Candidate's Visitation

Last October, Dean Carlson announced his retirement as Executive Director/Dean of Southern Technical Institute.

Last November the Georgia Board of Regents gave Southern Tech our independence from Georgia Tech.

Now as a result of those two decisions Southern Tech must search for its first college president. The search committee commissioned to find probable candidates for the office has announced the first in a series of visitations by the candidates. Today and tomorrow, Dr. Stephen R. Cheshier, of Purdue University, will be visiting our campus and attending interviews by various officials and interested students. Dr. Cheshier is currently head of the Electrical Technology dept. at Purdue in West Lafayette, Ind, where he began in 1971 as a professor of E.E.

Tonight at 7:30 in the Seminar Room of the library there will be a reception for Dr. Cheshier. The reception is open to all interested faculty, students and alumni, and it is hoped that everyone present will have the opportunity to meet and discuss their own goals and dreams for STI with Dr. Cheshier. Interested persons should R.S.V.P. to Mr Pattillo at 424-7572 by 5:00 this evening.

Tomorrow Mr. Cheshier will be in the Student Center Ballroom from 2 till 4 PM to interview with the SGA officers and any interested students. R.S.V.P. is not necessary.

MA BELL DOESN'T WANT YOUR MONEY

Southern Bell is introducing a new public telephone that takes no money.

The new phone, which has no slots for coins, is called the Charge-a-Call telephone. It allows users to make long distance calls either collect or by credit card.

The company will begin installing the new telephones soon at a limited number of locations in the Marietta area, according to Bill Kirkland, Coin Telephone Consultant of Southern Bell.

Mr Kirkland said the new coinless phones will be placed next to conventional coin telephones already known to have a high volume of collect and credit card calls.

One type of Charge-a-Call telephone is about the size of an ordinary coin phone. It is blue and will display a distinctive sign to avoid confusion with coin phones.

Other coinless public telephones, used at indoor locations, will feature a conventional black Touch-Tone wall set mounted on a distinctive blue backboard. This installation will also feature a Charge-a-Call sign.

To use the new phone, a caller lifts the receiver, dials the call and gives charging information to the operator. Calls can be placed collect or charged to a telephone company credit card. And customers

can make either person-to person or station-to-station long distance calls. Rates for these calls are the same as for operator-assisted calls from coin telephones.

In emergencies, callers can use the coinless phone to reach a telephone operator (or the 911 emergency number). Callers can also use the phone to reach telephone repair service and directory assistance.

The new Charge-a-Call units will be installed at Southern Tech at the following locations:

Basment of Norton Hall
Lobby of Howell Hall
Lounge of the Student Center

These units will be installed early in the Spring Quarter.

RUNNING TO WIN

BY TERRY DRAYTON

Have you ever heard the phrase, "the thrill of victory and the agony of the feet" and wondered what it really meant? Ask any persistent runner or jogger and they'll give an hour long dissertation on the joys of running.

If you are an avid running fan, then you'll agree that a large part of running is a test of perseverance and endurance. Running does involve pain. However, eliminating the sado-masochistic aspect of the sport and there is a lot of benefits to gain from running, such as a healthier and more physical attractive body and a positive mental attitude.

To some people, running is an obsession. People run for different reasons. Some people run for health and physical reasons, others run for their egos. Some people run because it is trendy or is the in thing to do. (They usually last from once around the block to 3 or 4 weeks). However, the dedicated runner will run for miles.

Running does have its good points and bad ones. The main positive attributes of running is that it strengthens you physically and helps eliminate excess weight. On the bad side of running, you must endure some pain at first (you're going to a walking commercial for Ben-Gay). You are constantly chased by dogs and people in cars who hate runners. Don't say I did not warn you.

Now that the weather is warmer, and everyone wants to look and feel their best, there are a few things you should know about running. I am no expert by no means, but I've been running for six years, so that should give me some credibility. However, you should consult an expert as always before attempting to become a good runner.

To the beginners, caution should be taken. The first rule of running should be never to over exert oneself. If while running, you feel any pain at all anywhere, stop immediately. If you should have difficulty breathing, stop. Running with someone can be helpful. Talking or singing while you run is good practice. If you can't talk or sing then you are not breathing properly.

Also, before running, you should eat some carbohydrates so that your body will have some energy to use, or burn up. Drink some fluids so that you can perspire, which is natural. Be sure to have the proper running equipment such as correct shoes, and proper clothing. Always do warm-up exercised before starting to run to avoid cramping.

Now that you are prepared to run, if you haven't started already, you are ready for some stiff competition. Competition is what makes running a sport and not just a hobby or a leisure activity. Your ultimate test will be to try for your first mile then two or maybe three or four. Then to prove that you are an accomplished runner, you'll enter the infamous Peachtree Road Race on July 4th.

Finally, training will be hard and long. At first you will have pain because all your muscles ache including your eyes. But running can be a joyous exciting experience. However, you'll learn to love the pain like the rest of us.

THIS WEEKEND AT ROAD ATLANTA

Road Atlanta's debut race, the Road Atlanta GT, April 12-13, will open with a "blockbuster" format. Instead of the usual sprint race for the GT cars, the weekend will include two 50 mile GT races on Sunday afternoon. The top drivers, including the Whittington Brothers, Peter Gregg, Danny Ongais, a newcomer dark horse John Fitzpatrick and Atlanta's John Paul will vie for the 20 lap checkered flag race, scheduled at 3:00. Leaving only a two hour span to get their car prepared for the second 50 miler will keep the crews and drivers "truckin", and at 5:00 the grid will be set for the second 20 lap race.

With records set at touring the course in 1 minute and 20 seconds, the pressure will be on to maintain the high speed car capability in the short race. The winding, twisting 2.5 mile course will push the drivers to their peak, leaving no room for margin of error. Each contender's credo will be "give it all you've got".

To add to the excitement and fervor of the weekend, the track officials have arranged on Saturday afternoon to have the GT cars qualify at top speed on the long straight. The fastest GT cars reach speeds of close to 200 miles

per hour. Since the pole position will obviously have the advantage when the short 50 milers green flag drops, every driver will be there to 'go for it'.

Accompanying the weekend schedule will be a GTU race, always a 2-3 car photo finish at Road Atlanta. The cars are constructed so closely competitive that the field draws evenly matched skills of Don Devendorf, Bob Overby, Frank Carney, Dick Davenport, and Dennis Aase.

The traditionally large entry of the Champion Spark Plug Challenge will once again pit Roger Mandeville, Atlantans Jim Downing and James Reeve, and Amos Johnson and Dennis Shaw of the Levi's Team Highball for the victory. Road Atlanta fans are accustomed to laying odds on the next car shooting under the bridge, cause each lap, it'll be a different leader.

To round out the full racing weekend will be the Kellygirl Challenge featuring once again popular Atlanta driver Gene Felton, with a record of multiple victories at his home course, Road Atlanta. Challenging Gene for an upset will be Lyn St. James who pushed Felton around the course last year, and Atlantan Clay Young whose record of wins continually increases.

The Silver Bullet Band

Against The Wind

Bob Seger's new album will probably go gold in a few months, and it is by far his best effort yet. He has matured as a musician as well as a lyricist. He wrote all of the songs on *Against The Wind*, showing that he hasn't forgotten his roots. There is still some kick-ass rock-n-roll. The *Horizontal Hop* is a good example of Seger's motor city rock-n-roll. There are three lead guitarists on this cut, and it's a guaranteed foot-shuffler. There are also a few mellow ballads that Seger has become known for. *No Mans Land* is this type of tune. A saxophone played by *Alto Reed* adds to the already talented *Silver Bullet Band*. On a scale of one to ten *Against The Wind* is a solid 9.9.

Richard Postic II

This article is about an interesting property inherent to the TI 59, and shared to some extent by the TI 58. It's one of those little quirks you won't find covered by the woners manual.

This little story began the end of winter quarter, right at the start of finals. While attempting to read a card with a low battery pack, the calculator dimply died in the middle of the read. Normally, this won't affect the card. But for some reason, this card was affected to the extent that when it was read by the calculator, especially while on the cradle, the program would list correctly down to a certain point. Beyond that point the program pointer would suddenly reset itself, and an entirely different program would be listed. A little investigation proved the "new" program to be part of the calculators own internal firmware.

After finals were over I started to check around to see what was causing this. Long distance calls to Texas Instruments produced notheing but confusion. I was, however, fortunate to find the address of a gentleman living in Washington, R.C. by the name of Maurice Swinnen who told me by phone and letter that I wasn't the first to do what I had done. He even sent me a number of keystroke routines which would get me into the firmware each time I used them.

Now before anyone tries the following, be advised not to press anything other than what I am about to list. You will find that after the first four keystrokes the display will be flashing. LET THE DISPLAY FLASH.

Mr Swinnen's routine starts off as;
at turn-on, press [2nd][Op]09
[2nd][Pgm]24
[R/S]-zero flashing in display-
[R/S]- one flashing in display-
[R/S]-zero flashing in display
9[2nd][Op]17-239.89 flashing in
display-[GTO]0[R/S]- 0.00 flashing
in display-[2nd][D.MS]-zero
flashing in display-[LRN]-000 82
in display.

For those of you who can find a printer if you list out what apperas to be in user memory, you'll find a lot of different routines, and you'll find quite a bit of use of the HIR command. For those owners of the TI 58, you can perform the same trick if you change the 9[2nd][Op]17 sequence to 3[2nd][Op]17. The display will flash 239.29. A word of warning to TI 58C users; to remove the calculator from its altered state, press [2nd] [CMs] [RST][2nd][CP]. With the 58C's continuous memory feature, it seems to remember part of the altered state, and operation in that state will produce bizaar operation and unusual characters in the display. On the

older 58's and 59's, simply turning off the machine will clear it.

In the same letter Mr. Swinnen was kind enough to tell me what I'd get and I'll pass along the information.

STEPS 000 to 057 - OP 12
047 to 057 - OP 15
058 to 066 - the tail end of
OP 14
067 to 100 - X
084 to 106 - OP 11
107 to 148 - INV X
149 to 191 - OP 13
192 to 249 - Sum Plus at 192
and Sum Minus at 213
250 to 283 - INV P/R
284 to 302 - P/R
303 to 340 - DMS
341 to 379 - INV DMS

Now from steps 380 to 383 there's nothing but zeros, but starting location 384 there are more program steps which will make absolutely no sense, because they are the memory interpretation of numerical constants used by the calculator in its Taylor series routines of the logarithmic and transcendental functions. I won't tell you what they are here for reasons of space, but if you're interested a copy of the firmware, along with what it all means will be in the library.

By the way, even though you need the Master Library Module to get at the firmware, it is not out of the Master Library, and what is listed out is by no means all the calculators firmware. This appears to be only the tail end of it. Well, play with this awhile and next issue while be an article dealing with the use of the HIR command from start to finish.

TKE

Tau Kappa Epsilon

TKE would like to welcome back every from Spring holidays. We would like to congratulate Scott Howard and Brent Mason who were initiated last week.

Our annual Florida trip is coming up the first weekend in May. Anyone wishing to go needs to talk to Steve Pochynok.

Calendar of Events:

- April 6 - St. Jude's Jam
 - TBA - Initiation of W.B.C. TKE Chapter
 - April 14-18 - Greek Week
 - April 26 - Spring Feast (Ga. Tech)
 - May 1-4 - Florida Trip
 - May 10-11 - Bath Tub Race
 - April 9 - Memory Dynamics Demonstration
 - April 23 - Memory Dynamics Clinic
- Anyone who feels they can help us this quarter with our busy schedule please come by and see us. We meet every Thursday at 12:00 in room 358. See you there.

Σ Π

Sigma Pi

The brothers of Sigma Pi would like to welcome everyone back from Spring break. The rush party turned out great and we would like to thank those who made it a success.

The trip to Ft. Lauderdale was fantastic. The beer was cold, the water warm, the sun hot, and so were the females. Go for it, Stacey.

Keith Sands needs help on the bath tub and the Leukemia drive is getting into full swing. There will be a mass IFC meeting in the electrical building on Tuesday April 8, everyone be there.

Those interested in softball and volleyball contact Dennis Gibs and Gary Harber. Meeting's are in the Student Center Thursday at noon, come and find out what it is all about.

*You are invited
to come to the
Southern Tech Library
Seminar Room
Thursday
April 10, 1980
8:00 P. M.
for refreshments
and to view a slide
presentation about
Rotaract.*

Minutes From IFC

All representatives were present at the IFC meeting of April 1, 1980. IFC needs to get an estimate of how many "dues-paying" brothers each fraternity/sorority will have each quarter through next winter so we'll be able to set up a budget.

The IFC will be sponsoring a Leukemia super-swim. Each Frat./sorority must raise \$750. The project is set up to work so that STI can raise \$20,000. We have a national acclaim for this project, so we'll get a lot of publicity for STI as a whole as well as for individual frats. You may raise your money through road-blocks, sponsor sheets or however your group wants to.

TKE is sponsoring a Memory Dynamics Workshop. It will be a four hour seminar on April 23rd from 6:30 to 10:30. The seminar will be held in the student center ballroom.

Tuesday, April 8th, there is going to be a mass meeting of all frats./sorority in room # 462 in the EE building. The Greek-Week schedule will be finalized at this meeting so have everyone there. The meeting will start at 12:00 noon.

Greek-Week T-shirts will, hopefully, be finished by this weekend.

Individualized T-shirts were decided on via general consensus. Money for the shirts is due by April 10th.

Each Fraternity/Sorority needs to turn in a phone list of all your members to IFC so we can make a Greek Directory. Turn in a copy of your Social Calendar with the phone list. All fraternities/sorority need to get the grade release/scholarship forms in to Sue Konrad as soon as possible.

Σ Ν

Sigma Nu

Well it's spring again and as usual the men of Sigma Nu Fraternity are busier than ever. So be prepared to see Sigma Nu involved in everything we possibly can.

First of all, we the men of Iota Pi chapter would like to thank all of the people who came to our rush party. We enjoyed your presence and hope to be seeing more of you. As long as thank yous are going out, a special thanks goes to our little sisters for helping us out. You all know that you have a special place in our hearts reserved for you.

We hope everyone had a nice Easter. We tried to help some underprivileged children have a better Easter by having a special egg hunt for them. They seemed to enjoy it just as much as we enjoyed helping them.

The outlook for Sigma Nu in sports is very interesting this quarter. We expect our softball team to do very well, and our volleyball team to be wiping the other teams off the court. If you are not playing, come out and show your support. It helps a lot.

A few reminders to the brothers. April 12th is the roadblock for Leukemia. We hope to do as well this year as we did last year so we need all the helping hands we can get. Also remember that April 13th is the pledge and initiation ceremonies. These functions should be attended by everyone. Greek Week is coming up so look forward to going for another 1st place trophy. As a final reminder, brothers please get your dues and your White Star money in as soon as possible.

That's all the news for now but the men of Sigma Nu will have a lot to say in the next article. Just remember "Keep on Striving for Excellence"

Spring rush is almost over and Greek Week lurks just around the corner. Here some brothers and sisters assemble for some down home Greek fun.

ARTS AND CRAFTS FESTIVAL
SEEKS EXHIBITORS, ARTISTS, CRAFTSMEN,
ENTERTAINERS, AND DEMONSTRATORS

The first annual Paul D' Cob Arts and Crafts Festival (Paulding, Douglas and Cobb Counties) will be held May 24 and 25, at the Dallas Golf and Country Club in Hiram, Georgia. The festival will be an outdoor event which should attract over 100 exhibitors. The exhibitor will display their work along one of the course's beautiful lakes and under Georgia pines.

A search for artists, craftsmen, entertainers, and demonstrators throughout Northwest Georgia, Eastern Alabama, and Southern Tennessee, is underway to participate in the festival. Any skilled person who has a skill in any of the arts are encouraged to attend. People who can do woodworking, needlework, ceramics, macrame, metalwork, sculpture, painting, tole work, quilting, silk flower arranging, china painting, porcelain doll making, handmade dolls and animals, or any other hand crafted products, please come and display your craft.

Skilled people who would like to demonstrate their work are also being sought. Potters, wood craftsmen, blacksmiths, bobbin lace, glass flowers, are just a few possibilities.

In addition to viewing the exhibitions and demonstrations, the spectator will be treated also to an elaborate depression glass display, plus golf tournament (men and women), live music, cloggers, jugglers, portrait painting, good country cooking, plus other attractions.

All interested artists, craftsmen, people with unusual skills to demonstrate, please contact: John C. McGee, Paul D' Cob Arts and Crafts Festival, 541 Hardee Street, Dallas, Ga. 30132. Telephone 445-9930 or 445-5524.

ORGANIZATIONS

B. R. A.

The regular weekly meeting for this BRA will be held Tuesday @ 7:30 PM in Rm 120 of the Student Center. All persons who are interested in bathtub racing please attend. The BRA would like to thank Ranky Nash for getting the headphone communication system working. All organizations who wish to operate a concessions stand at the spring race please fill out the necessary forms and turn them in soon.

S. T. A. G.

STAG (the Southern Tech Adventure Group) is planning a trip to Shining Rock Wilderness on the weekend of April 18-20. We will camp Friday night in Pisgah National forest, hike to Shining Rock and back on Saturday, and camp again on Saturday night. Anyone interested in coming with us should plan to meet with us at 12:00 noon on Thursday, April 10, in the Student Center cafeteria/Look for our sign.) We need to know how many will be coming. Equipment lists for the trail will also be distributed.

A. L. A.

The student chapter of the American Institute of Architects would like to invite all members and AET students to its first meeting of spring quarter. Our guest speaker will be Ralph Pettet of Pettet Assoc., Architects. He will give a slide presentation on "tilt up construction." The meeting will be in rm. 119 of the student ctr. @ 12 noon, Wed. April 9. Bring your lunch.

C. S. I.

!!! CALCULATOR RAFFLE !!!

The CSI student chapter is sponsoring the First Annual Calculator Raffle during spring quarter.

Buy a chance on:

1st Prize: A Texas Instruments 59 programmable calculator, valued at \$300.00!

2nd Prize: A casio fx-310 pocket scientific calculator, with a fraction function

Raffle tickets cost \$1.00 each. The student chapter will have a table on the lower level of the Student Center during the first few weeks of the quarter, or contact Betty Reynolds, P.O. Box 9644.

The raffle drawing will be held May 18th.

ON MARCH 30, 1979 ROTARY INTERNATIONAL CHARTERED THE SOUTHERN TECH ROTARACT CLUB, ROTARACT IS A WORLDWIDE NETWORK OF MORE THAN 2,800 CLUBS ON 74 COLLEGE CAMPUSES WITH A MEMBERSHIP OF MORE THAN 57,000 STUDENTS.

ROTARACT IS A SERVICE ORGANIZATION. EVERY ROTARACT CLUB WORKS ON AT LEAST THREE MAJOR SERVICE PROJECTS ANNUALLY. ONE FOR THE COMMUNITY, ANOTHER AIMED AT PROMOTING INTERNATIONAL UNDERSTANDING AND PEACE AND THE THIRD DESIGNED TO STIMULATE ACCEPTANCE OF HIGH ETHICAL STANDARDS IN BUSINESS AND THE PROFESSIONS.

THE ROTARACT CLUB OF THE UNIVERSITY OF ROME, ITALY, WORKING WITH AN ORGANIZATION THAT HELPS ABANDONED CHILDREN, VISITS THE CHILDREN AND BRINGS GIFTS, FOOD AND MEDICAL SUPPLIES. THE CLUB IS ALSO STUDYING THE RESULTS OF A LAW REGARDING JOB TRAINING FOR YOUTH.

AT THE UNIVERSITY OF SOUTHWESTERN LOUISIANA THE ROTARACT CLUB IS INVOLVED IN A FUND RAISING PROJECT TO BENEFIT MUSIC. EACH YEAR THIS CLUB PROMOTES A STATE WIDE MARCHING BAND COMPETITION KNOWN AS THE "CONTEST OF CHAMPIONS."

NEARLY \$5,000.00 WAS RAISED FOR THE LEUKEMIA SOCIETY OF AMERICA BY THE SOUTHERN TECH ROTARACT CLUB BY SELLING T-SHIRTS AT STI'S ANNUAL SPRING BATHTUB RACE.

PROJECTS AND THE NEED FOR HELP ABOUND, ONLY WAITING TO BE FOUND. THEY RANGE FROM THE UNUSUAL TO THE MUNDANE AND CAN ONLY BE ACCOMPLISHED IF ENOUGH STUDENTS CARE AND SHARE BY BEING INVOLVED IN ROTARACT.

COFFIE, TEA, OR BAYLEY

Time warp. You are not now but tomorrow
..Tangent arcs, vector quantities, concrete, revolved section, marketable securities, quiz the next day and it's :45 on a crisp March Monday night and I'm bored, tired and alone. The guy next door is banging the rosin out of salvaged two-by-four. Some turkey's out there playing Sgt. Pepper's lonely Hearts Club on a turntable with a worn out stylus. It's so loud you can hear every snap, crackle and hiss of that overplayed vinyl.

Noise. This is Lynyrd Skynyrd and Jimmy Buffet country. At least that's all that the solid states play.

tereo Dixie, electrocuted hillbilly onky-tonk, ground out twenty-four hours a day. Warning: hold it closer to your heart than to your brain.

Seven-fifty and I'm desperate. I've got to escape from this indifferent whirlpool of noise, of people. John Bayley? Who the hell is he?

Seven fifty-five and I've got to gamble...or lose. I don't have any money or fancy clothes. I do have the unchies, though. "Coffeehouse performance...free...refreshments...8:00..." he Sting-Ad blurts like a neon sign. It's a mad dash for the door and then.. I am there.

Music. Raggae music was a surprise in itself. It's threads of melody, intricately masterworked into a gentle, persistent rain of sound both clear, clean, vibrant and honest. The candlelit atmosphere lent a sense of intimacy and oneness to a gathering of noise escapees. Relief.

All fades. What you thought was now is now.

Such is, or was, the event called John Bayley who, in the nano-space of a single moment, became as much an art of my being as a worn-out pair of tennis shoes.

Although the show is over, the performance survives in my memory banks to be replayed and relived for years to come. What a waste if you weren't there to experience this remarkable performer also.

THIS WEEK'S MOVIE

"THE DAY OF THE JACKAL" - Based on Frederick Forsyth's bestselling novel of political suspense, this film tells of a mercenary hired by French OAS officers to assassinate Gen. Charles deGaulle. The methodical, detailed preparations of "Jackal" are paralleled with the efforts of the police to uncover the plot, and the film becomes a screw-tightening thriller of plodding authority versus the cold precision of the assassin.

ADMISSION IS 50¢
SOUTHERN TECH STUDENT CENTER
BALLROOM
shown at 4, 6, & 9:00 P.M.

UPCOMING FEATURES

April 24 "SORCERER"- Directed by William Friedkin and starring Roy Scheider. This exciting film focuses on four strangers trapped in a filthy and primitive South American backwater; their only hope of escape is to volunteer for a suicidally dangerous job, driving a cargo of volatile nitroglycerine across 200 miles of wild jungle terrain.

May 1 "GO TELL THE SPARTANS" - Starring Burt Lancaster. Many critics feel this is the best film made about the Vietnam War.

May 8 "BUTCH AND SUNDANCE-THE EARLY DAYS" - The early exploits of two of the most popular screen characters ever, Butch Cassidy and the Sundance Kid, are winsomely drawn in this captivating, cleverly adventurous film about the Old West's notorious outlaw duo.

May 15 "MACARTHUR" - Gregory Peck's portrayal of one America's greatest heroes is superb. "He fought wars and won them. He defied Presidents - and might have been one. The most controversial American hero of our time...and one hell of a man".

Nineteen years ago, Mary Healy had a success she'll never forget: recovering from cancer. She and almost 2 million others are living proof that serious forms of cancer can be beat. But not without the research and advances in treatment that your donations help to fund. Your contributions are important. As important as life itself.

CANCER CAN BE BEAT.
