

# STING

STING VOL. 2, NO. 7

News for Southern Technical Institute Marietta, Ga. February 12, 1985

## Perides, Hornets Net Victory 200

Sandwiched between two at-the-wire losses to West Georgia (61-60, Jan. 28) and NAIA District 25 foe North Georgia (63-60, Feb. 2), Southern Tech's Runnin' Hornets presented coach George Perides with his 200th victory at the Marietta school by racing past outmanned Piedmont College 81-34 on Wednesday. Heading into Monday night's clash with District 25 power Georgia Southwestern in the Hornets' Nest, Perides-coached Southern Tech teams have compiled a 200-76 record in his eight-and-a-fraction seasons. Overall as a college head coach, Perides' record was 267-112 prior to

the current season. As the Hornets prepared to meet Georgia Southwestern, they were still in prime position to finish high up in District 25 standings with their 15-7 overall and 8-3 district records.

With balanced scoring and a stifling man-to-man pressure defense, Southern Tech jumped to a 42-11 halftime bulge against the cold-shooting (4x28, 14.3 percent) Lions. Perides substituted liberally, with all 11 Hornets seeing playing time.

The losses to West Georgia in Carrollton and North Georgia in Dahlonega followed a similar pattern.

Southern Tech fell behind by halftime, charged back into contention with feisty defense and excellent shooting, only to lose narrowly on late-game floor mistakes.

Trailing 32-28 at West Georgia at halftime, the Hornets led 60-57 with 1:44 to play but finally succumbed when Braves' forward Tim Criswell, who led all scorers with 24, drove the baseline and scored with 40 seconds left. Tech worked the ball for a final shot, but Gary Dennis' off-balance jumper with three seconds left wouldn't fall. Forwards Scott Sharp and Sam Smith led the Hornets with 18 and 16 points, respec-

tively, as Tech shot 67 percent (23x47) from the floor, while the Braves made 64 percent (26x41).

Against arch-rival North Georgia, Southern Tech rallied behind the offense of Sharp and Smith and its pressure man-to-man to charge back from a 39-31 halftime deficit to lead by five twice midway through the second half. For six-plus minutes to start the second half, the potent Saints, averaging more than 80 points a game, were held scoreless. But Saint guard Wilson Dugger's outside gunning and five consecutive turnovers by STI, four off the four-corner

spread, kept the home team alive. Six-ten Oren Gilmore made both ends of a 1-and-1 with 1:05 left to provide the game-winner. A charge by Sharp, who scored a split-second later, with two seconds to go, turned the ball back over to North Georgia.

"Once again, we gave one away," said a dismayed Perides. "We played as hard and as smart as you can play, but we didn't execute under pressure again. It happened at West Georgia, and it happened with North Georgia. I guess we're just having to learn the hard way."

Score at the end of the Hornet's 200th victory.

## Professors Indicted

Stephen Hoofnagle, Editor

Professor Donald Tritschler and former Professor Douglas Black are among three men indicted by a federal grand jury in a seven-count drug conspiracy case. Professor Black, who resigned his post last November, was an associate professor of Industrial Engineering Technology. Professor Tritschler, also an associate professor of Industrial Engineering Technology, has been suspended from teaching until an internal investigation

is completed. Tritschler surrendered himself to authorities on January 25.

The third man charged in the indictment is Anthony Griffith of Morgan County. All three men have been charged with conspiracy to distribute marijuana and cocaine between October 1983 and December 16, 1983. Tritschler and Black are also charged with five counts of distributing cocaine and one count of distributing marijuana each.

## Tuition Increase Likely

Stephen Hoofnagle, Editor

A tuition increase of 10-12% is likely to go into effect sometime in the next year. Traditionally, students are supposed to pay for 25% of the cost of their education through matriculation and fees. The other 75% is appropriated by the Georgia State Legislature.

The last increase in matriculation and non-resident tuition went into effect summer quarter of 1984 (see "Paying the Price", *Sting* Vol. 1, #9, 5/29/84). That increase of 15% raised resident fees from \$293.00 to \$332.00.

According to Jacob Wamsley, Vice Chancellor - Fiscal Affairs and Treasurer of the

Board of Regents, the actual amount of the increase will be vague until the State Legislature confirms their amount of support in mid March. Once the amount of State appropriations are known, the Board of Regents will determine the actual amount of the increase in April.

As inflation increases, non-resident tuition and matriculation will have to be raised to compensate. This latest increase will be "across the board and is not likely to have a differential," Wamsley said.

Another factor that could have an effect on future increases is the declining

enrollment. If enrollment declines, students could face further increases to offset revenue losses. University System enrollment for fall quarter 1984, declined in two categories: Total and Equivalent Full-time (EFT). Total enrollment was down 1.8% from fall quarter 1983 and EFT was down 2.4%. Total and EFT enrollment at Southern Tech was up 3.1% and 0.6%, respectively. National student population fell 2.5% in the fall of 1982. The Association Council for Policy Analysis and Research predicts a continued decline, making future tuition increases likely.

See Special Valentines Section on page 11.

## Letters

An article in the January 23, 1985, edition of the Atlanta Journal informed of a United Nations report on worldwide drug abuse and its related crimes.

The report stated that in 1984 drug abuse and crimes related to drug abuse reached unprecedented proportions to the point that the security of certain nations are threatened.

The report was not elaborate as to the national security issue, but it is very likely an allusion to the developments in Columbia where the minister of justice was assassinated last May after declaring war on drug traffickers. After the killing a national state of siege was imposed.

Part of the report states that "The abusive consumption of drugs remains a serious public health problem," in the United States. This leads to my point. Is it not a greater moral problem than it is a health problem?

Some time ago, I heard a fellow say, "I don't see why anyone makes such a hassle about it. What's wrong with a little pot?" I didn't have an answer for him then. But

when a nation as large as Columbia can be virtually held hostage by mafia groups that are led by psychopaths who have no respect for legal systems and no compassion for human lives and personal dignity, then there is something wrong.

Perhaps one of the main problems with drugs is the attitude that accompanies drug use and tolerant attitudes. Most users don't even begin to realize that in using illegal drugs, they are supporting murder and intimidation. Many believe that, being adults, it is their own right to choose.

However, the issue is not whether illegal drug use or abuse is a matter of personal choice, but whether the choice to support murder, intimidation, and the destruction of lives is or is not a personal right. If it is a personal right, it can only be an immoral one.

I hope for the day when drugs are not condoned by the simple fact that an athlete or movie star habitually uses them, and when the idea of getting high is shunned.

As all of the students here know, we do NOT have enough PC's to go around. This comes to your attention with heart stopping frustration and anger at the end of each quarter.

The anger and frustration aren't caused by the administration (they do have only a limited amount of funds to spend), it is caused by those inconsiderate @!★%!#?s who abuse our PC use rights.

There is a sign (plainly displayed) over the printer terminals that use time is limited to 10 minutes, Now no student is going to have a heart attack if things are slack and someone needs a couple of extra minutes on the printer. What they do get all bent out of shape about is when some selfish @!★%!#? walks in and ties up the printer for two or three hours while he uses it as a Word Processor to write his quarter project. Not only does this jerk use the wrong machine to do the job, it is almost always at the wrong time (when the PC lab has standing room only) and

We all know it is not up to the user assistants to coddle and/or reprimand the students who use the PC's. Nor can we blame the department for the abuses that occur. The user assistants were taking counts every hour of how Many people were using the computers and the department even extended their operations hours to give the students a chance to finish their work. It is up to each one of us as PC users to control student abuse.

When you see a fellow student abusing their privileges at the cost of another student, SPEAK UP!! When every terminal is full and there is standing room only, it is not the time to play a game of "Frogger" or sit down to write a 15 page report. If you need the terminal (or printer) and someone is hogging it when he RARELY do they even know how to use the PC to do the job they are attempting. (One student in particular comes to mind who could not figure out how to use the dictionary, much less the PC or Lanier manual.)

or she shouldn't be, say so!

It always works better if you mention it nicely to them at first and give them a chance to relinquish the PC. If they want to be a @!★%!#? about it, go get the User Assistant and let them speak to the student about it. Everyone here has, or will have, a use for the PC's before they get out. Only common sense and a little courtesy will allow all of us to get our work submitted on time and still allow some time to play around with the PC's. Short & Sweet-

If you see a @!%!#? eating up your time on the PC when you need it to complete your computer assignment, say something about it.

If you ARE A @!★%.#& who has been abusing the PC's, STOP. Nobody likes it.

You may be surprised, but it sure seems that when you are willing to help others, they are willing to help you.

P.S. If you are an amateur cryptographer, have fun.

## Parking Blues

Karen Smith, Staff Writer

I would like to share with you a problem that I find to be rather consistent. What is it? Well, how many of you often find yourselves literally, having to HUNT your car after having parked in the main student-parking lot? That many! For those who do not park in this area, you don't know what you are missing.

What's it like? Well, let me tell you. First of all, it is 8:00 in the morning; you're half asleep, and already late for the test. Now, if you're like me, you will drive into the parking lot and find the first aisle that doesn't have the tail end of a Buick sticking out of it. From that point you will simply park your car somewhere and go to class.

After you've finished failing the test and have completed your other daily duties, you then go out to the clear blue--commonly referred to as the parking lot. By this time, the

bottom of cloud nine has fallen out even though David Weatherman said, "No rain today." Just the same, you grit your teeth, and begin hunting that popular pink convertible.

Swiftly, you glance over the lot in rare hope of spotting Sally. This usually fails. Next, you pick an aisle, and walk down it. Afterwards, you pick another, and then another. Ten minutes is sufficient enough to find your car. Though you are soaking wet and out of breath, you unlock Sally, crank up and go.

During my stay here at Southern Tech, I have found this to be a constant problem. I also, find that I am not alone. My strong suggestion is that letters be pasted up on the light poles in the parking lot. The lights are not on every aisle, but it would be easier to say, "I parked between A and B," rather than "I parked out there, SOMEWHERE."

THANKS TO EVERYONE  
WHO CONTRIBUTED TO  
THIS ISSUE OF THE STING!

*Man the mortal angel  
Barely above the beast  
Thinks himself arranger  
of all that he foresees*

*Nothing seems to satisfy  
His lowly mortal soul  
He spreads his cities far and  
wide  
And lays the mountains low*

*Through battlefields of glory  
And days at home in peace  
Mankind's lonely story is of  
searching n'er to cease*

*Perhaps he'll find an answer  
Someday to all his prayers  
But even now, he knows he's  
blind  
And knows not why he cares*

by David Barnhardt

# Balloons!

On Thursday, February 14, the student chapter of the American Institute of Architects will sponsor a Valentine Balloon Sale at the STI Student Center. These beautiful balloons will make an especially nice and unusual gift for your someone special.

ALL 12" BALLOONS WILL COST ONLY: \$3.00 EACH!  
ALL 36" BALLOONS WILL COST ONLY: \$15.00 EACH.

Compare this price to gift shop prices of \$5.00 to \$10.00 for 12" and \$20.00 to \$35.00 for 36".

**BALLOON FEATURES:**  
heart shape  
helium inflated (lasts for days)  
strong durable mylar construction  
free custom engraving  
includes color ribbon tie  
available in assorted colors and logos

Beginning January 30 thru February 13, at the STI Student Center and from ASC/AIA members, a presale will be held. You can order your balloons at the booth set up in the lower lobby.

PREORDERED BALLOONS WILL COST ONLY: \$2.50 FOR 12"

Please help support the ASC/AIA chapter. Have the HEART and BUY a HEART for your valentine!

HERE ARE SOME OF THE DIFFERENT STYLES AVAILABLE:

- 12" styles;
- 1) **P.S. I Love You**-silver balloon with black lettering and red kisses.
  - 2) **"Love"**-silver balloon with white lettering and inverted pyramid of hearts.
  - 3) **P.S. I Love You**-blue balloon with black lettering and stem of red roses.
  - 4) **Thinking of You**-blue balloon with white lettering and white doves and rainbow of hearts.
  - 5) **Remember, today and always**-Rainbow balloon with black lettering and faint butterflies.

- 36" styles:
- 1) **This Hug's For You** by the Critter Sitter's-hot pink balloon with white lettering and white koala bear.
  - 2) **I Love You**-red balloon with white script lettering.

## Free CPR

Free training in cardiopulmonary resuscitation (CPR) will be offered to metro Atlantans during the Red Cross Third Annual CPR Saturday on February 16, 1985. This event is co-sponsored by WGST Radio, Kroger Stores and Coca-Cola, U.S.A.

Free CPR training will be available at four locations throughout the metro area at the American Red Cross Headquarters on Monroe Drive, Columbia High School in Decatur, Gwinnett

Vocational Center at Parkview High School in Lilburn and First United Methodist Church in Marietta. From 9:00 a.m. to 4:00 p.m., training will begin every half hour at each of the four sites.

CPR provides artificially induced circulation and respiration to a person whose heart and lungs have stopped working due to heart attack, electrical shock, drowning or another cause. The skill can often make the difference in a life-or-death emergency.

## ACTS Competition

Entry forms for the 4th Annual AMERICAN COLLEGIATE TALENT SHOWCASE (ACTS) Competition are now available at the Student Center Office. Deadline for this year's competition is April 15, 1985.

ACTS is a nation-wide competition for talented students representing all fields of performing entertainment. Contestants have the opportunity to receive cash and scholarship prizes, auditions, overseas tours, showcases, personal appearances and other career development opportunities.

This year, a special team of producers and writers will be assembled by none other than world renowned comedian BOB HOPE, to judge the newly added categories in comedy writing. Additional categories include: songwriting, video production, contemporary and classical music, dance, drama and variety.

For more information, come by the Student Center Office or call or write: ACTS, Box 3ACT, New Mexico State University, Las Cruces, NM, 88003. (505) 646-4413.

7. **Living, Loving and Learning**, by Leo Buscaglia. (Fawcett, \$5.95) Thoughts from the acclaimed California professor.
8. **Changes**, by Danielle Steel. (Dell, \$3.95) Her latest romantic novel—this time between doctor and anchorwoman.
9. **The Road Less Traveled**, by M. Scott Peck. (Touchstone, \$8.95) Psychological and spiritual inspiration by a psychiatrist.
10. **In Search of the Far Side**, by Gary Larson. (Andrews, McMeel & Parker, \$4.95) More cartoons from the "Far Side"

### New & Recommended

- My Search for Warren Harding**, by Robert Plunket. (Dell, Laurel, \$3.95) A widely farcical tale, full of low comedy, high camp, manic character study, academic parody, sociomorphals and packed with hilarious surprises.
- Let the Trumpet Sound**, by Stephen B. Oates. (NAL, Mentor, \$4.95) The life of Martin Luther King, Jr. A biography not only full of drama, but of the real King, his bravery, his triumph, his pain and his doubts.
- Fifty-Seven Reasons not to Have a Nuclear War**, by Marty Asher. (Warner, \$4.95) 57 drawings by Lonni Sue Johnson of good things in life, i.e. ice cream, beach balls, etc.

ASSOCIATION OF AMERICAN PUBLISHERS/NATIONAL ASSOCIATION OF COLLEGE STORES

# Don't just get a job with your special skills.

## Get an advantage!

A specific job guarantee, accelerated promotions and a possible bonus are just the start. With our new College Enlistment Program, your high school diploma and special skills training pay off from the beginning, proof that your special skill means something to the Corps.

For example, your specialized training could guarantee you a job such as metal worker, electrician or construction surveyor just to name a few of the 260 select jobs you could qualify for.

Also, by getting accelerated promotions, you'll be making more money from the day you finish recruit training. Your first

rank will be private first class. Within 6 months you'll be promoted to lance corporal. If you qualify, you could make corporal within 13 months. Higher rank, higher pay.

Another advantage of our College Enlistment Program is the chance to get a bonus. Whether you qualify for one depends on the MOS you choose.

The advantages add up quickly in our College Enlistment Program. And if you qualify, you'll have an advantage for life few others can claim—the self-confidence and respect that come with earning the title United States Marine.

Call 1-800-423-2600. In California, 1-800-252-0241.

REGENCY

This five member a cappella vocal group got its start when the twins, Dwayne and Wayne McNeill, bass Anthony Griffin and tenor Milton Ames sang together in high school. In 1982, after they were joined by their very own Sammy Davis on leads and second tenor, this group from East Baltimore began public appearances. From dates on the streets of Baltimore, the Harborplace Amphitheatre and Gatzby's to

radio and television commercials, concerts and beauty pageants, Regency has delighted audiences throughout the Northeast with their music which is often reminiscent of the Mills Brothers. Their distinctive style--hot, rocking, lyrical and sometimes mellow--adds a flare to their musical repertoire which extends from the 30's to the music of today.

Leapin' Lizards

Brad Austin, Staff Writer

A few weeks ago Southern Tech had a special and interesting visitor. He was Michael Schedwick, the reptile man. He and his friends, several exotic reptiles, came down from Maryland to visit STI. They were here two year ago and enjoy coming to Georgia. Mr. Schedwick came to do more than just show the students the reptiles, he came to inform his audience about reptiles and their behavior.

The first reptile was an albino tortoise from Africa. Her name is Buttercup and she is very rare. The soft bright yellow shell makes her very easy to be seen and, thus, often attacked by predators. Unlike Buttercup her 100 or so brothers and sisters have a hard green shell. If it were not for a young boy who found her at a very young age, Buttercup would not have survived. Buttercup is a carnivore, but she is happy living the life of a vegetarian.

Another plant eater that Michael brought was Iggy. Iggy is a five foot lizard from South America. Because it was mating season for Iggy, he had a bright orange and green skin (STI colors of course). Iggy's female friends are supposed to find the colors very attractive.

The colors stretched all the way down his three foot tail that could be used for defense as well as for food storage. Iggy could go for nearly a month without eating because of this storage.

Many other friends that Michael brought also have the ability to live a while without eating. Some were rattle snakes, cobras, boa constrictors and aligators.

Most of the animals Mr. Schedwick brought were snakes. All of these snakes were poisonous. He brings the deadly snakes because he wants to educate his audience about the snakes. He showed that there is a proper way to treat dangerous reptiles, and also wanted the audience to be able to recognize a dangerous reptile.

The afternoon with Michael Schedwick was more than a good look at exotic animals; it was a learning experience. The packed ballroom was intent with what was being said and the students were not hesitant to ask questions. Mr. Schedwick seemed to enjoy himself and he appeared to be pleased that the audience was interested. Overall, everyone had a fun and interesting afternoon.

V A Extension

The Veterans Administration announced today that the Emergency Veterans' Job Training Act has been extended and that eligible Korean and Vietnam Era veterans have until February 28, 1985 to make initial application for placement under the program.

Charles W. Wickes, Director of the Atlanta VA Regional Office, said that employers now have until September 1, 1985 to place veterans in on-the-job training positions under the program. He said applications for renewal of eligibility from veterans already certified to participate will be accepted beyond the February 28, 1985 date.

Wickes said the program provides a "unique incentive" to employers to hire and train

unemployed veterans. "It's particularly attractive to small businessmen," he said "because it reimburses them immediately rather than through traditional end-of-year tax credits."

More than 20,000 veterans went to work in new jobs last year under the program; 202 in Georgia. The VA pays their employers 50 percent of their starting hourly rate of pay for up to nine months, 15 for disabled veterans, to a maximum reimbursement of \$10,000 per veteran.

Korean and Vietnam Era veterans and employers interested in participating should contact the VA Regional Office or local state employment service office. VA Regional Office toll-free number is 800-282-0232.

## Co-op

CO-OP JOB OPENINGS FOR SPRING QUARTER ARE AS FOLLOWS:

A TEC Assoc.  
Atlanta & Savannah  
CET

Atlanta Gas Light  
Atlanta, Carrollton, Gwinnett

## Placement

The following companies Pre-screen:

Thursday, Feb. 14 & Friday, Feb 15 - Milliken - ECET, IET, MET, TET

Friday, Feb. 15-Southwire Co. - ECET, IET, MET

Friday, Feb 15 - Cut Art Stone - AET

Tuesday, Feb. 19-Plantation Pipeline Co. - ECET, MET

Monday, Feb 25 - Morse Industrial Controls - IET

Thursday, Feb 14 - Rosser White - EET, MET

The following companies will not pre-screen:

Wednesday, Feb. 13 & Thursday, Feb 14 - Schweber Electronics - ECET, CIST

Wednesday, Feb 20 - Johnson Controls - (info posted later)  
POLICY STATEMENT is

required reading for all graduates and alumni using the placement center. Copies are on the counter in the placement center (green sheet). If you have not registered, you can not interview this quarter--Friday, January 18, was the deadline to register.

Sign up notebooks for these companies that are not pre-screening are posted one week before the interview date. Leave a resume in the notebook when you sign up.

Three tapes on interview skills can be viewed in placement. We also have tapes on Lockheed, Texas Instruments, Milliken, Norfolk Southern Railroad and Industrial Risk Insurers.

Placement Center Office hours are 8:00 a.m. - 4:30 p.m., Monday - Friday.

Call T. S. Ayers (404) 881-8348

This week is going to be a very important one for Lambda Chi Alpha. One might look at it as a transitional stage where new leadership takes over and new members join our bond.

Our fraternity election produced eleven new officers who will, I'm sure, give their 100 percent effort in making our fraternity as meaningful as it has always been. Our new officers are as follows:

President-Rene Smith  
V. Pres.-Kirk Hegwood  
Alumni Affairs-John Fisher  
Secretary-Scott Leisey  
Treasurer-Kevin Wright  
Social Chairman-Ernie McGeehee  
Rush Chairman-Don Mabry  
Fraternity Educator-Rick Sanders  
Ritualists-Tom Monroe  
Scholastics-Chip Morgan

Advisor-St. Germain (Doc)

Congratulations to all of them!

Hey Alpha Delta Pi, that was really a great party and you're all a great bunch of gals (not to mention dancers!) Us, Lamb-chops, look forward to having another social with you! Although most of you dressed as angels, we know who you really are (devilish) - ha, ha, ha!

This week will be initiation week for Lambda Chi. These men will work together, think together and rejoice together as they become a unit. Remember guys-think, listen, and learn!

John A. Fisher  
"Fish"

P.S. Baaaaaaa!

## BSU

Eight Atlanta area Baptist Student Unions will be participating in a marathon for summer missions. This 12 hour marathon will be held at Wieuca Road Baptist Activities building and last from 6:00 p.m. on Feb. 22 to 6:00 a.m. on Feb. 23.

Participating schools include Emory, Georgia Baptist, Clayton Junior, Kennesaw, Georgia State, Mercer, and Dekalb. Games will include volleyball, Trivial Pursuit, Foosball, ping-pong, chess, 8-ball, Monopoly and assorted other games.

Participants are asked to get pledges to help raise money for summer missions. Pledge cards, maps to the event, and additional information may be obtained at weekly BSU meetings on Monday night at 7:30 p.m. in Rm. 119 downstairs in the Student Center, and Thursday's luncheon at 12:00 Noon in Ballroom A.

Please come and be a part of the fun and fellowship.

## Pi Kappa Phi

Now that I have finally recuperated from our first annual Pi Kappa Phi ski weekend, maybe I'll be able to write a decent article. Needless to say, everyone that attended this function had a blast. We had some super parties, and we even had a visit from a few of the Sigma Nu's who were partying at Beech Mountain. Thanks goes out to everyone who planned the trip, and kept us straight throughout the weekend! (I can't wait until next year!)

Epsilon Kappa held its annual Awards Banquet on February 2. The speaker was Walter Kelly, who gave one of the absolute best speeches that I have ever heard. Awards were presented to the following people:  
Scholarship Award-Andy Young  
Archon's Plaque-Jon Cole and Jay Barrow  
Stephen E. Wrenn Award-Chris Bryan

Aspecial gift was presented to E.K. from Gary Pritchett. (Thanks)

Epsilon Kappa is headed south this week-end for the Area III Conclave in Tallahassee. Everyone is ready for the warm weather and Florida women! Epsilon Kappa will join in with the Pi Kappa Phi chapters in Area III for a weekend of fun and learning.

The Pi Kappa Phi Raffle that took place Jan. 30th, was a complete success. Congratulations to the winners and thanks to everyone who supported our fund-raising effort.

Congratulations to the Pi Kappa Phi basketball team who pulled off two victories in two tries. Keep up the good work guys.

A few reminders:

## Sigma Nu

Everybody returned in one piece from the annual ski trip at Beech Mountain. We braved cold temperatures and blowing snow to make that one perfect run down the slopes. On Saturday night everyone gathered for a big blow-out before the long drive home, Sunday. Glad to hear you are recovering nicely, Lynn! The brothers of Sigma Nu are looking forward to the Homecoming festivities and hope that everyone has an enjoyable time. Good luck to our Homecoming Queen candidate Angi Bay. Plans are now being finalized for the Sigma Nu Southeastern Conference Workshop to be held the weekend of February 15, at Southern Tech. Brother Jim Sullivan was married on January 26, 1985. Good luck Jim and Congratulations!!!  
Terry W. Schantz  
Reporter

## ROTC

Would you like to start working on a career this summer? If you will have between 45 and 90 hours credit toward your degree, you are eligible to do something different this summer, something that could be the answer to financial problems, and something that could be parlayed into a full-time or part-time job upon graduation. The Army ROTC 2 year program allows young people that have not participated in ROTC during their first two years of college to "catch-up" during a paid six week training session at Fort Knox, Kentucky.

The program is called Basic Camp. It is similar to Basic Training, but you and the other students are all basically the same-college students. Leadership training is stressed.

And you can win a scholarship that will pay for your remaining two years in college-

tuition, books, and \$100 per month. Scholarship or no scholarship, you are eligible for the \$100 per month.

With completion of Basic Camp and the last two years of ROTC courses you can receive a commission into the Army, the Army Reserve, or the National Guard.

This is not a smoke-screen. Three students within the last two years have won scholarships. For more information contact Major Wingard at 429-2929 or Captain Watson at 894-4760. One of us can fill you in on all the requirements, obligations, and expectations. Be all you can be.

## Sigma Phi Epsilon

Sigma Phi Epsilon is having a great winter quarter. ETA! Initiation of the new brothers went great. Brothers: Allan Gagnon, Michael Sims, Bob Jansen, Rick Morris, David Owens, Ken Hatcher, and Tom Beard had an excellent time at their initiation party on Saturday, January 19th. We welcome Carey Foster from the heart of Sigma Phi Epsilon as our new pledge.

February is a busy month for the brothers of the Georgia Eta Chapter. On Tuesday, Feb. 12 at 8:00 p.m., we are having Little Sister Golden Heart Induction. On Friday, Feb. 15, our 5th annual Founder's Day Banquet will be held at Brickworks on the square in Marietta. The guest speaker will be District Governor Ray Stanford. Also, on Friday, Feb. 22, and Saturday, Feb. 23, the Georgia Eta Chapter is attending our Regional

Leadership Academy (RLA) at the Peachtree Plaza.

ON SALE SOON

Sigma Phi Epsilon will be sponsoring a button sale in the Student Center. There will be a variety of sayings available and buttons can be custom printed for your fraternity, sorority or organization. To place special orders or for more information, contact a Sigma Phi Epsilon member.

Secretary

**PRIDE.  
IT'S ONE OF THE  
THINGS THAT COME  
WITH A BERET.**

Once you've been through the rigorous physically-challenging, mentally-taxing, emotionally-demanding training it takes to wear a beret, you'll understand the quiet pride a Ranger, Special Forces or Airborne soldier wears inside.

You're sure of your ability to handle sudden challenges, know your stamina, you've tested your skill and quickness. You've earned your beret. And the pride.

If you think you

have the special qualities that can earn you a right to wear the beret, stop by or call.

**ARMY.  
BE ALL YOU CAN BE.**

**"ROCKWORLD TO GIVE AWAY A HOBIE CAT SAILBOAT IN THE ROCKWORLD SEA & SKI SWEEPSTAKES."**

In conjunction with Sea & Ski, Rockworld will give away a Grand Prize HOBIE CAT SAILBOAT in this next sweepstakes to be held on March 25th. This Hobie Cat accompanied with a trailer is valued at \$5,000! Students can enter Rockworld's Sea & Ski Sweepstakes simply by writing down their name, address, phone number and college name and mailing it to: ROCKWORLD, 1698 Central Avenue, Albany NY 12205; or students can drop their entries in entry boxes provided by their school in the Rockworld viewing location. All entries must be received by March 25th, 1985. Don't be left on shore, send entries today for a chance to sail into the summer on a Sea & Ski Hobie Cat Sailboat. This contest is limited to college students, so all entrants have a great chance to win, and Rockworld couldn't make it any easier!

(Rockworld is a one-hour weekly music video show provided exclusively to college campuses across the nation and part of Canada free of charge. Our show contains various types of music such as

rock, country, rhythm and blues, jazz and punk. Rockworld is played in popular high traffic areas such as students unions, dormitories, pubs and rathskellers.)

Partial Listing of Acts Scheduled for Shows No. 20 - No. 23:

## Counselling Corner

**Stress.** The buzz-word of the 80's. It's the focus of a great deal of research linking it to everything from cancer to divorce, from heart attacks to poor performance at work. For some fortunate few, stress management has become an important concern... for most of us, however, stress remains a nebulous evil that "doesn't affect us" because we are young or usually happy or healthy or in love or any number of reasons.

**Wrong.** Stress is not "something out there that affects other people, but not me, I can handle it." It can- and probably does- affect your life regardless of your youth, health, happiness, or romantic bliss.

Of course, all stress is not bad. There is even such a thing as good stress or **eustress**. This refers either to the stress caused by something pleasant (e.g. falling in love or receiving an award), or to that level of stress that causes you to perform at your peak ability (e.g. on a test or in a sporting event.) However, much of the time the stress we encounter is not positive, so we must learn how to recognize its causes and symptoms and how to

manage it in the present and if possible, prevent its recurrence.

Stress is a physical as well as a mental occurrence. Psychologically, it is often experienced as anxiety, fear, pressure, depression, prolonged anger, and/or tension.

Physically, the immediate symptoms include sweaty palms or cold hands, nausea or stomach cramps, muscular tension, headaches, chills or hot flashes, hyperventilation (breathing too rapidly) or hypoventilation (breathing too slowly), shaking or shivering, rapid or irregular heartbeat, difficulty in breathing, insomnia, and a variety of others. Over the long run, stress causes a breakdown in the body's ability to resist or deal with infection and disease. It can also lead to ulcers, heart attacks and strokes, and is thought by many researchers to be linked to cancer.

The causes of stress vary from person to person, for what is a stressful situation for one is a breeze for another. There are, however, some situations that seem to spark stressful reactions in many people, for example: tests and

exams, having to write a paper, going out on a first date, lack of assertiveness in dealing with situations at work, school or at home, periodic evaluation at work, moving, changing jobs, doing poorly in school, the ending of a friendship or significant relationship, loneliness, procrastination, and physical injury. Any of these situations or a myriad of others may spark a stressful reaction in a given individual such as yourself, however **MOST STRESS IS CAUSED OR MADE WORSE BY MENTAL ACTIVITY**. That is, a person's beliefs or mental attitude regarding a situation affects the level of stress caused by that situation. If one believes that one cannot take tests, then upcoming final exams are bound to cause more stress for that person than for someone who views tests as a game. Therefore, changing your attitude about things/situations that cause you stress will help alleviate the stress.

In addition to learning to think differently about stress, there are several other things you can do to manage stress in your life:

1) **get enough sleep-** six to

eight hours is adequate for most people. If you are well-rested, you will handle daily situations with much less stress.

2) **eat well-** a balanced diet is important. Undereating, overeating, not eating nutritious food all cause weakening of the body and increase susceptibility to stress.

3) **get enough exercise-** proper exercise relieves muscular tension, activates the body's energy supplies, and helps the body get rid of the harmful chemicals built up by stress.

4) **talk-** whether to a roommate, a member of your family, a friend, or a counselor, talking about things that are causing you anxiety helps to relieve that anxiety. Stress begets stress...break the cycle by talking about it- you'll be surprised how many other people feel the same way you do.

5) **learn how to relax-** there are many exercises and techniques for relaxing. Breathing exercises, muscle relaxation exercises, and others. There are many books about such exercises (including of course, traditional forms of yoga and meditation.) Also available in the Counseling Center are

relaxation tapes and handouts on relaxation techniques.

Take a look at your life- where and how is stress affecting you? which of the signals or symptoms do you experience? When? How often? What negative attitudes about yourself or certain situations could be creating undue stress for you? Stress does affect everyone-but it need not cause you problems. It can be managed. If recognized and dealt with it need seldom pass that level which enhances peak performance. Out of control, however, it can be harmful. How are you managing your stress?

If you are concerned about the amount of stress in your life or would like to learn more about stress management, please come by the Counseling Center or call 424-7226.

## Management.

So often that word brings to mind unpleasant thoughts of bureaucracy, red tape, inefficiency, power, manipulation and lack of concern for subordinates. Employer-employee relations are all too frequently tense, impersonal and rough with suspicion. But it does not have to be that way.

Imagine, if you can, a situation in which boss and employees work together as a coach and his or her winning team. Continue to stretch your imagination to picture motivated and productive employees who like and respect their supervisors--a workplace where goals are clear and where praises outnumber reprimands 10 to 1.

Sound far fetched? Impossible you say?

Well, not only is such a method of management possible, it is being used across the country by the many major companies who have put to use the principle of *The One Minute Manager* by Kenneth Blanchard, Ph.D., and Spencer Johnson, M.D. One Minute Managing has proven to be an effective, efficient, productive, and enjoyable method of managing organizations--from student

clubs to large corporations and every size organization in between.

Does all of this sound intriguing? Are you planning to work in some level of management in the future? Are you a club/fraternity/sorority officer or perhaps hoping to run for such an office? Are you currently in a supervisory capacity at work? If you answered yes to any of these questions, learning more about One Minute Management would be beneficial to you and your career.

You will have an opportunity to learn more about this approach to management at a seminar given by Juli Wilson, Counselor, on Tuesday, February 26 from 6-7:30 p.m. in the Counseling Center Conference Room. The seminar will provide you with a wealth of information as well as enable you to experience first hand what One Minute Management feels like. So, if you want to become a good manager, director, supervisor, club officer or to become a better one than you are now, mark the 26th on your calendar and join us.

Steve Hoofnagle, editor

## Gasoline

Gasoline is a mixture of hydrocarbons that is refined mainly from crude oil. The refining process is a series of distillings, crackings (heating in the absence of oxygen), and chemical treatments that separate the components of crude oil into usable products. Presently, there are also pilot programs for obtaining gasoline from coal liquification, oil shale, tar sands, and other natural resources, but most of our gasoline is refined from crude oil.

Gasoline is a blend of different hydrocarbons, designed to meet the complex, changing requirements of the modern internal combustion engine. Gasoline is blended to achieve the optimum balance of volatility and detonation resistance or anti-knock rating.

Volatility is the ease with which a liquid vaporizes. A liquid with a high volatility has a low boiling point (i.e. alcohol is more volatile than water.) The volatility of a gasoline determines the ease of starting, the degree of resistance to vapor lock, smoothness of acceleration, and fuel economy. A gasoline must have high volatility for easy starting and good acceleration, but must also be of low volatility to give good fuel economy and combat vapor lock. Vapor lock is a condition, occurring mostly in hot weather, where some of the liquid gasoline turns to gas in the fuel lines and blocks the flow of fuel from the tank.

Detonation (also known as pinging, spark knock, and knocking), is an undesirable phenomena in engine operation. During normal operation, the burning fuel air mixture in the cylinder of an

engine "pushes" evenly on the top of the piston. Pressure in the combustion chamber increases smoothly and evenly. In other words, the burning of the fuel/air mixture, or charge, begins at the spark plug and ideally moves smoothly outward in all directions like waves do when a pebble is dropped into a pond.

This moving of the burning is called a flame-front (See figures A & B.)

Detonation occurs when the increasing temperature and pressure in the combustion chamber, caused by the expanding flame-front, ignites another part of the charge before the flame-front reaches it. This causes a sudden and uneven increase in pressure that hits the piston like a hammer blow. This causes the characteristic "pinging" sound and can lead to cracks or holes in the piston.

The ability of a gasoline to resist detonation is its "octane rating" or more accurately, its anti-knock index. The higher the index the more resistant to knock the gasoline should be. Anti-knock indexes range from 87 (average for regular unleaded), 89 (average for leaded regular), and up to 93 (premium-unleaded). Originally the anti-knock index of a gasoline was increased by the use of tetraethyl lead during the refining process (hence "leaded gas"), to increase the relative level of octane. More recently with the introduction of "unleaded" gasolines and new refining techniques, other additives are used to raise the "octane rating" or anti-knock index. Among these additives are ethyl alcohol. You should remember gasohol from a few years back. It was a blend of

90 percent gasoline and 10 percent ethyl alcohol (ethanol) and was not successful in the market place. Today, if you buy a lot of premium gasoline, you are probably buying a lot of "gasohol." If the level of the ethyl alcohol does not exceed 5 percent, it is an "additive" and the gasoline does not have to be labeled gasohol.

Some distributor's "premium" gasoline is a 95/5 mixture of gasoline and ethyl alcohol.

A never development is the marketing of methanol-blended gasoline. This is a mixture of 90 percent gasoline, 5 percent methanol, and 5 percent cosolvent. This new fuel has been approved for consumer use by the EPA and was test marketed in New York and Pennsylvania. If not blended properly, methanol will cause problems in a car's fuel system. Theoretically, the cosolvent makes methanol-blended gasoline a safe and reliable motor fuel. Consumer Reports, a publication of the Consumers Union, recommends more evaluation of the long-term effects of methanol blends on a car's fuel system before it is marketed on a regular basis.

Back to the anti-knock index. Originally the "octane" rating of a gasoline was determined by burning a test sample of gasoline in a special test engine. The engine was equipped with sensors to monitor the level of pinging. The engine was also equipped with dual-feeds to its carburetor: one for the test gasoline and one for a control gasoline. The engine was run alternately on the test and control gasoline; while the octane level of the control gasoline was varied. When the control

gasoline burned with the same characteristics as the test gas, an "octane rating" was assigned. This method of determining octane rating is known as the Motor method. It tended to give high octane numbers to gasoline, (i.e. 91 for regular, 108 for premium.)

Another method of rating a gasoline is known as the Research method. It tends to yield lower numbers for the same sample of gasoline than does the motor method.

Today a gasoline's anti-knock index is calculated by the familiar  $(R + M) / 2$  method. This is the average of the Research and Motor methods.

Now all this information on gasoline (more than you'd probably ever care to know), is fine, but how well can it help you? Well, there are 3 important things to consider when gassing up:

- 1) Seasonal formulations. The same brand of gasoline is not always the same gasoline. Gasolines are blended according to the climate and time of the year. For example, in a warmer area, you'd want a gas with a lower volatility to help combat vapor lock. In a colder area, you want higher volatility to make starting easier and additives to combat water accumulating in the tank. Starting problems at the onset of cold weather may just be a tankful of "summer" formulated gas.
- 2) In the winter time, condensation in the gas tank can collect and freeze, stopping the flow of gasoline to the engine. It's a good practice to keep your fuel tank as full as possible, say at least  $\frac{1}{2}$  full, to combat the formation of condensation. A gas treatment, like STP, might be a good

preventive measure against condensation collecting in the tank, since it breaks down water in the tank and allows it to be passed through the fuel system and "burned" in the engine.

3) Last, but not least, if your automobile runs well on regular grade unleaded (or leaded for older cars) runs well as in no detonation or dieseling (running-on after the engine is switched off)- there is no reason to use higher-priced premium unleaded. However, if you do experience detonation or dieseling, using premium unleaded should correct those problems (unless you have excessive deposits in the combustion chambers or have a timing problem). Letting your car continually suffer from detonation and dieseling from cheap gas will eventually kill your engine. It will also cost you more in the long run than the difference in the price of premium gas. In other words, if your car does not run correctly on regular grade gasolines, not buying premium is not a smart or less expensive move.

## LEARN HOW TO FLY HELICOPTERS.

If you've ever wanted to fly a helicopter, here's your opportunity. The Army has openings now in its Warrant Officer Flight Training Program.

To qualify, you must have a high school diploma, have no previous military service, be at least 17 years old, and not be past your 24th birthday at the time of your enlistment. You must meet certain physical and mental requirements for enrollment in the Warrant Officer Flight Training Program.

Prior to entering helicopter flight training, you must successfully complete basic training and pre-flight training.

After appointment as a Warrant Officer, you will return to your local Army Reserve unit and train one weekend a month and two weeks a year for at least 48 months.

If you'd like to wear the wings of an Army aviator, stop by or call:

427-8411

ARMY RESERVE.  
BE ALL YOU CAN BE.

# The Great State of Atlanta

Of the 1,875 students at eight North Carolina universities who took an elementary geography test, 97 percent of the freshmen, and 93 percent of the upperclassmen, failed. The geography professor who wrote the test called the results "depressing." Some students thought the Soviet Union was between Nicaragua and Panama. One said the "state of Atlanta" borders North Carolina.

## LEARN THE SECRET OF LIFE IN 3 HOURS.

CPR can save a heart attack victim's life. And it's easy to learn. So come to the Red Cross' CPR Saturday, February 16. Bring your friends, too. It's free and it only takes a couple of hours. And that's a small price to pay for a lifetime.

Call **875-9300** for more information.

CPR SATURDAY

**American Red Cross**  
Metropolitan Atlanta Chapter

### PRODUCTION SCHEDULE

The following is a list of production deadlines and issue dates for the **STING** for the remainder of the 84/85 school year.

#### Deadline/Issue Date

Feb.18 / Feb.26  
Mar.4 / Mar.12

Apr.7 / Apr.15  
Apr.22 / Apr.30  
May13 / May21  
May27 / Jun.3

Please take note of this schedule and submit any materials before the respective deadline!

# THE NUCLEAR NAVY. RIDE THE WAVE OF THE FUTURE.

**You're deep under the sea. There are 4600 tons of nuclear-powered submarine around you. Your mission - to preserve the peace.**

**Your job - to coordinate a practice missile launch. Everything about the sub is state-of-the-art, including you.**

**The exercise - a success. You're part of that success and now you're riding high.**

**In the nuclear Navy, you learn quickly. Over half of America's nuclear reactors are in the Navy. And that means you get hands-on experience fast.**

**You get rewarded fast, too. With a great starting salary of \$22,000 that can build to as much as \$44,000 after five years. And with training and skills you'll use for a lifetime.**

**Then, whether you're in the Mediterranean, the Pacific or the Atlantic, wherever you move around the world, you'll be moving up in your career and in the Navy.**

**Find out more about an exciting future that you can start today. See your Navy Recruiter or CALL 800-377-NAVY.**

## NAVY OFFICERS GET RESPONSIBILITY FAST.

## The "insides" Story

The more you put into something, the more you get out of it. It's that simple. And at Gorin's, we put a special touch into our famous ice cream that makes our best even better!  
It's an idea we call INSIDES. Choose your favorite INSIDE ingredient... or more than one. We'll mix in your choice of Nuts, Sno-Caps, Snickers M&M's, Heath Bar, Coconut, Oreo Cookie, Reeses, Raisinets, or Andes Mints with your ice cream for an added taste treat that's hard to beat!  
So dig in and give a love pat to your tummy!  
Ask us to mix your favorite 'INSIDE' with our FAMOUS ICE CREAM
