One of the more interesting things to see at the Sigma Nu House of Horror.

House Raises Big Money

For the eighth year in a row the Sigma Nu House of Horror has been a great success. In the past seven years the House of Horror has raised over \$42,000 to put towards a fraternity house. This year, Stephen Austin, the House of Horror coordinator, projects a profit of anywhere from ten to fifteen thousand dollars.

At the end of the season after the expenses are paid, I.E. electricity, concession supplies, traffic control, etc., 15 percent of the remaining profit is given to the Scottish Rite Hospital for children. Over the past seven years Sigma Nu has donated over 77,000 to Scottish Rite from the House of Horror.

A few years ago Sigma Nu

faced a financial setback when they discovered that the materials that they had left there from the year before had been stolen. Every year since they completely dismantle the props and store them in a mini-warehouse. Sigma Nu has a potential problem concerning next year. They have been told, as they have been before, that the property that the Barn sits on has been sold. This year, however, there is some doubt as to whether or not this is an idle threat. As of yet, no alternate site is available for next year, although Sigma Nu has enlisted the help of some

Board Approves Program

The University System of Georgia's Board of Regents has approved Southern Tech's request to offer a Master of Technology Management degree. The Board's approval allows the college to offer its first graduate degree program and the only one of its type in the state.

As with Southern Tech programs, the Master of Technology Management (MTM) will emphasize the needs of industry with regard to applications-oriented technical specialists. The program is designed to study productivity improvement concepts in manufacturing, construction, and service industries. Students admitted to this program typically will be employed in industry and have experience in their respective technical areas most will be practicing engineering

technologists, engineers, or production supervisors. The program will emphasize leadership of technical projects and on-going programs, plus leadership of the key elements of industry--productivity, improvement, time cost analysis, and personnel--in technical environments.

President Stephen R. Cheshier commented on the uniqueness of the MTM program, "There is no similar program in our region. It will teach the elements of technical management, with emphasis on manufacturing and production-oriented industries. We believe this program fills a large, unmet need and will be very successful and grow rapidly."

Dr. Cheshier added that it is especially appropriate that Southern Tech's first master's be in the field of management of technical industries since many of our graduates end up

in just such roles. We have and alumni pool of over 8,000, many of whom have remained in Georgia.

A Graduate Admission Committee will select prospective students based upon such criteria as the Graduate Record Exam score, appropriate undergraduate grade point average and academic discipline, demonstrated potential for successful performance at the graduate level, sufficient industrial experience (through fulltime and co-op work) to benefit from the educational program, and recommendations.

The college anticipates an enrollment of 30 students in the third year. Initial inquiries regarding the program should be directed to the Admissions Office, extension 281. The Admissions Office will accept names immediately for consideration for the program.

Wallace Terry

Terry Speaks At STI

In honor of Veterans Day, STI's Campus Activities Board is proud to present Wallace Terry, the author of the book *BLOODS*, on Thursday, November 7 at 7:30 pm upstairs in the Student Center ballroom.

Terry's presentation will include a lecture on the Oral History of the Vietnam War by Black Veterans and a slide show including voices recorded from the battlefield which appeared in *GUESS WHO'S COMING HOME*, the Motown documentary.

Wallace Terry gained firsthand experience from covering the Vietnam War for two years for *Time Magazine*.

"Recreating the experiences of black soldiers, who accounted for the greatest American casualties, *BLOODS* rises above color and race to deal, ultimately, with the story of every man at war." *BLOODS* has been named one of 200 best books of 1984 by *THE NEW YORK TIMES* and one of 10 best by *TIME* magazine.

Don't miss, Pulitzer Prize nominee, Wallace Terry's dynamic and compelling multi-media show. According to Walter Cronkite, *BLOODS* is "SEye--Opening...Unsettling...Fills a yawning gap in the record of our Vietnam experience."

Alcohol Program To Be Held

As our society struggles with alcohol abuse and as we make adjustments to drinking age changes, each of our groups and we as individuals are frequently confronted with difficult decisions about the consumption and service of alcoholic beverages. As part of National Collegiate Alcohol Awareness Week, the Department of Student Activities is sponsoring a program entitled

"Alcohol and You: Drinking in the 80's" to be held on Tuesday, October 29 at 12:10 p.m. in Room 119 of the Student Center.

After some brief introductory remarks, Ms. Kathy Drewwhin from charter Peachford Hospital will speak on a variety of alcohol-related topics including dealing with peer pressure to drink, the development of responsible

drinking habits, and methods of responsible alcohol service. Following her presentation and some time for questions and answers, Mr. Rex Adams from the Atlanta Beverage Company will give a major beverage company's perspective on alcohol consumption. Mr. Adams' remarks will be followed by a film addressing the problem of driving and drinking.

Communications Program At Southern Tech

Maurice Chapman, Director of Engineering and Telecommunications Services at Kennestone Hospital, will speak on campus at 12 noon on Friday, November 8, in Ballroom A of the Student Center. A 1978 graduate of Southern Tech, Chapman designed the first productivity monitoring system for the

hospital maintenance function. He is also the quality assurance officer for all hospital construction and is responsible for physical plant engineering at Kennestone.

As guest speaker for STI's Writing Across the Curriculum Committee, Chapman will address the im-

portance of effective written and oral communication in industry. And as Industrial Advisory Board member for our IET Department, he is well qualified to speak in the best interests of Southern Tech students and faculty.

Everyone is invited. Refreshments will be served.

Anti-Porn Bill Introduced

The bill, introduced in the Senate by Senators Mattingly and Paul Trible (R-VA), would allow the customs Service to refer cases for prosecution to the U.S. Attorney in the region in which the individual to whom the material is addressed resides. It would also extend from 14 days to 30 days the time limits during which forfeiture hearings must be

begun.

"Presently, imported pornographic material is reaching communities throughout this country and cases which should be prosecuted are not being pursued and materials which should be forfeited are instead being delivered. The sole reason for this is the fact that U.S. attorneys in several areas of the country are overburdened. In other words, administrative problems are hindering effective law enforcement. This should not be allowed to continue," said Mattingly.

Under current law customs officials can seize questionable material upon its entry into the United States. Once it is seized, it must be forwarded to the U.S. Attorney in the federal judicial district in which it is seized. Since most imported pornography enters the U.S. at a handful of ports, a tremendous enforcement burden has been placed upon a few districts.

"Allowing the customs Service to forward the material to the judicial district where the addressee resides will result in a fairer distribution of work

and greater flexibility in prosecuting pornography cases. More importantly, it will more adequately protect our children. Since Congress increased the penalties on the production or possession of pornography involving children, it is more important than ever that we intercept the foreign produced material of this type," said Mattingly.

"In addition, our bill allows for the prevailing community standards of the pornography's destination to be considered in determining whether or not the materials are legally obscene. Under the present system, often the only standards considered are those in New York City, where much of the foreign pornography enters the country," said Mattingly.

Mattingly said the current restrictions often result in the Customs Service having to forward questionable material to the importer. "Right now Customs has to begin forfeiture procedures within 14 days. Too often the time runs out before action can be taken. Thirty days is a much more reasonable time limit."

Letters To The Editor

Where Is The Jazz Ensemble Going To Practice?

Jazz is alive, but not here at Southern Tech. The problem is not so much with membership, or leadership, but with finding a place for regular practices. Since the creation of the Jazz Ensemble, practices have always been held two nights a week in the Student Center, that is until this quarter.

During the summer quarter, the Jazz Ensemble submitted its fall room reservation request, asking for the usual two nights a week rehearsal space, at the same time as all other campus organizations.

The request, however, was made. It was not until ALL other requests were processed and the fall schedule was completed that Barry Birchhead notified the Jazz Ensemble that they had been omitted

from the scheduling. He informed the officers of the band that they would have to operate on a week by week basis, going to the Student Center each Friday afternoon to see what space, if any, was available for the next week. this enables any organization, either on or off campus, to fill the remaining spaces before the band even has a opportunity to reserve it.

This makes members of the band feel that they are less an organization than any other. When two members of the band met with Dean Smith seeking his help, they were told that because of the scheduling demands on the Student Center, someone has got to suffer and it's going to be the band.

As with any performing

group, regular rehearsals are a must in order to perform. Without regularly scheduled rehearsals, the band cannot predict when, if ever, they would be performance ready. As with any volunteer student organization it is difficult, at best, to obtain full attendance at a rehearsal, even with a month's notice. With the present system, it is next to impossible.

Mr. Birchhead offered as a possible solution using the Student Center on the weekends. The Jazz Ensemble has the same trouble as any other organization in keeping its members around through the weekend. Because of the noise generated by the band during a rehearsal, they are unable to use substitute meeting locations such as the

library conference room, an empty classroom, or the gym. A possible solution might be to juggle the Student Center schedule around to even out some of the "suffering."

Over the years, the Jazz Ensemble has performed (free of charge) both on and off campus representing Southern Technical Institute at many school or organization activities. Many people think that the Jazz Ensemble performs only "three, four, or five times a year". This is not true. During the 1984-85 school year the Jazz Ensemble performed at: the fall Bathtub Race, the Talent Show, several Basketball games including Homecoming, Skit Nite, two highschool visitation days, Women in Technology Day,

Technologist of America Day, the AIA/ASC Casino Nite, Professor Stone's retirement party for Robert Hays, the Alumni Banquet, Cobb County Kaleidoscope at the Cobb County Civic Center, and was the opening act for the Preservation Hall Jazz Band at "A Night In Old Savannah" in Savannah, Georgia.

Every recruiting brochure for Southern Technical Institute lists the Jazz Ensemble as one of the organizations here on campus in order to show how "well-rounded" life at Southern Tech is. It seems strange that the administration is willing to let the only organization dedicated to the arts die out, just because of a lack of a regular time and place to rehearse.

Parking Problem Still Exists At Southern Tech...

Dear Editor:

Whether or not you may know it, the parking situation at Southern Tech is far from adequate. Although we students realize that this school is experiencing rapid growth, we feel that the problems associated with our growth could have been handled in a more professional manner. As a basis for this statement we ask you to answer two simple questions.

QUESTION I:

Assuming that you have known for some time the approximate number of students that would be parking on campus during Fall Quarter,

why did you start to provide extra parking spaces only after the quarter had started?

Didn't you realize that: a.) there weren't enough parking spaces and b.) putting off construction of new spaces until new would further aggravate the problem (particularly in the southwest corner of the campus) by putting earth-moving equipment in the large areas where students had parked before? Please Answer.

QUESTION II:

Each student pays \$30.00 per academic year for parking permits. Multiply this figure by the number of students at Southern Tech you will find that a large amount of money is taken in by the campus

police. To our knowledge there have been no major improvements on our campus in the last 3 years, save for the purchase of our previously-owned speedwagon interceptors in which our police sport about. So the question is where is this money or what has it been used for? Please answer.

We hope you understand that we do not intend for these questions to sound insulting, nor do we intend for them to go unanswered. By design, our system at Southern Tech allows us to pay you to solve, and by accepting our payment you are obligated to do so.

If this letter helps reverse the problem it is worthwhile, if it does not it is merely a statement. If the statement

sounds as if it comes from an uninformed source, then please inform us. In any event we look forward to hearing from you in the next edition of

The Sting.

Sincerely,
Mards J. Ford, D.L.R. and
Friends

TEAMWORK.

Birth control works best when both partners work together.

CROSSFIRE

Two Opinions On Music Censorship

By Russell King
Special to the STING

College students, especially those editing campus newspapers, are a diverse lot not given to uniformity of opinion. The issue of Rock 'n' Roll record ratings, however, has found student editors across the country in agreement.

A sampling of their comments:

"Rock has always been challenged by so-called responsible citizens who claim

the ability to see purported damage wrought by such music on the moral fabric of our country," say the editors of The Daily Illin. "...One must ask: Are the moral stands these groups seek to impose acceptable to rest of us, all of us?"

"...Should the Parents Music Resourch Center succeed, many record stores, especially those in family-oriented suburban shopping centers, will be afraid to stock X-rated or brown--wrapped albums. This is censorship.

The people who make the music lose because they cannot be heard; the people who want to hear it will lose because they will not be able to buy it."

The editors of the University Daily Kansan echo the First Amendment argument and question the usefulness of legislated morality before adding that "The popular music industry can never fulfill the role of parental discretion. Parents who care will take the time to listen to the noise coming from their kids' stereos, and if the words of-

send them they can say... you can't listen to that rot in my house."

The Wayne Stater editors document what they believe to be a "trend in popular music... leading away from lyrics that have been predominantly promiscuous or downright raunchy" and argue that "It seems unfair that the whole of rock music must be judged on the lyrical content of extreme groups."

And a Kentucky Kernel columnist says "Our rock stars are exaggerated images

of ourselves...and that kind of mirror is always valuable.

"When concerned parents begin voicing worries about what rock does to children's minds, what they're really worried about is the state of the world they've built for those children..."

"If children are learning about ugly reality at an earlier age than they used to, it isn't because their rock stars are poisoning their minds. It is because the world in which those musicians came of age has gotten uglier."

By David Crowder
Staff Writer

Censorship, as defined by "The American Heritage Dictionary, is the act, process or policy of censoring." A censor is "a person authorized to examine literature, plays, or other material and who may remove or suppress what he considers morally or otherwise objectionable." Is this the type of censorship that is becoming the norm in this country? This article does not try to answer this question because of the complexity of prolems involved. Rather, this article will describe some of the issues that have surfaced in the media recently.

Book bannings in elementary and high school have been the most common types of censorship. The major battle is the banning of classics from the libraries and classrooms of some schools. Somebody determined that these books

contained sexual innuendoes and strong language. Dicken's Moby Dick, Hemingway's The Sun Also Rises, and Twain's Tom Sawyer are examples of banned books. Whether the persons who decided that these books should be banned represent a majority is hard to determine. The fact is that many legal battles have ensued.

Another area where censorship has come into play is the music industry. Groups are popping up all over the country demanding that musical lyrics be censored or rated. The most prominent of these groups is a group of senators' wives. They believe that a rating, like that used in the movie industry, should be placed on album covers. They think that this would limit the number of minors purchasing so called X-rated albums. Would a rating system really work? In the movie industry it doesn't.

Music videos are also cat-

ching a great deal of flack because of their violent content. Granted some videos are violent, but it seems to be only a small percentage. How could music videos be censored without hurting the en-

tire industry? The only type of censorship that can work with music videos is for the parent to change the station or turn off the television.

Censorship, can we live with it? Will it help to protect young

minds or will close out different facets of life? Is book and record burning the thing to do? The floor is open. Reader response to this touchy subject will be greatly appreciated.

Rush Returns With Power

Neil Peart, Alex Lifeson, and Geddy Lee are Rush.

By Joel Lesser
Layout Editor

After 18 months of waiting and anticipation, Rush fans have a new album to place in their collection. Bassist, Geddy Lee, Percussionist, Neil Peart, and Guitarist, Alex Lifeson have done remarkable job. *Power Windows* from Polygram/Mercury was released on October 21st to mark the 15th album (including imports and live remixes) from this Canadian based trio.

The band has once again changed producers with the addition of Peter Collins. When Terry Brown left the band after the *Signals* album, Rush had earlier introduced a new producer, Peter Henderson. The *Grace Under Pressure* album which Henderson produced did not sell as well as the group had expected it to. This is why there is another change in producers on the *Power Windows* album.

The actual writing of the music has gone back to a more stylistic approach. Synthesizers are still relevant more than ever before. The programming for the PPG Synthesizers are given credit to

two other men which have not worked with the band before, Andy Richards and Jim Burgess. The writing is the usual Neil Peart style; intense but simple. The album was recorded and remixed at The Manor, England. This is a major change since the band has recorded in the past at Le Studio, Quebec.

The band is getting ready to start their world tour in December. Laser images and a fantastic light show are also expected for the tour.

The group has one video released for the song, "The Big Money" (the lead cut from the album). The video is superbly made using computer graphic images created from a Greenlight graphic computer. Other videos are said to be in the making.

Album covers credits hint that any thought of breaking up the band is not evident for the future. The *Rush, Power Windows* is definitely not a flop. As a matter of fact, if you get the album, you too will be very pleased with the product and be very amazed at how such a fine group of people can create such great music.

Yes, to get that Southern Tech Spirit started this year, the first (maybe last) Annual Coach Perides Look-alike Contest will be held at the opening basketball game of the season-Friday, October 15 vs. Philander Smithe College of Arkansas! This great event will take place during halftime and Mr. SGA himself -- David Key will be the M.C. The audience will act as judges of this spectacular occasion so bring your friends to cheer you on!! A grand prize will be awarded to the winner so BE THERE!! See the flyers around campus for additional information and motivation.

Look Alike Contest!

Greeks, Clubs,

AIAS

Hello again from the American Institute of Architecture Students, student chapter of Southern Tech.

The chapter extends a warm welcome to our new tour chairman, Emilio Arango. Emilio tells AIAS that he has tentatively planned a visit for you to Buckhead Plaza, which is going up at the old Sears site at the corner of West Paces and Peachtree. Buckhead Plaza is designed by the firm Thompson, Ventulett and Stainback both of whom agreed to let us visit the site for the next three quarters to view the different phases of construction.

Thanks are in order to all who came to the first AIAS meeting. Your attendance made it a great success and we do look forward to your support in the upcoming months. The AIAS Chapter would again like to express thanks to Steve Martin, Ed Bernard, Lynn Darrell, Lisa Arnold, Nick Chilton, and Darnell Rice for their help in making the kid's balloon experiment Archifest-85 at Wynn Park (Atlanta) a fantastic success!

The hot news story for AIAS is the upcoming "Forum" being held in fabulous New York City! Why should you go? Well, the benefits are numerous! When will you ever again see

so much of New York, hear many famous Architects, and be able to voice your opinion on the direction and operation of AIAS at such a low cost. The forum event is from Nov. 25th to Dec. 1st, and the cost is \$20 a night plus spending money and a dirt cheap airfare. So, do not worry that you will not be home for Thanksgiving, thousands of people will keep you company during Macy's Thanksgiving Day Parade! Hurry and sign up before the Nov. 12 deadline and have a whale of a time with the rest of us. You can get more information about "Forum-85" at the AET office.

Our next seminar for you is Nov. 6th and it will be on "the process of team design" hosted by the up and moving firm of Palmer, Flynn and Finderup. P.F.F. is a young firm who is involved in large scale commercial projects in the Atlanta and Chattanooga areas.

Lastly, it is never too late for you to be a member of AIAS. Just stop by the ever so local AET Dept. office and ask the marvelously wonderful Mrs. Vickers, our AET secretary, for a membership form and packet, then we look forward to seeing you at our next seminar!

Nick Chilton
Historian

Alpha Delta Phi

The sisters of Alpha Delta Phi wish to give a warm welcome to our newest pledges. ADPhi has eight new girls. Congratulations Jenny Buchanan, Linda Burrell, Tammy Clay, Cynthia Farr, Andrea Floyd, Billie Maddox, Elaine Stephenson, and Alice Young.

As our special gift to our new girls, Alpha Delta Phi will have a semi-formal pledge dance on October 26. We are all looking forward to a great time of dancing and sisterhood.

Alpha Delta Phi will also be helping the Lambda Chi's in their public service Halloween party children from neighboring elementary schools are all welcome. The service project is to aid in a fun and safe Halloween.

Cindy Berman-Reporter

AIEE

The American Institute for Industrial Engineers had their first meeting of the year, Tuesday, October 22nd at 12:00. There was a good turnout to hear Amanda Guthridge on the benefits of AIEE. We also saw the film "IE's on the job".

AIEE has many benefits for the Southern Tech student. We get a monthly subscription to the Industrial Engineering magazine, informative speakers and plant tours another benefit of being a member of the Atlanta AIEE Chapter is the regional and national conferences we are able to go to.

All this is possible for only \$12.00 a year. (the magazine itself is worth this). Applications can be found at professor Atkins office.

Robery Eazio President

Sigma Phi Epsilon

Sigma Phi Epsilon's Rock-n-Rush '85 proved to be a great success! Eta! This was shown our 18, yes, eighteen man pledge class consisting of:

Rod Tumlinson
David Alderman
Jera Shumpert, my little brother
Tony Adams
David Crews
David Brown
Bill Bales
Gary Newton
Mike Wilson
Rick Hoffman
Brennen Jones
Keith Bouswelle
George Lumsden
Scott Wheeler
Mike Allerheiligen
Ken Lunsford
Allan Berry

Oh, by the way, I hope

Pi Kappa Phi

We are still growing! Congratulations to our newest associate member, Allan Kelley. His valued addition to Lambda Pledge Class brings our total member of future Brothers to thirteen. These lucky men are all striving for initiation into our Brotherhood, realizing that it is a wonderful and fulfilling experience.

Another experience that everyone enjoyed was our annual Fall Retreat, or "Get Away From Atlanta" party, held Oct. 11-13 near Greenville, Ga. This was a time where our entire fraternity set aside our daily problems and established future goals. We accomplished a lot and had a

CSI

Hello from the Construction Specification Institute student chapter at Southern Tech.

The past Southeast Region Conference held at the Waverly Galleria was a great success and for this many thanks go to Reynolds Brown, Nick Chilton, Kim Davis, Ricky Gibbs, Nancy Layman, Russ Newman, Jeff Nolen, Greg Smith, Serge Vidalis, Kathy Wade, and Miles Whitfield.

And, at this time, Danita Nolen would like to express

nobody missed our Front page article with full color picture of the Rock in the Atlanta Journal! Yes, that's right, the Sig Ep's from Southern Tech made the front pages of the Atlanta Journal. Rick Morris talked with a reporter and told him about the tradition of the Rock and about our chapter. It was great publicity and made it worth while being at the Rock. Plus the fact we have 18 new members.

This was the first time in four years that the Brothers have taken the Rock, despite the numerous Rock raids, it was Great ("Good Clean") Fun! The new Associate members to Sig Ep are a great bunch of guys and we are glad to have them in the Fraternity. Their pledgship to the Fraternity has already boosted morale and promoted brotherhood. This class of

great time. A special thanks go to the parents of Brother John Clayton, who paid us \$500 for a day of work cutting and splitting firewood.

Though our Retreat was great fun, our camping trip into the North Georgia mountains was also a blast. For the men, it was tasting what it is like to live in the wilderness completely surrounded by nature. For the women, it was learning to "rough-it" without nearby modern facilities. But for everyone, it was an opportunity to get together and party-down.

However, even though our fraternity throws the best parties, we also take our school grades seriously. Besides knowing older Brothers who have already passed difficult courses, members of Pi Kappa

Phi enjoy the advantages of an up-to-date study file for individual courses, and a two hour study hall every evening at our Fraternity House. These beneficial aspects of being a Pi Kappa Phi help us to maintain one of the highest Grade Point Average on campus.

Upcoming events for our chapter include socials with several area sororities, flag football intramurals, and eating lunch together every Thursday. If anyone wants to be a part of us, just visit our house on Thursday at noon for lunch, or call 425-BEST.

Sincerely,
David G. Hirschler
Historian

Lambda Chi Alpha

It has been a busy month for the Chops but it has definitely been motivating and rewarding for the brothers and new associate members. Lambda Chi opens its arms to six new men who desire our friendship as much as we do theirs. To these men I wish to remind them just how selective Lambda Chi Alpha is when looking for a new member: someone honest, intelligent, friendly, and hard working. Sounds easy enough--but not everyone fits all four. This is why these men deserve congratulations:

John Cobb
Kelly Crossly
Ray France
Darrel Johnson
Russel Vullo
Mark White

The Lambda Chi little did a great job this year. Just seeing those pretty faces at the party is great, but they continue to help us in so many ways. Making a freshman feel "relaxed" at a party is one. Cleaning up after parties, and listening to a brother's problems are others. We, the brothers of Lambda Chi, do not take you girls for granted and we really enjoy and appreciate your involvement.

Lambda Chi Alpha will

have its Halloween party on November 1. Who cares if it isn't on Halloween night. After a few beers what does it matter? Speaking of "belch"-alcohol; everyone is invited to the party but must bring an I.D. Ask any brother for location, time, and a ride.

To the girls of ADPi -- we sure are looking forward to the "Halloween carnival" for those 300 screaming little brats- I mean nice kids. The sisters of ADPi and the brothers of Lambda Chi keeping the little kids off the dangerous streets on Halloween night and having a carnival for them. After letting us show them a night of entertainment they may wish they had stayed home (heh heh). Seriously--we hope to have a good time.

Once again congratulations to our new A.M.'s. They will always know what Lambda Chi is all about every time they shake a brother's hand. May we work hard together and remember the phrase "Naught without labor." Nothing is achieved without hard work--and sometimes a good friend is the tool one can have to achieve a certain goal.

"Lambda Chi Alpha...there is a difference"

John A. Fisher
"Fish"

BSU

Greetings fellow students and welcome to another exciting episode of BSU. We have several events up and coming and some reports to make so this should be a great fact filled issue, I'm not gonna guarantee anything.

The annual BSU Halloween party will be held Oct. 31 at Jim Rice's house. Maps will be available at all meetings. To get in you must have a costume of some sort and some kind of snack for munching purposes. Everyone should be prepared to teach the group a game. The party has been lots of fun in the past and this one should be no exception, so come on and join the fun.

Tau Kappa Epsilon

This Fall, our chapter has come off an excellent rush with nineteen men interested in becoming brothers of Tau Kappa Epsilon.

Congratulations and good luck to all the new guys. They are:

Zack Amacher
Chris Bard
Alan Berry
Robery Burdette
Edward Cocciaferro
John Comer
Bret Courtney
Matt Cunningham
Richard Fortenberry
Patrick Frisbie
David Golen
Michael Johnson
Jeff Manadeen
Brian Martin
Steven McDonald

The International Student Conference will be held on Thanksgiving weekend at Norman Park. The conference provides a place for international students to go and meet people from their home country. Cost will be a mere \$5.00. For more details contact Stephen Powell r. 133 Howell dorm.

The annual BSU Football tournament will be held Nov. 2nd at Mercer Macon. A fellowship will be held Friday evening Nov. 1. Sleep space will be available somewhere for Friday evening. For more details contact Jim Rice.

We will be working on a Habitat for Humanity projects on Nov. 9. The group will leave from STI that morning at around 8:00 am. For more

details see Bill Posey.

Four students from STI BSU participated in the Metro Atlanta Hunger Walk on Saturday Oct. 19. They are Jack R. Linscott, Bill Posey, Tim Johnson, and Daryl Abney.

Recently eleven students labored at Six Flags as volunteers to raise money for Summer Missions. They were Craig Day, John Cook, Wayne Cromer, Brian Farmer, Scott Morrow, Jeff Brooks, Ron Kilgore, Billy Posey, Tim Johnson, Sandy Ford, and John Pierce.

That completes this episode. Don't forget, Monday 7:30 at Noonday Baptist association, and Thursday 12:00 in the Ballroom, Goodbye and God Bless.

Rush was dry for the first time at Southern Tech, but that didn't keep anyone from having a great time. We had six great parties and everyone worked real hard to get in a good group of new guys. Our thanks to Rush Chairman Chris Lindsey for a fine job he did with rush.

Our chapter has been working real hard to raise money for a house that will one day occupy space on the campus "Fraternity Row." Various work projects and doughnut sales have kept us busy this quarter as we are continually adding money to our New House Account.

Congratulations to Tim Murphy and Bobby Cauthen who graduated this summer and also Kristy Morgan who graduated spring quarter with honors.

We're all looking forward to our annual Halloween Party. If the costumes are anything like they were last year, we're sure to have an outrageous party. The TKE sponsored blood drive will be held here at the school on November 11 and we would greatly appreciate the continual support of the students and faculty.

We've started off another great year and will continue being the number one fraternity on campus.

Ken Boggs
Historian

AUNTIE LOG

Dear Auntie Log,

Recently a reader wrote to you about taking the Tekes' chalk away. Well, I am a "long time student (4 years) at Southern Tech" and there has only been one time anyone has seen TKE slogans written anywhere on campus. That was the first week of Fall quarter '85 hardly something to get "tired" about. Furthermore, no one was forced to stop and

read such slogans as "Teke's Raise Hell" and "Party Naked". The slogans were intended for the new students at Southern Tech who did care which fraternity was the largest and who had the best of times. Anyone not interested is strongly urged to keep their heads up and eyes forward in the future. Unfortunately, some chalk was spread on brick walls and this was voluntarily removed by a

Teke with a scrub brush, which the so called "tired of" student might mistake for a "toothbrush".

I have been a member of Tau Kappa Epsilon for 3 years and I am not a hairy, overweight, alcoholic redneck who looks like I smell bad. On the contrary, I am a clean cut, thirty-two inch waist, great smelling member of the student body who does care that TKE has the largest fraternity on campus and in the world. I would also like to point out that TKE supports all other organizations (SGA, CAB, Student Activities, et.) on campus and that they have

a charity project every year to raise money for Cystic Fibrosis. This fund raiser also helps gain support for our Basketball team. This is the largest and most publicized charity project on our campus.

In addition, with all due respect, we do not need "Auntie Log", "Tired", or anyone else for that matter to account for our actions. We are proud of our actions. We are proud to Tekes, especially Tekes at Southern Tech, and can account for our own actions.

Signed,
ZEKE THE TEKE

News Of Interest To STI Students :

Unruly consumers of alcohol have been spoiling the game for football fans at U. of Georgia home games, so UGA has decided it will eject from the stadium anyone with alcohol. The cost of the admission will not be refunded. In the past, the policy was to throw out the beverage, not the drinker.

Students to end the national deficit was founded when an Illinois congressman asked his summer interns to help him fight the deficit, and spread to campuses when the interns returned to school this fall. The group's battle cry is that today's college students are "victims of fiscal child abuse."

Fundamentalists anonymous has formed a student chapter at Yale U. The group helps people who are troubled by bad experiences with fundamentalist Christian churches. Formed five months ago, FA has grown quickly to 27 chapters and more than 4,000 members.

A new abuse of drugs by teens and young adults involves intravenous injections of the drugs in nasal inhalants as a substitute for amphetamines, according to medical authorities. Accurate figures on the numbers of abusers are not available, but authorities warn the abuse is spreading. ***

A new dating service, catering to Midwestern colleges, says it expected mostly freshmen, but the bulk of their business has been from seniors and graduate students. The service will give students names of potential dates chosen according to the students' answers on a 34-question survey. The questions range from smoking, to abortion, to the meaning of love and life.

A good man is harder to find than a good woman, according to an Arizona State U. study. The study found that 22.5 percent of college men lack the traits most women want in a husband, and 17.5 percent of college women lack the traits men want in a wife. Both sexes, however, rated the qualities of communication, trust sensitivity, affability, warmth and self-assurance highly

The campus anti-apartheid movement is heating up again. Stanford Out of South Africa members, who were blocked from sitting in the Stanford U. president's office earlier this summer, met recently with the president to discuss Stanford's divestment policy. A Pennsylvania State U. Board of Trustees member was arrested while protesting at the South African Embassy in Washington D.C. The U. of Arizona's Students Against Apartheid joined a protest outside the Federal Building in Tucson. U. of Texas students and Austin residents marched outside a recent Board of Regents meeting. Protesters from the U. of Minnesota say the UM Board of Regents violated the state's open meetings law by barring them from a recent meeting and using campus police to keep them out.

Get to the answers faster. With the TI-55-II.

What you need to tackle the higher mathematics of a science or engineering curriculum are more functions – more functions than a simple slide-rule calculator has.

Enter the TI-55-II, with 112 powerful functions. You can work faster and more accurately with the TI-55-II, because it's preprogrammed

to perform complex calculations – like definite integrals, linear regression and hyperbolics – at the touch of a button. And it can also be programmed to do repetitive problems without re-entering the entire formula.

Included is the *Calculator Decision-Making Sourcebook*. It makes the process of using

the TI-55-II even simpler, and shows you how to use all the power of the calculator.

Get to the answers faster. Let a TI-55-II show you how.

News Of Interest To STI Students :

Discipline in the classroom is regarded as the biggest problem facing American schools by the general public, according to a Gallup Poll. That view, however, is not shared by either teachers or students. Only 16 percent of the teachers, and 14 percent of the students, say that discipline is a serious problem.

Johnny can write, but still can't read, according to the director of Depauw U.'s Writing Center. Grammar, spelling and organization have reportedly improved, but students still can't identify themes or ideas in reading material.

Full-time enrollment will fall, and part-time enrollment will climb for the next five years, according to the National Center for Education Statistics.

A student fashion poll by Levi Strauss found the preppy look--oversized shirts worn outside blue jeans, nerdy sunglasses and lace accessories--the overall favorite. Punk, however, reigns in the East, while the Midwest likes Magnum PI Hawaiian shirts and baseball caps or Miami Vice T-shirts and blazers.

Students opposed to pornography have won a partial victory at Stanford U. where a flyer explaining STOP'S position on pornography and asking the reader to consider the implications of the "demeaning portrayal of women as willing sexual objects" will be placed near the Student Union cash. Playboy magazine, including its October "Girls of PAC-10" issue, is kept behind the register counter. STOP had asked that both the flyers and magazines be enclosed in manila envelopes.

Sexual harassment is commonplace in higher education, according to a study by the Indiana U.' Office of Women's Affairs. the study found that, every year, about 25 percent of the women enrolled in colleges are sexually harassed.

The suicide rate for the 19-24 age group more than doubled between 1960 and 1980, according to the American Association of Suicidology in Denver.

A survey on rape at the U. of Northern Iowa found that 36 percent of women students say they've been forced to have sexual intercourse, and 20 percent say they were victimized at least six times.

All-nighters are bad for cramming, according to a Cornell medical school professor. He says the best memorizing times are 11 a.m. to 12:30 p.m.

Know When To Say When

...A Campaign for Responsible Drinking

For most adults, having a drink is a way to relax and enjoy the company of family and friends. Only when alcoholic beverages are abused do they pose a danger, leading to drunk driving and other serious problems.

Anheuser-Busch and your local distributor are proud of the products we sell . . . the world's greatest family of quality beers. We want you to enjoy our fine products but to remember to drink sensibly and to know your personal limits.

That's why we're encouraging consumers to "Know When To Say When" in a campaign to promote greater awareness of the responsibilities associated with drinking. So, enjoy your favorite beverage . . . responsibly. Please. Know When To Say When.

Thursday, Nov. 7 from 12-8

Friday, Nov. 8 from 9-6

Don't be left out!

"Tastes just like the stuff I used to drink at fraternity parties."

WHAT ROAMS THE NIGHT

*Ghosts and Goblins and Ghouls delight,
Some of the things that roam in the night,
A knock on the door and you wonder who's there,
Something that can give you an awful scare.*

*In the house at every corner and turn,
the lights are out and only candles burn,
Squeaking sounds come from the boards in the hall,
Noises that make you feel tiny and small.*

*You quiver and shake at the smallest of sounds,
You search the house but there's nothing to be found,
You return to your chair and shake with fright,
Because of the things...that roam...in the night.*

*Another knock on the door causes you to jump,
In your chest you feel a hard thump,
You open the door but there is no one there,
No one in sight...not anywhere.*

*The lights return as you shut the door,
You sigh in relief as you cross the floor,
Back to your chair and there you find,
One red rose and a note of some kind.*

*The note is written in the color red,
I love you forever is what it said,
Then something brushes across your lips,
Something that causes your heart to skip.*

*A cool breeze seems to fill the air,
As the candles burns next to your chair,
The flame dances and flickers and then it goes out,
While you stand there...frozen...holding a rose.*

House of Horror staff poses for camera.

HOUSE

From cover story, pg. 1.

members of the Cobb County Police Department in assisting in locating a suitable location.

The House of Horror consists of more than ten separate rooms including an execution chamber, a forest with Jason of Friday the 13th fame, and a maze. The complete tour lasts about ten minutes. The house requires a total of about 35-50 people to operate. Which means that a good percentage of the fraternity must attend each night.

The House of Horror has been open since the 19th and will remain open until the 31st.

The hours are from 7:30 pm 'till 11:00pm during the week nights and from 7:30pm until 12:00pm on Friday and Saturday night.

Probing the Very Frontiers of High Technology. That's Intelligence.

Electrical Engineering, Computer Science and Mathematics Majors.

The National Security Agency is responsible for analyzing foreign communications, safeguarding our government's vital communications and securing the government's computer systems.

This three-fold mission requires unheard of solutions to uniquely challenging problems. This is why NSA is—in many areas—working well into the 21st century. Now, you can work with us.

Here are just a few of the possibilities:

Electrical Engineering. Research and development projects range from individual equipments to complex interactive systems involving micro-processors, mini-computers and computer graphics. Facilities for engineering analysis and design automation are among the most advanced anywhere.

Computer Science. Interdisciplinary careers include systems analysis and design, scientific applications programming, data base management systems, operating systems, graphics, computer security and networking—all in one of the world's largest computer installations.

Mathematics. Projects involve giving vitally important practical applications to mathematical concepts. Specific assignments could include solving communications-related problems, performing long-range mathematical research or evaluating new techniques for computer security.

On top of providing you with unheard of challenges, NSA offers a highly competitive salary and benefits package. Plus, you'll have the chance to live in one of the most exciting areas of the country—between Washington, D.C., and Baltimore, Md.

You'd be smart to learn more about all the options you have with NSA. Schedule an interview through your college placement office or write to the National Security Agency.

NSA will be on campus November 26, 1985. For an appointment, contact your placement office.
