Seven SCT Students Arrested at 'The Stupid Party'

The Jail that made the Stupid Party Infamous - Photo by recently released Jack Silver

By Bill Finnick
a.k.a. Sinnick

The Stupid Party ended Saturday, October 5 with the arrest

of seven Southern Tech students. Allegations of excessive force and racial slurs have been leveled by the students against members of the Marietta Police

Force.

The party was advertised around campus and turned into a Braves victory celebration when they won the division later that evening.

According to Marc Riley, the "party has become an annual event and is expected this time of year."

The trouble started when the security guard hired by College Commons Apartments, acting on complaints from other residents, told the tenants they had to keep it down.

According to the Incident Report filed by Officer R. S. Smith he, "could hear a very loud stereo from down the street of the incident...and observed approximately 60-80 people outside on the walkway and stairwell. People were hanging out the windows, drinking al-

coholic beverages, and hollering using obscene language in a disorderly manner."

The officer further stated that due to the number of people on the stairwell he could not get to the apartment, which was on the third floor, so he called for backup.

The officers arrived then backed off when the crowd began to leave. Several of the party goers were underage but no charges were filed.

Several students took it upon themselves to ensure everyone had a designated driver and a way home.

After about 15 minutes the party was just about broken up when a guest started shouting for everyone to come back.

At this point some of the students started to yell at and curse the officers. Officer Smith

reported that he, "pulled his patrol car next to the stairs and requested the people to leave again."

Shortly thereafter several more police cars and a K-9 unit, an officer with his German shepherd dog, pulled up to the apartment.

Mark Riley said, "they brought a K-9 unit into the apartment...because they scared some of the people away. My guests left some of their personal items upstairs...when they came back to get them the police started arresting people."

The police version has students, "continuing to use loud and obscene language towards the officers...Major Morris arrived and was advised of the situation. The suspects were then arrested without further Party continued on 6

Asbestos Removal Temporarily Closes Student Center

By Tony P.
Staff Slave

The very first stage in the renovation of the Student Center began last week with the removal of asbestos from a portion of the building.

On Tuesday, October 8, the downstairs entrance was closed and sealed off so that asbestos could be removed from the old location of the Counseling Center. Work was also done to the Student Center Office storage room and a fire-escape stairway.

As a result of excessive odors from a strong chemical used in asbestos removal, the Student Center had to be closed down at 8 pm Fri-

day, October 11 and kept closed all through Saturday.

There were two building managers in the Student Center that night. Bill Finnick, who was on duty at the time, said, "after several complaints I went down stairs and decided the vapors were strong enough to justify closing the Center. Barry Birkhead fully backed me in this decision."

Vicki Langston, the Student Center Secretary, came in late Friday evening to arrange alternate meeting locations for organizations that had planned meetings in the student center for Saturday. AKA and AΦA held their scheduled meeting in the Burruss Exhibit Hall.

Ed Hardy, the other Building

Manager in the Center Friday night, said, "one of the people removing the asbestos told me that the fumes weren't dangerous, but they could irritate the nose, throat and eyes."

According to a worker removing the carcinogenic material, the asbestos that is currently in the building isn't dangerous as long as it remains undisturbed. Meanwhile the new Student Center continues towards completion.

The plans call for the building of the new addition first. The addition will extend westward and southward from the existing building and will house new offices, student lounges, an auditorium and cinemas.

The location of the old counseling center will become a snack bar for the new addition. The snack bar, separate from the cafeteria, will serve short-order meals and will operate from the site of the old Counseling Center.

Except for the old Counseling Center, the existing Student Center is expected to remain intact and in full operation. Once the new addition is completed, the Student Center operations will move to the new addition and the old building will be closed for remodeling. This stage will occur about one and a half years from now. During that time, asbestos will be removed from the rest of the Student Center.

The current game room will be

Is it a nuclear reactor or the new Southern Tech renovation? - Photo by Tony Perez

moved to the ballrooms and the entire downstairs will become the cafeteria. The radio station will be relocated to the new wing. *The Sting/Log* office will be enlarged. The north stairwell will be knocked down for remodeling. The Post Office will be relocated to the first floor of the new addition and the bookstore to the upstairs of the new addition.

The entire project is expected to be completed around the fall of 1993.

Six point five million dollars have been allotted for the project. Hopefully this will be enough to complete the project. The center will then be twice the size of the current building and should be able to accommodate the increase in students and provide office and meeting space for all of the organizations.

The workers ask that the students bear with them through the renovations.

EET Students Get Great Goodies from Hewlett Packard

No not another useless end of quarter evaluation that no one will take serious and students will want access to, Aaaugh.

Evaluations

By Jennifer Waller
Tiny & Toony

suggestion.

The evaluations exist because of the importance of student input in the education that they receive. The evaluations are the private property of the teachers. They are seen by no one other than the professor who was evaluated, except when promotion or tenure time rolls around. At this time, the teacher must provide his or her student evaluations to be reviewed by higher administration.

After the new evaluations are written and put to use, will the results be made accessible to their students? "No way!" said Professor Pevey, "Students have their own grapevine and that is more valuable than statistics on paper."

Since the official results will be hidden far away from the eyes of the curious students, word of mouth will have to be sufficient to warn students of the impending doom of the fang-and-talon-bearing demon that has assumed the form of an MET professor and awaits eagerly to destroy student souls in the upcoming quarter.

Not only are the old evaluations being done away with, but future ideas are in the works for the evaluations of department heads, deans, and higher administration.

Student input for the new evaluations is requested. Anyone with ideas for questions included on the new form should put their ideas in Professor Pevey's office box, in the classroom building, room D254.

The teacher evaluations that have been filled out at the end of every quarter are being done away with and changed for the better. According to Professor Jo Pevey, an English teacher here at Southern Tech, a major percentage of the professors were not satisfied with the questions that were asked on the old evaluation and requested a new, updated version of the questionnaire that would be more helpful in determining the areas where he or she needs improvement.

Professor Pevey said that many of the teachers used the standard evaluations along with their own personal evaluations to get a better idea of their students' opinions of their classes. For this reason, the old evaluations have been done away with and a revised assessment is being compiled.

The decision to change the old evaluation came about because of the general unrest from the professors. An evaluation that contains only broad questions that are to be answered by a scale of one through ten is not an effective tool for rating a professor. "An evaluation is more valuable to an instructor if it contains several specific things," said Professor Pevey. The evaluations need to contain specific questions that are answered with specific answers and they need to be open to creative

By Dara Badr
Proud to be foreign

Have you ever gone past the Southern Tech gym and wondered what's in that small building beside the satellite dish? Or are you a junior in the ECET and think the Wilder complex everyone talks about is another name for the zoo? Anyway, here is all the information you wanted about the Communications building of the EET department at Southern Tech and much much more.

The Wilder Complex was constructed with funds donated by Mrs. Jim Wilder. However, the state-of-art equipment in the building has been bought with two grants from the National Science Foundation. These were matching grants, that is, the funds received from the Foundation were matched by the School or the State. It must be noted that the vendors, like Hewlett Packard, did give the school discounts on the purchases. A third grant has been approved bringing the total in-

vestment in fiber optic equipment alone up to \$400,000.

At present, the fiber optic equipment in the laboratory enables users to analyze the electro-optic characteristics of transmitters and receivers. The new equipment, scheduled to arrive by Winter 1992, will increase the frequency capability to 3 GHz. In laymen's terms, Southern Bell could utilize such a capability to make 50,000 calls. The equipment also includes the state-of-art lasers and laser diodes. Another exciting feature is the ability to computer control all test equipment.

All ECET majors have had access to and continue to use all this equipment when they sign up for the required fiber optic classes. Now, all students, regardless of which major they belong to, can have the opportunity to get extensive exposure to this equipment. The new ECET 366 class is open to all students who have completed PHYS 202/222 and PHYS 201/221. Professor White, ECET professor extraordinaire, said

that "this program is unique in that no other undergraduate program allows students access to such state-of-art equipment."

Apart from the fiber optics laboratory, the complex also houses the conventional communications labs. These labs are equipped with a majority of Hewlett Packard systems. Equipment donations have come from Hewlett Packard directly and from companies who have used HP equipment. These donations add up to about \$250,000. According to Prof. Zimny, the other ECET professor extraordinaire, "less than \$100,000 was used from the normal budget allocated for equipment by the department."

Also, depending on the availability of funds, the interior of the Wilder Complex is going to be renovated adding two new labs, a Telecom lab and a Datacom lab. Recently, Southern Bell donated fiber optic telephone equipment to the school. This equipment is the same as that used in the central offices of Southern Bell and will be housed in the new Telecom lab.

Casio's 7000G vs. 8000G

Ruthless Calculators Battle Endlessly in Downtown Tokyo For World Domination

By Tony Butts
Staff Writer

Just when you thought it was safe to buy a calculator, the Math department makes you do what students dread most, make a decision.

Casio has introduced an upgraded version of the calculator required by the SCT Math department, the 8000G.

Here are some basic facts about the Casio 7000G, the calculator which has been required for several years, and the newest option, the Casio 8000G.

The Casio 7000 G calculator has 193 functions, 422 steps, and 26 memories. On the other hand, the Casio 8000G calculator has

255 functions, 1,446 steps, and 26 memories. The Casio 7000G and Casio 8000G are very similar, but the 8000G can perform more functions than the 7000G.

With the 8000G some of the different types of files that can be stored and recalled are the built-in file editor function which has a total capacity of 1,191 steps. The 8000G can also be used with the EA-80 interface unit which provides even more performance than the 7000G.

The EA-80 is equipped with a printer interface which allows a print-out of computation results, program lists, and graphs.

Math students at Southern

Tech are required to buy one of the two Casio calculators. Professor Young, of the mathematics department, said, "the reason why math students are required to have one of these Casio calculators is these calculators are easier to teach how to use and easier to learn how to use than other calculators that have similar functions."

The Casio 7000G calculator costs about \$70.00 and the Casio 8000G costs about \$100.00. So, for just \$30.00 more you get a lot more functions for your money.

But, do you really need a calculator that can do all of that? Thirty dollars is a lot of money, but you get all those extra functions.

Organization Spotlight: WGHR, 'The Big Wooger'

By Tom McInvale
FNG

At the tender age of just ten years old, WGHR, the noise of Southern Tech, is one of the most diverse organizations on campus. It's diversity stems not only from the wide range of music but also from those who congregate there.

Ten years ago on, October 7, WGHR, aka Wooger, began broadcasting on the FM frequency of 102.5 megahertz. Before that auspicious date it was WSTB AM, founded in the early seventies.

The wide selection of music allows it to reach any audience from progressive and punk to blues and rap and even oldies (well maybe not). This wide selection is kept in check by Anthony Jackson and Shawn Moseley, music directors. "I make sure we don't have one large pocket of a certain type of music," says Jackson (AJ, as he is better known). Around the station can also be quoted as saying "I'm the shit!" a statement he has every right to spew all over campus (which he does) because he has the most popular show of all of the Dj's (AJ plays mostly rap but listen to him anyway).

Marc Pruitt, the station manager, is now busy testing a new transmitter cable because the renovations on the student center will involve removal of the cable that currently connects the station to its transmitter. Everyone thank Marc for his diligent work. When asked about the station's power, which is a powerful ten million microwatts, (that's ten watts) Marc will reply, "Get your own radio station and raise the power of it!" Actually, the stations facilities are above average for this size college, and WGHR was very lucky to have even received a license. Atlanta is the nation's third most competitive radio market, and no frequencies are left available in the non-commercial band (80-92 megahertz). Somehow the FCC allowed WGHR to be assigned with the commercial band, which is a very rare occurrence.

The Dj's, including personalities such as Gareth Williams (resident bartender), Psycho Dave (local psycho and photographer for *The Sting*) and Jen Waller, are some of the most interesting people anyone could ever meet.

The music played is as interest-

ing as the people. Gareth plays everything from killer death rock to the oldies (or at least punk covers of the oldies). Dave plays punk and only punk (but he isn't the infamous Dave punk). There are also people such as Mackie, your Dj of the time, who play more main stream music such as good old rock and roll.

College progressive programming, the mainstay of Wooger's format, includes such shows as "The Wes n' Andy Show" (a Wooger institution), "Channel Zero" (with Shawn Moseley), "Steal This Spot and Die Soon, Skronk" (with Jen Waller), and "The Kim & Laura Show" (with...duh).

This quarter, according to Marc Pruitt, there are a lot more Dj's than ever before. There is a sign up board for Dj's to specify their shows and times, which is almost completely full.

One contributing factor to the increased popularity is the fact that it recently began operating on a 24-hour basis. The station's record servicing is ever-increasing, and programming is sponsored by Plastic (an Atlanta nightclub), The Center Stage Theater, and Brusco Barr Presents.

Left to right: Music Director Shawn Moseley, Program director Anthony Jackson, and General Manager Marc Pruitt. Together pointing onward toward the horizon of greater common good.

Photo by: Dave Conrad

To become a Dj at WGHR one must do a few simple things. First an aspiring Dj must find Marc, AJ, or any one of the other managers, their names and office hours are on the bulletin board in the station, and see if he/she can get a time slot. Once a time slot is acquired, the aspiring Dj must then fill out an application for a provisional FCC license, when that is done the last remaining task is to get trained on the equipment and have fun.

Tune your radio into 102.5 FM and leave it there. This station is not

a commercial station so no one is going to try to sell you anything (except a Wooger T-shirt!), they just play music and public service announcements (you never know Wooger may just save your life if you listen).

Call in and give them a request (528-7300), if they have it they will play it.

If you don't like the music that is being played then get a show and play what you want, the station has an open format. Just don't forget your disclaimer.

Learning Resources Center Offers 'Free Help'

The Former Developmental Studies Lab offers Tutoring in Basic Physics, Math, and English courses to all SCT Students

By Jack Silver
"still crazy after all these years"

The Learning Resources Center offers free tutoring assistance to all Southern Tech students who need help with basic level courses such as physics, math, and English, according to Dr. Richard Hitchcock, the new director of the center.

The center, which was formerly the Developmental Studies Lab, is open to all students who need help with their basic freshman courses.

The center offers help with such basic courses as English 111 - 112, Math 111 - 112, and Physics 201 - 221. Help for all Developmental Studies courses

is also available.

Tutors are available for English, math and physics at all times either to check students work or to provide instruction. Tutors are either upperclassmen or Technical Communication Masters degree candidates.

Dr. Hitchcock, who has previously taught at DeKalb College and at the University of Georgia, feels that one of the jobs of the center is to help new students get over the initial shock that comes with starting college and causes many to have difficulties in their classes.

For this reason, "Many of our best tutors are former developmental studies students" said Dr. Hitchcock "because they understand the problems that

new students have."

Dr. Hitchcock also feels that the center can help with the small stumbling blocks that students often face and that the teachers do not have time to explain due to the large number of students they have.

One of the biggest problems with the center, according to Dr. Hitchcock, is the fact that many students who could benefit by use of the services do not know that the center is available. Dr. Hitchcock went on to say that spreading the word about the center is something he hopes to do.

Students can use the center either individually or in small groups and have a choice of textbooks or computer instruction.

The center has recently expanded its hours of operation so as to make their services available to more of the student population at Southern Tech. The expanded hours include

A SERIES OF NOONTIME PRESENTATIONS

BY THE
COUNSELING CENTER
528-7226

Balancing School, Work, and Family

Wednesday, October 23

Simultaneously wearing the three hats of student, employee, and family member can be very stressful. Discuss ways in which you can successfully balance these three areas while keeping stress at a manageable level.

Stress Management

Wednesday, October 30

Relaxation is a skill which can be learned. Learn a step-by-step method for relaxation. And, discuss FIVE ways to assess and manage stress in your daily life.

Memory Enhancement

Wednesday, November 6

Storing things in memory is a much more complex process than we usually give it credit for being. And, we all have our own strengths and weaknesses in this area.

In this program we'll discuss how we can better understand our own ways of committing what we learn to memory, and how we can use these insights to enhance our academic performance.

All presentations will be in Conference Room A of the Student Center, 12:00 - 1:00. No advance registration is needed. Students, faculty, staff, and friends of the College are invited.

Bud Pays Students Who Can Say When

St. Louis—"Know Your Limits." "Don't Stretch It."

Each were themes of previous grand prize winners in the "Know When To Say When" poster competition. Supporting the 1991 National Collegiate Alcohol Awareness Week, college students nationwide will again be challenged to stretch the limits of their imagination by developing poster concepts that creatively express the need for personal responsibility and respect for the law when consuming alcohol.

\$20,000 in scholarship money will be awarded.

Co-sponsored by Anheuser-Busch, Inc. and the Inter-Association Task Force of Alcohol and Other Substance Abuse Issues, the poster competition's goal is to bring attention to the need for legal and responsible consumption of alcohol and to further the "Know When To Say When" message on campus.

"Over 2,500 high-quality entries were received last year, and we're looking to receive even more in 1991," said Joseph P. Castellano, vice president of Consumer Awareness and Education at Anheuser-Busch. "A student's ability to draw

is not important in this competition. What is important is the idea and thinking beyond the concept."

The winning entry will earn a \$5,000 scholarship. The winning poster will also serve as the official poster for the 1992 National Collegiate Alcohol Awareness Week (NCAAW). The 1991 NCAAW was scheduled for October 13-19 and was held on over 3,000 campuses. SCT participated in this program in the past.

Robin Maeda, a student at the University of Hawaii-Honolulu, earned first grand prize honors in last year's competition. Her concept, titled "Don't Stretch It," is the official poster of the 1991 NCAAW.

"Making the personal responsibility message contemporary and top-of-mind is important if we are to make a positive impact of today's college campus," said Edward H. Hammond, president of Fort Hays State University and national chairman of NCAAW. "Who better to create those messages than the students themselves."

In addition to the grand prize, five \$1000 runner-up scholarships and twenty third-place scholarships

This is the official winner of the 1991 National Collegiate Alcohol Awareness Week poster contest. You need to quit drinking when you see a frog with a sweater on. -Concept by Robin Maeda.

will be awarded. All scholarships are underwritten by Anheuser-Busch, a sponsor of NCAAW since

its inception in 1984. Poster entries should be mailed to: Poster Competition, P.O. Box

13287, St. Louis, Missouri 63157 and should be received by December 15, 1991.

incident."

At the station, "Officer Turner became involved in a physical altercation with Derrick Frances in the intoximeter area."

The officer has stated that he took Derrick into the separate room to do some paper work concerning the case.

Derrick has accused officer Turner, and another unnamed officer, of beating him while he was being booked.

Officer Turner's version is that he did punch Derrick, but in self-defense after Frances lunged at him.

The Marietta Police Department is currently investigating the charges of excessive force and of returning racial slurs hurled at them by the students.

The Marietta Daily Journal has quoted MPD's internal affairs investigator Lt. Kennedy as proposing a conspiracy between the students to fabricate the brutality allegations so that

the police will drop the charges against them.

Concerning the allegations that officers used racial slurs during the arrest Lt. Kennedy said, "We had a black officer down there...Do you think we're going to have [another] officer say nigger? [The black officer] was called 'white nigger' and an 'Uncle Tom'" by the students.

Marc Riley also stated that after he and others tried unsuccessfully to get their friends out of jail that night an officer followed them.

"When we stopped at Krystal's to get something to eat, an officer told us we could not stop, that we had to go home...if we did not go home he would take us to jail."

Marc has, "filed a grievance with the City of Marietta Police."

As of press time the students' final decision on what they will do and the MPD's own internal investigation are still in the works.

The Homestead: Hard to Find, But Worth the Trip!

By Westly Hetrick
Ramblin' Writer

Food is a wonderful thing. I love food. Sure, yeah, so do you, and so does everyone else, but really, have you ever just sat back and thought about food? Not only is it a pleasant and potentially inexpensive vice, that has very few negative side effects, but it is also a major social force in society. We use it as an excuse to stop being productive and instead concentrate on pleasing ourselves and getting to know those around us. If you don't know someone very well, you ask them to lunch. And it's a perfect topic for idle chit-chat, much better than, "How bout that weather?" As if anyone would ever be surprised about weather. "It's raining outside? Really? Well, I never expected it to rain. Wow. How unusual." Nope, why mess with the conversational equivalent of those styrofoam packing worms when you could talk about RESTAURANTS! Yep, good, bad, or indifferent, restaurants are the conversational equivalent of say, water coolers. Not exciting, but definitely welcome. Which leads me into the next paragraph.

Whoa! Here we are at the next paragraph, and while some major

lead in has been done (174 words. Count 'em), not a lot has actually been said. Which leads me to the, ahem, meat of this article. A restaurant review. Caught you by surprise, didn't I? You thought I would recommend a punk album at this point and tell you not to be so narrow minded, unless of course we're talking about punk music. Well, that's on the next page.

Third paragraph, and I still haven't mentioned the name of the restaurant. Well, it's in the title. I'll get to it eventually, or maybe now. The Homestead. There, I said it, it didn't scare me, so I'll say it again. The Homestead. I ventured down there just the other day for dinner, solely on the strength of the 15% off coupon which they have been running in *The Sting*. Well, let's get on with it.

The food was excellent. I spent a lot of money on a thesaurus, so I'll also call it commendable, extraordinary, great, impressive, smashing, sterling, superb, and wonderful. Mind you, it wasn't cheap. Not really expensive either, though the dinner entree items ranged from six to twelve dollars, with most falling around \$8.95. Before discount. I had the prime rib, which was about an inch thick, and which I used a

butter knife to cut. My roommate, Marc Pruitt (General Manager and International Espionage Agent) ordered a rack of ribs that almost fell off of their bones. Both meals came with a dinner salad and rolls. There was also an in-house bar, but since I decided to become a Mormon, I quit drinking. Funnelling only for me now. Both meals were that magic \$8.95 (before discount). Did I mention that the food was really good yet? Yes? Well, I thought so. Well, there was a minor flaw. The rolls were of the bland, grocery store variety, and none too warm. But I don't like rolls that much anyway.

Lunch prices are cheaper, centering on sandwiches, and around four bucks. Lunch items are served with chips or "I-ore-da" fries, whatever that means. I recommend the chicken cordon bleu sandwich, because that's what was recommended to me.

Did I mention they had a deck? Well, they do, and it's a nice one, but hurry up, because outdoor dining season is just about over.

Now the part that's really important. The location. They don't mention the location in the ad, which is silly, because

Dis is da Homestead, where I ore- da fries all da time.

Photo By: Jack Silver

you'll never just bump into it. Go down the S. Marietta Parkway, formerly Clay street, towards the square. Turn left at the Huddle House, onto Manget Street. Now go into the parking lot behind Huddle House and look up the hill for a red house.

You may remember it as a barbecue place, or as the C&C Seafood Factory. Both darn fine establishments that went under because nobody could find the place. Don't let that happen to the Homestead. Really good food. Reasonable prices. End of article.

Communication breakdown?

Get out of the Stone Age! Whether it is a potential client or your mother with the hometown news, your messages are important to you. With an automated voice mail box, you can have access to a full-featured, computer driven system.

For as little as ten dollars a month, The Message Center can set you up with a private, password protected place for your friends and associates to leave messages. And all you need to access the system is a touch tone phone, from anywhere in the world.

There's a voice mail plan at the Message Center to suit everyone's needs, whether you are a student, individual, family, small business or non-profit organization.

Ernest Tries to Make Your Halloween Stupid

By Ryan J. Nichols
Staff Writer

He's back! In some he inspires fear, in some laughter, in some boredom, and in some just plain lack of interest, but Ernest will work overtime to entertain his audience. In his new movie, *Ernest, Scared Stupid* (starring Jim Varney as Ernest), he comes back bigger and dumber than ever.

This new film promises to fill your Halloween with horror, laughter, and an abundance of Troll snot. Yes, I said snot. *The Sting* is not afraid to print anything.

The film sports the same high level of comedy that some of us have all come to love. It has the same inventive camera angles and facial expressions, including all of Ernest's multiple personalities that make all Ernest P. Worrell movies stand out. A collection of characters from earlier films are back in this one including Rimshot, Ernest's dog, and the two brothers that keep the level of comedy at a peak. These

two now have changed careers from security guards at the bank to the owners of a glorified flea market.

The story opens with an ancient ancestor of Ernest, played by Ernest himself, trapping a Troll under a tree for stealing the souls of the children of the town. A curse is bestowed upon him that all of his children and children's children will become duller and duller until one of them will finally release the horror into the world again.

Back in the present Ernest seems to have evolved to the end of the chain of the curse. His inability to finish a job without bumbling it up has demoted him to Custodial Engineer. He and his dog move silently through the city cleaning up after the good people and destroying everything in sight.

What would a horror movie be without a witch? Ernest is sent to her house to clean up the yard since it is an eyesore to the community. She recognizes him as the descendent of the Worrell line and tries to warn him of the impending danger,

but to no avail. The stage is set for disaster.

In helping some of the children that he is friends with to build a tree house in, yes, you guessed it, the 'Troll tree' he releases the troll and the nightmare begins. The troll needs five children by midnight of 'AllHallowsEve' to have the power to release his horde of trolls on the world and Ernest is the only hope. Children start to disappear at an alarming rate and no one but the witch has a clue as to where they are.

A titanic battle ensues with Ernest as the hero facing an army of trolls and backed by only a tree house, his dog, and a few children. This is what truly great movies are made of.

This movie offers a light, comical look at horror movies that will be enjoyable to all ages that view it. Following in the great Ernest tradition, *Ernest, Scared Stupid* plans to entertain and delight children no matter how old they are.

Here is a spooky picture of the ghostly Red knight. No, there is no Red Night in the new Ernest movie, But it's the only scary picture we had. Photo by: Gee, I don't really know!

What's This? Another Punk Record Review!

By Dan Punk and Dave Punk
Punks

Welcome once again to another installment of those wacky Punk rock record reviews. This issue we will review a brand new release by a band out of Chicago. The band is called Sludgeworth, and if you have any knowledge of cool Punk rock bands, you might be interested in knowing that this band contains two former members of Screeching Weasel. The two ex-Weasels, Dan Schafer, who gave up his bass for a shot on lead vocals, and Brian Vermin, who still beats on the drums, are joined by three other talented musicians to make an album that shouldn't be missed.

The album is called *What's This*, and to the best of our knowledge, this is the first album put out by Sludgeworth. Although they did put out an EP on the Roadkill label, that we first heard way back in May and quickly became one of our favorites. We were anxiously looking forward to the release of an album by this quintet since then. We kept bugging Roadkill, but they never wrote us back. It seems that we were barking up the wrong tree however, because the album came out on a new label called Johann's Face. We had a long wait, but it was well worth it.

I know, you are reading this and thinking "Hey, why don't they stop their yapping and just review the damn record". Well, just chill man, were getting there. In fact, we'll start right now.

The 'Worths spit out one tremendously cool LP. Brian and Dan seem to bring to Sludgeworth the same pop-Punk sound that Screeching Weasel had, especially as far as the whiney guitar goes. The lyrics are more serious, but still just as catchy as any Weasel classic. Added to this, a couple of these songs have a little funk influence, but not to the annoying excess of the Red Hot Chili Peppers or Faith No More.

What's This contains new versions of two of the songs, "Some-day" and "Two Feet on the Ground", from the highly important Sludgeworth EP plus eight other cool songs. The first side of the LP keeps in tradition with the fine punk stylings of the EP. It contains such ditties as "Never Say Never" and "Another Day" along with the two songs from the EP.

The second side of the LP is a bit funkier than the first side. That's a bit obvious with such titles as "Tomato Paste" and "Funk Dungeon", which both come complete with the '70's style bass. You know, like the one in bad tv-action series

from that period.

Overall, the album was every bit as good as it should have been. The songs seem to capture the classic

Punk enthusiasm with experimentation kept to a minimum. The energy is there along with the fun and a catchy melody. Well, we will be

more prepared for the next review and not try to write it at the last minute, with everybody hanging over us threatening to kill us.

"The more a space becomes cluttered, the more formidable a task it seems to be to straighten it up."

ASK THE PSYCHOLOGIST

In this column, Dr. Michael Slavit, Director of Counseling, will answer questions about issues of emotional, behavioral, or social interest. This column is not intended as a substitute for seeking help from a qualified professional. (SCT students, faculty, and staff are eligible for service at the Counseling Center). And, Dr. Slavit's comments do not necessarily reflect the views of The Sting. Send your questions to Dr. Slavit c/o The Sting.

Q: "I read your last 'Ask the Psychologist' column — the one in which you gave some advice to the woman who kept forgetting to turn off the air conditioning, forgetting her keys, and stuff. You said that sometimes psychologists can help in practical ways. I wonder if you can give some advice to help me. I clutter things up. Every place I can possibly clutter up, I do. My desk is a mess. The trunk of my car is a mess. My closet is a mess. Everything. It's not that I like clutter. I don't! But every time I decide to straighten out one of these places, I get scared off because it looks like too big a job. I'd like to get some of these places straightened up and keep them straight. Can you help?"

Signed, Joe

A: Joe, your situation is not unusual. Clutter is an inevitable part of our culture, with all our mail, newspapers, magazines, packaging, gadgets, etcetera. The key is to manage the situation so that the clutter in your life space is not so much that you are uncomfortable or inconvenienced. Apparently, Joe, you are uncomfortable with the amount of clutter in a number of your life spaces.

Giving you enough advice for you to keep things straightened up would take more space than I have in this column, so you'll have to come in to the Counseling Center if you want to discuss it. But I can describe for you a technique which may help you to straighten up some cluttered places to begin with.

First of all, Joe, you've put your finger on one of the biggest reasons that people cannot control clutter. You said "I get scared off because it looks like too big a job." The more a space becomes cluttered, the more formidable a task it seems to be to straighten it up. So, the key to cleaning up a cluttered space is to take away the formidable appearance of the task. The method I prescribe is "Do 10 things." It works for desks, closets, car trunks, work benches, living rooms, etcetera.

Let me illustrate it with an example. Suppose your living room is cluttered up. There's a glass on the coffee table, so you put it in the sink and say "one." You pick up your jacket and hat and hang them in the closet and say "two." You put yesterday's newspaper in the pile to be re-cycled, and say "three." You put a few record albums back into their covers and put them away and say "four." You put your running shoes into the closet and say "five." You continue like this until you reach "ten," and then you stop. Yes, you stop.

It takes only about two-to-three minutes to "do 10 things." You can do it before leaving for class, before going to bed, while waiting for water to boil, while waiting for the Braves game to start, etcetera. And, doing 10 things is not a formidable enough task to avoid. Straightening out the whole place may be formidable; doing 10 things isn't. Within a day or two, you can get your apartment, desk, or the trunk of your car all straightened up — 10 things at a time.

You may try it and say "Hey. I've done 10 things and I'm on a roll. Why not just keep going and do the whole job?" And that's okay — some of the time. But, most of the time, you've really got to stop after 10 things. Why? Because you can't fool yourself. If you know that doing 10 things is just a way to try to jive yourself into doing the whole job, you'll end up avoiding doing 10 things the same way you avoid the whole formidable job. So, give yourself permission to just do 10 things and stop. Joe, you may find that you can keep your life spaces neat without ever making a major project out of it.

A final note: At the Counseling Center, we can help you develop practical and strategic solutions to problems, as well as deal with other personal, educational, and career issues. Our service is confidential.

calvin and Hobbes

by **BILL WATERSON**

MATH STINGER

By Dr. Joel C. Fowler
Assistant Professor of Mathematics

The puzzles from last week were as follows.

- a) Find 100 consecutive numbers, none of which are primes. You should explain why your 100 numbers are all non-prime.
- b) Explain why no number larger than 3 that is one less than a power of 4 (i.e. $4^2-1=15$, $4^3-1=63$, $4^4-1=255$, etc.) is prime.
- c) Explain why no number larger than 5 that is 4 more than a fourth power (i.e. $2^4+4=20$, $3^4+4=85$, $4^4+4=260$, etc.) is prime.
- d) Explain why no number other than three of the form n^4+n^2+1 is prime.
- e) Explain why no number other than five of the form 21^n-16^n is prime.
- f) Explain why no number of the form 64^n+27^n is prime.

Correct solutions were received to b) and c) only. They were solved by Alan Gabrielli of Continuing Education. The key to solving puzzles of types b) through f) is to realize that what is needed is an explanation of why the form that the number takes always factors. For some this can be accomplished by giving an algebraic factorization. For example, solutions to b) and c) are as follows (others are possible):

b) $4^n-1 = (2^n)^2-1^2 = (2^n-1)(2^n+1)$
 c) $n^4+4 = (n^2+2n+2)(n^2-2n+2)$

The above comments should help on the remaining problems. I will leave them open and continue to accept solutions.

For new problems for this issue we look at arrangements of chess pieces on a standard 8x8 chessboard such that no one piece attacks any other. These are sometimes called "peaceful arrangements". Two problems are as follows. What is the largest number of peaceful rooks that one can place on a chessboard? In how many ways can this largest number of rooks be placed peacefully on the board? Once you have solved this you may wish to investigate the same two questions for bishops.

All answers should be sent to Joel Fowler in the Mathematics Department. Correct answers and the names of the first to find them will be printed in the next issue of *The Sting*.

EDITORIALS

Ramblin' Editorial Going Nowhere

By Westly Hetrick
I Can Be Bought or Rented

The past two weeks have been quite interesting, and I, personally, have made several observations. Not all of them are worth mentioning here, but that never stopped me before.

•I went to the Braves-Pirates game last Sunday, and I noticed something that I think may have affected the good old home team. The Braves started strong that evening, and we did the Tomahawk Chop almost continuously. However, by the fourth or fifth inning, a cheering contradiction began. We would do the Tomahawk Chop, and immediately follow up with the calvary charge. I mean, first we would invoke the powerful Indian baseball spirits, then we would slap 'em in the face with the the last music a lot of Indians ever heard. No wonder we did so much better in Pittsburgh.

•Did you watch the Clarence Thomas hearings last week? I didn't see all of them but I did see one thing that struck me as odd. Where the hell does Teddy Kennedy get off judging anybody for sexual harassment? Gosh Ted, what did you do over spring break? Next thing you know, he'll be denouncing drunk driving as a crime that needs stricter punishment, especially if you leave the scene of an accident.

On a side note, my sister lives in D.C. She used to

make it a point to go the long way home and drive really slowly through Teddy and Joan's neighborhood, because rumor said Joan had a nasty habit of getting soused, crashing into cars, and Teddy would pay a lot of money to keep the incident out of the papers and police reports. My sister figured one good wreck and she'd retire.

•A lot of talk has been made in this country about the trade deficit, and about how American industry is failing to keep up with the rest of the world. Well, there's one industry where we outproduce the world in both quantity and quality. It's not food. It's not computers. It's not rap bands. It's lawyers!

That's right. We have more lawyers in this country than probably the rest of the world put together. And now, there are so many that a lot of them are having trouble trying to get jobs. Well, there's a simple solution to all of our problems. Start exporting lawyers!

Instead of teaching American law, teach Japanese law, German law, international law, any kind of law that doesn't happen here. Before you know it, the industries of the world would be crippled, just as ours are now. But we would have the advantage, since we've been trying to work with these guys harassing us for years. I mean, we're not doing to bad for a country that's constantly trying to slit it's own throat.

If this plan fails, my next big plan is to get the military to start a legal assault squadron. Airborne Ranger parachuting paralegals bringing lawsuits from the sky. Swimming SEAL shysters spreading needless litigation to the beaches of our enemies. John Wayne would be proud.

Drinking: Students Teach Themselves

By: Dr. Edward H. Hammond

There has been a lot of talk recently about alcohol abuse on college campuses.

Television networks, newspapers, magazines, social researchers, college administrators, alumni associations-they have all engaged the issue.

But until these various parties involve students in the discussion, until they include students in the solution process to the problem - they are doing little more than exchanging hot air.

In my 25 years as an educator, I have found no lesson more basic than this one: Students must ultimately teach themselves. We can give them the tools of learning, but they must teach and learn.

During National Collegiate Alcohol Awareness Week (NCAAW), an annual event held on more than 3,000 campuses nationwide, we challenge students and faculty to apply the foundation of all education (that is, self-education) to the subject of drinking - moving beyond the rhetoric of action.

During this year's NCAAW, October 13-19, students will act on the subject of drinking- teaching themselves that underage drinking is never acceptable, and for half of the post-secondary students over 21, teaching themselves the difference between alcohol abuse and responsible drinking. This goal will be pursued through a number of educational activities, patterned after the events and themes conducted by their peers since the inception of NCAAW in 1984.

Last year, for instance, students at the University of Richmond in Virginia learned how to P.A.R.T.Y. (Promote Alcohol Responsibility Through You), attending seminars, watching movies and participating in activities that demonstrated the effects of alcohol abuse, including drunk driving.

At Texas Christian University in Fort Worth, Texas, students, faculty, and staff built "The Wall"- comprised of

single bricks on which the different participants inscribed their experiences with abuse.

At Illinois State University in Bloomington, Illinois, students learned how to "Let the Good Times Roll without Abuse," promoting this contemporary theme through campus newspapers, buttons, fliers, the ISU stadium message board and the marquees of local businesses.

And at the University of Fairbanks in Alaska, students participated in 40 different programs, including a "Family Feud" competition with questions on alcohol and drinking.

These efforts were successful because innovative, creative strategies were coupled with the vigor and persistence of students helping students. And despite the diversity messages were common to all of these efforts.

First, these students taught themselves about respect for the law- about not drinking before they are 21, and about never driving drunk, or riding with a drunk driver.

Second was the message of personal responsibility. Students taught themselves that ultimately, only they are responsible for their decisions, good or bad- and that their success in school and life depends the right decisions.

Finally, students who participated in NCAAW taught themselves to respect their- peers- to celebrate true friendship. They learned that friends promote responsible behavior; that friends don't let friends drink if they are underage; and that friends don't let friends drive drunk.

As an educator, I am proud to see today's college students take an active role in their education - particularly their education about alcohol.

During this years NCAAW, we expect to hear more success stories- stories that may finally force those who endlessly debate the issue, to cease their conversation, and join students in real actions to address a real problem.

ORGANIZATION ARTICLES

Articles written by organizations to inform the campus of activities and events are welcome. Articles must be submitted by the deadline on the front page and typed on a 3.5 inch computer disc. Please limit articles to two hundred words. All such articles are subject to editing for style or content, and are run on a space-available basis. *The Sting* reserves the right to remove the phrase, "...and a good time was had by all" from any and all organizational articles

JOINING THE STING

Any student paying Activity Fees is eligible to join *The Sting*. We prefer woman who have passed English 111. Come to our meetings Thursdays at Noon, in the *Sting* office beside the big screen TV, upstairs in the Student Center, or call 528-7310. *The Sting* is a supporter of affirmative action, and would gladly replace most of it's men with women.

Census Editorial

Each of us here at *The Sting* has at one time or other had a simple revelation that we feel could be shared with the rest of the general populace:

Don't Drink Paint,
Because if you drink paint-
YOU DIE!

MINDLESS BANTER

Page 15

Soft Drinks, Red Meat, and Other Nonsense

By Dave Punk
Punk

Whatever happened to that bastion of the soft drink world, Jolt cola? You know, twice the caffeine and real sugar. It's time we decided to join together and defeat the evil powers that be in the soft drink world and fight the vile Nutrasweetness that has cast a dark shadow over we who eat mainly for pleasure. This is a call to all you who still enjoy that most basic of food groups, the junk category.

Exactly who the hell buys a soft drink for it's health benefits? When I go out to purge my pockets of my hard earned (or hardly earned) money on a glucose based, non-alcoholic, carbonated beverage, I expect it to be as detrimental to my health as possible. I don't want any mamby-pamby caffeine free, chemically sweetened, natural spring water granola drink. If that's what you're aiming for, go out and buy some assorted vegetables, throw them in the blender, pour in some Evian, and puree the hell out of it.

Experts believe that there is a huge conspiracy from all the carrot-thumpers to rid this world of every possible gastronomic joy left. Allegations are that this whole perverted movement started in Kdkhus, Terrafirma where the worlds largest Nutrasweet mines are harvested for millions of tons of the highly artificial sweetener yearly. The Nutrasweet is hauled out of the mines in hoppers, where it is then carried to the giant sifters which separate the nasty Retsin deposits from the inherently satanic Nutrasweet. Then the raw Nutrasweet is taken to the immense refineries which are protected from industrial sabotage by trained mongeese equipped with infra-red night scopes and small bits of styrofoam. At the refineries, the Nutrasweet is washed of further impurities with a steady flush of Ammonia-D.

Obviously this process is not a cheap one, but is required to keep the economy, and the entire social structure for that matter, intact. The government of that small country has launched a huge program of propaganda in an effort to destroy the natural sugar trade, and therefore maintain the integrity of their economy. Through the publishing of papers that instilled people all over the world with the fear that death is a really negative experience, the

Computers Are My Sex Life

By Andrew Newton
Staff Head Wound

When Bill Finnicks, *Sting* Editor, buddy, pal, friend, upstanding citizen, dude, philosopher, and fellow alcohol physics partner, came to me four weeks ago and said, "What should we name this new columns page where I'm going to allow anybody to say anything they like?"

I threw up my arms (a fairly disgusting act) and said, "I don't know. Call it 'Mindless Banter.'" So he did, and since then we've been printing tons of insalubrious thoughts under that banner.

And while I'm adding to this "Mindless Banter" you are probably sitting back in your favorite sitting back position and thinking, "You know, these guys probably aren't professionals. In fact, they probably write this crap with no clue and no plan on the spur of the moment." Well, if you were thinking that then golly gee willeckers, you're right.

self-concerned government of Terrafirma has successfully started a trend of healthy attitudes all over the globe.

And our falsely imposed guilt doesn't just stop with colas

...trained mongeese equipped with infra-red night scopes and small bits of stryrofoam.

either. Oh no, now we, the human race, can't exercise our God-given right as the dominant species on this planet by engaging in the consumption of a little charred animal flesh. The argument about three hundred pounds of undigested red meat sitting in the average adult's intestines by age forty just doesn't hold water (or even milk) with me. What all this really boils down to is a matter of personal choice, doesn't it?

Assuming that the highly regarded allegations of corporate and international espionage are false, who cares if I, Dave Punk, decides to consume a lump of raw meat and a mixture of glucose and caffeine for my dinner? Actually, the question is who SHOULD care? That's right, no-one. But the celery brained health fanatics just won't let you die in peace.

Now I've met some pretty obnoxious groups of individuals in my time, but few could compare in downright holier-than-thou-ness to the chlorophyll consuming vegetable killers. What kind of self-given right do they have to tell me what I can and cannot put in my body. Joe Schmoe who lives in Techwood homes could down a fifth of Pine-sol in a fit of depression over his deceased pet lump of coal, and these same people wouldn't bat an eye.

These are the same people who go into your local 24 hour hamburger joint at Godawful in the morning and devour as many pieces of meat as possible until they can't physically force any more down there esophagus. They're all hypocrites. Sure, in public they put on that righteous facade like they actually enjoy sucking down huge quantities of dead foliage. In reality, however, it is my belief that they are participating in this

disgustingly corrupt vegetarian life-style in a futile effort to strike back at society, and that kid in the third grade who made fun of them because their nose was shaped embarrassingly like a horse.

As I wrap this up, I must make a plea to all people with any resemblance of humanity left in them to reinstate the mighty opposition to this menace, Jolt cola, as a leading consumer product in this country. Go out and buy as many Slim Jim brand petrified meat sticks as possible. Please help us defeat this rising spectre of health and weight consciousness. And another point I'd like to bring up is that Solid State TV's are a lot easier to watch than those damn gaseous state TV's.

How You Came to Be Reading This

By Bill Finnicks
Why?

For the very few how this section came to be may be of interest. To the rest this is my version.

Right after I put the gun down Dave, of Dan and DavePunk Unlimited, came to me and said something along the lines of how *The Sting* needed a columns section.

Dave for the first time since selecting hair styles had a good

Andy is a Pillar of the Community

idea and *The Sting* was sent spiraling in a new direction.

At this point I wish to give credit to Dave for opening a channel for the mindless to spout off at what ever they find good or bad in society, or their imagination.

You see to commit space for so inauspicious an area as Mindless Banter I had to have guaranteed idiots, like myself, that are unafraid to speak their minds.

Andy has no problem in this. Like most conservative, politically correct, big company, republican, assholes he readily spills his spleen on the unsuspecting masses with a totally corrupted image of what he perceives to be the problems of society as caused by the Macintosh computer.

Did I mention that Andy is a pillar of the community. He has taken it upon himself to befriend Shawn a.k.a. Sport and propel him to notoriety in the Campus Forum section.

This is of course probably a plot by Wooger to take over *The Sting* for the capitol it needs to finance the revolution they have planed to remove Pearson from the Architecture department. That, of course, is another issue and the Dean would probably be fashionably late to his own execution in style with his own agenda. A good idea who's time has come.

Anyway back to Dave. Despite his indulgence into Led Zeppelin bashing (by the way they are the greatest rock-n-roll band of all time) and themeless topics he did produce a column on a recurring enough basis to start this section. Years, if not months, from now some editor will wonder where it all started.

Jack Silver in the year 2000 will be able to tell the story of how Dave started it all a long time, back when Jack was just in his third year of being a Senior in the IET department. Jack by that time will need just 42 more hours to graduate.

And why are you right? For one thing, we all go to an engineering technology college and can barely distinguish between adjectives and adverbs much less rough draft and final copy.

And we tend to start three paragraphs in a row with the word "and." Every once in awhile we even write our articles so that we tend to get crazy and wacked by hiding in our writings the messages for nuts by using every three (not two) carefully placed words.

Getting back to the point, we know it is painfully obvious that many times we make no sense and are typically not funny. But they are done under rushed and impromptu circumstances. So please remember that the next time you read these columns, especially mine because it is probably the only thing that's going to get me return business.

By the way, anyone who reads my stuff most of the time will notice that I'm always referring to Bill Finnicks as both an upstanding citizen and drunkard. He tells me that he doesn't like it, but I'm not sure which character reference he's complaining about. At any rate, I really intend no character defamation.

This line intentionally left blank.

By Jessica Pittman

Ooooooh baby!— What a long summer!! It is great to see all the A Dee Pi's again! I have good tidings of GREAT joy (and lots of news, too) to share with you all!... On the subject of Formal Fall Rush... Praise God it is over!! But the labor was worth it by-golly because A Dee Pi had the opportunity to meet many new SCT women and had the pleasure of bringing three more fine SCT women into the "First and Finest." So, to Kimberly, Lori, and

Mary, I (and all the other sisters) welcome you into our sisterhood with open arms, lion love, and many hugs! To our other Alphas... keep up the hard work— You're almost there! We love ya'll! Without further procrastination, let me express my sheer admiration, lion love, and CONGRATS to Pam Weaver for all her time, talents, and dedication to our beloved sorority. We could have never pulled Rush off without your guidance and support. We will be indebted to you forever. Thank you, Pam!!! Everyone is to be commended on doing a damn good job during Rush! What a sisterhood! The best just keeps getting better!

GSPE

By Ted Sommers
Secretary of GSPE

The Southern Tech chapter of GSPE had its first meeting of the quarter Oct. 17, 1991. GSPE is the professional organization that is in charge of the IET exam. The group elected officers and planned for this years accomplishments.

The new President of our chapter is Mr. Keith Fraser. All officer positions were filled, except that there is still plenty of room left on the Board. Anyone who would like to participate in GSPE this year should contact Professor Lee in the MET department or attend the groups next meeting on the 14th of November (GSPE will meet on the second Thursday of each month).

The EIT exam is the first step in becoming a professional engineer for all engineering majors. It is a national test administered by each state and is the same test that Georgia Tech engineers take. By passing the test you show employers that

might look down at a technology degree that you have the skill to be an engineer.

The next EIT exam will be given at the end of this quarter. It is too late to register for this test but you can take the next test at the end of next quarter by registering at the beginning of winter quarter. To register talk to a professor in an engineering department or contact GSPE.

The EIT is a comprehensive engineering test. It covers mathematics (including differential equations), electrical circuits, fluid mechanics, thermodynamics, dynamics, statics, chemistry, mechanics of materials, engineering economics and material science. Yes, this is a lot of material. Because of the large number of topics, GSPE sells exam preparation books. These review books can be purchased, at a discount, from Professor Lee or Horton in the MET department. It costs about \$80 to take the test so start studying now so you do not waste your money.

For general information see the EIT bulletin board at the MET office.

By John Ordway
SLC VP

Sigma Lambda Chi thanks Mike Guinan, Mike Noli, John Ordway Dwight Thomas, George Hemenway, and Todd Volheim for being tour guides for the American Council for Construction Education's visiting team.

The Construction Department was under going an accreditation visit by the ACCE. The team consisted of the following people: Mr. Robert E. Dahl (chairman), Professor Emeritus, Manhattan, KS; Pro-

fessor James W. Craig, Jr., (member), College of Architecture, Texas A&M University, College Station, TX; Mr. George Hodges, (member), Senior Recruiting McDevitt & Street Co., Charlotte, NC; Professor Troy McQueen, (Member in training), Auburn, AL.

The ACCE team's job was to examine the Construction Program. The team first interviewed Southern Tech school administrators. Then the ACCE Team had a tour of the entire school. Their next job was to interview Construction Department staff and various department heads. The team also examines student class work and projects. Most importantly the team interviews construction students. Finally the team met with alumni, em-

ployers and the advisory Committee members.

The effect that the accreditation has on a program is very significant. The accreditation assures an adherence to curriculum standards. The accreditation process not only forces a self examination of the construction program; but, it also recommends changes that will help the program.

The accreditation is very important for the students in that employers recognize the accreditation and know that the student has met rigorous requirements.

The Construction Department will know in February if they earn the ACCE accreditation. Hopefully, Sigma Lambda Chi has played a constructive role in this process.

THE TIME IS NOW.

MAD DOG #329
21.

But what makes 21 such a majestic number? Is it because you have to be 21 to drink a cold beer (legally)? I think not. Is it because 21 is a cheap way to get out of playing a full game of basketball? I don't think so. Or is it because Keith Taylor has 21 Yugoslavian chickens that dance nude around his mail box? No.

Xi Chi Chapter of Tau Kappa Epsilon would like to congratulate and welcome 21 new Fraters. They are as follows: Byron Cambell, David "Scarecrow" Power, Spencer "WOODY" Smith, Brian

Dominy, Keefe Newton, Dustin Messer, Tim Bollwerk, Jason Mitchell, Jeff Cason, Shawn "Crotch-MAN" (got the best big bro in the whole world) Roach, Jeff "call me what ever you want" Whittemore, Matthew "SEAGRAMS 7" TURNER, AL "stand on the table and HULA HOOP" Rogers, Jeff Cashner, Billy Earle, David Armstrong, Jaime "can't find a good place to sleep" Duff, Charlie Ruyle, Jason "Magilla" Lane, Gary Wise, and Zack "have you ever done a Mexican Boy MS. Hooters?" Kharrazi. We would also like to welcome the five spectacular women who have done such a fine job. How about a cookie? With fall rush, Tau Kappa Epsilon experienced an increase of 77% in QUALITY BROTHERHOOD. "All you can do is all you can do; and that's enough," Frater Philip Rampey. A special thanks is given to Ms. Peggy Catha who spoke at our RUSH conference during the summer. POSITIVE POSITIVE POSITIVE. As a dedicated Frater of Xi Chi, I would personally like to thank ALL THE FRATERS WHO

GAVE 110% during RUSH. ***How about that BEER & CHEER, was it the best ever was I mistaken!!!UP ON A HILL IN THE MIDDLE OF THE NIGHT.....

The TEKES would like to invite everyone to the annual FRIGHT NIGHT Halloween Party on OCT. 25th, maps will be posted. On Oct. 29 we would like to see everyone at the BLOOD DRIVE. Just stop by and drop a few pints off! We are also looking forward to kickin' some booty in our annual Alumni Football Game. "Adjustable chairs are good for your back," Frater Eric Williams (he thinks this is LIFE College).

As for sports, well-well-well... Sigma Nu put up a good fight at the football game but TEKE just cannot be defeated. And this the only warning!!!

Finally, the Fraters of XI CHI would like to congratulate Frater Rick Payne on his GRADUATION (and one HELL OF A PARTY-TEKE STYLE).

.....not for wealth, rank, or honor, but for personal worth and character....

TKE

STSBE

Southern Tech Society of Black Engineers

By Mirhonda Studevart

Greetings to all involved with the Southern Tech Society of Black Engineers (STSBE). Ya' down with Region Three? Yeah, you know me!! That was the call of the weekend for everyone that attended the NSBE Region Three Leadership Conference in Huntsville, Alabama. Activities included: creating a new Region Three slogan along with a song or step, group presentations by chapters on various NSBE issues, lectures on contributions of Blacks in science, and technical workshops

featuring NSBENET. All of the Officers agreed that the conference was very informative and would greatly benefit all STSBE members.

In other news, it's almost time to get hyped up (but not 2-hyped) for the Fall Regional Conference to be held in Nashville, Tennessee the first weekend in November. However, the next important NSBE date is Oct. 31 because there is a General Meeting that Thursday in Ballroom A at 12 noon.

Finally, just as promised, there is exciting news about the National Conference. It will be held in Manhattan, New York from March 25 until March 29. Our Treasurer, Miko Sims, is more than ready and willing for you to begin a money stash with her for Nationals. Well, this ends the lines for now. Remember to stay down with Region Three (Yeah, you know me).

BSU

James A. Hicks II

Well, I see that there are still some left before withdrawal date. We, at the BSU, are glad to see all of the freshmen and the college veterans back at the center. We have had a great first three weeks of school. On the 17th, Babbie Mason came and gave an awesome hour of singing and praising the Lord. If you missed it, you missed a great concert, refreshments, and fellowship with friends. After the concert, we had Braves Bash, which has happened for practically every Braves game. Come on down and join us to see the Braves scalp the Twins.

During the week at the center, we have a Tuesday luncheons, where a neighboring church brings food and someone tells us the Word. The food is always free and the fellowship is great. On Thursdays, we have TNT (Thursday Nights Together). There we play games, learn about CHRIST, and watch the Braves. We also have intramurals at the BSU so come on down and join on the flag football or our volleyball team. We also just got a brand spankin' new ping pong table and pool table.

This is the end of my little contribution to higher education. Come on down to the center. Have a good week and live long and prosper.

By R.S.B.
"Worminator"

Congratulations to our future brothers! They are as follows: Christian Koutouzis, Nick Besheo, Mike Cerio, Richie Craver, and Justin Dey. Hey guys always remember that you have joined a GREAT fraternity! We look forward to hanging out with ya'll.

Plans for our FRIGHT NIGHT social with the Alpha Delta Pi's are now in progress. The social will be held on November 1st at "THE HAUNTED HOUSE". Can't wait to

Sigma Pi cont on 17

Λ X A

Lambda Chi Alpha

By Alan Rountree
The old man

Now that rush is over and the quarter is really underway, it's time to study all week and make those grades. However, the weekends are our own and were meant for having fun.

Speaking of fun on the weekend, the Lambda Chi's just returned from an outstanding camping/repelling trip to Mount Yonah. We had an excellent turnout complete with the,

by now infamous, appearances of B. T. and Muirhead sleeping on that ice cold rock!!! (thanks guys!) Whether it was smashing cans on your head (that would not be advisable, SIR!!!), headbangin' on the camper, or chasing sparks from the fire, everyone had a blast, even the newly formed "hot dog club" who proceeded to eat everything in sight.

The Lamb Chop's are off to a good start in a vicious flag football season with a record of 1-1. We lost a blow out to the Wolverines (doesn't everyone?), but were able to come back the next day with a strong 18-0 victory over the Pi Kapps. Volleyball is a different story so we won't discuss it (yea, wait til next week). Watch out the Lamb's are on the warpath! Speaking of the warpath,

GO BRAVES, KICK LOWER POSTERIOR AND TAKE SUR-NAMES !!! Lambda Chi Alpha does "the chop" against Minnesota, led by Jeff "Ha, I got series Tickets!" Dewberry.

Thanks go out to all the Gamma Phi's and the A Dee Pi's who attended our start o' the quarter party, we'll see you again at our Halloween Costume Ball on October 29.

Congratulations are due to our three newest associate members, William Sikes, Sean Barr, and Greg Hasty, way to go guys! You won't regret it.

Well I'm running out of news so I'll close with a piece of advice, "Watch out for drunks while in Florida".

Sigma Pi

continued from 16

decorate!

The "PER" PORCH PARTY has come and gone, and a great time was had by all! (Gotcha Guys!) We drank, talked, drank, danced, drank, had a great time, drank, slept, drank, woke-up, and drank some more. Special thanks goes out to our brother Tommie Harrison for his great job organizing this event.

Beware everyone - the Sigma Pi's have fattened the goat - in preparation for "GOAT NIGHT '91". We can't wait to see Nick all dressed up. We are also looking forward to the

other "group" to sing their butts off. We are hoping that the judging won't be so one-sided as last year, seeing that the OVER-SIZED trophy was distributed last year under the mist of controversy. Guys don't forget the fact that part of being in a fraternity is having honor and pride. Let's everyone compete on the same level with unbiased judges and may the "best" REALLY win! Good luck to all Goat Night participants. SIGMA PI - WHEN ONLY THE BEST WILL DO !!!

CAMPUS FORUM

Yo Andy! Anndeeeeeey!

To Mr. Harry Mudd

I would like to comment on your letter about this Shawn Moseley character. I completely concur with your view of this horrible menace to society. I too feel that Shawn has caused a terrible contusion on my psyche.

He is always following me around wherever I go, and he won't leave me alone. He is constantly talking to me, though I never listen to him. He doesn't just "walk" around like you said, he "struts", of course trying to be like your hero Andy "the fig" Newton.

As far as picking on Antie Noooooon, that should never, ever be condoned. Endy is a mortal among mere saints! He really has the coolest sideburns (not like Shawn, who went back in time to grow his before Nady could ever think about it). He's constantly making a fashion statement with his non-coinciding attire (unlike that copy cat Moseley guy who's clothes never really match). I especially enjoy that cool button down with no sleeves!

I think Shawn Moseley really is P.S. Andy Newton is a Scientologist

Julian Wilson

trying to be just like Onpy Nuttin, with all this hat, bandana, and chronic halitosis thing.

Once I heard this Shawn character making fun of Mr. Nueton, he was doing a cool portrayal of Arndy imitating Chuck D. from Public Enemy, waving his hands up and down, back and forth and stuff and screaming "yea booooyy" really loud. Although I was really impressed, I was offended, Aundee never waves his hands back and forth when he does that!

One other point about this Shawn person, he copies Mamby Neutron all the time by pointing a finger gun, but little does he know, Anbea points a finger knife, not gun and says "Hey guy" and "Yo Adrian." Besides, Undie Nothin has had a lot more parking tickets than Shawn. Once again a little more than we asked for!!!!

Akhkjhyuy Nwifitieuun is my hero as well! Leave him alone Mr. Moseley or I will hunt you down and tie your shoes!

Yours in Andy-ness,
Shawn Moseley

PC Committee Bogus

Dear Editor,

I'm always amazed to find that an object, or an idea, can be viewed by two different groups or individuals and be perceived as two entirely different entities. There have been rumors of a "Sensitivity Committee," but now it has emerged from the shadows. I have trouble seeing how a minority telling a majority that they can't corporately invoke God's blessing on a particular function, is being sensitive. Ann Watson reports that we will be allowed to silently say a personal prayer. Well, thank yew! I guess the hordes under communist domination all these years have had religious freedom all along.

Doesn't our currency still say "In God We Trust," don't we still say "one nation under God" in the pledge, and isn't this the Bible Belt of a country that is mostly Judeo-Christian? Right! So it's pretty obvious to me that the most sensitive solution would be to allow the majority to corporately pray and allow the minority to be silent.

Extra Mindless Banter

Continued from page 15

By Psycho Dave
Drooling Psychopath

531729346

There once was a lonely beer (a long time ago in a galaxy far, far away). One day this poor little beer decided to make new friends, so it decided to wander though the desert aimlessly. After many weeks of hobbling along, it came upon the well known superhero, Long-Haired Leaping Leper. Long-Haired Leaping Leper greeted the beer with a mighty howdy-doo (after picking up his finger) and they quickly decided to rape and ravage the nearest town.

When they got to the town of Woodgrain, they first commandeered a couple of Harley Davidsons and then began

shooting everything in sight. The towns-people of Woodgrain were so frightened they all fled in rampant frenzy.

The only one left to face the lonely beer and Long-Haired Leaping Leper was the timid, plasticene Marshal Gumby. Marshal Gumby, having just recovered from his lobotomy, marched out to the center of town to challenge the daring duo.

Using the bottle opener at his side, Marshal Gumby delivered a swift blow to the lonely beer spilling his innards on the hard-packed dirt below. Long-Haired Leaping Leper then retaliated by punching Marshal Gumby in the kidneys, but to his dismay, he got his arms stuck in the soft, mushy clay body of Gumby. In an attempt to pull his arms out of Marshal Gumby, Long-Haired Leaping Leper accidentally ripped his arms out of his sockets and bled to death at the feet of Gumby.

With the two villains now out of the way, all the towns people flocked back to congratulate the victorious Marshal Gumby and get on with their pitiful, meaningless lives.

Would this make a great comic book or what?

FREE SCHOLARSHIP INFORMATION FOR STUDENTS WHO NEED MONEY FOR COLLEGE

Every student is eligible for some type of financial aid regardless of grades or parental income.

COMPREHENSIVE DATABASE: Our data base of over 200,000 listings of scholarships and grants represent over \$10 billion in private sector financial aid.

MANY AWARDS: Scholarships are available to students based on their career plans, family heritage and academic interests.

UNIQUE RESEARCH: Our research department has located many scholarships including awards for newspaper carriers, grocery clerks, cheerleaders and non-smokers.

Karl's Outdoor Recreation Center Under Construction

Campus Security gets new towtruck.-Photo by John Kuberek

By Stan Burton
With: d.s. & v.l.

The construction process has finally begun on the Outdoor Recreation Facility! The trees began being removed on October 3. Accord-

ing to Karl Staber, Director of Recreational Sports, the facility may be able to be used as early as next fall. The Outdoor Recreation Facility will consist of; 3 softball fields, 12 tennis courts, 3 flag football fields (which can also be converted

to a regulation soccer field), and a walking/jogging trail. The walking/jogging trail will encompass the entire facility. The walking/jogging trail will be able to be used by all of campus (including faculty and staff).

Presently, the intramural program has to share the baseball field with the Athletic Department. The new facility will serve a dual purpose. It will provide the students with their own facility, and it will allow the baseball field to be used solely by the baseball team.

There are other advantages to having the facility built. It will provide more playing fields, which in turn will provide more playing and practice time. Mr. Staber stated, "I will be able to schedule more games and have a more flexible schedule." This will provide a more active intramural program and a more suitable environment for these type of events.

The facility will be located below the lower west student parking lot. This lot is across from the mechanical and civil buildings. The entrance to the facility will be provided by a bridge, which will cross

the creek below the parking lot.

Although the construction process has begun, there are several steps to the overall development of the facility. The steps are as follows: tree removal, bridge construction, road construction, and field construction.

The tree removal is being handled by the U. S. Forestry Service. As stated earlier, the process has already begun. The bridge and field construction will be accomplished by using private contractors, once the trees have been re-

moved. The road construction will be provided by Cobb County.

The school is growing and the Outdoor Recreation Facility will be a welcomed addition. It will provide the students a modern facility on which to compete. It is only phase one of the recreational complex which will later include a \$7 million dollar indoor recreational center.

Over the next year look for the ongoing construction, it will be a good sign that Southern Tech is an up- and- coming college.

Braves

By Stacy Watkins
Sports Writer

This story is not of cowboys or wagon trains, but a story of how the mighty tomahawk prevailed in the west. For the first time since 1982, the Atlanta Braves have won the National League West, narrowly edging the Los Angeles Dodgers for the Western Division pennant.

The Braves turned out to be the Cinderella team of the Major Leagues this year. The Braves showed signs of promise early in May, only to fall 9 1/2 games behind the L.A. Dodgers at the All-Star break.

After the break, the Braves came alive as a team. Several players began to get into their rhythm and settled down to start playing like winners.

The pitching of young Steve Avery and Tommy Glavine has been outstanding. The two pitchers had the most wins for the Braves this season and are both in the running for the Cy-Young award. Also, these two are at the top of the league in base hits by pitchers.

Pitcher John Smoltz was 2-11 before the all-star break. After the break, Smoltz came alive winning 12 games for the Braves. Smoltz finished the season 14-13 and winning the game against the Houston Astros to help the Braves clinch the division.

Pitcher Charlie Leibrandt got hot when the Braves needed it the most in August by winning several key games. Who would have thought that this left-hander could strike-out 11 batters in one game.

Left-fielder David Justice was on his way to the home run title this year until a back injury put him on the disabled list for a month and a half. His return to the club brought confidence back to the team. In his return, he produced three game-

winning hits in his first seven games. By looking at his stats, one couldn't tell he only played just over a hundred games.

Braves center-fielder Ron Gant was Atlanta's big gun while Justice was out. Gant hit over thirty homers and stole over thirty bases to become a member of the 30-30 club. His performance under pressure greatly helped the Braves in the games down the stretch.

Out-fielder Otis Nixon gave the team something it hasn't had in many years. His base stealing ability put fear in the hearts of many catchers. Nixon filled David Justice's position while performing great defense and offense. Nixon was suspended late in the year for failing a drug test. Nixon was leading the league in stolen bases at the time.

Many people feared the worst when Otis Nixon was suspended. But, the experience of Lonnie Smith has helped this young team. Lonnie has three world series rings to his credit and has lots of play-off experience.

And then there is Terry Pendleton. This man is the foundation of the Braves infield. His leadership ability has helped this team tremendously. His personal trips to the mound have saved the Atlanta coaching staff several long walks. Terry's batting average was enough to help him win the National League Batting Title with a .319 average. It's hard to believe Terry was picked up as a free agent.

Manager Bobby Cox has turned this team around with his style of team play. Cox believes in letting everyone have a chance and it has paid off this year. Bobby Cox has turned this team around from a last place team to a division winner. Don't be surprised if Cox is named Major League Manager of the Year. This is how the West was won.

Southern Tech Athletic Association

"Runnin' Hornets
on road to
Kansas City!"

Hey, it could happen... support Southern Tech athletics by joining the Southern Tech Athletic Association. Membership entitles you to attend all regular season basketball games free (\$30 value), or save even more with a family membership.

Individual Membership \$15
Family Membership \$25

For more information contact any member of the association board or send your check made out to Southern Tech Athletic Association to Sandy Lloyd in MicroComputer Support.

Fred Hartfield, President
Sandy Lloyd, Vice President
Ron Schroeder, Secretary
Bob Dreyer, Treasurer

Board Members:
Judy Brooks Maurice Northcutt
Carol Callahan Jane Schroeder
Richard Cole Herb Smith
Jim Hamrick Charles Weeks
Kelly Hewitt Tom Wiseman
Vicki Langston John Ziegler

Tennis Anyone?

Anyone interested in playing on the Southern Tech Tennis Team please attend an important meeting on October 30th at Noon in Conference Room B in the Student Center.

If you can not attend this meeting please contact Coach Lee Tucker in Room E210 or call 528-7357 or 422-0159.

First choose your major. Then choose your weapon.
