BSA Presents A. Reginald Eaves

MEMBERS OF THE BLACK STUDENT ASSOCIATION CONDUCTED A MEMORIAL SERVICE FOR ATLANTA'S MISSING AND MURDERED CHILDREN ON MAY 7.

HARLES MIX TOOK A 7 SECOND LEAD AFTER THE FIRST LAP AND NEVER LOOKED BACK, AS HE WENT ON TO WIN THIS SPRING'S 15TH ANNUAL ATHTUB RACE. HE FINISHED FOUR LAPS AHEAD OF ED JORDAN. COMPLETE RACE RESULTS AND MORE PHOTOS APPEAR ON PAGE 15

On Thursday, May 7, 1981, the Black Student Association presented memorial services for Atlanta's missing and murdered children in the Student Center ballroom. Approximately 80 students and faculty were present.

The featured speaker for the occasion was A. Reginald Eaves. However, Mr. Eaves arrived late and the Academic Dean, Dr. Stevens made comments expressing concern about "the serious problem and the disturbing results." He also said the only way to solve the problem is through togetherness.

When Mr. Eaves finally arrived his oration was impressive. He stated "This tragedy was unparalleled in the history of Atlanta, or almost anywhere in the U.S." He criticized the press for their sensationalism. He viewed the victims in a positive sense saying that instead of being hustlers and street children, that they were industrious children earning extra income. He was also bothered by a statement made by an FBI agent saying that Mother's had murdered their own children. He was most disturbed by statements from the press concerning Atlanta present administration incompetency. He stated that if this is true, then so is every other agency involved such as the FBI, GBI and Dekalb and Fulton County law officials. According to Mr. Eaves, the only incompetency existing is "the incompetency of this society in not being able to deal with an individual with a sick mind."

Mr. Eaves said that in order to help, "we must bring a sense of cooperation, character, competence and commitment out in public to help erase the stigma attached to the situation."

Mr. Eaves was presented a plaque in appreciation by Stanley Hill, president of the BSA. Mr. Hill later stated that the audience could have been larger and there was no excuse for non-participation because the services were well publicized. He attributed lack of attendance to apathy on campus. More students, faculty, and administration should have been involved seeing the situation as it is.

According to John Martin, a more visible member of the BSA,

Only In America

Only in America they said. Lennon, John F. and Robert Kennedy MLK, Ronnie Reagan. But then some fool shot the Pope--not in America but in the Vatican, home turf of the Catholic Church.

America is not the blood thirsty, sex crazed, Godless country so often spoken about--at least we're not the only one. But neither are we the land of the uninhibited free that near-naked Cubans in sugar fields dream about. In this writer's opinion, America has fallen behind several nations in the pursuit of basic rights for its citizens. Though progress has been made, Utopia still beckons from afar--across the fat jungle of theological politics.

I consider myself conservative--defining conservatism as close adherence to the US constitution. I believe that this declaration of American freedom gives me the right to do anything I please as long as it does not infringe upon the rights of anyone else. If this assumption is wrong, then I disagree with the constitution. Laws in this land certainly disagree with me. I wonder why?

I wonder why I can't legally engage the services of a willing prostitute in the privacy of my own motel room. I wonder why I can't legally walk through the closed doors of a bookstore and purchase certain periodicals filled with pictures of willing models, produced by a willing publisher, and sold by a willing vendor to me, a willing customer.

I wonder why I can't legally smoke an illegal, untaxed marijuana cigarette inside my own wall to get blown slap out of my mind. Of course, this is no major problem--I could get blown just as

bad on legal and heavily taxed alcohol if I wanted to.

Why can't I lose my house trailer in a poker game if I want to? And why can't I be a white male school teacher married to a black woman or another man if I wanted to?

I am not a pimp, pothead, poker player or pervert. I do believe in God, good morals and natural highs. I aim to be a preacher one day. But I, nor any branch of government has the right to decide whether you must live as I do.

But laws in this land do take these rights of choice from us, destroying our own sense of self discipline. These laws are not sons of the American Constitution but bastards of an extremely political church in this country.

This is sad. At best, these laws are unenforcable and thus useless. Time says politics and religion mix like castor oil and a screaming baby. Too many people have died in the name of the price of peace.

The state, in my opinion, does a pretty good job of staying out of the church. What business does the moral "majority" as good as their intentions may be, have at the back door of the White House.

It is time we planted the seeds of freedom for tomorrow by eliminating a few "crimes," crimes where the only victims are the offenders themselves.

The Word Is 'Participate'

Have you ever been to a full-fledged scream in? No? Well, the key to a cream in is absolute participation. During the peak intensity points of a quarter, all faculty, students and administrators meet in a designated place at a designated hour and are given the signal to scream at the top of their voices for a designated period of time. Afterwards, they resume work as usual. The idea is to release all frustration at one given moment.

But perhaps, Southern Tech is not ready for a scream in! But there are other activities that are useful as outlets that demand your participation. There are the basketball and baseball teams. You might not be into playing the sport but why not a spectator be? There are the newspaper and year-book staffs. Perhaps you are not into writing or photography, but at least a reader be. These institutions are a service for the whole student body. This includes you! Let them know what it is you would like to see published. If you think they're doing an excellent job, say so. It's your privilege!

And last but not least, class! Did you ever wonder how you could liven up the boringest class of the day? Participate! Ask a question every now and then! Especially if it's something you really don't understand. Your friend on the outside may be a little fuzzy on the subject, too. The best thing to do is ask the prof on the inside!

Don't continue to let administration go on without you! The word is participate! Join! Encourage! Stimulate! Motivate! Generate--by your thoughts, words and deeds. A scream in? Well, that's a long time coming! Participation equates satisfaction a whole lot faster! And who knows you might even meet a friend!

Backtalk

Irresponsible Journalism

Dear Editor,

This quarter has had some very interesting editorials and then some, not so interesting. Seemingly, everyone agrees with all your opinions because no one ever writes a disagreement or a complaint. I can't believe everyone at Southern Tech is apathetic or even copasetic.

This is not a complaint, however. In your last issue there was an article about irresponsible journalism. I agree with the author and would like to site some of the problems and fears created through the press. Because of the unfortunate murders of children in Atlanta, there is reason for children to be afraid. However, the press has at point made the murders into a racial issue by giving credence to leaders in the community supporting racism. How can the murders be racially motivated when there are no clues of who the murderer is (black, white or other). Furthermore, the press has even insinuated that the murders are sexually oriented comparing them to the John Gacey incident in Chicago

The police department has dispelled all such notions because sexual evidences were not apparent on any of the victims. Even evidence of great significance was revealed and why.

I agree, the press is full of sensationalism. What the public reads is the truth and not fabricated stories. My question is can we no longer trust the information coming from those people responsible for keeping us informed? Ask your staff this question.

Linda Evans

Illegal Beer

Dear Editor,

Please help the building managers of the Student Center. We have been having people bringing beer into the Student Center and it is illegal. We (the staff) have been getting a lot of static from the administration; so would you please print something to the effect of reminding everyone that it is illegal to drink beer or even have it on campus--especially the Student Center.

Thank You.
Larry Panetta

The Adventures of COMMON MAN!

COMMON MAN (AKAS CARP DENT) IS A HARD WORKING REPORTER AT THE LOCAL PAPER THE DAILY BLAH.

HE IS INTERRUPTED IN HIS WORK WHEN HE HEARS A SCREAM! (* COURTESY - THE FLY)

SLIPPING INTO HIS COMMON MAN COSTUME - HE RUSHES TO THE WINDOW AND SEES...

What can I do, I'm just a COMMON MAN?

HE QUICKLY FORMULATES HIS PLAN OF ACTION ...

BE HERE FOR NEXT WEEK WITH MORE THRILLS COMMON MAN!

LATER

NEXT TIME WE VISIT COMMON MAN'S HOMETOWN! DON'T MISS IT!

Lincoln Green Goes To College

You know, I figure Southern Tech must have a lot of money to throw around. At least three times this week I have had to dodge (that one time they really liked to have taken my head off!) what I, at first, thought were miniature flying saucers! But I'm too smart for that! It's a sport they have here on campus. They either steal or temporarily borrow plates from the Student Center and throw them at each other! Some of these guys have really perfected the art of throwing plates. Their wrist action is amazing!

But I don't really have time to stand around watching kids play. It's pre-registration time. I know that must be "the event on campus" because I've heard the line wraps around the building at least twice. What these folks are waiting on has got to be really fantastic! Some people don't go to class all day long, just wait in line to get registered. It must really make a guy feel good to go home for summer break and be guaranteed readmission to a great institution like this! That in itself is worth the wait. But see, I'm really lucky! Everybody knows for registration they go in alphabetical order. There's only six other letters before "G". There can't be but so many people in line with last names A-F. I'll be in and out in a flash!

It was really nice of them to print all the courses in the news paper. I thought maybe all I had to do was pick out what I wanted to take and then write it all down. But that really isn't the thing to do. I've got to find a current catalogue to help me select classes applicable to my major. Gee, that could be rough. I still haven't decided on a major. But looking through the catalogue might be fun. I've never seen a college catalogue

before. I wonder if it is anything like the ones we get from Sears and Roebuck and J.C. Penneys. It must have pictures of all the classes and course descriptions and even pictures of my instructors! I'll head over to the library. There's probably one in there.

What a break! There's someone coming out of the Administration Building. "Have you finished pre registration, man?"

"No, not yet I've got to get my prof to sign my schedule so I can get into this class."

"Oh yeah!"

"You haven't preregistered yet, huh? Well you'd better hurry, classes are closing fast."

And Momma said college wasn't at all like high school. I remember senior year you had to have all your teachers sign you into their classes. After 30 or so people, they wouldn't sign up any more.

I'm sure glad Southern Tech ain't like that! Around here they make being a college man a piece of cake!

m.t. simmons and company

Graduate Admissions Preparation Service

Every year, over 2.5 million students enter nation-wide testing centers. For several hours, they match wits with a standardized exam, the results of which they will carry with them for the rest of their academic careers. The ritual is nearly unavoidable for the college and graduate-school bound.

Educational Testing Service, who develops and administers these exams, has asserted for years that the tests only measure "aptitude," defined as "the capacity to learn." If this were the case, test scores would not be affected by such variables as social background, education or prior coaching.

But independent studies by Harvard and National Education Association indicate otherwise. Prior coaching can affect scores, and preparation courses are currently a \$60-million-a-year business.

For example, the Graduate Admissions Preparation Service has had such a positive response to its home-study pre-medical and pre-dental courses for the MCAT and the DAT, that it recently expanded, and now offers courses for the GRE, the LSAT and the GMAT.

GAPS' philosophy--that exam-taking is an acquired skill and "aptitude" a questionable concept--is of course opposed to that of ETS.

GAPS courses include cassette tapes prepared by professionals and professors who lecture the student on such topics as English grammar, chemistry and law. Typical test questions and explanations are provided. Test strategy, how to quickly reject certain questions, untangle tricky wording and "think ETS," is covered.

Lest anyone hesitate over the price of professional preparation, GAPS mentions the importance most universities place on test scores. Their price (\$179 for the LSAT course) stacks up well against the cost of four years of tuition. Universities admit they depend on the standardized test as a performance indicator. Spencer Reynolds, associate director of admissions at Princeton says: "obviously, the lower the test scores, the less chance students have of being admitted."

So, until such a time that the controversial standardized exam is abolished, many students are opting for some kind of preparation. They have little choice.

Southern Tech's Radio Station

A radio station is an institution or organization that through the use of broadcasting communication offers different services to the public. WGHR, the radio station at Southern Tech is not an exception, since it offers different kinds of programs designed with the purpose of filling the needs of the students, and to delight different tastes. Presently, WGHR is offering programs of music for every taste, a Spanish program, and news commentaries.

Since the student body at Southern Tech is composed of persons with many different tastes, WGHR has created programs to satisfy everyone's music likes. For those who like vibrant music with a lot of beat, Southern Tech's radio station has a disco-soul hour, where the DJ plays the latest recordings in disco and soul charts. Students who like soft and mellow ballads can find their favorite songs in the WGHR Country Hour, where the DJ plays cuts from the albums of country singers like Dolly Parton, Kenny Rogers and Loretta Lynn among others. Finally, for those who like the rock and roll music, our radio station plays the most electrifying hits of the top rock and roll performers.

The daily Spanish Hour that WGHR is offering from 6:00 to 7:00 p.m. in the afternoons has the purpose of serving as an educational and informational program to the Spanish community, not only of the Spanish speaking students at Southern Tech, but also other persons who listen to the show outside the campus. The listeners of the show can find music from many Latin American countries and commentaries about the records that are played. This is the first show in WGHR that is entirely broadcasted in Spanish.

As all radio stations, WGHR also has the important task of keeping its listeners informed of the latest happenings. Fifteen minutes out of each hour program is devoted to broadcast the most recent news, received through the United Press International teletypewriter. WGHR not only broadcasts the national and international news, but also informs the student body of the campus events.

Southern Tech should be proud of its radio station, since beside being a well-organized and professional institution, gives Southern Tech's students the opportunity to enjoy and listen to their favorite programs.

Edwin Fernandez

"BSA" cont. from 1

"The Missing and Murdered Children Service gave the campus an opportunity to show their concern about the pressing crisis and I was disappointed in the turnout."

In the past, the BSA presented other interesting speakers such as Ron Sailer of WAOK-Radio and WSB-TV, Scottie Andres of WVEE-Radio, Charles Johnson, Vice President with William and Russell Alvin Bradbury, an engineer with Lockheed, Rev. Lockhart of Pleasant Grove Baptist Church in Marietta and Lt. Clayton Duncan of USAF.

The BSA is an organization

geared toward black awareness. The BSA, according to Hill, "is here to help the community and be involved with activities on campus." The BSA is presently organizing a school-wide tutoring program which is tentatively scheduled to begin in the fall. Mr. Hill further emphasized that the BSA was here for everyone, all projects are for all to become involved, not just black students, such as the Thanksgiving Basket, which last year help feed five needy families in the Marietta area. He emphasized more student participation and involvement. The BSA is a vital organization on the STI campus.

People Say The Darndest Things

Being such as I am, all of this amuses one:

1) Last week my work assignment was at a bank that has only a few black tellers. A kindly, old lady whom I liked right off the bat, asked me to cash a check for her which was to be used as prizes in an essay contest she sponsored at one of the local high schools. She said all of this without looking up at all, being accustomed to the regular teller that was usually there. But then she looked up, saw I was Black and a big smile came over her face. Then for no reason she began telling me how two years ago a Black girl had won 1st prize in her essay contest and how surprised and proud she was of her accomplishments.

2) Then when I was at the checkout counter in a record store, a guy struck up a conversation with me. He said "I really think Stevie Wonder is a great artist, don't you?" I said "sure" unenthusiastically. He said "I guess you're not much into Stevie, huh, I bet the last album you bought was 'The Jacksons' I said, 'Nope, I'm not much into albums. The last tape I bought was 'Guilty' by Barbara Streisand and Barry Gibb." He didn't talk to me anymore.

3) I was having a conversation with one of my supervisors once and he made it clear to me that his son's best friend in grammar school was Black. He went on to say that this friend had even been to his very home and that he had treated all the kids the same. "That's the way it should be, ain't it?" he asked

4) I really like this one. I went to get fitted for my Debutante's gown. It was a floor-length, hoop-skirted, white formal. It was beautiful, trimmed in lace and tiny pearls. The sales girl said, "White just

fades me into nothingness." "I wish I were black so I could wear that beautiful white gown." Was she serious? Did she "really" want to be black???

But then there are the ones who forget you are black:

1) In an interview on an occasion I was asked: "Have you ever been intimidated?" I wanted to ask, "Am I black?"

2) Then a fellow classmate remarked, "You must have had this professor before. He knew your name after the first day." In my major the reason could have been because I was the only girl in the class, but I wouldn't put my life on it!

In the long run you might say I bring these things on myself. I work in a predominantly white atmosphere, I transact business in predominantly white neighborhoods and when I'm not living at home my roommates are--you guessed it, white. But I'm not at all complaining. I am usually flattered by the extra effort people take in trying to make one feel welcome in an environment where I am the obvious minority.

White people generally have been brainwashed into believing they are the only ones who could be accused of being prejudiced. Rest assured, prejudice is not a one way street. Prejudice comes in all colors; however, when there's really no bias in your heart, then there's absolutely no need to waste words trying to convince me of the fact. Once my roommate interrupted me as I was beating on our raggedy television set. I said, "Alright, television stop acting colored!" She was appalled. (Most people generally are shocked at this statement, one which I make quite often. But, there's a trick, I never specify what color, would you?

Monica Durden

(that) would not appreciably ease our energy problems."

District heating, by contrast, had an old-style American entrepreneurial birth 104 years ago when an inventive Lockport, New York, tinkerer named Birdsill Holly decided it would be smart, economic idea to produce steam that could do double duty--to heat buildings and run the pumps of fire engines. So he built a boiler in his basement, ran steam pipes across his neighbors' lawns to the fire station and down Chestnut street to nearby homes.

District heating flowered for a few decades in America, to a peak of about 150 systems in 1909. Then it tapered off as oil and gas for individual building heating became cheap and plentiful. Its remnants may be found today on college campuses and military bases and in a handful of aged city steam systems.

But the Europeans, we are now reminded by the Council for International Urban Liaison, took district heating seriously. It now supplies one-third of all space and water heating needs in Scandinavia. The Soviet Union has 67 times our installed district heating capacity. Most modern systems employ hot water, a system now considered more economical practical and safer than steam.

Today, by various scientific estimates, 50 to 90 percent, of US heating and hot water needs, plus considerable air conditioning could be satisfied by district heating. Immense investments in water pipes would be required to hook up the country's homes and businesses. But the costs would be a fraction of the trillion-dollar-plus capital demands of a full-scale synfuels development.

"If you add up the total amount of waste energy produced by all the electric power plants in the country," says Damascus, Maryland, district heating expert Theodore Taylor, "there's more than enough waste energy to heat the entire United States." The reason: The kinetic energy derived from an electric turbine represents only 30 percent of the energy potential of a conventional fuel burn. The remaining energy is released as steam or hot water. Yet if recaptured in pipes, in the process called cogeneration, 85 to 90 percent efficiency of the fuel is achieved. And hot water can be economically transported for distances of up to 20 miles.

Cities or suburbs could build their own power plants to burn coal or garbage and transfer the hot water produced by pipelines to their residents. Homes and businesses could use the hot water in lieu of hot water heaters, and also circulate it through radiators for heating, or through radiators with forced air systems for the same effect.

cont. on p. 9

A Rational Alternative To Synfuels

Here is a perfect example of how the Reagan administration could curb wasteful, inflationary government spending, assure a more stable U.S. energy future and channel more investment and jobs into hard-pressed urban centers.

First: Follow the counsel of Office of Management and Budget Director David Stockman and "throttle back" on the incredibly expensive synthetic fuels subsidy program. Congress last year authorized synfuels development at an initial \$20 billion, with a suggestion of \$68 billion more later.

Second: The administration could encourage, with minimal federal money, a proven, century-old technology called district

heating--a method which could eventually provide low-cost heat and hot water and cooling to the vast majority of America's homes and businesses.

National support for synfuels is thin. Westerners rightly fear coal and oil shale exploitation that would pollute their air, consume scarce water supplies and promote energy boom towns for which they would have to provide most of the expensive new public facilities. Easterners foresee a massive diversion of scarce capital out of their economically pressed region. Environmentalists bemoan a program that would inject cancer-causing chemicals into the atmosphere. Last year Mr. Stockman characterized synfuels as a "multi-billion dollar program

SGA NOTICE

Students nominate teacher of the year in Basic and Technical studies. Please submit in 40 words or less and neatly, the name of a teacher and reasons why they should be chosen teacher of the year.

Submit this to the Student Government Association c/o the Post Office.

John Cochran
SGA President

TEST ANXIETY WORKSHOP TO BE MAY 25, 1981

A workshop entitled "How to Reduce Test Anxiety," will be offered to all students by the Counseling Office Monday, May 25 12-1 p.m. in Room 119 of the Student Center. It is designed to help students recognize stress and how it affects their grades. For more information, contact Barbara Anderson, Director of Counseling, 424-7226 or come by her office in the Student Center.

MISS COBB COUNTY PAGEANT

Applications for the 1981-82 Miss Cobb County Pageant are available at the Student Center office. A \$1,000.00 scholarship is awarded to the winner!

Miss Cobb County is consistently among the finalists for Miss Georgia. Three have been named Miss Georgia--Jeannette Ardell Young in 1958, Marilyn Olley Ashmore in 1969 and Cynthia Cook Robinson in 1971, who was also a talent winner and one of the ten finalists for Miss America.

The major purpose of the pageant is to provide scholarships. The Miss America program is the largest scholarship foundation for women in the world.

If you are a single young lady, 17-25 years old, a high school graduate by 1981 and either a Cobb County resident or a student in a Cobb County institution of higher learning; then you are qualified to enter the 1981-82 Miss Cobb County Pageant.

The first event is a preliminary contestant screening on June 14. Twenty finalists will vie for the title at the Cobb County Civic Center, August 29. Judging categories are: private interview, swim suit, evening gown and talent.

The following pageant personnel may be contacted for further information: Parks Rice - 257-7478 or 427-2024, Margaret Womack - 873-6611 or 973-8703, Gene Phillips 881-7575 or 435-6378.

STINGERS

34

from de Caux

Two exceedingly neat solutions for #14 and #29 were handed in by Samuel S. Walker. There were many attempted solvers for #33. Several turned in infinite series! Others turned in finite sums but with repeated denominators. That was my fault for not making it clear that all the denominators must be different. Steve Blalock produced a large number of correct solutions and conjectures that there are infinitely many different finite solutions! "ZOTT" produced a beautiful algorithm for solving any problem like #33. He also asked for reprints of unsolved Stingers. All unsolved STINGERS are in the display case outside the Math. Office.

This week's STINGER is for gamblers. Which is more likely? To throw at least one 1 in six throws of a die or to throw at least two 1's in 12 throws of a die? Exactly what are odds in each case?

S.R. solved #19 which has been unsolved since July of last year as well as a correct solution to #32.

Faculty

DR. ROBERTA GATES

Dr. Roberta Gates recently presented a paper, "Characterization in Constance Fenimore Woolson's Rodman the Keeper: Southern Sketches," at the 71st Annual Convention of the College Language Association in New Orleans. The session, entitled "Female Views of the South," emphasized the conference theme, "Caribbean and Southern-Plantation Literature."

Earlier this year, Dr. Gates presented a paper at the 6th annual convention of the Comparative Literature Circle at Florida State University. The conference theme, "Transformations in Literature and Film," was highlighted in her session where she spoke on "The Metamorphosis of the Fabliau: Chaucer, The Miller and The Reeve."

Dr. Gates is also serving as the Managing Editor of the Journal for Humanities and Technology and as Secretary-Treasurer of the Humanities and Technology Association, Inc.

Marijuana Can Cause Infection

Marijuana contains a common household fungus that can lead to allergic reactions or lung damage when smoked and, in certain individuals, can cause life-threatening infections.

Research at the Medical College of Wisconsin in Milwaukee showed about half the marijuana users have fungal organisms in it," Dr. Kagen said.

Members of the Aspergillus family produce spores which Kagen said are not destroyed by burning. Once inhaled, growing organisms can cause a number of lung diseases that range from asthma to fatal infections.

"Lit and unlit marijuana cigarettes were able to pass Aspergillus organisms right through, unimpeded," Kagen said. Studied had been infected by fungi belonging to the Aspergillus family.

Dr. Stephen Kagen along with three other researchers studied 26 marijuana users and marijuana obtained from each of them. Of 21 smokers given special blood tests, 11 (or 52 percent) showed Aspergillus infections.

One patient had the microscopic fungus growing in his skin, lung, nose and kidneys out had no

external signs of infection. "He was a walking fungus ball and had no symptoms," Kagen said.

Although the fungus is an everyday inhabitant of dark, damp basement corners, the chief researcher warned that people who smoke marijuana inhale large amounts of fungal spores of many types. "We have yet to find a sample of marijuana that doesn't

"District Heating" Cont. From p.7

District heating systems could save the equivalent of 55 percent of the country's current oil imports by 2000, supporters say. Unlike synfuels, the technology is of a proven, "off the shelf" variety. And since the systems would require thousands of semi- and low-skill jobs to build, they would create jobs for people where they live--in the cities--instead of creating intense demand for workers and scarce scientists to build questionable synfuel facilities in isolated Appalachian coal or Western oil shale areas. Finally, district heating would make older cities more economical, competitive places to live and do business.

Clubs and Organizations

Bathtub Racing Association

The Bathtub Racing Association would like to thank the following people for their help in making the 1981 spring race a big success. First of all, our thanks go to Mr. Ernie Stone and Ron Wofford for co-ordinating the track marshalls at the race. Thanks to the race officials and corner crews of the Sports Car Club of America for their outstanding support throughout the weekend. Thanks to Dr. Logue for having the driver's school. Thanks to J.D. Wise for his help with communications. We wish to thank Orren Williams for heading up the safety inspection and opening up the shops for last minute repairs. Special thanks to the STI Police and Physical Plant for their efforts. Last but not least, thanks to all those individuals who pitched in to throw those nasty dirty tires.

The BRA meets every Tuesday at 8 p.m. upstairs in the Student Center. A special meeting is being planned for May 26 to benefit those people who are interested in racing bathtubs next year. Things that will be covered include Tub design, Tub construction and methods on how to approach sponsors. All those who are interested are encouraged to attend.

The American Institute of Architects student chapter during its last meeting, May 13, elected new officers for next year. The 1981-82 officers are as follows:

- President - Eddie Auerhan
- V. President - Jeff Smith
- Treasurer - Mary Pasley
- Secretary - Mary McCullough
- Activities Chairman - Paul Grocoff

The next meeting of the ASC/AIA will be Wed., May 27 in Room 119 and 120 of the Student Center. We will have a guest from the National Resources Dept. to speak on Historical Preservation.

After the May 27 meeting, at 2:00 p.m. we will have a tour to the Galleria across from Cumberland Mall. We will meet in the Student Center lobby, upstairs. See everyone there.

American Institute of Industrial Engineers, Inc.

The Southern Tech Chapter of the American Institute of Industrial Engineers will hold its annual spring social on Thursday, May 28. The Pizza and Party will be held at Mr. Gatti's on Roswell Street, across from K-mart, beginning at 11:30 a.m.

All AIIE members and IE Technology faculty are invited to attend. According to newly elected president, Pam Matthews, "AIIE members and IET faculty will only have to \$1 for the buffet luncheon and beverages. Non AIIE members will be charged \$3 at the door."

For further information about this social event either check with Pam or any of the other new AIIE officers: Vice President Tin Horne, Secretary Gloria Medlin, or Treasurer Chris Strippelhoff.

June 3 Mike Gallifancicks
Palmer Brick and Tile

All programs are 12 noon in Room 119 of the Student Center on Wednesdays. Bring your lunch and a friend.

THE INSTITUTE OF ELECTRICAL AND ELECTRONICS ENGINEERS, INC.

Remaining meetings - spring quarter Tuesday, May 26. Professor Covertis to speak on Guided missiles and automatic control and systems. Tuesday, June 2 - Election of officers for next year. Last meeting of this quarter.

Tau Alpha Pi

The members of Tau Alpha Pi National Honor Society would like to announce the names of the recently elected officers. They will take office following spring quarter.

- Michael Cobb, EET - President
- Lance Caine, EET - Vice President
- Tommy Nowell, MET - Secretary
- Jack Braden, EET - Treasurer

The members would also like to announce that David Cullen won the raffle held by Tau Alpha Pi on May 18th. We would like to congratulate David on his good fortune. The winning ticket number was 172. The prize was a black and decker auto vacuum cleaner.

Tau Alpha Pi is initiating a resume book to be sent to companies that might desire Southern Tech graduates. This book will be a composite of resumes for all students that wish to be entered, who are graduating within a one year period. If any graduating senior would like the information about them entered in the book, they should fill out the following form and submit it to Tau Alpha Pi, via post office box. In order to more completely distribute the book, any submission of names of prospective companies, by students, would be helpful. Submission of company names is merely to aid in the distribution of the book. It is not required to have your data entered in the resume book.

Lance Caine

EDITOR'S NOTE: Because of space limitations the "Resume Personal Data Sheet can be found on page 16.

Black Student Association

May 22, 1981

GREEK NEWS

Xi-Chi Chapter Tau Kappa Epsilon

TKE would like to congratulate the BRA on an excellent Spring Race. Congratulations also goes out to frater Charlie Mix for winning the race in record time. The Post Race Party and celebration proved to be as interesting and rewarding as the race. Thanks

to all involved. Also TKE's Annual Spring Trip to Panama City was also very successful, TKE from STI and Valdosta State combined to tear the city down. Congratulations goes to Eddie Nix for planning the trip. Upcoming events for TKE include a 10 kilometer road race, in Marietta, to benefit St. Judes Childrens Hospital on June 6th. Anyone interested in running the race please call 424-1979. Steve Cobb

GAMMA PHI BETA

Did everyone have fun at the Bathtub Race? Well, Gamma Phi Beta enjoyed it. It was great. At the race we set up our annual booth and sold drinks and hot dogs. Thank you for helping out at the booth. Dana Manning thanks everyone who helped or participated, especially all the sisters Gamma Phi thanks Dana for working so hard and doing a great job. Congratulations TKE--you came in first at the Bathtub Race.

Our sorority has a strong group of Alumnus that help us dearly. Tuesday, May 12, we met with them to have a White Elephant Sale to raise money for our chapter.

There's a new chapter of Gamma Phi Beta developing also in the South. The girls at Florida Institute of Technology are being installed next weekend. We are proud of them!

Our pledges gave us a dinner on Sunday, May 17. We enjoyed the dinner and had a nice time. Thanks pledges! Thanks Pam for the use of your house.

Girls don't forget about the softball tournament May 22, 23 and 24. Don still needs people to help, so sign up in the Student Center office.

In the last issue, I forgot to mention that Linda Jaskowski's GPA of 3.93 helped her win a scholarship award at our Pink Carnation Banquet. We thank the two disc jockeys, Jack Melton and Bruce Wauer for doing a great job.

Caroline Melton

Tau Beta Alpha

The Bathtub race May 10th was a new first-hand experience for BA and we all enjoyed participating in it very much. Congratulations are definitely in order to TKE Charlie Mix for coming in first with his tub.

We appreciate the Sigma Pi's for joining with TBA in the booth we had set up. Todd's dorm room really came in handy during the race! (To make the tea and lemonade)

Mike Roberts from the Marietta Journal came to STI to do an interview on fraternities and sororities. We were very honored to have the chance in helping him with his article.

Kathy Dixon would personally like to thank Lambda Chi Alpha for their invitation to the formal banquet May the 9th. From what we've all heard, it was a really enjoyable affair.

TBA would sincerely like to thank the Sig Eps for their invitation to their Beach Party at the Rock. It sounded really fun, but unfortunately the postal service was a bit slow that day. We would also like to thank Pi Kappa Phi for their invitation to their party over the weekend.

The TKE social on the 16th was a real success, despite the weather. We all had a good time at the lake socializing, skiing, 4-wheeling, and for those who were somehow unable to ski, swimming fully clothed proved to be just fine! A bit cold, right? We were also glad that we had the chance to meet some of the TKE little sisters for the first time.

Presently, we are looking forward to another social with the Sigma Nu's. Now, it sounds like all we do is party, right? However, every girl in TBA has been working hard to form the unity and closeness we originally started the sorority for. We are very honored to admit Donna Eison, Yvonne Dutton and Nancy Rice into TBA as our spring quarter pledges.

Congratulations to the baseball team for placing 2nd in conference. Much appreciation to Tim Murphy of TKE for dedicating those songs to TBA!

Carol Woodruff

Pi Kappa Phi

The brothers of Pi Kappa Phi extend a warm welcome to Ray Johnson, our newest pledge. Congratulations and best wishes, Ray.

A Pi Kappa Phi National Council Meeting was held April 25-26, 1981 at the University of Tennessee. During the meeting Epsilon Kappa's Chapter Advisor Steve Wrenn presented a check to the National Council bringing our total contribution to Play Units for the Severely Handicapped to over \$1000 this year. The PUSH project is supported solely by the efforts of individual chapters of Pi Kappa Phi, the only fraternity that has its own national project. National President Dr. A. J. Strickland and the other council members expressed their pride and thanks to the newest chapter of Pi Kappa Phi.

The Pi Kapp softball team is still rolling along having defeated the Over the Hill Gang and the Muffdivers. You're doing great guys--keep it going.

Apologies are in order to Brother Paul Gordon who was elected as Nigh Student Representative to the SGA. Brother Gordon's name was inadvertently left off of our last article.

This quarter has really gone by fast. Greek Week and the Spring Bathtub Race have already come and gone. I would like to congratulate Sigma Nu for receiving first place in the Greek Week Competition. Good work guys!

The Bathtub race went off without a hitch. A lot of people were really sweating the spring race out because of the threatening rain. Sigma Nu would like to congratulate the 96-Rock tub for taking third place and the Danvers tub for finishing in fourth.

The Luau party, which was held Saturday night before the tub race, was really successful. Chicken and oysters were served at the party. Everyone who went had a good time. Thanks goes to the social committee for making the party successful. Sigma Nu also held an 'after the race' party Sunday night. The Alpha Zeta Delta sorority from Auburn University attended. Everyone who got thrown in the pool had a good time.

Sports

WILSON'S BASEBALL REVIEW

Southern Tech is proud of the Hustlin Hornets with their remarkable success this year of not only getting into the playoffs, which had not be done before, but also finishing second only to Shorter College, known notoriously for their baseball program.

Even though we had a young team, we were seasoned and have learned a great deal, not only about baseball, but about academics whereby we become eligible to play. Let's keep up the hard work and next year, set our sights on getting into the playoffs, and winning the district tournament.

Again, I apologize for not having the statistics of the games. Perhaps they may be printed at a later date.

Roy Wilson

Congratulations To Danny Mann And Mickey Dunn

Danny Mann, Southern Tech's Bob Horner, not only hit the most home runs this past season for Southern Tech (13) but hit four of them in the district play-offs. Three of these shots were produced in the first game against Flagler. He led the team with his almost .500 batting average and was voted most valuable player by the Dugout Club of Marietta. The team certainly thanks him for his outstanding performances.

Mickey Dunn, four-year team veteran and lead off batter, will be graduating this year and although Dunn was not a home-run king, his success with a consistent batting average of .370 or more kept men on base for providing necessary runs. A prophetic occurrence happened in Dunn's last college baseball game. Dunn, with four years of college baseball and a great batting average had never hit a home run. In Southern Tech's last game against Shorter, with Dunn batting his last time in college, he blasted a home run, thus highlighting and ending his college baseball career.

Roy Wilson

Hornets In Playoffs For First Time

The Hustlin Hornets for the first time ever were not only seeded in the NAIA playoffs, but were seeded third out of four available positions. Shorter College in Rome, Georgia, received the top seed and therefore the games were held at their field in Rome. Flagler College was seeded second, Southern Tech seeded third, and Georgia College was seeded in the fourth slot.

The first day of playoffs, May 13th scheduled first seed Shorter against fourth seed Georgia College with Shorter gaining the victory. The second game pitted Flagler from Florida against Southern Tech. A slugfest ensued and resulted with a narrow victory of 13-12, Southern

Tech on top. The second day of playoffs, May 14, placed Georgia College against Flagler in which Georgia College won. The next game put Southern Tech against Shorter. Although the Hornets had a 5-0 lead they were unable to keep it as Shorter won 11-8. This meant that after Southern Tech lost to Shorter at 3:30, they had to play Georgia College at 4:00. Southern Tech sent Georgia College home after twelve innings due to double elimination Friday, May 15, the last day of the playoffs, Shorter defeated Southern Tech leaving the Hornets in second place. Shorter is in Arkansas this week playing in a regional tournament.

Roy Wilson

FRONT ROW(L-R): Johnny Barrett, Lamar Knight, Kenny Howard, Johnny Couch, Greg Grier, Hal Holloway, Wesley Haines, Tiger Harrington, Mike Smoker.
BACK ROW(L-R): Coach Charlie Lumsden, Blake McCrary, Brian Good, Roy Wilson, Hank Chavous, Brian Brumby, Tony Key, Alan Ball, Mickey Dunn, Danny Mann, Jay Butler.

AN INVITATION

Because of the male population at Southern Tech, one would expect 100 or more people to try out for the baseball team but not so last year. This is an invitation to those of you who want to play baseball to go ahead and plan to come to fall practice to try out. Remember that there are strict requirements for eligibility, but the rewards of self-satisfaction are worth the work. So come on out and join a winning team.

Roy Wilson

Teams trying to reduce travel

Campus Digest News Service

College athletic teams are attempting to reduce their travel expenses by changing schedules to avoid long travel in their athletic exchanges.

The University of Missouri is paying San Diego State University \$50,000 to cancel its football duals for the remaining two years of their contract.

Baylor University in Dallas is cancelling five road trips for next season and will replace them with home games.

West Virginia University has pulled out of an exchange with San Jose State University in California that would have given West Virginia a take of \$30,000. However, the school figures that the trip now costs \$90,000 to make, so the school would lose money. The contract was originally negotiated five years ago.

Intramural Results

SOFTBALL ACTION

The Who's defeated TKB in a nip and tuck game 11-10. Glass collected a double and a triple and Hudson had a single and home run to lead the Who's 15 hits. Mike Marroni led the Bru's with 3 singles.

Muffdivers slid past the Geechees in a 7-6 win. Hayes had 3 singles and a home run for the Muffdivers. The Geechees outlasted TKB 15-13. Anthony Richards lead the Geechees with a single, two doubles and a triple.

Lambda Chi out hit Pi Kappa Phi 10 to 7 with Eddie Somervell leading the Chi's with a home run and a single.

Sigma Nu's out scored Sigma Pi 8-7. Woodcok had two singles. Reb's hung on to their undefeated record of 9-0 by beating the Whos 11-10. Clete Anderson lead the Reb's with three singles and a home run. Ronnie Ward lead the Who's with two singles, 2 triples and a home run.

TKE blasted the Pi Kapp's 15-6. Otice Turner lead the TKE's with a single and 2 homeruns.

VOLLEYBALL SCOREBOARD

Two teams have dominated this year's volleyball season. Sigma Nu's from the fraternity league and Los Quedaos from the independent league. The Sigma Nu's lost their first match to Sigma Chi Epsilon, but has continued to win since with outstanding play by Bruce Wauer and Jeff Mills. Los Quedaos is undefeated going into the post season tournament. Their outstanding players are Jose Mendez and Manuel. The Latin team will receive the #1 seed in the tournament with Sigma Nu seeded #2.

The most impressive and attractive team in the league this year is the Attractors. This team consists of a group of young ladies that deserve a lot of recognition here on this campus. The Attractors were successful in keeping the Muffdivers off balance as they sneak past them for the Attractor's historical victory. A night to remember for the women at STI.

Ron Wofford

First Annual State Intramural Softball Tournament

During the weekend of May 22-24, the Southern Tech Intramural Department and Southland Beverage Company are sponsoring the 1st Annual State Invitational Intramural Softball Tournament at the Terrell Mill Softball Complex in Marietta. Sixteen teams from colleges throughout the state will compete in this double elimination tournament.

Some of the colleges participating will be Armstrong State, Georgia Southern, Georgia Tech, Atlanta Jr. College, Clayton Junior, Brewton-Parker, Emory, Reinhart, Southern Tech and Life Chiropractic College. Play will begin on Friday night May 22 and will end the championship game at approximately 3:15 p.m. on Sunday, May 24.

Ron Wofford, Director of Intramurals at Southern Tech will be coordinating this event and he can be reached at 424-7349 or 7374.

The first annual state intramural softball tournament sponsored by Southern Tech Intramural Department and Pabst Brewing Company was organized to promote intramurals and recreation sports within the state of Georgia. This program will make it possible for average college students to participate and represent their college and university in recreation sports on a state level. This event is also designed to promote fellowship and friendship between the state wide participants.

This year's tournament will host a men's bracket only because of a lack of response from the women's teams with the state. Hopefully, the women's bracket will become reality in the 1982 tournament.

STI INTRAMURAL ALL STARS

The Intramural Council chose nineteen outstanding players from the fraternity and independent conferences to represent Southern Tech in the first annual state intramural softball tournament.

From the fraternity conference, representing Lambda Chi Alpha are Eddie Somervell and Billy McCloud; from Pi Kappa Phi are Jeff Hallman and Burt Bell; from Sigma Nu are Bruce Wauer and Donnie Gantt; from TKE are John Minor, Otis Turner and Stewart Adams.

From the independent conference, representing the Geechees are Clyde Miller, Anthony Richards, David Roberts and Hollis Askew, from the Muffdivers are Hal Cooper and Dale Loudermilk; and from the Who's are Ricky Hudson, Charlie Glass, Ronnie Ward and James Johnson.

The All Stars will play their first game Saturday morning at 10:15 against Life Chiropractic College #B.
