

Southern Technical Institute

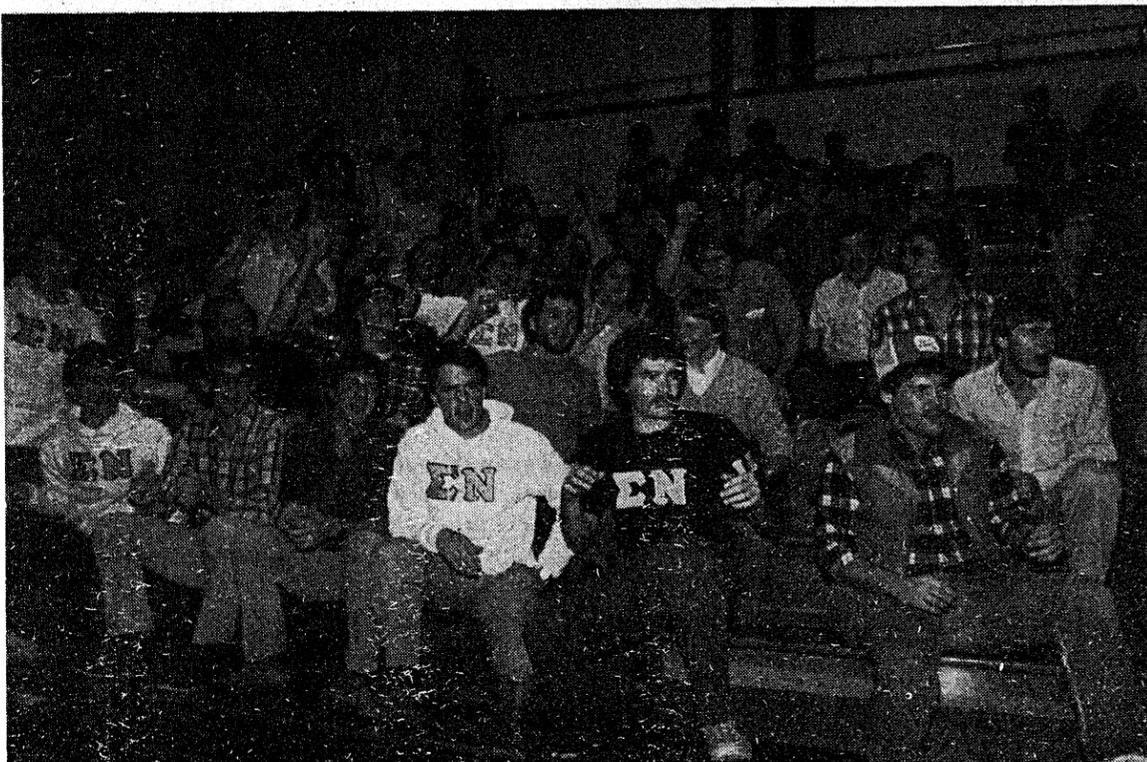

Marietta, Georgia

# The Sting

**BUILDING DEDICATION AT SOUTHERN TECH**--Dedication ceremonies naming Southern Technical Institute's mechanical engineering technology building after a former department head were held on the college campus in Marietta November 23. The building was named for Clarence Arnold Arntson, who served as the first head of the Mechanical Engineering Technology Department at STI from 1948-1968. Participating in the program were (from left) Arntson's widow, Mrs. Clarence Arntson of Doraville; Ben Sparks of Marietta, Cheshier, President of STI; Hoy McClure of Marietta, professor, Industrial Engineering Technology, who spoke on Arntson's contributions to the college; and Jeff Tucker of Marietta, President-elect of the Southern Tech National Alumni Association, who presented Mrs. Arntson with a commemorative plaque.

## Marietta Revitalization

A few years ago, downtown Marietta seemed destined to become just another town sent to the graveyard of former great cities. Chain stores, four lanes, and development elsewhere in Cobb County had blown sagebrush across the empty streets of this ghost town. The death of townships in Georgia is no rare occurrence--a new interstate springs up, the billionburgers and department stores saturate its path and the old business section is forgotten.

But several local citizens understood the historical importance of the area and sent it to a convalescent home to recover. Their efforts have proven to be one of the most successful redevelopment projects in the history of the South.

When the Georgia Department of Transportation began construction on the Marietta loop project (Georgia 120) in 1966, many downtown merchants ran scared. They feared that the route would give rise to new national chain businesses on the highway and decrease the number of people travelling through the city. But a strict licensing process has limited the number of outsiders and the loop has in fact increased the number of patrons because it provides direct access from I-75. Shop owners on the square couldn't be happier. The demand for real estate within the city is also on the rise. Space that rented for 50¢ per square foot only two years ago now goes for \$7-\$8.

Progress began on the rebuilding around 1970 when the Downtown Marietta Development Authority (DMDA) was formed. The late Red Atherton, former mayor of Marietta, became the first chairman of the organization. In 1974, the Kiwanis Club commissioned a two year study to, "Determine the economic, cultural and historical significance of the square

### PREFACE 81'

Yes, it's that time of the year again. We are beginning to plan for the New Student Orientation which will be held on January 5, 1981.

If you would like my staff to include a letter from your organization in the orientation folder, please submit to us 250 copies by 12:00 noon December 12, 1980.

Sue Konrad

Director of Student Activities

# Editors' Corner

## WHAT I DON'T KNOW CAN'T HURT ME!!!

Look!--deep in our minds . . . It's ignorance! No . . . It's Apathy--traveling across the country faster than the election returns. More pervasive the V.D.! Able to resolve any problem with a stifling yawn! Apathy plays a large role in the average Americans life these days, although by nature a passive one. The greatest voice in politics this past year has been the group that was unheard from--the 52% that didn't vote. Less than 12% of our population reads a newspaper. And now for the first time since World War II, new parents don't believe that their children will lead better lives than they do. It is shame, but it will probably take a national disaster to shake everyone up and get them moving. We need to have more control over the forces that shape our lives and to do this, some sort of consensus is necessary.

Not surprising, it was a series of national disasters, some quite prolonged that has lead to the general feeling of helplessness among people of our age group. Starting with the assassinations of the Kennedys and Martin Luther King, and continuing through Vietnam and Watergate, Americans were subjected to years of unanswered and unanswerable questions. It's no wonder that we felt betrayed by our leaders and began to distrust or have no confidence in our nation's institutions. Rather than spur the citizens to play a more active role in society and exercise firmer control, the 1970's saw us turn inward toward self-satisfaction, and away from any active public conscience. Instead

of choosing to sort out the confusion, we shied away from decisions that we had little control over and completely ignored issues that we didn't understand. All the hard questions were answered with "I don't know and I don't care!" People were more concerned with making their own ends meet and that's understandable, faced with rising food, fuel and housing costs. The silent majority not only spoke on evil, but refused to see or hear it as well.

Into the 1980's, these inflationary trends are still out of control, but that is one reason why we must begin now to shake off apathy and start regaining a firm grip on our future. The low turnout on election day is a sign of no confidence. Let's accept that as fact: that the majority of registered voters have no confidence in the way our government is run. Conservative trends towards decentralization of government (actually a Libertarian concept) are also a sign of this lack of faith. If this is so, if we don't like the the lumbering inefficiency of big government, if we don't want an expensive, wasteful bureaucracy, if we disapprove of partism politics and incompetent candidates, if we are tired of having our taxes support social programs that have never improved society, then why have we take so long to change it? Why can't we make substantial changes in our government to make it more efficient, more responsive and more responsible to the people it serves? That's right--government should be subservient to us, and it is time we gained control over it. Whatever is necessary to improve it, by changing

election laws, throwing out waste and mismanagement or even calling a constitutional convention, the first change has to happen in each of us as individuals. We must change our attitudes towards our society. We have to regain the social conscience that is inherent in all of us and realize that if we work together as a nation, we won't have to work so hard as individuals. You see, if things are left to follow their own course, our children will have to face a poisoned environment, a collapsed economy and a degenerative society. It's about time that those people with no confidence in government, regained confidence in themselves and started earning their right to freedom, to insure that their children can exercise it.

### CAMPUS COPOUT

Apathy takes many forms here on campus. Since this was my first quarter as editor, I started out very optimistic that I could bring the students here more into the mainstream of American life by offering a larger, more informative newspaper. By presenting a major news topic every issue, I was hoping to spur your interest enough so that at least you'd have an opinion, instead of being apathetic. Well, if somebody out there has an opinion, they sure are keeping it to themselves! The STING has not received a single letter to the editor regarding any of the fine articles from our staff. Not one comment about any campus news, national or local news, or events! Oh, I received an unsigned letter demning janitors to hell, and an English teacher had his class write letters for an assignment, but I'm convinced that most of you are too lazy to even have an opinion. In any case, we wonder if you deserve the time and effort that this staff puts in to produce a quality newspaper for you!

Another bit of annoying apathy is directed towards the basketball team. Noting the sparse attendance at games, I can only wonder how other schools can pack a gym for an average team, and we can't fill 1/3 of our gym for a championship team. Sports editor Ken Shaw, also on the basketball team, has a few choice words about this in his sports column. Our athletic teams deserve more consideration from us, and one positive step is a pair of vans or bus to transport teams to away games. The SGA should not think twice about spending \$18,000.00 on a traffic light, as putting a "right turn only" sign at the entrance would solve the problem; but that money should be spent to purchase the vans, and soon!

Another consideration for the SGA should be to establish a weight/exercise room to serve our large male student

# Backtalk

Letters to the editor are encouraged and all will be read; however, if they are to be printed, they must have your signature.

Dear Editor:

The Chief Engineer for WGHR is Mr. Kelly Bond who has been serving as such since October 7, 1980.

The six-hundred-plus feet of outdoor transmission line cable, PVC pipe and additional accessories needed to install the cable will be purchased with funds that have been held in reserve since WGHR started constructing the FM station. In fact, all hard equipment for FM such as the transmitter, EBS monitor, antennae, tower and tower cable was purchased with funds other than the SGA funds that you mentioned.

The delays that we have experienced in selectin and installing the FM equipment, 90% of which has been delivered, are not due to financial deficiency but to the availability of several key parts and bureaucratic red tape.

Building a station that will stand the test of time takes time. We can give you FM RIGHT NOW but the quality of the signal and the professionalism of the progamming will no reflec the highest fiedlity that our equipment is capable of, nor will it reveal the maximum creative talent of our staff.

It is unforunate that you think that WGHR-FM is only talk and that we have been sitting idly in our little corner doing nothing else. Evidently you have not been listening to WGHR-AM. Since

United Feature Syndicate

last Spring, WGHR-AM has beefed up both its programming and its public image. We've come a long way from being the "radio room." Why not dial us up? Hearing is believing.

In closing, WGHR-AM warns you to keep your eyes open for two killer hornets on loan from WSB radio at future Southern Tech events and basketball games.

Lee Blaylock  
Station Manager

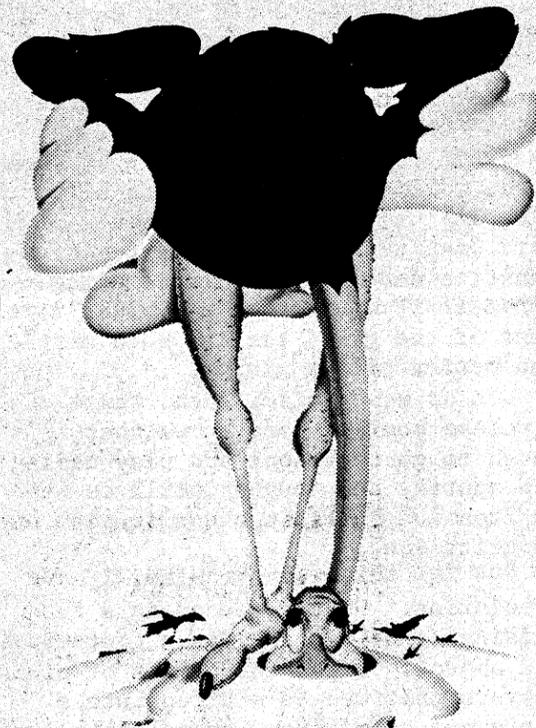

Dear Editor:

Please let me apologise for neglecting to keep the STING informed on the dedication of the Clarence Arntson Building on November 23. It was nothing intentional, I assure you, just a result of trying to do too much with too few and too busy people. Partly, the oversight was due to my being off campus for a longer time than I had anticipated.

Professor Arntson was always very close to students and their activities at Southern Tech, and I feel sure that he would have been deeply disappointed that the student body was not adequately informed about this occasion in Southern Tech's life. If you would extend my apologies to the students through your medium, I'd appreciate it and I think he would too.

Ben C. Sparks  
Head, Mechanical  
Engineering Technol.

**Cancer is often curable.  
The fear of cancer  
is often fatal.**

If you're afraid of cancer... you're not alone. But some people are so afraid that they won't go to the doctor when they suspect something's wrong.

They're afraid the doctor might "find something." This kind of fear can prevent them from discovering cancer in the early stages when it is most often curable.

These people run the risk of letting cancer scare them to death.

American Cancer  
Society

## Unsung Athletes

Faculty and students alike at Southern Tech have raved about the success of our athletic giants, the Runnin' Hornets basketball team. Already there is talk of yet another District 25 championship--perhaps even a national championship. These collegiate cagers are worthy of some mention.

But let's not forget the real jocks at Tech. They'll never get letters, or financial aid, or their picture in the local sports page--but God, they're sharp. I'm talking about the campus pinball wizards and electronic games pros, those unmentioned (yet hardly unseen or unheard-from) studs.

From before the first class--say, 7:30 or so in the morning, long before our beloved basketball buddies are "boxing out" and hitting the boards--to a few minutes before the Student Center closes for the night, the sound of steel balls slamming into bells and buzzers is heard throughout the building. Young males, clad not in shorts and athletic shirts but rock and roll tee shirts and Jack Daniels Field Taster caps, stand before Super Flash, Air Aces, or Space Invaders, ready to best the score put on the game before. Their fingers by the flippers, hips swung low to provide the occasional rear-tilt ball boost, they're ready to play not just four quarters, but a dozen, if need be.

The real heroes here, however, are those individuals whose lower arms are so muscularly developed from pushing buttons that they need the support of a high chair in order to play the game. Unable to stand up before a machine due to the weight of the polhemetic paws, they sit above the change-hungry monsters, rolling the digits even higher, stopping only to make the twenty-five yard dash to the bill changer--an exhaustive and sometimes frustrating (What if it don't take my dollar??) element of the game, testing both mettle and metier of the player.

Let us now praise, then, these tireless souls. Lord knows that it's tough to go to school and play collegiate sports, and tougher still to have to front the bucks in order to play one's favorite game.

But for this last problem, I have a solution. What's needed is a fund-raising event. I suggest a contest. The object: Guess the number of pinball players that can be stuffed into a microwave oven. (Hey, phone booths are not enclosed anymore!! What else is there??)

I just know the contest is a sure-fire means of success.

Steve Cantrell

## Car of the Future

Recent economic developments in the field of transportation and the growing realization that the main source of fuel--the earth's oil reserves--will inevitably be exhausted, have led to an interest in the search for an alternative mode of transportation. Of all ideas considered, the electric car seems to be the most feasible and realistic.

The electric car is not a new idea, but it is one that should be given serious consideration. Most people laugh at the idea of driving an electric car. This is an idea whose time has come. According to Don Kimble of the Electric Car Company of Atlanta, the idea has finally become a reality. Last year, his company sold ten cars in Atlanta alone. He has the largest dealership in the Southeastern United States. He stated that Commuter Vehicles, Inc., located in Seabring, Florida, manufactures almost 150 electric cars per month to be distributed all across the United States.

Several companies such as General Motors have manufactured electric cars for experimental purposes, but C.V.I. is the only company in the business of marketing the electric car.

Also, in the experimental stages is a solar energy powered vehicle. The idea is not very feasible and not likely to be in demand. The charging system has to be supplemented by use of solar panels. Cost of the panels are extremely high. Also, because of the use of photo-voltaic cells, the efficiency of the solar vehicle decreases.

There are many advantages of an electric car. The electric car will handle exceptionally well in snow and on an incline because of its low center of gravity, a rear-mounted motor, and transaxle that provide excellent traction. The electric car, unlike cars with internal combustion engines, is pollution free and operates more efficiently. Safety in an electric car is compatible and comparable with the average small car because it is equipped with all the safety requirements required by law. The electric car is a good investment because of its low operating costs, low maintenance costs and low depreciation as compared with a conventional car. The only maintenance required is 15 minutes per week to refill the batteries with distilled water. The batteries should last from 12,000 to 18,000 miles under normal use. The car is rust proof since it is built from aluminum, plastic and rubber.

While the good points are numerous, there are some disadvantages of an electric car. It is not recommended that it be driven on the expressways and interstate highways because the electric car is designed for low speed and short distance driving. After a recharge, the car will travel a distance of 50 miles before the next recharge is required.

Presently, top speed of the electric car is 35 to 38 miles per hour. While at the Electric Car Company, Don Kimble was in the process of assembling a faster and improved electric car called the Bradley GTE. The cost will be

greater but it will be able to attain up to 100 miles per charge, the top speed will be 75 mph, and the body design will be an improvement.

Some standard equipment for the electric car is a 110-volt on-board built in charger, high impact energy absorbing bumper system, seat belt assembly, radial tires, and a 25 feet Heavy Duty extension cord. The car weighs 1475 pounds and is 216 cubic feet in area. The engine is composed of eight 6-volt batteries producing 6 horsepower. The car frame and body are made up of ABS plastic, aluminum and rubber and is rust proof.

If your interest lies in owning an electric car at a mere 5,000.00 dollars, contact Don Kimble of The Electric Car Company of Atlanta. He has the largest dealership in the Southeastern area. Actually the electric is not a car of the future; it is a car for the present.

Terry W. Drayton

## Building Careers

The Placement Office, those small rooms at one end of the Goat Shed, is more than just Southern Tech's employment office. It can easily be said that the Placement Office has been quite instrumental in shaping Southern Tech and its curriculum.

Since its founding in 1948 as a two-year technical institute, many local engineering firms recognized the promise of Southern Tech grads as engineering technologists and technician. The administration of this school took note of this, and assigned to certain faculty members the additional duties of helping students locate prospective employers, and vice versa.

This gave STI a good degree of visibility and established a solid reputation with large, local engineering concerns. Among these concerns were the State Highway Commission and Georgia Power Company, both which today employ Tech students as co-ops and graduate engineering technologists. After its accreditation in 1962 by the Southeastern College Accreditation Board, Tech faculty and administration realized that a centralized effort for placement was required. Thus the Placement Office was created, making possible more liaisons between students and industry.

Feedback from engineering firms to the new office generated additions to the curriculum. Companies advised faculty members as to the content of courses, and suggested subjects that would be beneficial to graduates entering the job market. This, of course, was not done totally unselfishly. By the mid-sixties many companies needed the skills of Tech graduates--their work in introducing neophytes to the "real world" would be made easier by the addition of increasingly more relevant courses.

Thus the interchange between Southern Tech and industry via the placement office expanded the campus and curriculum. Soon, the potential as a four-year school was seen. Many two-year graduates returned after some time and experience in their chosen field to pur-

CONT. On p. 5

"MARIETTA" from p. 1

area." These findings suggested upgrading the city's shopping environment and restoring many old buildings.

Interest in following this course grew. Hundreds of thousands of dollars were pumped into various revitalization programs. Federal and State money was also utilized on some projects.

Today, the square is alive again with pebble stone streets, restored buildings and real gas lights. The Kennesaw House Hotel, used by Sherman as a field headquarters, has been redone with hand-scrubbed bricks from another pre-1900 hotel, using horse-hair as a bonding agent. It now houses the famous Smith House Restaurant, considered one of the finest in the Southeast. Another distinguished eating house, The Depot Restaurant, is housed in the old L & N train station.

Modernization also has its place in the downtown area. A beautiful new six-million-dollar City Hall building has been built and an eight-story Cobb county government complex is under construction. Two other new multi-story, multi-million dollars projects are also on the drawing board.

But the job is still in its infancy. Future plans include a 5 million dollar restoration of the historic Marietta Walk. 135,000 square feet of total retail space will be established. Two theaters, three additional entertainment facilities and several specialty shops will locate here. Many projects are

being constructed at the initiative of the individual shop owner as well.

Phil McLemore, the DMDA's first director said, "Marietta is undergoing a very exciting transition, one that will truly blend the very best of yesterday with the most appealing aspects of today."

It is now evident that the cemetery of cities will have to wait a long time on downtown Marietta.

Allen Bearden

"PLACEMENT" FROM P.4

sue the bachelors' degree. This brought more companies to the Tech campus, as those that had become marketable as associate degree holders became even more so with field experience and additional training.

Today the placement office keeps in touch with nearly 550 companies that have some interest in our graduates.

They come to campus for career nights and large-scale recruiting efforts. This fall quarter 62 companies came to Tech to interview tentative grads. For the most part, interviewers had full schedules when meeting with the students and it was not unheard of that some interviews were granted in the evening after regularly scheduled hours.

Southern Tech graduates are found in various industries nationwide. This is due to a great degree to the efforts of the Placement Office, that small but extremely necessary department of the Southern Tech administration.

Steve Cantrell

TEACHERS WANTED

The Foreign and Domestic Teachers Organizations needs teacher applicants in all fields from Kindergarten through College to fill over five hundred teaching vacancies both at home and abroad.

Since 1968, our organization has been finding vacancies and locating teachers both in foreign countries and in all fifty states. We possess hundreds of current openings and have all the information as to scholarships, grants, and fellowships.

The principal problem with first year teachers is WHERE to find jobs! Since College Newspapers are always anxious to find positions for their graduating teachers, your paper may be interested in your teachers finding employment for the following year, and print our request for teachers.

Our information and brochure is FREE and comes at an opportune time when there are more teachers than teaching positions.

Should you wish additional information about our organization, you may write the Portland Oregon Better Business Bureau or the National Teacher's Placement Agency, Universal Teachers, Box 5231, Portland, Oregon 97208.

We do not promise every graduate in the field of education a definite position, however, we do promise to provide them with a wide range of hundreds of current vacancy notices both at home and abroad.

Sincerely,  
John P. McAndrew, Pres.  
Foreign and Domestic  
Teachers

LEE, FST

On Monday, October 20, Rod Lee, Head, Fire Science Technology, spoke to the Southeastern Section of the Society of Fire Protection Engineers. Attending were 34 representatives from a number of firms. Mr. Lee's presentation was "Education Opportunities on Fire Protection in the Southeast."

DR. STEVENS

Dr. Charles A. Stevens, Acting Dean, attended the 48th Annual Meeting of the Accreditation Board for Engineering and Technology in San Antonio, Texas on Oct. 15-17. At the session on new technologies and curricular trends in engineering technology, he presented a paper entitled "Two-Plus-Two Programs."

COLLEGE STUDENTS SADDLE UP FOR SCHLITZ RAINBOW ROUND-UP

The Schlitz Rainbow Round-up is underway!!

College students across the country are rustling up empty 12-12. Jos. Schlitz Brewing Company cans and bottles and redeeming them--where permitted by law--for prizes such as television sets, pool tables, microwave ovens, video cassette recorders, computer and stereo systems and more.

The Rainbow Round-up, which runs April 30, 1981, gives enrolled student groups the chance to win prizes from four categories by simply collecting Schlitz, Erlanger, Schlitz Light, Old Milwaukee, Old Milwaukee Light and Schlitz Malt Liquor empties and returning them to local Schlitz wholesalers for Prize Point Certificates worth one point. Erlanger classic bottles, Schlitz, Schlitz Light or Schlitz Malt Liquor tapered bottles are worth two points.

"An organization selects as its goal one of the four prize color categories," said Peter Dang, Schlitz Manager of College and young adult marketing.

"Each category, designated by a color of the rainbow and the point total to win, contains four prizes. Once the point total for the category has been achieved, the group picks the prize desired and sends in its Prize Point Certificates."

Dang said all students organizations, fraternities, sororities, sports clubs, dormitory units and independent groups are invited to enter. "The great thing about the Schlitz Rainbow Round-up is that everyone can win," he said. "The groups compete only against the goal they set for themselves and all winners can enter more than once."

Additional information about the Schlitz Rainbow Round-Up may be obtained by calling toll free (800) 245-6665.

# Sports

Competitive sports at Southern Tech was almost abolished back a few years ago. But the students and faculty convinced everyone to keep basketball.

Basketball is good for Southern Tech. People who don't know much about STI think of it as a vocational school. When people hear about the basketball team defeating a 4-year school like Columbus, Oglethorpe, or North Georgia, then they realize that STI is a four-year school like "Georgia Tech."

Also, the publicity helps to sell the school to new student recruits because they recognize the name and are willing to listen to the recruiters' pitch.

But, besides the publicity basketball brings, it offers entertainment at a school where pranks are the common diversion from studying so hard. So let's support our team for the good of the school.

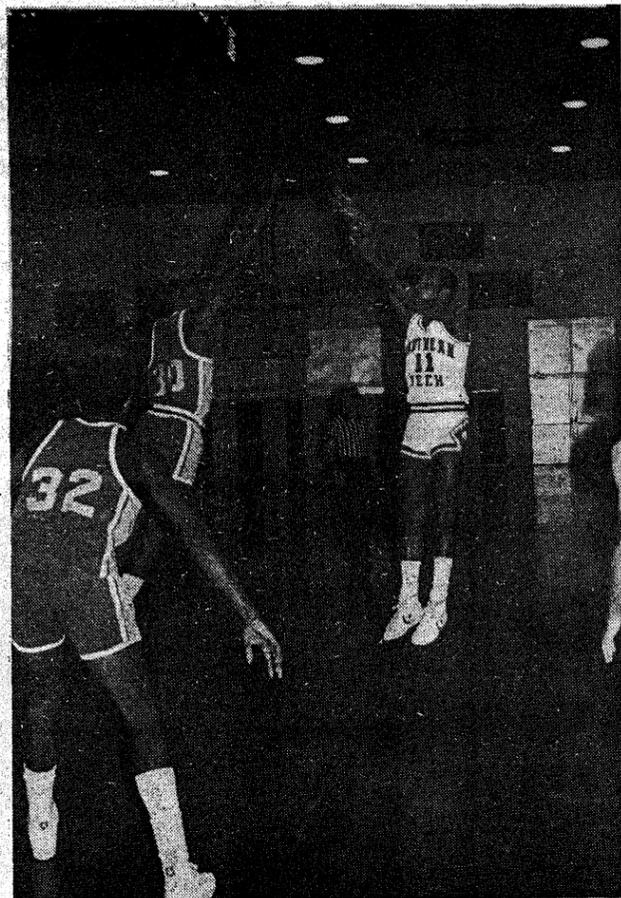

## SOUTHERN TECH SQUEAKS BY CLAFIN

Southern Tech won its second game of the season in a real thriller against Clafin College on Wednesday, November 19. The one point win, 80-79, makes the Runnin Hornets two wins and no losses.

The first half was characterized by lack of defense by Southern Tech. The Hornets managed to score 40 points but allowed Clafin 45.

In the second half, the Hornets fought back behind the shooting of Billy Bromell who ended up scoring 33 points. With only three minutes on the clock, and the score tied, Southern Tech went into a four corners offense and held the ball. Clafin got a technical called for lack of sufficient action. Billy Bromell sank the free throw to make the score 80-79. But with seven seconds left, the Hornets failed to make the front end of a one-and-one. Clafin managed to get a shot with less than a second on the clock but failed to score.

## SOUTHERN TECH WEARS OUT EDWARD WATERS

### CROSS-COUNTRY

Students interested in Cross-Country for Fall 81 should contact Coach Perides in the Gym.

### PAINE SLIPS BY SOUTHERN TECH

In the first round of the West Georgia Invitational Tournament, Southern Tech faced Paine College in an important District Game. It was not a good day for the Runnin Hornets as they shot poorly on their first road game.

In the first half, Southern Tech shot 38% from the field, while Paine put in 57% from the floor. This enabled Paine to take a commanding 44-33 lead at the break.

Lack of rebounding plus poor shooting and costly mistakes kept the Running Hornets from catching up to Paine even though they got within two points with two minutes to go. The final score was 73-69.

Ken Shaw

### SOUTHERN TECH DESTROYS COLUMBUS

The Runnin Hornets took on old SAC foes Columbus College on November 25, 1980. Southern Tech took a hard fought win by 18 points.

In the first half, both teams played good defense but the Hornets forced more turnovers and had more steals to give them a 36-27 lead.

After the break, the game turned into a scoring battle. At the end of the game Southern Tech went into the four corners to preserve a 82-64 victory. Baxter Thomas lead all scorers with 21 points and Billy Bromell pulled down 10 rebounds.

Ken Shaw

Edward Waters College, the tigers, thought Southern Tech was going to be "tiger meat," but the Runnin Hornets continued their domination by the score of 97-81.

The patience and good rebounding of the Hornets in the first half kept them in the game as the Tigers came out red hot and scored consistently from the outside. The score at half was a close 47-46 in favor of Southern Tech.

Ten minutes after the half, the Hornets displayed the great defense they are capable of and Billy Bromell cleaned

up most of his 17 rebounds. Ricky Hudson, Baxter Thomas, and Billy Bromell scored 24, 17, and 23 respectively, but it was Ricky Hudson that added insult to injury by dunking on the head of one of the Edward Waters' players in the last minute.

This put Southern Tech at 6-1 for the year so far. The next Hornet game is this Saturday, December 6 at 7:30 pm against Paine College the only team that has beat us so far this year.

Ken Shaw

### HORNETS WIN 5TH GAME

In the consolation game of the West Georgia Tournament, Southern Tech defeated Allen University for the second time this year, 88-78.

The first half was a very dull game as neither team executed very well but the Hornets managed a 41-40 lead at half. In the second half, Southern Tech managed to get a ten point lead, mostly on mistakes made by Allen or steals by the Hornets. Poor free throw shooting at the end of the game resulted in only a ten point difference, 88-78.

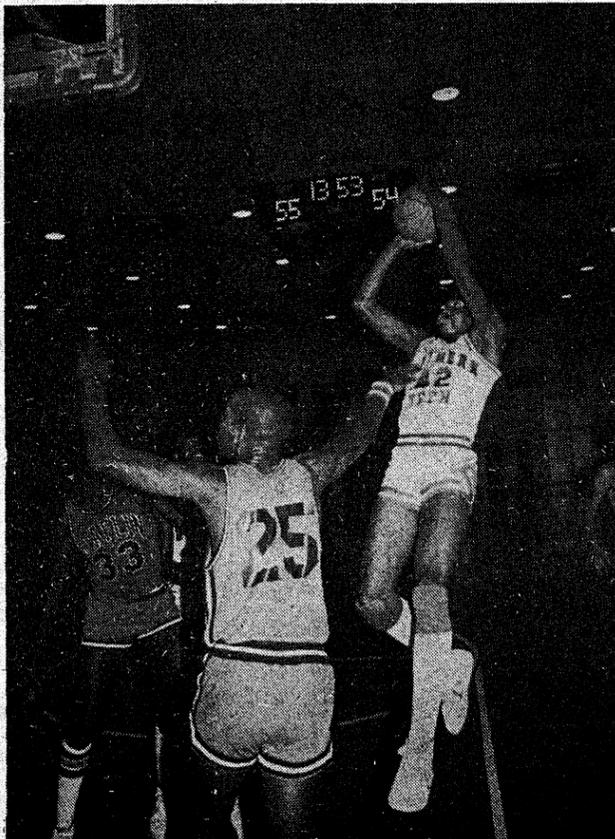

Ken Shaw

### HORNETS SLAUGHTER FRIENDSHIP

Southern Tech hosted winless Friendship College on November 22, 1980. A sparse crowd witnessed the Runnin Hornets show obvious superiority in the first half as they went out to a 47-30 lead.

The second half was no different. Southern Tech played good defense and managed to win by the score of 94-64. Mike Braun had 15 points and Ricky Hudson scored 14 points while Clyde Franklin pulled down 11 rebounds.

STI REPRESENTED IN NATIONAL TOURNAMENT--TKB (Tap a keg of brew) will be representing STI in New Orleans at the 2nd annual Flag Football Sugar Bowl Classic. There will be 32 intramural teams from all over the nation. The tournament will take place on December 28-31, at the University of New Orleans.

Approximately 50 men's and 16 women's collegiate flag football teams from across the country will compete for respective national championships at the second annual Michelob Light/NTFL Sugar Bowl Classic, set for December 28-31 at the University of New Orleans Athletic Fields.

"This is the newest addition to a myriad of sports events held at the UNO campus during Sugar Bowl Week," said tournament director Lou Mariciani, "and it's turned out to be one of the most exciting and successful of the Sugar Bowl programs." Last year's first Michelob Light/NTFL Sugar Bowl Classic attracted 30 men's teams to UNO, while this year's tournament has been expanded to 48 teams and includes a women's division.

In addition to trophies and "bragging rights," top teams compete for the chance to demonstrate their skills at a pre-Sugar Bowl game scrimmage before a packed house at the Superdome on New Year's Day.

The double-elimination men's tourney will feature approximately 128 games between 9:00 a.m. Sunday and Wednesday's 2:30 p.m. championship. The women's tourney begins Sunday at 11:30 a.m. and continues through the title match set for Wednesday at 1:30 p.m.

Pre-championship games played at the University of New Orleans intramural fields--located near the school's Health and Physical Education Center--are scheduled between 9 a.m. and 4:30 p.m., December 28-30.

## REMAINING SCHEDULE-FALL QUARTER

- December 5 - Finals Begin
- December 6 - Basketball vs. Paine College, home, 7:30 p.m.
- December 7 - STI Christmas Party for students and faculty kids, sponsored by Gamma Phi Beta and the Campus Activities Board, 3 p.m., Student Center. A Disney film will be shown plus a special visit from Santa Claus.
- December 10- Finals End  
Basketball vs. Paine College, away, 7:30 p.m.

## FINANCIAL AID PLANNING CALENDAR

### ENROLLED STUDENTS

- January 1 - April 1 Period to submit new or renewal applications for the following academic year.
- March 1 Deadline to apply for short-term loan for Spring Quarter Registration if funds are expected before late fees apply.
- April 1 Deadline for submission of new or renewal applications for financial aid (scholarship, loan, etc.) for the following academic year. Submission deadline for the Financial Aid Form to College Scholarship Service.
- April - May 15 June graduating seniors should schedule an exit interview with Business Office if National Direct Student Loan has been received during college career at Southern Tech.
- May - August Notification of action taken on financial aid application.
- June 1 Deadline to apply for short-term loan for the Summer Quarter Registration if fund are expected before late fees apply.
- August 21 Deadline for notification of action taken on financial aid application.
- September 1 Deadline to apply for short-term loan for Fall Quarter if funds are expected before late fees apply.
- December 1 Deadline to apply for short-term loan for Winter Quarter if funds are expected before late fees apply.

### PROSPECTIVE STUDENTS

- December-January Request information and application from Financial Aid Office, Southern Technical Institute, Marietta, Georgia 30060. (404) 424-7227.
- March 1 Submission deadline for Financial Aid Form to College Scholarship Service.
- April 1 Deadline for submission of financial aid application (scholarships, loans, etc.) to Southern Tech.
- May - July Students will be notified of action taken on financial aid applications.

### BOOSTER CLUB TICKETS ON SALE

Individual, family and Century Club memberships to the Southern Technical Institute Booster Club, Inc. are on sale. Individual memberships are \$10; family, \$15, and Century Club, \$100. Each membership admits holders to all home games without additional charge. Tickets may be purchased by contacting John Pattillo, secretary/treasurer of the Boosters Club, or at the gate at home games.

### VETERANS ANNOUNCEMENT

All students receiving veteran benefits are reminded to stop by the VA office as soon as possible to fill out the status form (after registering) so they can be certified for Winter Quarter. Failure to do so on time will delay receiving benefits.  
OFFICE: ROOM 101 ADMINISTRATION BLDG.

CHRISTMAS PARTY ! ! !

SPONSORED BY GAMMA PHI BETA AND CAB

SUNDAY, DEC. 7 AT 3:00 P.M.

STUDENT CENTER BALLROOM

JAMES MAPES will appear January 15, 1981, at 7:30 p.m. in the Student Center Ballroom. FREE to STI students, faculty and staff. PUBLIC: \$1.00.

Exciting sellout shows, standing ovations and repeat performances... that's why James J. Mapes was named 1977's "Campus Entertainer of the Year in ESP & Hypnosis." His incredible total audience participation program is really two shows in one: combining ESP and hypnosis. It's available on its own or as part of a unique two day residency where he teaches self-hypnosis in a 3½ hour workshop. Call and we'll send you an info kit describing Mapes' programs.

# What's happening

## INTERNATIONAL INFORMATION

### ALIEN ADDRESS REPORTS

All aliens, immigrant as well as non-immigrant, are required to report their current address and status annually in the month of January. The alien address report card (form I-53) may be obtained at any U. S. Post Office, Immigration Office or the ISP Office. The completed form I-53 should be mailed in January. Failure to complete and submit an alien address report card during the month of January can necessitate a personal visit by the alien to the district office of INS to explain his noncompliance.

### CHRISTMAS TRAVEL PLANS

If you are an F-1 student and plan to leave the United States during the Christmas vacation you must have a new I-20 form for re-entry. Please stop by the ISP office ONE WEEK BEFORE YOUR DEPARTURE to request your I-20 form.

Make sure your visa (the stamp in your passport) has not expired. If it has, you will need to visit the nearest American consulate outside of the U.S. to obtain a new one before you will be allowed to re-enter the U.S.

### HOSPITALITY OPPORTUNITIES

Applications are now available for the CHRISTMAS INTERNATIONAL HOUSE and FRIENDSHIP INTERNATIONAL HOUSE. Both programs are designed to give international students a place to go during the Christmas holidays and to share the spirit of Christmas with a family in the United States.

Since you will be guests of the family, room and board will be FREE. The only cost to you is the ten-dollar (10) registration fee and the round-trip transportation to and from the city where you will be staying.

The family will also provide tours and recreational opportunities during your visit.

Applications are filled on a first-come-first-serve basis and you are urged to mail your applications early. If you are interested and placed with a program and then must cancel your plans, it is very important that you notify the coordinating office that you cannot participate. This will allow another international student to take your place.

### DATES TO APPLY:

CHRISTMAS INTERNATIONAL  
(until November 26, 1980)

FRIENDSHIP INTERNATIONAL  
(from November 1 - December 1, 1980)

© 1982 United Feature Syndicate, Inc.

## ANNUAL BAPTIST CONVENTION

Every year the Georgia Baptist Convention sponsors a conference for international students of various religious beliefs to discuss religion with other students in Georgia.

This year, the conference will be held from January 23-25, 1981 at Toccoa, Georgia. The conference will begin at 9:00 p.m. on Friday and will end after lunch on Sunday.

Participants are welcomed to attend a presentation of the Christian faith on a voluntary basis.

Cost/single student \$5.00  
Cost/couple(children free) \$10.00

### TWO NEW SCIENCE ELECTIVES TEXTILE DEPT

What company will you be working for when you graduate from STI? Well, if there is possibility that you might be employed by a textile-related company, you might be interested in taking these courses:

TET 371--Carpent Manufacturing 3 hrs.  
(T Th 9-10:30)  
TET 393--Textile Industry Safety 3 hrs.  
(t Th 9-10:30)

These courses were designed with the non-textile student in mind. Textile Technology and terminology knowledge is not needed. No text is needed. Lectures will be supplemented by presentations by visiting industry experts; plant trips; slides and/or film. Tests will be taken from notes obtained from these sources.

The carpet manufacturing center of the world is Dalton, Georgia, just 55 miles north of Marietta. Ninety percent of all carpet produced in the world is produced within a 50-mile radius of Dalton. The carpet industry is one of the fastest growing industries in the U.S.

### SCHEDULING OF MEETING ROOMS IN THE STUDENT CENTER

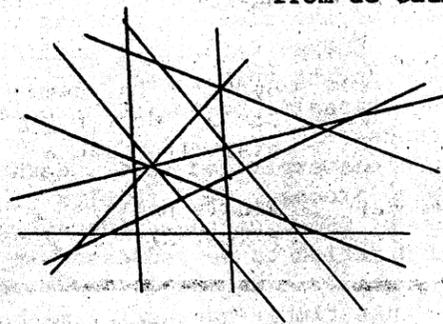

Every quarter there is shortage of meeting room space in the Student Center on Tuesday's and Thursday between the hours of 12:00 Noon and 1:00 p.m. In order to be fair to all organizations, I am setting up the following guidelines for reserving rooms during this peak period. THESE GUIDELINES ONLY APPLY TO THE ABOVE STATED TIMES!

1) all recognized organizations can reserve Rooms 119 and 120 if they have over 20 members. If their membership is less, then they cannot reserve Rooms 119 and 120, and they should reserve the conference rooms instead.

2) The Student Center Office will not take reservations Winter Quarter until December 1, 1980 at 9:00 a.m. At that time the student center secretary will schedule on a first come first serve basis. Mrs. Burr will handle all scheduling, so all requests must be submitted to her in writing. If there are any questions, concerning these guidelines, please contact Sue Konrad, Director of Student Activities.

## STINGERS

from de Caux

STINGER #20 has been solved by David Schornak. STINGER #25 was solved by Sharon Nardo and working together Mike Sumrell and David Schornak.

What is the largest number of regions into which the plane can be divided by ten straight lines?

### CARRIAGE TRADE DINNER CLUB

The Carriage Trade Dinner Club is happy to presents its fifteenth fabulous season to the Metro Atlanta area. Over 55 of Atlanta's finest restaurants, including, THE AMBASSADOR, HERREN'S, THE GRANARY, ICHIBAN STEAK HOUSE, e.j.'s and COGNITO'S--welcome you to dine TWO for ONE at their establishments.

Never before has such an outstanding group of fine restaurants been added to your dining program. Heading the list is the famous SMITH HOUSE (Marietta and Dahlonega locations). MCKINNON'S LOUISIANE AND THE DIPLOMAT (praised by American Express as "one of the best restaurants in the world.") can be enjoyed on weekends. Cashins's (Perimeter Mall) and Cathay Pacific (Lenox Square) complement the list of 12 fine restaurants participating for the first time.

WEEKENDS are great for dining out this Season--with 32 restuarants valid on Friday, 28 valid on Saturday, 20 valid on Sunday and 18 available at lunch.

SPECIAL FREE BONUSSES for the Winter-Spring Program include lodging in Hilton Head, St. Simons Island, Miami, Jekyll Island and Savannah. A little closer to home we have DINING and LODGING bonuses at Stouffer's Pine Isle Resort and popular Lanier Island Cottage Rentals. For your entertainment pleasure we have included two for one admissions at 9 metro Atlanta movie theaters.

The advertised price for the Winter-Spring Program will be \$20.00. However, as a member of Southern Tech you are offered this exciting membership at a savings of \$7.00. To qualify for the reduced rate of \$13.00 you may pick up your special applications at the Student Center Office.

GEORGIA'S NATIONAL FORESTS

"The new era in resource management for the Chattahoochee and Oconee National Forests continues to unfold," Forest Supervisor Pat Thomas said today. Thomas made the remark as he announced the major issues being addressed in the land management plan for Georgia's two National Forests.

Land management planning, an open, systematic approach for deciding how the Chattahoochee and Oconee National Forests should be managed for the next 10 years enters its second stage with the announcement of these major issues. The first stage of the planning process involved identification of issues of public concern. Thomas noted that hundreds of Georgians provided comments on their concerns during this first stage. Issues raised ranged from the availability of recreational opportunities to law enforcement procedures to timber harvesting methods.

Thomas explained that, "each of the comments we received underwent a two-step review process. The results of this evaluation was the following list of major issues. Each of these issues was found to be of sufficient scope, intensity, and duration to be addressed in a long-range plan." The major issues are:

- What timber harvesting methods should be used on National Forest Lands?
- What should be the final recommendations for RARE II "further planning" areas on the Chattahoochee National Forest?
- How should the Forest Service road system be managed to meet resource needs and public needs?
- How much, of what types of recreational opportunities should be provided on National Forest lands?
- What role should the Chattahoochee-Oconee National Forests play in providing firewood?
- How can the soil resource be managed to prevent erosion and the reduction of water quality?
- How can violations of laws and regulations be reduced on National Forest lands?
- How much emphasis should the Forest Service place on wildlife management?
- Under what circumstances should hardwood areas be converted to pine?
- What restrictions on off-road vehicle use are necessary to prevent environmental damage?
- For what reasons should land be acquired by purchase, donation, or exchange by the Forest Service?
- How should the Forest Service identify and manage unique or delicate resources existing on National Forest lands?

Thomas asked that the public continue their involvement in land management planning by suggesting possible solutions to these issues. He continued, "An eight-page document that examines each of these issues in-depth and describes how the public can offer suggestions on solutions to these issues is available from each Forest Service office in Georgia. Or, interested people can write or call the Forest Supervisor's office, 601 Broad Street, Gainesville, Georgia, 30501, (404) 536-0541.

\*\*\*Public relation skills are needed to publicize and promote a health oriented agency's special projects and events. January is Smoking Education Month and a minimum of four features are needed. Share your publicity experience by calling United Way's Volunteer Cobb/Douglas at 428-8344.

\*\*\*Holiday--Share your good fortune with needy families this Thanksgiving by collecting food baskets and making Thanksgiving meals. Give thanks this year by calling United Way's Volunteer Cobb/Douglas at 428-8344.

\*\*\*Volunteer Training--The meals on Wheels program in Lithia Springs needs more volunteers to deliver meals to senior citizens. ENVIRONMENTAL QUALITY SURVEY

"The United States is, by and large, a nation which is willing to pay the price for environmental quality," according to a recently released public opinion study of the Council of Environmental Quality.

Approximately 1500 people were interviewed between January and April 1980, in order to "obtain information about new areas of environmental concern, the degree of support for environmental protection, and to determine public responses to difficult choices between environmental protection and other values."

Among findings of this survey, conducted by the Roper Organization and Cantrell Research, Inc., was the concern of Americans about toxic chemicals in the environment. The study states, "We want the government to test and regulate new chemicals before they are allowed on the market. We prefer environmentally benign energy sources--such as conservation and solar energy--to sources that pose health risks and other dangers."

Only 20 percent of those interviewed said to "relax environmental standards in order to achieve economic growth." However in energy/environmental trade-offs most people chose energy production. The study says that Americans want to concentrate our efforts on developing solar power, energy conservation, and coal. Development of nuclear power was the last choice of those surveyed.

U. S. FOREST SERVICE

While Forest Service officials continue to look for the person responsible for last week's Cohutta Wilderness fire, the U. S. District Court in Rome, Ga., has handed down Georgia's first guilty verdict for deliberately setting fire to National Forest land.

Ralph H. Stokes of Murray County, Georgia, has been found guilty of two counts of leaving a fire in and near the Chattahoochee National Forest on April 10, 1980. Stokes set ten fires on National Forest land in Murray and Gilmer Counties, Georgia. The damage sustained by these fires was approximately \$18,000.

Stokes' sentence of six months on each of the counts was suspended and he was placed on five year probation. During those five years Stokes may not enter the Chattahoochee National Forest except to travel through the area on U. S. Highway 76 or Georgia Highway 282.

Fire investigators continue to ask that anyone who saw anything suspicious in the area of Rough Ridge Trail and Jacks River on Thursday, November 13, from 3 to 6 p.m., contact the U. S. Forest Service at (404) 536-0541.

### ALUMINUM RECYCLING

Christmas is traditionally a time for lots of entertaining, and most households are stocked with products packaged or contained in aluminum.

Save the discarded aluminum and receive cash from Reynolds Aluminum Recycling Company every Tuesday through Saturday in December (except Dec. 25 & 26) from 9:00 a.m. to 12:00 p.m. at the Unclaimed Freight, 119 N. Cobb Parkway.

Reynolds pays 23¢ a pound for aluminum cans and other clean aluminum items. In certain markets, Reynolds pays a bonus price depending on local market conditions. For further information, call toll free 1-800-228-2525.

"Holiday entertaining usually centers around food preparation and dining with family or friends," said Dick Kephart, District Manager for Reynolds Aluminum Recycling Company. "There are numerous aluminum items found in almost any and every kitchen during the holidays, items that could be saved for recycling."

Recyclable aluminum includes such items as beverage cans, foil, pie plates frozen food and dinner trays, dip, pudding and meat containers. Siding, gutters, storm door and window frames, and lawn furniture tubing are also recyclable. These items should be cut to lengths not exceeding three feet and bundled.

### TONY AWARD WINNING "PURLIE" TO OPEN PEACHTREE PLAYHOUSE

The Just Us Theatre Company will present the Tony Award winning musical "PURLIE" starting January 9th through 18th at the Peachtree Playhouse, Peachtree and 14th.

"PURLIE" was first presented in New York, in 1969, starring Cleveon Little and Melba Moore. Mr. Little and Ms. Moore received Tony Awards for their performances. Featured in the cast were Sherman Hemsley, Helen Martin and Novella Nelson. Linda Hopkins ("ME & BESSIE") was also featured as solist in this joy-filled production.

Just Us Theatre Company will present a free preview show at the Peachtree Playhouse on January 8th at 8:30 p.m. Tickets will be given out on a first come first serve basis. Just Us Theatre is a 5 year old civic non-profit organization created for the purpose of presenting professional black theater to the people of Georgia. For ticket information call: 252-8960.

### ATLANTA MARKETING ASSOCIATION

Chris Schoenleb, Executive Vice President of Arby's will be the guest speaker at the Wednesday, December 10 meeting of the American Marketing Association scheduled for noon at the Atlanta Biltmore Hotel. He will discuss "The New Arby's Marketing Program."

In a major effort to increase market share and revitalize its operations, Arby's has developed a new marketing program and advertising approach. Mr. Schoenleb will review fast-food marketing conditions and the special research which led to the strategic repositioning as well as showing the new advertising campaign created by Louis Pitts Gershon, New York.

December 5, 1980

### CHRISTMAS AT FERNBANK

Beautiful music and sparkling skies await the planetarium visitor at Fernbank Science Center this holiday season. For most people, the season of Christmas brings to mind warm thoughts of peace on our planet Earth and good will toward all men. Among these pleasant thoughts, many of us are also reminded of a mysterious star that appeared over the small town of Bethlehem. Fernbank's planetarium staff invites you to come and share their search through the heavens as they investigate, through astronomy, the possible explanations of this 2000 year old mystery. "The Star of the Magi" begins on December 2 and continues through December 23 (no shows December 24-29) and December 30. Programs are offered to the public Tuesday through Friday evenings at 8:00 p.m., Friday evenings at 10:00 p.m., and Saturdays and Sundays at 3:00 p.m. Admission is \$1.50 for adults and 75¢ for students. Children under twelve years of age must be accompanied by an adult and children under six are not admitted.

### CHRISTMAS FANTASY AT FERNBANK

"The Elf, the Widdle and the North Star" is Fernbank planetarium's Christmas fantasy designed for children of ALL AGES and offered FREE of charge.

Having lost their way to the North Pole, Pip the Christmas Elf and Rudolph the Red-Nosed Reindeer find themselves on the ice-bound planet Gimme. There they meet a local inhabitant, a widdle, who explains his plight. Gimme will remain ice-bound until someone on the planet can find it in his heart to give something to someone in need. But widdles are use to receiving gifts, not giving them!!

Will just one widdle come forth and rescue Gimme from it's cold fate? What kind of gift would be needed? Join the staff of the Fernbank planetarium as they celebrate the holiday spirit.

### FREE PRESENTATIONS:

December 12, 16, 17, 18, 19

6:30 p.m.

December 13 & 20

11:00 a.m. & 1:30 p.m.

December 14 & 21

1:30 p.m.

December 23

10:30 a.m., 3:30 p.m., and 6:30 pm

### SATURN AND THE CHRISTMAS STAR

The Agnes Scott College Observatory and Planetarium monthly open house, Friday, December 5, will feature a lecture on the planet Saturn, a planetarium show on the Christmas Star and observation through the 30-inch Beck Telescope. Presenting the program will be Dr. Robert Hyde, director of Bradley Observatory, and Julius Staal, director of the planetarium. The free, public program will be held at 8 p.m., rain or shine.

Bradley Observatory is located in Decatur off East Dougherty Street across the street from the Agnes Scott tennis courts. Free parking is available at the tennis courts.

### "ANNIE" RETURNS TO ATLANTA

Mike Nichols, producer of the multi-award winning musical, ANNIE, returning by popular demand to Atlanta's Civic Center auditorium from December 17 through January 3rd for 24 performances only, has announced the cast that will bring to life the fabled characters from the comic strip on which the musical is based.

Reid Sheldon, who created the role of Daddy Warbucks, played it for 1,189 performances on Broadway and whose voice appears on the original cast album will repeat the role as the world's most lovable billionaire.

In the title role Atlanta audiences will see Marisa Morell, not quite 10 years old when she won this coveted role. The bright-eyed little actress was discovered by director/lyricist Martin Charnin when she made her Broadway debut in I REMEMBER MAMA with Liv Ullmann.

Tickets are 1/2 price for youngsters 16 and under for the following performances, \*Wednesday, December 17, 3:00 and 8:00, Thursday, December 18, and Sunday, 8:00, December 21. Ticket prices are \$15.00 for Main Floor, Box and loge, \$12.00 for Dress Circle, and \$9.00 for Balcony tickets. For the New Year's Eve performance only, special ticket prices apply and are \$17.50, \$14.50 and \$11.50.\*\*

For further information please call 252-8960. Tickets are available for the time being by mail order only. A \$1.00 handling charge is applicable to all orders.

### ATLANTA SKI CLUB

Not only do Atlantans live in a vibrant and progressive city, but the Atlanta Ski Club offers a unique opportunity to all of us. We have both winter and summer sports within each reach. ASC summer programs are both interesting and exciting, and offer a means of staying in shape. Our own Sawdust Ski School teaches skiing to all levels of skiers, and our extensive program of Local Trips (downhill and cross country) is already in the final planning stages. FOR MORE INFORMATION CONTACT:

Atlanta Ski Club, Inc.

Suite 502, 1430 W. Peachtree St, NW  
Atlanta, GA 30309

APPA

The Atlanta Press Photographers Association will be conducting the eighth annual Atlanta Seminar on Photojournalism on Friday, Saturday and Sunday, December 5, 6, 7, 1980 at the Stadium Hotel in Atlanta.

The seminar is open to the general public and high school and college students interested in photojournalism are particularly encouraged to attend. Portfolios for critiquing by speakers are welcomed.

Features include contests, manufacturer's exhibits, workshops on many subjects, portfolio critiques, a hospitality suite and a list of fine speakers.

### FLIGHT TRAINING UNDER THE GI BILL

Veterans taking flight training or correspondence courses under the GI Bill must pay a larger share of the costs under legislation effective in October.

But low cost VA loans of up to \$2500 are now available to veterans in flight training. Both provisions were part of "The Education and Rehabilitation Amendments of 1980."

The Congressional action, approved by the President on October 17, also increased GI Bill education allowances.

Students who enroll in correspondence programs after September 1, 1980, may receive 70 percent of the total charges for correspondence training from the Veterans Administration. Those in flight training are reimbursed 60 percent of the costs. Those enrolled in either program on September 1, 1980, or earlier will continue to get 90 percent of the total throughout the course provided the training is continuous and part of the same program of education.

Flight training continues to be restricted to eligible veterans taking an approved course of flight training generally accepted as necessary to attain a recognized vocational objective in the aviation field. Flight students also must meet physical qualifications, and they must have earned a private pilot's license.
