

Glee Club, Choir To Present Xmas Concert on December 9

Group of 35 to Appear in Four-Part, Varied Program of World's Loved Music

The Southern Tech Glee Club and the STI Choir, under the direction of Jack Elkins, will appear in a joint Christmas concert in the school gymnasium on Tuesday evening, December 9, at 8 o'clock. No charges are being made for this performance, and the public is cordially invited to attend.

The evening's program will be presented in four parts: (1) Songs by the Glee Club; (2) "Four by Eight," a group of four songs by eight of the most talented of the

Club's singers; (3) Songs by the Choir; and (4) Caroling by the Audience, in which all present will join in singing carols in keeping with the Christmas season.

In general, the selections by the Glee Club will be semi-classical and popular, while that of the Choir will be music in the spirit of the season. Some of the numbers will be "Only Make Believe," "O' Man River," "The Emperor Waltz," "Ave Maria," and "Let Every Tongue Adore Thee." A program lasting approximately two hours will be offered.

35 To Appear

Presenting solo numbers will be Jack Elkins, Ken Malone, Raymond Eckman, Max Johnston, and Norman Talley. About 35 students will participate in the evening's performance, which will be staged in the school gym with special effects.

Accompanyist for the group is Robert F. Pecht. Frank Mims is

14 Telephone Men Complete Course

According to Mr. W. R. Halstead, Head of the Electrical and the Electronics and Radio departments, the second class of men who studied at STI under the sponsorship of the Southern Bell Telephone Company's training program have finished their courses and are now back to their jobs and families.

The purpose of the training of the men here was to enable them to qualify for the FCC second-class radio-telephone license.

The first such class, composed of 17 men from 8 different South-

The Thanksgiving Season — A Blessing-Counting Time

Among the many wonderful events which November brings to the American people, the Thanksgiving Season stands out as one of the most glorious and enjoyable.

Earlier in our history it was, more so than now, that period which marked the harvest's end, when people gathered the fruits of their labor, feasted temperately on a portion, stored the remainder for the winter ahead, counted their blessings, and went into their churches to thank God for them.

Somehow, as our mode of life has become more and more complex but vastly more enriched, especially with man-made conveniences and achievements of science, men have been prone to forget the source of their necessities, luxuries, comforts, and joys. They take for granted all the wonders which have been showered upon them. They seldom look upon them as blessings to be counted and paid for through thanksgiving.

Our plea on this eve of another Thanksgiving Day is that you pause often to consider how well off you are, how many of God's works you are enjoying, how enriched and comfortable life has become. Make your Thanksgiving a blessing — counting time — a time of sincere thanksgiving.

Students, Staff Give Thanks for Holidays From November 26-30

Joyous Thanksgiving approaches again!

And according to the Southern Technical Institute calendar, staff and students will be allowed November 27, 28, 29, and 30 off to enjoy the many activities and pleasures appropriate to the season and occasion—fishing, hunting, eating, reading, sleeping, visiting with friends, just plain loafin', or whatever other activity or lack of it one desires.

School will close after the last scheduled class on Wednesday, November 26, and fire up again Monday morning, December 1, at 8.

The Technician staff wishes everyone a wonderful, sane, thankful time!

Annual Editors Make Progress

"Goodness! Do I look like that?" "I'd just had my hair washed. Doesn't it look messy?" (Hoping somebody would say no.)

"Can't you touch mine up a little?"

"Aw, Jack, it looks just like you."

"Gosh, Mr. Carroll, you sure do look sharp!"

These comments and dozens more like them were heard practically all day Friday, November 14, in the Conference Room, for it was the day proofs for Log pictures were being viewed and selected by students, faculty, and staff. The photographer had been a busy man several days beforehand making individual and group pictures.

Editors Make Progress

Editor Pugh reports other steps achieved in the progress of the 1953 STI annual. He says that the first 16 pages of the book have been laid out and most of the work completed in readiness for the first deadline on December 16.

The color of the book has also been selected, according to Editor Pugh. It will be silver and black.

Editor Pugh is very much pleased with the progress made in ob-

(Continued on Page 2)

Thanksgiving Dance Certain To Be Outstanding Affair

Event Sponsored by Mech, Gas Fuel Clubs Set for Friday, November 21

By Joe Boggs

The first event on the social calendar for the Southern Tech student body is the Thanksgiving Dance. This dance, an annual affair sponsored in the past by the Mechanical Club, is this year being co-sponsored by the Mechanical Club and the Gas Fuel Club.

Let's Have Another Good One!

Plans for the big occasion have been formulated by the committees representing each club. It will be held on the weekend before Thanksgiving Holidays, Friday, the 21st of November, in the Southern Tech Gym located on Hood Avenue, in Chamblee, adjacent to Lawson General Hospital. It will begin at 8:30 P.M. and last until 12:00 P.M.

Music will be furnished by Herb Taylor's orchestra. This group of musicians has played at several other dances here and has proved to be very good.

Admission will be \$1.50, stag or

drag. Dress for the dance is semi-formal.

All forthcoming pointers indicate that the dance will be a big success, but of course what really makes a dance a success is the attendance. With the increased enrollment the dance committeemen anticipate a much larger attendance at this one. Both the Mechanical and the Gas Fuel Clubs join in urging everyone to plan to attend.

Tickets are on sale by several men out of each department. Let's all get that Bonnie Lass and come out and make this a memorable occasion.

Contributions to Fund Lag; Thomas S. Craig Gives \$50

To Thomas S. Craig, Industrial Technology graduate of June, 1950, goes the honor of making the largest donation to the Southern Tech Alumni Scholarship Fund.

Tom's check for \$50.00 was recently received by Mr. R. L. Wilkinson, co-ordinator between STI and alumni, who expressed delight at the amount and sincere appreciation for the donation and the fine, unselfish spirit shown by Tom in making this contribution.

This gift places Tom in a club to himself.

Finn Club Grows

One more name has been added to the roster of the Finn Club. John Arnsdorff's check for \$5.00 qualifies him for this group of donors. To him STI and the Association owe their thanks.

To date only 16 faithfuls have contributed to the Scholarship Fund, and the amount raised is only \$134.00, which is far short of the \$1,000 the Scholarship Committee had set as its goal to be reached by January 1, 1953.

All alumni are urged to send their contribution as soon as possible to the Alumni Secretary, Southern Technical Institute, Chamblee, Ga. Checks should be made payable to Southern Tech Alumni Fund.

Mr. Wilkinson states that any amount will be most welcome. He also points out that if every graduate gave only \$2.00, the \$1,000 and year's education for a deserv-

ing boy or girl would be assured. Let the checks pour in, he urges.

The \$50.00 Club — Thomas S. Craig.

The Sawbuck Club—W. E. Carr, Palmer Ferguson, J. B. Stanley, and Jack Tyler.

The Finn Club—John Arnsdorff, J. E. Barnard, Jack Byrd, Hugh M. Edwards, George D. Miller, R. D. Spaulding, and Joseph C. Wigley.

Other Donors—Harold Anderson, H. W. Hair, Jr., Thomas Ezell, and George Robarts.

Student Council Elects Milton Smith President; Odom, Veep; Wood, Secretary

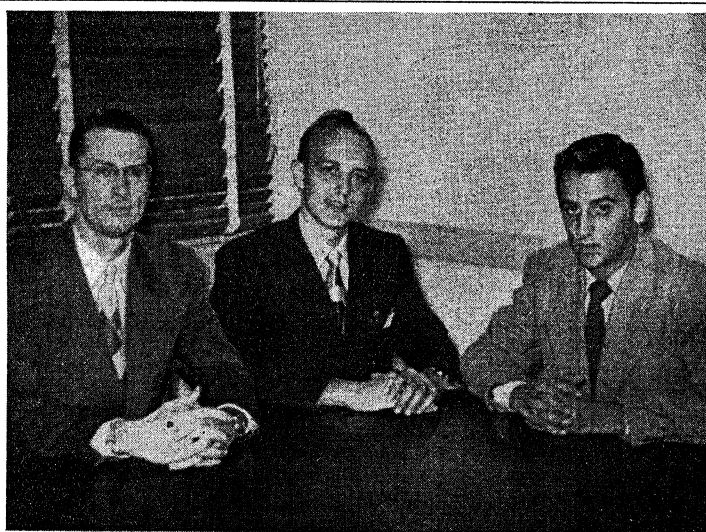

Milton Smith, senior student from Thomaston, Ga., and a member of the Electronic and Radio Department, was recently elected to serve as president of the Student Council for the Fall Quarter.

W. E. Odom, who is also a senior student from Thomaston, Ga., and a member of the Electrical Department, was elected to assist Mr. Smith as vice-president. Clifton G. Wood, senior student from Prince Frederick, Maryland, and a member of the Gas Fuel Department, was elected secretary-treasurer.

The new members who were elected by their departments to serve as representatives are Fred C. Vickers, Building Construction; James S. Thompson, Civil; Russell Turner, Civil; Jesse C. Taylor, Electrical; Carl Bovay, Gas Fuel; Joseph Pinkerton, Electronic and Radio; Bob Stanley, Heating & Air

Conditioning; Loren Rose, Heating & Air Conditioning; M. P. Lane, Mechanical; and Carol Henry, Industrial.

The purpose of the Student Council is to enact and enforce rules and regulations and represent the interest of the students.

Council Leaders for Fall Quarter

Quality Assembly Programs Assured

Plans of the STI administration are to provide two top quality assembly programs each quarter for the entertainment and information of the students and staff.

The first of these programs was the showing of the Moody Science Film, "Dust or Destiny," to a large group of instructors and students in the Navy auditorium at the Club Hour on Thursday, October 30.

The next general assembly will be held on Thursday, December 11, at which time an outstanding speaker will talk to the assembly or another film will be shown.

Students and faculty members are urged to attend these meetings, at which they are sure to get something of benefit.

The Technician

Published monthly by the students of The Southern Technical Institute, Chamblee, Georgia.

(The Southern Technical Institute is the Georgia Institute of Technology's two-year, coeducational, boarding unit located at Chamblee, Georgia. STI was established in March, 1948, to train technicians for industry in these eight fields: Building Construction, Civil, Gas Fuel, Electrical, Electronics and Radio, Heating and Air Conditioning, Industrial, and Mechanical.)

The Technician welcomes criticism, suggestions, and contributions, but insists that these communications be signed and limited to 300 words.

Mr. R. L. Wilkinson Placement Director Southern Technical Institute Chamblee, Georgia	
Dear Mr. Wilkinson:	
I have your recent letter wherein you announce the graduation of 10 associates in Electronics and Radio Technology on 19 December 1952.	
At the present, I have vacancies for three junior engineers and would be extremely desirous of reviewing the qualifications of your prospective graduates. In this connection, I am interested in bachelors who would like to do rather extensive traveling during the first year of their employment with this concern.	
As you probably know, we employ Messrs. Wilensky, Duke, and Gutzke, all of whom graduated from Southern Technical Institute. I am well pleased with their performance to date and would like to hire three additional men of their caliber.	
Yours truly, HOPKINS ENGINEERING COMPANY, INC.	
<i>Nelson M. Cooke</i> Nelson M. Cooke Vice-President and General Manager	
NMC:bs	

This letter carries a powerful, convincing message, according to STI Placement Director R. L. Wilkinson—a message based upon several irrefutable facts:

1. Southern Tech is doing a thorough, efficient job of preparing men for industry.
2. The excellent performance of STI graduates in industry leads personnel men back to Southern Tech for more engineering technicians.
3. Students with the best school records are usually the ones chosen for the best jobs.
4. Outstanding school performance predicts outstanding work performance. For outstanding work performance industrialists pay well.

The Technician takes pleasure in presenting this letter so that all may see, be convinced, and challenged to do better work.

A Well-Rounded Education

AN EDITORIAL BY BOBBY ANDERSON

The primary purpose of every student is to obtain a well-rounded education which will enable him to glide through life with the least possible friction. It is only natural for the student to feel that he should take advantage of the present opportunity and, therefore, utilize his time and efforts in acquiring his education.

Let us not misconstrue, however, the meaning of a well-rounded education. Certainly, the individual who can quote many passages from Shakespeare or work the most difficult chemistry problem is intelligent, but does the fact that he can do these things mean that he is happy, or that he can get along with his fellow man, or that he is successful in life? The person who has the well-rounded education can realize that the way of life is not something that we obtain by reading a book, but rather a knack that we acquire through friendly association and cooperation with our fellow man.

In studying, we discover that diligence and perseverance are wonderful attributes which should, indeed, be cultivated; however, one should not be so studious that he

fails to see the many other important activities going on around him. Certain school activities tend to mold more desirable personalities, since they broaden our insight in regards to human nature and similar fields. If we fail to participate in any of the extracurricular activities, then we will probably miss a vital part of our education.

After all, this is our school and the activities it provides are for our benefit; so it is we who should strive to make all our activities successful ones. In doing this, we not only aid the school, but also take a step further in obtaining that ultimate goal:

A well-rounded education.

Wolfe Magazine of Letters

HEMINGWAY REVIEWED

"The Old Man and the Sea" Rated One of Author's Best

The Old Man and the Sea, Ernest Hemingway's most recent book of fiction—a novelette, perhaps it should be called—is, according to many critics, the best work this outstanding American author has produced. To place it above A Farewell to Arms, The Sun Also Rises, or For Whom the Bell Tolls is to praise it highly indeed. It is at the top of most best-seller lists and is apparently being enjoyed by many people.

Not Like Hemingway

This 140-page story is not in the earlier Hemingway tradition. It is much shorter than his other outstanding works; it is told in a simple, flowing, graceful, beautiful style; seemingly he has no axe to grind, nor does he attempt to correct any world evils; he is less bitter, even to the extent of infusing into the work a deep feeling of tenderness and sympathy; finally, he gives us a realistic, authoritative story of the sea.

Santiago, the old man, is a Cuban fisherman who recently has had very little success in his daily trip to sea. So bad has been his luck that Manolin, a young boy whom he has taught to fish and learned to love, has been forced by his parents to desert him.

The Old Man determines to go even further out to sea to try his luck the next day. On the following morning with the bait Manolin helps him obtain, the Old Man carries his boat far beyond the

limits he has ever been. After landing several small fish, a gigantic marlin, larger than the boat itself, strikes his choice bait. The struggle that the Old Man is forced to wage in securing the fish, killing it, lashing it to his boat, and getting it to shore constitutes the major action and content of the story. Be prepared, though, for the most unusual ending to a fish story that you have ever read.

Man's Eternal Fight

The Old Man and the Sea, to this writer, is, however, more than just the story of an old man waging a fight to the finish with a huge fish. It could be interpreted as man's conflict with himself—a man's test of his physical stamina and inner fortitude. Symbolically, it is a retelling of the courageous struggle that daring, stout-hearted men have always waged against a worthy opponent—whether it be a fellow-man, the sea, a fish, a mountain, or for an idea or cause.

This reviewer believes you will like The Old Man and the Sea, because of the author's knowledge of fishing, the exciting story itself, the simple beauty of its style, the sturdy character of the old man, and the reassurance that in the hearts of men regardless of their age, there still remain the courage and determination to see a good fight to the finish, the thrill of waging it, and the satisfaction of having been true to one's self in attaining victory.

Covering the Campus

with John Parente

A campus puzzle is . . . Who were the two pretty young ladies that couldn't attract any attention outside the STI dorms one night last month?

* * *

Chamblee residents were startled recently by a cross-breed Stanley Steamer-Chrysler. Don't worry folks, 'twas only George Traber and Bob Pease, on their way to Asheville.

Joel Abrams is hereby known as "the haircut." We personally thought that all the Indians in the U. S. lived on reservations.

* * *

A freshman was heard to comment that the vanishing species of Southern Tech are the new fancy colored glasses in the cafeteria.

* * *

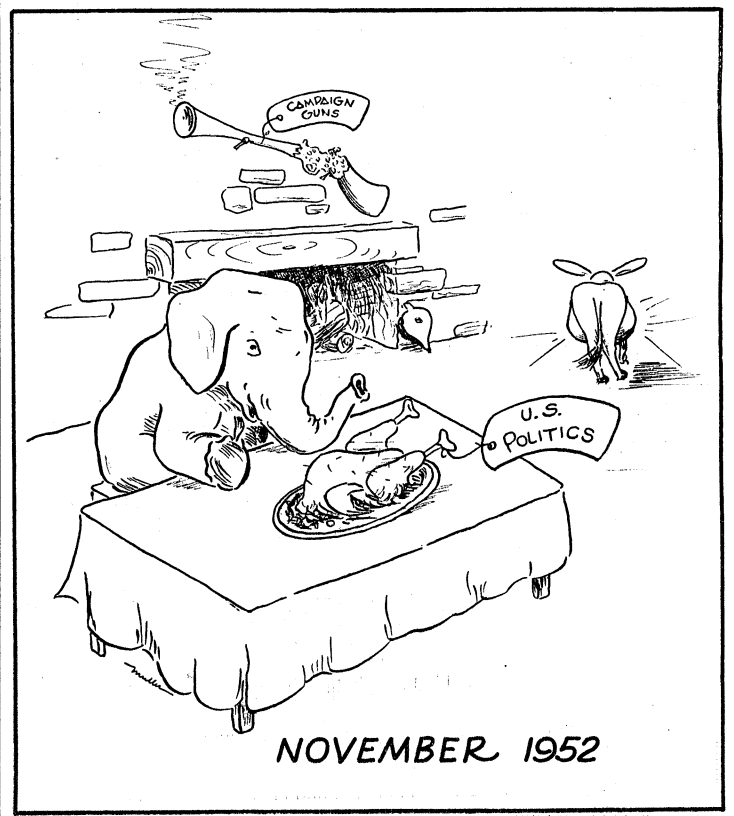

The annual Thanksgiving dance has grown to be one of the biggest social events of the year. Congratulations to the Mech Club and to the Gas Fuel Club, who are co-sponsoring the dance this year.

* * *

Congratulations to Ray Moore on his recent marriage. Ray tried to keep it a secret, but now the word is out.

* * *

Norman Talley has a treat in store for us at the Glee Club Concert. He will offer his rendition of "It's in the Book."

CLUB NEWS ROUNDUP

Honor Society Admits Five; Others Look to Big Dance

By JOHN PARENTE

On Monday evening, November 11, five new members were initiated into the Tau Alpha Pi, Southern Tech's Honor Society. They are W. E. Odom, Electrical; James Thompson, Civil; Jack Kelly, E&R; Jess Ward, Gas Fuel; and J. R. Fields, E&R.

The officers for the Fall Quarter are Ronald Davis, president; William McEver, vice-president; Donald Gober, secretary-treasurer; and Clifton G. Wood, public relations officer.

To be eligible for membership in the Honor Society, a student must maintain a 3.0 (B) average for thirty consecutive hours of school work.

H & A CONDITIONING

The Heating and Air Conditioning Club recently elected the following slate of officers: Ken Malone, president; Charles Wright, vice president; and Stanley Lowery, secretary-treasurer.

Ken Malone states that members of the Club have also decided to build chairs for their club room.

GAS FUEL

The Gas Fuel Club, in a recent meeting, appointed Clint Wood, Charles Studdiford, and James Mahoney as a committee to work on

Glee Club, Choir Present Concert

(Continued from Page 1)

Club secretary, and C. E. Saunders is assistant to Director Elkins. In charge of publicity are Milton Smith and William Bradford. Ken Malone, Club president, is stage manager for the production.

STI students, staff members and friends are urged to attend what Faculty Adviser J. J. Defore feels will be a most enjoyable occasion.

The Glee Club has been rehearsing bi-weekly for the concert and will celebrate the conclusion of their preparations with a dress rehearsal party on the evening of December 8.

Morningside Teachers Thank STI for Memorable B-E Day

After Southern Tech had participated in the recently observed Business-Education Day by playing host to 10 teachers from three Atlanta and Fulton County schools, Director L. V. Johnson received the following letter of appreciation from teachers of the Morningside School. Dear Mr. Johnson:

We want to thank you for a most happy day spent at your school. All of you were so genuinely cordial and so delightfully hospitable that we enjoyed it from the first introduction through the delicious lunch and on until we had seen all the buildings with their complicated and interesting machines.

At the beginning, Mr. Bryant remarked that he hoped we would not be disappointed in our being sent to a school instead of a business, and indeed we were not. In fact, we felt that you had quite a business right there in your school, and you seemed not only to understand many phases of the business world, but were helping to develop them. We found your school unique and the atmosphere so very democratic that we think advertising it to our friends and school a pleasure.

Please convey our thanks to your kind secretary and to Mr. Bryant, who helped to make the day a most unforgettable one.

Yours truly,
Margaret Carmichael
Ruth Flurry
Sue Davis
Rebecca Ramey

Mr. Johnson appreciated so much the warm, friendly, grateful, sincere spirit of the letter that he asked that it be published in The Technician so that staff and students could learn of others' opinions of Southern Tech formed on that day.

Other guests were Messrs. E. E. Baker, M. T. Crissman, and R. E. Smith, from Hapeville High School; and Mrs. Jan Cato, Miss Suzanne Neal, and Miss Frances Arrington, from Spring Street School.

the problem of redecorating their club room.

CAMERA CLUB

Willard Prince was recently chosen president of the Camera Club. Helping him and serving with him are Norman Talley, vice-president; Gary Wood, secretary-treasurer; and Frank Mims, public relations.

For the first time, the Camera Club decided to elect a sponsor.

Harry Ward, Ken Malone, H. V. Carr, and Bill Rhyne were recently voted into the club.

President Prince reports that the photo lab is being used more than it ever was in the past.

MECH CLUB

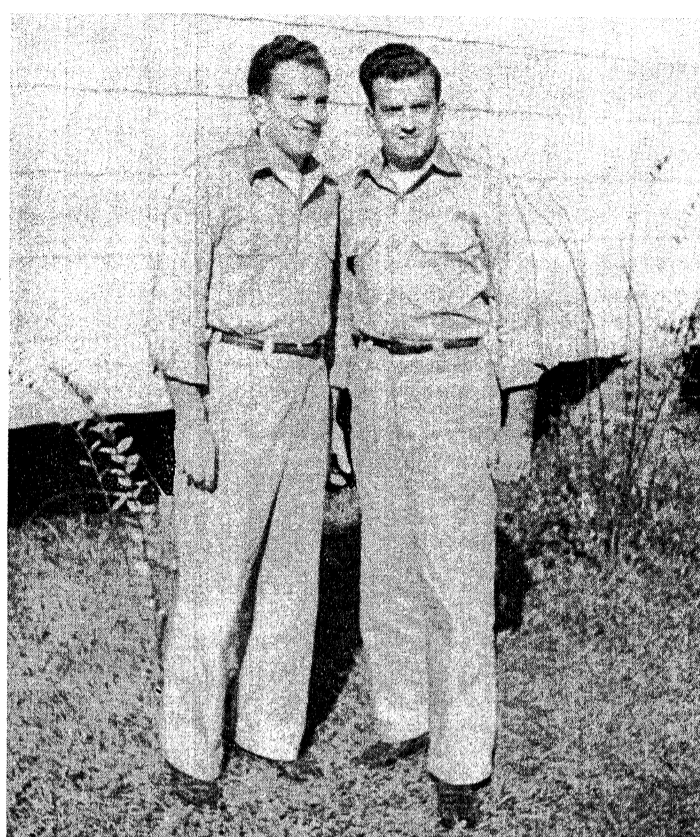

Members of the Mech Club are really putting on the pressure to make sure that the Thanksgiving dance, which they are co-sponsoring, will be the best ever held at STI.

Those who have attended this delightful affair in the past remember what an enjoyable occasion it has always been. Mech and Gas Fuel Club members feel that they must live up to expectations or even surpass what they have achieved in the past.

E & R AND ET

The Electronic and Radio and the Electrical departments merged to sponsor a hamburger fry and dance at North Fulton Park Thursday, November 13. According to Mr. Halstead, advisor for the Electrical department and Mr. Goodwin, advisor for the Electronic department, both previous members of each department and new members turned out about 60 strong for the occasion.

Mr. Halstead, head of both Electronic and Radio and the Electrical departments, encourages all freshmen to join their respective departmental groups and become active participants in club affairs.

**Herschel or Herbert? We Don't Know
Feel Dizzy? Vision Fuzzy?
Could Be the Bailey Twins**

BY HARRY WARD

It isn't because you missed that extra hour of sleep this morning or because your vision is fuzzy—they are twins, identical twins at that.

This is the Bailey twins, Herbert and Herschel, the first set of twins ever to be enrolled at Southern Tech. Making their home in Rome, Georgia, where they were born and grew up, they have matriculated here for their first quarter in Electrical Technology.

Herbert Here Earlier

Herbert got the jump on his brother Herschel back in 1930 on the 23rd of February by beating him by fifteen minutes into this world. From this moment on they grew up as one, sticking together through thick and thin, even through Armuchee High School, outside of Rome, where they graduated in 1948. They admit that they frequently had the teachers bewildered but won't admit any mistaken identities when it came to issuing marks for classroom achievements. Twins all the way, it is understandable that they should choose the same electives while at Armuchee.

In August of '48 they decided to do their stretch in the Armed Services and entered the Navy. During the four years in the Navy until their discharge in July of this year they were separated but a short two months, which came at the very end of their service. Here Herb again got the slight edge, as he held down the rating of Electrician Mate 2nd Class while his brother was a shade behind with a 3rd Class rating. Their interest in electricity stems back to pre-Navy days, an interest which brought them to Southern Tech for a degree in their chosen field.

Close Friends Knew Them

In regard to the question frequently asked concerning the possibility of recognizing them apart, they remarked that close friends have been the only successful ones; but the fact that many can't make the distinction has led to some humorous situations.

Herschel—at least, he said he

was Herschel—tells about the time in the Navy when he and his brother were stationed on the West coast. Herbert had arranged a swimming date earlier with this girl who happened to run into Herschel downtown the day of the date. Believing he was just early and was Herbert, she mentioned she was ready to go; so she and Herschel spent an enjoyable afternoon at the beach. And to this day she believes she spent the time with Herbert.

On the subject of the future, they term it indefinite, but hope to get into electrical work upon graduation.

PS. At the time of going to press wedding bells did not loom as a threat to breaking the bond of these inseparables.

Psychologists say a hysterical girl is most efficiently quieted by a firm kiss.

"And do they say how to get them hysterical?"

Gas Line

**Mary King Quits
Mrs. Wilson Added
All Married Now**

Mrs. Mary King, steno-typist who joined STI in January of 1951 as Miss Mary Rainey, has given up her job as secretarial assistant in the Central Office to prepare for motherhood.

It is the sincere opinion of all who worked with her that Mary will be greatly missed. They feel that Mary's gentle, quiet, cheerful, cooperative spirit was nice to have around. Best wishes of her co-workers go with her.

Mrs. Mildred T. Wilson, of Chamblee, joined the STI staff on October 27 to carry on Mary's duties. Already, she has proved that she has the sociability, industry, and efficiency to make STI a prized staff member. A warm welcome to her!

Assistants Are Married

Three newcomers are now handling the work formerly done by Mary Price, Mary King, and Louise Skaines. Mrs. L. T. Hair is receptionist and placement secretary; Mrs. Joyce K. Smith is financial secretary; and Mrs. Wilson is assistant in the Central Office.

Notice that all three are "Mrs." Can STI be plotting against single girls, who have in the past had a tendency to marry a technician and fly away?

"A Good Place To Trade"

Cagers Open 21-Game Season Against Columbia December 5

Prospects for Winning Team Are Good; Ronald Miller, Forward, Named Captain

By Don Voyles

The Southern Tech varsity cagers led by Captain Ronald Miller and Co-captain Ralph Martin, will open their 1952-53 season on their home court with a game against Columbia Theological Seminary on Friday night, December 5.

Coach "Arnie" Arntson has lined up a schedule of 21 contests for his varsity squad against the keenest competition the smaller colleges and the junior colleges of the state can furnish. The "B" team will also see plenty of action, for they have seven games scheduled on nights when the varsity is entertaining varsity opponents.

Miller Elected Captain

The varsity squad recently chose as their leaders for the coming season Ronald Miller as captain and Ralph Martin as co-captain. Both men were members of the championship squad of last year and are being depended upon for much brilliant basketball this season.

The team has tapered off two months of hard practice with scrimmages with Chamblee High School, Roswell High, and our nextdoor neighbors, the Navy.

At this stage of the game Coach "Arnie" won't say who will be the starting five, but the following eight men should all play a lot of ball this season: Bobby Anderson, a fast and deceptive guard who played with Benedictine, Savannah; Ronald Miller, fleet forward who returned from last year's squad;

14 Telephone Men Complete Course

(Continued from Page 2)

Out of the second class, made up of 14 men, all received their third-class radio-telephone certificate, and 67 per cent qualified and received the second class FCC certificate. The total per cent receiving a second-class license was 66.

Mr. Halstead reports the total outcome very satisfactory in view of the following facts: (1) nearly all of the men were well over the college age, each having worked approximately 10 years with the Telephone Company; and (2) very few of the men had had any mathematical or electrical background whatsoever.

It was also related that the department expects to conduct another training program for the Telephone Company in the spring or early summer of next year.

Bob Stanley and Paul Martin, who both played good ball at forward for Southern Tech; Willie Sutton, tricky guard who played with the team that won a Navy Championship; and Will Madison, a good ball handler from Savannah, at guard. At center there will be Jim Ambrose, from Chamblee, and John Griffin, a Grady High man. Both of these men are good ball players and can get up on the boards.

Saffair Improves

Alan Saffair has shown by far the most improvement of any man out for the squad. Alan, who can't miss his overhead, two-hand shot didn't get the chance to play basketball in high school but is learning fast and will probably see a lot of action next year. He will have the regulars hustling this year if he keeps on improving.

Joe Rettie, who played two years with Southern Tech and is now working at Lockheed, is helping Coach Arntson in his chores. Rettie is working with the "B" team.

The STI team is blessed with two "jam-up" managers: "Mowhawk" Abrams and Yank Parlett. Yank is out of school this quarter but will be back to resume his job as ball polisher in January.

* When there are two games to be played at home, the first game will start at 7:30 p.m. All single games start at 8 p.m.

It Won't Be Long Now!

THE SPORTS FRONT

with Charley Ray

It's almost time for the Southern Tech basketball season to get underway, and as always the question is, Who will take the place of last year's graduates?

Let's sort of compare man for man for a start. First, who is to replace "Bubba" Hodges, the quick and tricky playmaker? After watching Will Madison, a Savannah boy who plays the same brand of ball as Hodges, you will agree he will be an acceptable replacement. He is fast and alert and is a good team man. The other guard should be Bobby Anderson, another Savannah boy. Bobby, another playmaker, will succeed Bill Dyer, former STI rebounding ace. Bobby is a fine shot and should rack up many points for the home team.

The pivot spot vacated by high-scoring Charlie McDaniel will be held down by Jim Ambrose or Johnny Griffin. Although neither will have the speed of McDaniel, they will have the shooting and rebounding ability to offset this.

Captain Miller Steadying Factor

Ronald Miller, a returning regular, will hold down his old forward position. He is a reliable player as well as a good shot. Ronald, who was recently elected captain by his teammates, should be the steady factor when the going is rough. Paul Martin will be the replacement for Jim Maxey. Paul, who has greatly improved his defense to go along with his offensive powers, should be the best all-around player on the squad. He has a variety of shots to go along with his rebounding.

Dependable Bob Stanley will see a lot of action at any position and will make an all-round utility man. Bob is a steady competitor on both offense and defense. Another sub will be Willy Sutton. Willy is fast and capable of pouring the ball through the hoop.

It looks like another fine season in the making for the Technicians. The team looks good and should be ready from the word go. There is a lot of teamwork to go with the all-round ability of the individuals. Although the season opener is two weeks away, the squad is ready to go full force at the present date.

Former Editor Becomes Father

Aubrey Bone, Gas Fuel graduate of the spring of 1952 and former editor of *The Technician*, became the father of a six-pound seven-ounce girl on October 25, according to the announcement.

Not to mention Edith, his charming wife, earlier does not mean that she didn't play a major role in this matter of parenthood. Too many times, though, it's the father who suffers most and recovers last.

Aubrey and Edith named their daughter Jenny Lynn and make this contention.

She couldn't be cuter

Or dearer or sweeter!

If you don't believe it

Come over an' meet 'er!

Many STI students will remember Aubrey as the gay caballero who married his senorita secretly while she was visiting here in Chamblee on a weekend and was called to Columbus, home of the couple, on Monday to make a few explanations.

The Technician sends sincere congratulations to Aubrey and Edith, who are making their home in Birmingham, Ala., where Aubrey is employed by the Tennessee Iron and Coal Company.

INTRAMURALS

Two Undefeated Teams Clash In December 9 Game

Football has hit Southern Tech with a bang this year, and the intramural league has taken the spotlight for the present. This year there is a very high amount of interest, and the material is excellent. According to Director E. J. Muller, the material here is good enough to field an inter-collegiate team that would stand up with any other junior college in our section.

Four Teams Competing

This year there are four excellent teams: Civil and Industrial, Mech, Building Construction, and Electronic and Radio. Gas Fuel shows promise, and had the basketball players been allowed to play, they might easily be leading. But with such stars as Ronald Miller, Paul Martin, Bobby Anderson, and five-star Ambrose not allowed to play they are somewhat less potent.

There are two teams, the Builders and the Electrons left undefeated. They were scheduled to have already played, but because of rain the game was cancelled and will be made up December 9, and looms to be the game of the year.

The play has been rough and hard and has produced a regretful injury. Clifton Wood, of the Gas Fuel Department, broke his arm while playing against the Civil and Industrial team.

Intramural Basketball?

It has been brought up that many boys are making inquiries about an intramural basketball team. All clubs are asked to select a representative to confer with Mr. Muller and make plans for this league.

He: "Before we get married, I have a confession to make. I have a wooden leg."

She: "Oh, that's all right, I have a cedar chest."
