens of another nation. If Iranian students here on our campus condone, advocate, and encourage the actions of the students in Tehran, then they also are wrong, by all civilized standards, of acts outlawed by both God and man. If the students want to be our friends, then be a friend and don't find aid or comfort to our enemies, or at least keep quiet; don't try to justify what is going on in your country.

And Dear Don, THAT'S THE ISSUE. P.S. I personally like the Iranians I've met, but I don't like it when they bring their anarchy onto a camp where I'm trying to learn.

Bob Quin

Mike Renfroe and Barbara Ransom express their happiness with the chancellor's recommendation to the Board of Regents that Southern Tech be totally separated from Georgia Tech.

Dr. Crawford stated that..."their determination to show that they, on their own, can move their institution to new heights of success, ..." It took determined people to move Southern Tech to this point in its history and will take this same determination for it to succeed as an independent institution. Let's all hope that the Board of Regents will decide in favor of separation at their December meeting.

Norwegians visit campus-- A team of 20 Norwegian Apparel and Textile industry executives visited the STI campus Tuesday. Larry Haddock, department head, ATET, served as host while the group toured the campus, local apparel industries and visited the new Atlanta Apparel Mart. The visit was part of a 10-day tour of the U.S.

HORNETS

The Southern Tech "Running Hornets" started off their season with a tremendous smear against Bristol College. With sixteen minutes left in the first half of the game, Coach George Perides took the first string out of the game and let the second string damage their opponents. The first string again started off the second half and played eight minutes, leaving the second string to finish the game.

Each player on the basketball team was used during the first game. I was very impressed with each player scoring at least one field goal during the night. The Southern Tech defense was just as impressive as the offense was. The final seventy point spread totalled up a very impressive score of 127 to 57. Our two main producers of the night Cyrus Hunter scoring 27 points and Billy Bromell scoring 23 points would come close alone to topping the Bristol teams final score.

If the Hornets continue to play as consistent as they did last Wednesday, they should not have any problem arriving in Kansas City at the end of the season.

With only four returning members of last years team, Coach has had to do some searching for some top recruits. Many hard hours are spent sweating each practice out in the gym. If it weren't for the dedication and hard work of each player and the Coach, our Basketball team would not be ranked where they will soon be. Let us as members of this school support our team to the fullest, for they are a fine representation of an excellent school.

SSA'S SKI CARNIVAL

If you think the only places that attract thousands of college students are the sunny beaches of Ft. Lauderdale and Daytona Beach, guess again. In recent years the powdery snow of the Student Ski Association's College Ski Vacations has been almost as popular a place to get-together as Florida.

Last winter and spring over 5,000 students from hundreds of colleges trekked to SSG's carnivals at major ski resorts in the East, Midwest and Rocky Mountains. Priced to fit a student's budget, SSA's College Ski Vacations include first class lodging or condominiums, lift tickets and a full schedule of activities. Most trips also offer a low-cost breakfast and dinner plan, with meals served in the student's own lodge.

Discounts on lessons and equipment rentals make the carnivals popular with beginning and intermediate skiers. Both the group ski lessons and numerous activities make it easy to meet new people and make friends. Every day there are many activities to choose from: Welcome parties and all college mixers, dances to live bands and discos, fun races and a College NASTAR Race to test a student's improvement.

For the 1979-80 season, the Student Ski Association is offering

trips to Stower, Mount Snow and Bromley/Stratton/Magic Mountain, Vermont for \$99 to \$119 and to the Mt. Washington Valley, N.H. for \$99 for five days skiing in January. In the Midwest there are weekend trips to major ski areas. Week-long trips to Steamboat, Winter Park and Copper Mountain are offered from December thru April from \$133.

According to SSA Director Kim Chaffee, "The popularity of our carnivals is in large part due to our removing the normal hassles associated with skiing. We pick well known resorts, clean comfortable lodges or condominiums and take care of all the details. Students can come solo or with friends. SSA will find roommates for those who need them. Through volume purchasing power, we can cut costs almost in half, which is very important to college students. For those without cars, we have chartered busses from major cities that go directly to our lodges. We can book low cost air or train transportation through our official travel agencies.

For more information write the Student Ski Association, 1200 Post Road East, Westport, Conn. 06880 or 2256 N. Clark St., Chicago, IL 60614. The Student Ski Association is sponsored by Schlitz Beer.

OUTSTANDING FACULTY AT SOUTHERN TECH--Ten faculty members at Southern Tech were given the Distinguished Faculty Service Award of the STI Foundation at the college's annual alumni banquet held recently. Award recipients include (from left) Richard Castellucis, Electrical Engineering Technology (EET) of Marietta; John Keown, EET, of Atlanta; Roberta Gates, English, of Marietta; Orren Williams, Mechanical Engineering Technology (MET) of Mableton; Jack Nevitt, Architectural Engineering Technology (AET) of Marietta; Michael Orlandella, Civil Engineering Technology (CET) of Marietta; Ron Young, MET, of Marietta; Earle "Brad" Young, Industrial Engineering Technology (IET) of Atlanta; and Ralph Youngblood, Math, of Kennesaw. Not Pictured is Charles Wimberly, IET, of Marietta.

PLACEMENT INFO

Interviews for the remainder of the quarter as follows:

Mon, Nov 19--Ingersoll Rand--EET,IET, MET,CET (Atlanta)

Mon, Nov 19--Dravo Corp--CET

Tue, Nov 20--Factory Mutual Engineering All degrees

Wed, Nov 21--Alcoa--EET,IET,MET

SIGN UP NOW FOR THESE COMPANIES AND LEAVE A COPY OF YOUR RESUME IN NOTE BOOK.

November 21, is the close-out date for campus interviews for this quarter. Any other jobs that come in will be posted in folders in the bin for direct contact.

Interviews for Winter Quarter 1980 begin the week of January 14. A list of companies recruiting Winter will not be available until after first of year. Winter, Spring and Summer graduates should interview Winter Quarter.

MILLIKEN & COMPANY will be on campus Tuesday, November 20, to interview for co-op positions. If interested, see Mrs. Kearney in the Co-op Office.

The next Lendman Conference will be December 14 and 15 at Century Center Hotel. We should receive further information about this conference soon.

THE SMOLDERING EMBER FIRE SCIENCE TECHNOLOGY

Fire Science has been a part of Southern Tech since 1972. Even after seven years most students know very little about this department. There are currently 57 students enrolled in Fire Science at STI. Many of these students are already involved in some form of Fire Technology. There are also about 43 others who are attending classes on and off, alternating quarters.

Each of the classes that are offered only once are video-taped. Classes are video-taped so as to make it possible for students who are not able to attend a class to see it at their convenience. Since there are only 57 students video-taping is the most effective way of filling the needs of all the students who have irregular or conflicting schedules.

Mr. Julian R. Lee is the acting department head of Fire Science Technology and no one understands the importance of this program more than he. Fire Science at STI is a technological course, as Mr. Lee says, "we teach the prevention of fires, and the management of fire related careers and not how to put out a fire." The fact that there were 20 ten million dollar fires in the United States last year and 74 three million dollar fires speaks for itself: Fires need to be prevented in the first place, rather than merely waited for to extinguish out when its too late. The growing number of new products that are flammable makes it necessary, even more than ever, to spot a fire hazard before it becomes a fire. That is the purpose of fire technology, as well

as to show the mechanics and physical aspects of fire control and prevention procedures.

An associate degree in Fire Science is currently available, but Mr. Lee has hopes for a four year program. Unfortunately, Fire Science is, more than most departments, lacking in

financial backing. The Fire Science office is located downstairs in the administration building and the classroom (1) is in the Textiles building. A four year program would necessitate more facilities and more outside support. If a four year program were to be instigated at STI, it would automatically attract both interstate and international support in the way of Fire Science majoring students and institutional support. The uniqueness of such a program would unquestionably be a plus for Southern Tech as an outstanding school in America.

For now though, there is a two-year program which once completely qualifies the graduate for a position in a field which will greatly be in demand, as long as wood burns and people use products that are flammable.

Mr. Lee encourages not only firemen but all students at Southern Tech to look closely at the advantages of a Fire Science Degree or even just a few credits in Fire Science courses. An understanding of fire laws and codes can be of great value to a building architect, an electrician, and even a mechanical engineer who has to face the possibility that his work, his structures, lines, and buildings can, if not properly designed, installed, and maintained present a fire hazard, a hazard that endangers people and property.

Fire Science is an important, though little known and little discussed area and should be better understood and discussed more rather than merely left in the corner...smoldering.

THE TIGER COMES OUT OF THE TANK!!

Remember when millions was spent to sell us to put the tiger in the tank?

Well, Mr. Jay F. Cornell of Selective Products, Co. is so upset with "Big Oil" companies ripping him and us off, he took the tiger out of the tank to bite "Big Oil" where it hurts!

Mr. Cornell has started a one man crusade against "Big Oil"! He has designed a CRUDE-A-GRAM for the use of anyone who feels like he does, and the CRUDE-A-GRAM, which sells for \$3.95, is absolutely FREE if you purchase the Tiger T-Shirt and show everyone you told "Big Oil" off!! The minimal profits from the T-Shirt goes right back into manufacturing more CRUDE-A-GRAMS, which is Mr. Cornell's way of telling "Big Oil" to shove it.

And that's just what the CRUDE-A-GRAM says!

The complete CRUDE-A-GRAM comes to you ready for mailing to your choice of "Big Oil" companies, or a few of their political friends in D.C.

It contains a 1 oz. bottle of their own medicine (Genuine Alaska Pipeline Crude Oil) wrapped in toilet paper (because Mr. Cornell is very thoughtful) with a strong message telling them what they can do with it!!

SHOW EVERYONE!

So, when you order a Tiger T-Shirt and show everyone you told "Big Oil" off, Mr. Cornell will donate a CRUDE-A-GRAM to you to send to "Big Oil".

For more details, or to order your name brand, top quality, 2-color T-shirt for \$7.95 plus \$1.50 to help offset the cost for shipping the T-shirt and FREE CRUDE-A-GRAM, write to Jay F. Cornell of Selective Products Co. Dept-CP, 2504-A Transportation Av. National City, CA 92050.

X-MAS PARTY

The annual Southern Tech Christmas Party will be held Sunday, December 2 at 3:00 p.m. in the Student Center Ballroom. As in the past, Gamma Phi Beta and the Campus Activities Board will sponsor the festivities.

Here's a schedule of events:

- 3:00 P.M. - Disney Animated Film will be shown "3 Caballeros" starring Donald Duck.
- 4:15 P.M. - Santa Claus arrives.
- 4:30 P.M. - Reception honoring Santa Claus.

We are especially encouraging married students, faculty, staff and alumni to bring their children. This party is open to all friends of the Southern Tech community.

"NOTICE"

LOST HEIRLOOM

If anyone found a retractable, silver, Cross pen in or around RM. 209, Classroom Bld. approx. 2pm last Thursday, would they please call Paul Roper, Atl. 252-3730; \$5 reward, great sentimental value.

ORGANIZATIONAL NEWS

IMPORTANT:

There are quite a few calculators (and other assorted articles) in the police station's lost and found. If these articles are not claimed they will probably be auctioned off. It would be a shame to lose an expensive item such as a calculator just because you did not check to see if it had been turned in.

The next Curriculum Committee meeting is scheduled for Monday, November 26, at 2:15.

— SIGMA PI —

A sincere degree of appreciation goes out to our football team. Even though a winning season was not produced, the men of Sigma Pi gave consistent competition, even though constantly hampered by injuries. But let us not forget last year. When Sigma Pi had it's worst season, but was the unprecedented victors of the overall trophy. Once again we are thought by our peers to be out of contention, but the pride of Sigma Pi men shall overcome.

We hope everyone will have a happy Thanksgiving. But keep in your hearts and soul the lives and loved ones of our fellow Americans being held captive in Iran. Remember this is a time for searching, and the men of Sigma Pi send their heartfelt sorrow to these people. In these times of violence, which the Editor of the *STing* says breeds violence. How can these Iranians who were so unjustly persecuted by the Shah put a man in power, Khomeini, who has since taken power, executed seven thousand people. We as not only brothers of a fraternity but as fellow brothers of all Americans are appalled that the editor suggests we do not utilize our freedom of speech. His concern appears to be that the campus media was not informed. Let us not forget we are all brothers and sisters in the same country. The benefits we are now reaping are the result of hard work. We are proud to be Sigma Pi's and prouder to be Americans.

GAMMA PHI BETA

Recently Gamma Phi Beta celebrated its Founder's Day and we all had a chance to meet some of the women who had been Gamma Phi's for over 50 years. It was very exciting and interesting to meet some of the women who have been around for a long time. We hope that our chapter will progress and be as strong going as the other chapters that were represented at Founder's Day.

We would like to thank everyone who helped sponsor our Rock-a-thon this weekend. The money is going toward each of us being initiated as Gamma Phi's.

We hope everyone will have a nice and safe Thanksgiving. EAT TURKEY (GOBLE GOBLE)!!

— SIGMA NU —

The brothers of Sigma Nu would like to thank the little sisters and the social committee for a great party Saturday night. We would like to thank Gamma Phi Beta sorority for attending.

We would like to remind all brothers about the Dec. 1 Anniversary Party. Money for the ski trip is still being taken up, so let's everyone try to get it turned in.

The football team should be proud of their performance this year. They had a good season this year, but had a few tough breaks. We would like to wish the other team good luck in the play-offs.

The next Standing Committee meetings have been schedules for Tuesday, Nov. 27, from 4:00 until 5:00 and for Thursday, November 29, from 4:00 until 5:00.

LAMBDA CHI ALPHA

We would like to thank everyone for coming out Saturday and helping us with the Olympic Fund Raiser out at Cumberland Mall. It was very successful.

We hope that all the brothers remembered to come Monday night to get pictures taken for the composite. If you forgot, too bad.

We want everyone to have a good Thanksgiving Holiday and when we get back we'll be getting our basketball team together again. If you play well and want to be on our team, be at our meeting at 12:00 Thursday room 206.

— BRA —

The BRA will hold its regular weekly meeting on Tuesday at 12 noon in Room 119 of the Student Center. Everyone please attend as we are planning the events for the upcoming winter race. Also remember that voting memberships for the 1980 racing season are due. Everyone please try to attend.

RE-ACCREDITATION

All engineering technology curricula up for re-accreditation by the Engineers' Council for Professional Development (ECPD) have been re-accredited. The action was taken by the ECPD Board of Directors October 11; and Dr. Carlson received word of the action last week.

Only curricula leading to the associate degrees in IET-Industrial Management option and EET-Nuclear Safety option, and the bachelor degree in IET-Industrial Distribution option were not submitted for accrediting agency for engineering technology programs means that curricula have met minimum standards set by ECPD.

A team of experts in various fields throughout the U.S., including professors in engineering technology, deans, department heads and people from industry, toured the STI campus February 5-6 to evaluate programs for accreditation. In determining accreditation, team members examine detailed studies of curricula, facilities, look for the liaison with industry and interview faculty and students. The institution itself is regionally accredited by the Southern Association of Colleges and Schools.

"We are proud that we have the faculty, administration and facilities to maintain and upgrade the excellence of our engineering technology programs," Dr. Carlson stated.
