SCT Gains BS in Technology Management

Here is Dr. Yancey, Dean of the School of Management. He is very pleased that SCT will soon have even more BS. -Photo by Bill Finnick.

By Marc Pruitt
It's not cheesy to be easy.

Beginning this September, Southern Tech will offer a new undergraduate degree in management. This program will focus on industrial applications and will be called the Bachelor of Science in Technology Management.

The objectives of the new management program include the preparation of Southern Tech students for careers in the management of technology-based enterprises and improving the competitiveness of business and industry in the state of Georgia.

The program will also make available a wide variety of undergraduate management courses at Southern Tech which students in other fields will be able to take advantage of. The Institution's value to industry and the state of Georgia will also be increased by the broadening scope of technology based instruction.

Like all management degrees, the Bachelor of Science Technology Management will include

courses in accounting, finance, and marketing. Upper level courses will include the management of people, resources, and quality. Courses will also be offered in improving creativity.

The most distinguishing aspect of the program is the fact that students will be required to take a proposed 25 hours of technical electives. Students transferring into the program from other technology schools should be able to transfer their technical credits.

Currently, the curriculum is still being decided on, but should be decided by the end of Spring.

It is hoped that many of the undeclared majors at Southern Tech will be the first to enroll in the program. In an internal study conducted at Southern Tech to evaluate student retention, it was found that 65% of the non-developmental studies students who entered Southern Tech as Freshmen during the Fall quarter 1988 were no longer enrolled as of Winter 1989. Most of those who transferred to other colleges chose those where business and management programs have

experienced the most rapid growth. The proposed program will provide the option of management on this campus, thereby increasing our retention of student population.

It is also anticipated that initiating the program will attract students who otherwise may not have enrolled at Southern Tech.

The job outlook for a management graduates currently looks good. The January 1990 issue of the College Placement Council's Salary Survey reflected a strong demand for management graduates at the undergraduate level which further supports the need for such a management program here at SCT.

According to Dr. Robert Yancey, Dean of the School of Management, "one of the most rapidly growing fields is still management, and the area of management which is most interesting is the industrial field. Management graduates will be qualified for positions in several areas of industry."

Hopefully, the new management degree will serve the needs of students as well as the demands of industry.

Budget Cuts Cost 29 Jobs at Southern Tech

By Bill Finnick
Rumor Control

On March 4, Southern Tech announced plans to meet operating budget requirements that will lay off 15 employees effective June 30. The staff members effected will have priority until March 13 to decide if they wish to apply for one of the currently vacant positions on campus.

In addition to the personnel cuts, operating supplies and

equipment for all offices has been slashed ten percent, while travel for non-instruction was reduced by fifteen percent.

No faculty positions will be cut. The only academic area even being considered for any cuts is the Apparel and Textile Engineering Technology Department whose desired growth has not materialized. The discussions concerning this area are about it being a separate administrative unit and do not affect

the education programs of the department.

Most schools in the Regents system that had to lay off personnel to meet the state's mandated budget cutbacks did so last August. At that time SCT's President Cheshier cut travel, supplies, and equipment, "hoping the economy would rebound and layoffs would not be required."

A total of 29 positions were terminated under a restructuring plan that was made with the input of the president's primary advisors, thirteen of these positions were vacant and one employee had previously decided to retire.

At the heart of the plan is the consolidation of departments that will trim the uppermost management positions by 11% and middle management by 35% school wide. Functions that overlapped or duplicated work are being combined.

The new Student Counseling and Career Services unit will combine Counseling, Co-op/Placement, Alumni Placement, Minority Affairs, Testing and

This is Lisa G who overcame adversity at the CAB sponsored Talent Show to win the \$50 first place prize- Photo By Dave Punk

other student services under Dean of Students Charles Smith. Co-op and Placement will now be under one director. These

changes eliminated five positions.

Budget continued on 3

Organization Spotlight:

Sigma Phi Epsilon Fraternity

By Billy Elder
Staff Writer

Sigma Phi Epsilon was founded at Richmond College in November of 1901. The fraternity was founded because twelve young collegians hungered for a campus fellowship based on Judeo/Christian ideals that neither the college community nor the fraternity system at the time could offer.

By March 4, 1902, the number of members stood at twenty-one out of the total 209 students enrolled at the college. Today, there are 256 active chapters and 17,310 Sig Eps on campuses across the United States. Over 180,000 men have been initiated.

According to Barry Bynum, the Alumni Board President of Georgia Eta, "Southern Tech's chapter was chartered on Valentine's Day, February 14, 1981 with 29 'Founding Fathers.' This date was chosen because of the Sig Ep's recognized symbol of the heart."

Before the chapter was chartered, it was known as the Sigma Phi Epsilon Colony of the Sigma Phi Epsilon Fraternity. The colony was founded in October of 1978 with seven members. The chapter

now has 130 initiates.

If you ever find yourself in the midst of the ever-changing student center, you may be lucky enough to meet one of the original founders of Georgia Eta. They still love to come around and impress students with their vast amounts of knowledge.

Even though the days of polyester leisure suits and bell-bottom pants are gone, the chapter still prides itself on the diversity of its membership. Membership is open to all faiths, races, and economic groups. A wide variety of interests exists, ranging from athletics to academics and everything in between.

In 1991, the Sig Eps placed third in both Goat Night and Greek Week. They did this not with vast numbers of people, but with a quality few with a common goal in mind. They simply wanted to compete and have fun in doing so. This sense to compete has carried over into academics, as well as athletics.

"Spirit healthy, Body healthy" is a concept that was revered by the ancient Greeks. Today Sigma Phi Epsilon strives to embody this philosophy through the challenge of becoming the Balanced Man.

To encourage those who feel they can meet the challenges of

becoming a Balanced Man to enter college, Sigma Phi Epsilon has set up a scholarship that will be awarded in the Fall.

According to Scholarship Chairman Richard James, "this scholarship will be awarded to the best all-around male from the state of Georgia who will be entering the Southern College of Technology." Applications will be mailed to high school counselors throughout the state. Mr. James emphasized "there is no obligation to join Sigma Phi Epsilon or any other fraternity on campus by accepting this scholarship."

Future plans of the Sig Ep Chapter include the awarding of brotherhood scholarships to members of the fraternity and, with the support of local and national alumni and a tremendous effort from the National office, a house will be purchased for the undergraduate chapter.

Chapter meetings are currently held at the school on Sunday nights at 7:30. A traditional journey to the local T.J. Applebee's usually follows. Here Chapter President Sid Miller demonstrates the greater advantages of being a brother in Sigma Phi Epsilon.

For People on the Move

An Invisible Man is Not Really Worth Seeing

By Ed Hardy
Ask me out. I'm available.

This flick shouldn't be named *Memoirs of an Invisible Man*, a better name would be *Memoirs of a Dull Movie*, which is what I got from it. In case that introduction doesn't clue you in, I wasn't too thrilled by this picture.

Chevy Chase plays a stock analyst who gets trapped in an out-of-control scientific experiment which renders him, his clothes, the building he is in, and a good portion of real estate invisible.

Chase's character does everything he can to prevent discovery of his unique complexion problem, but some CIA agents find out about him and want to use him as the world's most perfect espionage agent/assassin. But our hero refuses to have anything to do with them, so to prevent him being used by some foreign power against America, these agents start devoting all their actions toward killing him.

Somewhere along the way he meets up with a documentary filmmaker played by Daryl Hannah,

whom he falls in love with (surprise, surprise) and vice versa.

This movie really dragged in a few places. OK, it dragged in a lot of places. And it had some holes in the plot you could have tossed a cat through.

But it did have some amazing special effects. I mean really excellent stuff. The sight of an invisible man smoking is one I won't soon forget. It is pretty obvious a big truck-load of money was spent on special effects.

Unfortunately, nifty visual tricks just can't make up for a weak plot, lame villains, limping dialogue, slow pacing, etc.

Why do people think Daryl Hannah is beautiful? She looks like a man. And a not very handsome man, at that. She has a big lumpy nose. Her acting is OK, I guess, but there are better looking women who can act better. So why does she keep getting parts in movies? Don't ask me.

Another thing that bothered me was that it was narrated by Chevy Chase. Narrators get on my nerves; they are really distracting. Most

movies get along just fine without narrators. Adding a narrator in just seems like an admission that your audience can't figure out what is going on in your movie without help.

Now, my willing suspension of disbelief just barely extended to cover the concept of rendering a

person invisible (without even killing him), but a couple of other details did bother me.

One, the way you see is by light being absorbed by the back of your eye. If the back of your eye were invisible, as it was in this case, no light would be so absorbed, and you would be blind. Of course,

this doesn't happen in the movie.

Two, the food he eats, which isn't invisible, is carried to all the cells in his body. So a ghostly outline of a man should gradually appear, and he should be completely visible after a few years. Of course, this also doesn't happen in the movie.

Budget Eliminates 29 Jobs continued from page 1

Support is to be absorbed by the Office of Planning and Information Technology, eliminating four positions. Likewise Business Services will lose four positions by being merged with the Comptrollers Office.

Enrollment Services, a new unit, will consolidate the Admissions, Registrar, Recruitment and Financial Aid functions under the Executive Assistant to the President, Sam J. Baker.

Six positions were eliminated in other areas along with five positions that were eliminated last fall.

According to Dr. Cheshier, "every employee of this college was asked for their input, and many did reply." The Faculty Senate and the new Staff Coun-

cil also drew up proposals to effect the cuts most efficiently.

Southern Tech, under the direction of President Cheshier, has made a commitment to change the distribution of resources from the current 51/49 Instruction to Support ratio to 60/40.

Students will notice slight changes in support they receive from the college in different areas, although quality of support will not change. This will be done by, "finding ways to be even more productive and supportive of our students," according to the president.

Album Review Gives *Sting* Readers a Headache

By Dan Punk & Dave Punk
Staff Pop Tart Sponsors

For the past few years, Headache records has been putting out singles for their local New Jersey Oi! scene, and to this date they have yet to put out a bad single. It must just have something to do with good taste on the part of the owner of Headache records, who also is in one of the label's best bands The Wretched Ones. Unfortunately, many of the early singles put out by Headache are no longer available due to the fact that they sold out. The good news is that a record company in Germany, Dim Records, in conjunction with Headache has put

out *American Headaches* an album containing five of the seven out-of-print singles.

The first single on this LP is the first one put out by the Wretched Ones. These four songs give you a real feel of what Oi! is supposed to be. If we hadn't known better we would have thought that this came from blimey ol' England about ten years ago. It didn't, it was released in New Jersey about seven years ago. The two best songs from the Wretched Ones was "You're a Prima Donna" slagging everyone from Cher to Tina Turner, and "I Hated School" which lyrically sounds like Social Distortion.

The next single is by a band

billed as being the longest surviving Oi! band to date, Niblick Henbane. Niblick belts out four angst-ridden Oi! classics on what was their first release. Included is a Punked-up remakes of "Tallahassee Lassie" and Anne Murray's (actually, we think she wrote this song, but we're not sure) "Danny's Song."

The second side of the album begins with the latest EP from a New Jersey Oi! band which is really from Connecticut and has more of classic Punk sound than an Oi! sound. We're speaking of the Wussies and these four songs from *New Age* represent one of their strongest offerings to date.

If you thought Johnny Rotten

was whiny wait to you hear Jack from the Wussies. The vocals are about the only thing wussy about the music, it's all hard-driving kick-butt Punk. Included here is a song about Karen Carpenter called "Karen" which ends with someone choking while singing "Close To You." Funny, funny stuff.

The next two songs come from Mental Decay. Mental Decay have more of a metal edge to them than the other bands on this compilation, but they are good none the less. These two make for great anthem, fun to sing along with music.

The album closes with two songs from the Burnt. From the

Charlie Brown single. Here they do a witty cover of the Platters "Charlie Brown" backed with an original song of theirs called "I Wanna Pet My Cat (With a Bat)."

If you are into Punk/Oi! stuff we suggest you get your hands on a copy of this compilation, it represents some of today's hottest talents as they sounded a couple of years ago. This is one of the best compilations we've heard. Highly recommended.

American Headaches, a punk compilation.

Marshall's-Just Like Mom Used to Thaw

By Westly Hetrick
Hire Me-Now!

Those of you who have been paying attention to the restaurant reviews in the newspaper this quarter have probably noticed how we've been leaning towards "good ol' homestyle country cookin'" all quarter, and this issue is no exception. Our review this week is for Marshall's Country Kitchen, where everyone assures me there is the worlds greatest macaroni and cheese.

Now I don't know about you, but personally, when I go out to eat, the last thing I want is macaroni and cheese. That and ramen noodles is what I eat when I can't afford anything else, and if I'm eating out, I can afford something else. Besides, the only claim to fame I can think of more boring than "worlds greatest macaroni and cheese" is possibly "worlds greatest ketchup." Who cares?

Anyway, Marshall's is just down and across the street in the same shopping center with Big Star,

and this really neat dollar store that's run by an angry Arabic woman. She scowled and sneered at us as we played with all the dollar toys and I think secretly she wanted us to steal something so she could cut off our hands.

But back to Marshall's, where the service was much friendlier. It's pretty much standard cafeteria on the inside. You go through, stand in line, pick out your meat and three vegetables, sit down and a big haired woman asks if you want rolls or corn bread and what you want to drink, tea or coffee. All this for a low low \$4.35, including tax. Not bad for a filling, nutritious meal.

Between me and my dining companions we had a little of everything. Country fried steak (not bad), Salisbury steak (better), boiled cabbage (with lemony fresh detergent seasoning), green beans (just like mom used to open and reheat), corn bread (pretty good), and, of course THE WORLD'S GREATEST MACARONI AND CHEESE!!!!!!!

Frankly, this macaroni and cheese changed my life. It showed me that there can be beauty and joy in all our lives, and that the pursuit of excellence, even in the mundane, can lead to happiness and fulfillment. If only the Arabic woman next door would come over and have this macaroni and cheese just one time, she would greet her customers with a smile and sing the glories of heaven on high as she restocked her shelves with three foot tape measures and forty two ounce plastic cups.

OK, perhaps all this is an exaggeration, but it really wasn't bad macaroni and cheese.

On a scale of one to ten, I would have to give Marshall's a five. The service was good and the food was cheap and plentiful, but not always the tastiest. I remarked to a friend recently that the food I had at public schools really wasn't that bad, and if I could still get a meat, vegetable, fruit, dessert, and milk somewhere for 75¢ I'd be there every day. Well, Marshall's is almost the same, just more expensive.

International Students Mill About Mardi Gras

By Hayden Wakeling
International Reporter

How can anyone really describe Mardi Gras in New Orleans? The best description that someone told me before I went was that it is like a whole city decided to hold a party!

So on the 28th of February, a section of the Southern Tech International Association set out for New Orleans just to see how good a party it was!

The trip down was pretty uneventful, except when someone decided that in one gas station that he was Indiana Jones and picked up a whip that was for sale. You can

guess the rest!

The biggest relief when we arrived was that the Motel did not resemble something out of 'Psycho,' though they could of improved the color scheme. Baby blue and pink are not too friendly on the eyes!

That night the whole group set out for something to eat, but that mission was cancelled as soon as we hit Bourbon Street!

An old man playing a saxophone greeted us into this infamous strip of tar, but it took another hundred yards before we really hit Mardi Gras.

This is the best I can really explain it. Everyone was pushing

and walking over people to catch a string of beads. There was a shortcut, show a vital part of the female anatomy and the beads would be heading your way.

The next day was to be the most eventful, as it was the only full day we spent in New Orleans. First thing was the procession with the floats throwing out even more beads. The art of catching the beads was to jump up, and if you failed to catch any, look on the floor very quickly when you landed. After that the main group split up as everyone decided to explore different parts of the French Quarter.

The group I was with made

their way down to the Hard Rock Cafe and up to the bar, Pat O'Brians. Unfortunately, to get into the bar you had to wait for a hour, so we decided to eat at a Cajun restaurant next door.

At the restaurant an old tradition was taking place. In every leap year on the 29th of February a woman is expected to ask a man to marry her. This happened while we were there, and the man did accept so this made the restaurant a happy ball of fun.

Meanwhile somewhere else, one of our members was being insulted by a Louisiana police officer. To quote the upholder of law,

the words he uttered was 'Foreign F****r'. This attitude was taken because someone wanted to only drink water when they went into a bar!

The rest of the night was basically catch the beads, and at five on a Sunday morning we decided to head back to the sunshine hills of Southern Tech. Again an uneventful trip as most of us were asleep.

Thank you to everyone who went for making it a good time, to the drivers without whom we would never have gotten, there and to Jimmy for organizing the whole trip.

SCT Students Discover a Frictionless Surface

By Dave Punk
Investigative Reporter

In technical circles the pursuit for a frictionless surface has been going on for ages. Scientists have long sought ways in which to test the actions of objects upon one another when moving along a frictionless plane. They have constructed giant air hockey tables in order to reduce friction, along with various oils and other lubricants used to produce nearly frictionless contact between objects. They have never succeeded in producing a truly frictionless situation. That is until now.

Here on the Southern Tech campus, advanced engineers in conjunction with the nation's finest in construction technology have installed a frictionless bar of steel near the main entrance.

Cleverly disguised as a handrail in order to prevent other American technological col-

leges, as well as foreign military regimes, from stealing the 'anti-friction bar' technology, the bar was originally intended to be kept secret until authorities deemed it appropriate to reveal to the world. The secret was prematurely discovered by one of Southern Tech's finest alumni (who, in order to preserve his confidentiality, will be referred to as 'Cavernous Esophagus' in this article) when he attempted to innocently slide down the rail to avoid the laborious task of descending the stairs. He knew something was awry when he hit the bottom of the stairwell at warp 9.

Cavernous Esophagus then contacted this reporter to convince me of the alleged 'anti-friction bar'. At first I was skeptical, being a veteran rail-slender I was aware that he may have merely found what we in the rail-sliding sport like to call a 'fast rail'. How mistaken I

knew I was as I scraped myself up from the pavement at the bottom of the rail which I had just struck at warp 8 (slightly slower than Cavernous Esophagus' first attempt as I was able to brake slightly).

Not only is this discovery a great leap forward in the technological sciences, but it is also an excellent find for rail-riding thrill seekers everywhere. No longer must those steel-bar passengers be afflicted by those sticky start and stop rides. No longer must they travel to distant lands to find a good handrail. It's all right here in the back of the Student Center on the new stairwell that leads from the big screen T.V. area to street level.

Oh, by the way, this reporter, *The Sting*, and the Southern College of Technology are not responsible for injuries incurred while investigating the 'anti-friction bar'. Leave it to the professionals.

No, this is not the frictionless surface. We could get into a liability suit if we showed it to you and you broke your neck - Photo by Jack Silver

$=^{\wedge}_{\infty} \neq \pm \geq <$

Math Stinger

$\div \sim \int \approx \Omega \# \S$

by Dr. Joel C. Fowler
Assistant Professor of Math

The answers to the chain problems of last issue are as follows. On a seven link chain it is only necessary to open one link, the third, in order to "make change" for every dollar amount from 1 to 7. For a twenty link chain it is only necessary to open two links, the fourth and the eleventh. Finally, if three links are opened then the longest chain possible has 63 links. In that case you would open the fifth, fourteenth, and thirty-first links. Correct answers were received from Thom Sukalac, Alan Gabrielli, and Rick Muller.

Still no solutions have been received to the chessboard puzzles. I will give the solution to the first one and leave the others open. The solution I give should provide some clues as to how to solve the remaining problems.

Suppose a chess piece can move only one square horizontally or vertically at a time, i.e. a king that cannot move diagonally. Suppose that on a standard chessboard two squares at opposite ends of the same diagonal are deleted. The first puzzle was to determine if it possible for the king to visit every square and return to his starting point. The answer is no, but the difficult part is giving a convincing argument that explains why no path, no matter how convoluted, will work. The statement "I couldn't find one" is certainly not enough. One way to see that no path will work is to observe two important facts. The first is that

the "king" always moves from a square of one color to a square of another color since it only moves horizontally and vertically. Thus the colors (black and white) must alternate in any path that the king takes. If the king could cover every square once and return to the starting point this alternation would mean that the board would have the same number of black and white squares. The second observation is that the two deleted squares at opposite corners must be of the same color, either both black or both white. Since the board originally had 32 black and 32 white squares the deleted board will have an imbalance of two squares, 30 black and 32 white for example. Hence no path is possible.

The above solution should give ideas that are useful in solving the following variations. Suppose that the board is m squares by n squares with no deleted corners. For what values of m and n is it possible for the "king" to visit every square and return to his starting point? Suppose two corners diagonally opposite are deleted from an m by n board. For what m and n is it possible now? In each case you should provide the values of m and n for which it is not possible (with an explanation as to why) and the values of m and n for which it is possible (with some general diagram that shows how the path is constructed).

All answers should be sent to Joel Fowler in the Mathematics Department. Correct answers and the names of the first to find them will be printed in the next issue of *The Sting*.

Jack Silver - On Drugs

By Jack Silver
Corpulent Elderly Flatulence

Recently there have been a number of changes in the drug laws of the Sovereign State of Georgia which are aimed at reducing the involvement of college students with drugs. Chief among these is the loss of academic credit for the quarter in which a person is convicted of a drug-related felony offense.

This seems to be based on the idea of putting the fear of God into someone to prevent them from getting involved with controlled(?) substances. It might even work. (As an aside, with a smart lawyer you might be able to get the case delayed long enough so that you graduate before it goes to trial. While this would work best for a senior, it could be well worth a try for underclassmen.)

At first blush this would seem to be another tool to use in the fight against drug abuse, especially when combined with the loss of financial aid for a drug conviction. Throw in the probable loss of employment and the good possibility of losing your driving privileges and it is a pretty frightening scenario.

After all that you might even welcome a nice long jail term because your chances of surviving on the outside would be pretty damn slim.

Too bad it won't stop anybody from getting involved in drugs if they so desire. In the long

history of human jurisprudence nothing has been found that is an effective deterrent against criminal activities if someone is so inclined. A fine example of this was the pickpockets in the crowd at every hanging in merry olde England, this at a time when the punishment for being a pickpocket was hanging.

The gist of all of this is that the increasingly stiff punishments for drug-related offenses won't slow things down a bit, and in fact could well force a casual user who would give it up in a few years into becoming a hard-core full time drug pusher. When you have lost your drivers license, your job, college credits, financial aid, and even the chance of joining the military, you may not have any choice but to turn to the drug world in order to make enough money to survive.

The insanity of continually stiffer punishments does nothing to address the causes of drug abuse and causes people to have ever greater contempt for the law and society in general. People begin to get the feeling that laws are written exclusively for the benefit of the well-off, as a result they say "screw it" and go along their merry way.

We won't begin to see a reduction in drug use until a rational approach to the problem emerges from the vote-buying hysteria which now characterizes drug laws and we begin to ask the very people who are the most involved in drugs why they are.

Bill on Drinking and Life

By Bill Finnick
WSIC? WSIC?

The next four months here at Southern Tech promise to be challenging at the very least. Here are some of the challenges I see coming and some new Life notes:

•Presidential politics. *The Sting* cannot go on record supporting Paul Tsongas for his honesty and actual realistic plans without giving room to all other candidates.

One lesser known candidate is Elijah Anderson Omega of the 'For A Better World Organization' who has mailed us his entire platform. If your interested contact *The Sting* for a copy.

•Layoffs. I have personally been there when the pink slips were handed out and nothing can be said to console those affected. It was done in a nicer way than found in the market place where you're here today, gone tomorrow. At least they have until June 30 to look for employment, and then six months of undisputed unemployment compensation.

•Substance Abuse. I am no saint of this evil yet I find it intriguing that people make a banner condemning drinking and driving, while intoxicated, and then drive home.

I would like to compliment the many smart people who plan their partying to include designated drivers, places for people to crash (sober-up), or stop drunks from getting behind the wheel.

•Rumors. Since becoming the editor of the *Sting* the biggest problem I've had has been wading through the flood of unsubstantiated rumors that are constantly flying about this campus. Good natured rumors can be fun but many of the recent group have really been in poor taste or emotionally retching to the subjects.

Imagine a woman being told her husband had

just been one of those laid off, when in fact he had not. If the lady had been of weak emotional fiber it could have caused serious side effects in the trust she has placed on her husband's career. Do us all a favor, if you are not positive of the facts don't repeat what you hear - and better yet if it doesn't concern you don't repeat it at all.

•The economy. I myself am guilty of not supporting the economic recovery of the state. I have withheld \$110 in spending that otherwise could have been used to fuel the state out of the recession. Or at least that's what I remember from Warsi's class. I therefore pledge to continue to spend that ten dollars a month at the barber shop now that my one year experiment in hair growth is over.

•Life misunderstood. Recently the editor of the Life College paper contacted me about purchasing ad space in *The Sting*.

It seems we have some misconception of chiropractic here at SCT. Not that thinking we fix toasters here could be misconstrued as a slight at the EET department.

While she never made our appointment she did observe that *The Sting* has true freedom of the press, for we can say things they would never dream of printing. They can buy their teams but they can't buy us, and you can quote me on that one.

•A final note on Life. A state senator from Albany is trying to pass a law that would require Life Chiropractic students to have to attain a undergraduate degree before working for four years on a Doctor's degree.

Life is dead against this.

They point to the sponsor being a member of a different professional association. This is the type of legitimacy in their programs that could devastate the college.

Ignore this insult.

Faculty Scapegoat:
Dr. Thomas Wiseman

Aggressive Disorganization by:
Willie Finnick

The Sting is published bimonthly for the students, faculty and staff of the Southern College of Technology. *The Sting* is an official publication of the Southern College of Technology. The ideas expressed herein are those of the editor or of the individual authors, and do not necessarily reflect the views of students, faculty or staff of Southern Tech or the University System of Georgia.

ADVERTISING INFORMATION

The local advertising rate of *The Sting* is five dollars per column inch for ads smaller than a quarter-page, and four dollars per column inch for all others. Ads for service and professional organizations on campus are free, but a run-date is not guaranteed. To guarantee one, ad rates are one half the local advertising rate. Advertisements must be submitted by the deadline printed on the front page. To reserve space or for more information, contact *The Sting* at (404) 528-7310.

LETTERS TO THE EDITOR

The Sting welcomes letters praising or criticizing editorial policies or opinions. Letters should be typed or neatly printed, double spaced and should not exceed three hundred words. Letters must include a name and address or phone number for verification purposes, but names will be withheld on request. *Unsigned letters will not be printed.* *The Sting* reserves the right to edit letters for style, content or size. All letters are run on a space-available basis. Please send all letters to Bill Finnick, *The Sting*, Southern Tech, South Marietta Parkway, Marietta GA 30060-2896, or to *The Sting*, Campus Mail, or STING @ SCTNVE.BITNET, or drop them in the box beside our office door, top floor of the Student Center by the big screen TV.

ORGANIZATION ARTICLES

Articles written by organizations to inform the campus of activities and events are welcome. Articles must be submitted by the deadline on the front page and typed on a 3.5 inch computer disc. Please limit articles to two hundred words. All such articles are subject to editing for style or content, and are run on a space-available basis.

JOINING THE STING

Any student paying Activity Fees is eligible to join *The Sting*. We prefer women who have passed English 111. Come to our meetings Thursdays at Noon, in the *Sting* office beside the big screen TV, upstairs in the Student Center, or call 528-7310. Staff members drink beer because it's the healthy alternative.

Consensus Editorial

Somewhere between our mail box and the office Bill lost a letter about students heckling Coach Peridees at the SCT-North Georgia Game. The writer, who wished to remain anonymous, chastised the students for being rude and not supporting the team.

While we, *The Sting*, support the athletic teams in all their endeavors we find it difficult to support George.

His language would make the worst *Sting* editorial seem like a prayer compared to his drunken-sailor-like ravings. Furthermore, at that particular game he threatened to "meet" a student outside after the game.

Have the lessons of 'winning at all costs' that have rocked other colleges in this nation been lost to our campus leadership? If athletic programs are supposed to build character, we wonder what the people George produces will be like?

MINDLESS BANTER

Page 9

Dave Does A Column About Columns

By Dave Punk
Staff Columnist

What is a column? What is a columnist? A column, for starters, is a large, usually cylindrical, structural unit designed to hold up ceilings and such. No, but seriously, a column is a vertical block of type within a newspaper, and therefore a columnist would be one who writes a vertical block of type within a newspaper. But isn't a columnist more than just that, or, at least, shouldn't he be?

What are the 'duties', if you will, of a columnist in a paper such as *The Sting*? In reality it is entirely up to each individual columnist to determine his standards, his topics, and his style of presenting his views on those topics. That is really how it should be too. That, however, cannot entirely constitute a columnist.

Firstly, a columnist must present his material in a readable fashion. There is no use in presenting your views in a column if nobody can read it. I don't just mean physically read it, I mean easily read and enjoy it, even if they don't necessarily agree with the views. That, in fact, goes for just

British Student Scalps Tickets

By Hayden Wakeling
Ticket Scalper

Looking down the classified pages in the newspapers you can see the hundreds of advertisements for concert tickets which were meant to be sold out weeks before.

Most often the prices are not displayed, the advertisement just tells the prospective buyer to contact a phone number and all will be revealed.

These names and numbers appear frequently in the classified ads, in fact the people behind the ads appear to have tickets to every major concert in the forthcoming future.

This would be ideal for the customer if the scalper was like a ticket outlet, such as Turtles, but when asked to quote a price the price given is often at least twice the original face value.

Its not only music concerts that are singled out for this treatment. Sports events are also a prime target. Events such as the Superbowl and the World Series are rich pickings for a ticket scalper. In England, Wimbledon is usually flooded with scalpers but in recent years the police have been able to clamp down on the illegal, (as Georgia it is illegal to sell a ticket more than the face value), sale of tickets. In fact the Wimbledon Tennis Club offer a reward for information that leads to the arrest of a scalper. At one sporting event in England the unlucky sport fans who did not have a ticket and could not afford the inflated price beat the crap out of scalper!

We would not have the need for scalpers if people took a stand and did not pay the inflated price, with the market taken away the scalpers would not be able to survive.

Concerts, especially the major concerts, are expensive enough nowadays as it is, so anyone who decides to pay an inflated price, sometimes many times the face value, must be out of their minds!

I suppose though that the scalpers are only taken advantage of the system of free enterprise that exists in the good old US of A and should be congratulated for being able to create a decent profit margin! In fact, why not give them a business grant to help with the outlay involved with buying the tickets. They are only providing a service, people will always want better seats and they provide them.

I suppose it depends on the size of your wallet whether you think that scalpers provide a valid service, but if you ever do decide to use a scalper consider whether the event is really worth the money.

about everything presented in a newspaper. A poorly written column will simply be skipped over by the reader, and is nothing more than dead space within the newspaper.

A columnist must also determine his standards, in other words he must determine what worth his column will be. Don't get me wrong, a column doesn't have to be about the growing rape statistics on college campii (or campuses) or some other such weighty topic for it to be worthwhile. If a humorous column makes the reader laugh, then it has served it's purpose, and since it has entertained the reader then it is most defintely worthwhile. Usually, if a column gets the author's desired reaction from the reader, whether it be to laugh, think, or to merely be entertained, then it is worth it's space and ink.

Topics can make or break a columnist in many cases. Topics also cause most regular columnists the greatest amount of headaches. Trust me, you can't just sit down at a computer and whip out a column in no time at all. Well, not every time anyway. The topic must be interesting to the readers as well as the columnist, but foremost to the columnist. A columnist writing on a topic which is not very interesting to him

will be about as interesting to the reader as your typical high school term paper.

Style is as important in columnizing as any other attribute. If it wasn't for style, each column would sound alike, so what would be the use. Style is what allows the columnist to add some artistry to his work, and gives the reader a variety, which, may I remind you, is the spice of life. In one issue of *The Sting* Bill can bitch, Andy can confuse you, Ed can egg on warring factions, Hayden can express his views, and Jack can ramble on, and on, and on, and on...

You know, I just read over this column and it sounds like Dave's guide to aspiring columnists, which seems just completely goofy now that I think about it. Well, what the hell, this is my column, and if I want to write about columns in my column I will. Yes, I know I left myself open for criticism on any of the points I brought up above, but hey, I can handle it. So until next time, stay warm, get plenty of rest, take your medicine, and drink plenty of liquids (as opposed to drinking plenty of solids).

CAMPUS FORUM

Letters to the editor are welcome on any subject or concern. The letters need to be typed or neatly printed, double spaced and should not exceed three hundred words. Letters must include a name and address or phone number, but names will be withheld on request. Unsigned letters will not be printed. All letters should be sent to Bill Finnick, The Sting, Southern Tech, South Marietta Parkway, Marietta GA 30060-2896, or drop them in the box beside our office door, top floor of the Student Center by the big screen TV.

Jessica Changes Her Opinion

Dear SCT students,

In my three years here at SCT I have had the privilege to meet many of you. Some of you and how we met are more memorable than others, but each person special in his/her own way. I am writing this letter to apologize for a mistake I made a little over a year ago. . . regarding SCT men and a certain part of their anatomy.

I was wrong to make such a hasty judgement about you guys. In truth, most of the guys at SCT are charming, well-spirited, handsome, and shall we say "well-equipped." It has become more and more apparent that you guys do have "the balls" to ask SCT women out- it just takes a while for ya'll to get the balls rolling, so to speak. Furthermore, I think almost any girl should consider herself lucky to catch any one of you charming fellow's attention. Granted there are exceptions to every rule, for the most part all SCT gentlemen are worth the time and effort to win their affection. Almost every SCT guy I've come across has been intelligent, fun-loving, and eventually someone I was delighted (and privileged) to call a friend. I am sorry for the "mistaken identity" before, and thank God I was wrong.

Ladies, it goes without saying that ya'll are awesome individuals, too. Just remember that the SCT men are fabulous fellows and worth spending time getting to know. When was the last time you took a look around? We are fortunate to have so many cool (single and HANDSOME, too!) men at our fingertips. So, as the old commercial says. . . why don't you reach out and touch someone? I know you'll be glad you did!

Best wishes to all of you!

Sincerely,
Jessica E. Pittman

Techfest Delayed Until 1993

Dear Campus,

Each year since 1986, TECHFEST has grown in diversity, quality, and in numbers of people attracted to our campus. It has become a proud tradition that brings together every facet of our college. Everyone who has been associated with TECHFEST has a major investment in its reputation for excellence.

We want to maintain that reputation and keep TECHFEST a very special event. After much difficult deliberation among many people, it has been decided that TECHFEST should next be presented in 1993, and not be held this spring.

It would be difficult, if not impossible, to conduct an excellent TECHFEST this spring. Human and financial resources are more limited than ever before. The entire front of the campus is very much affected by major construction, which presents a potential safety problem for large numbers of people, many of them quite young.

We have considered many options, including holding a "smaller version" of TECHFEST or delaying it, but none of the considerations appeared to be viable or effective substitute for our major spring event.

We are aware that breaking the continuity of TECHFEST may be of concern; however, we feel that everyone will come back more motivated than ever a year from now.

Beverly D. Golden
Director of Development and College Relations

A Thank You Letter

Dear Faculty, Staff, and Students,

The beautiful basket of flowers you sent in remembrance of Lance was especially meaningful to his family. Southern Tech was an important part of Lance's life. We had seen him really get excited about his school work in recent months. So it means a lot to us that you saw fit to show your affection for him in this way.

Thank You
Don, Connie, & Kellie Linscott

ADPi

By Shanna Fernandez
"Outgoing President"

Hi everyone, well here we are at the end of another Quarter, and my term of office. I hope that everyone did well in their classes.

February 22 was our Annual Crush Party. What a Blast! Thanks Ken for playing some great tunes. And Thanks to Kirk and Hunter for a great show! K.C., you did a terrific job at planning and decorating, even if Tim did blow the balloons up too big.

Congratulations to our new Delta Sisters: Angi Carroll and Kim Odom. Welcome to "Delta-hood," We Love Ya!

Now for the reason that I asked to write this article instead of Jess. To say thanks.

To Pam, Debbie and Shannon- Thank You for your support. Congratulations Pam, we're proud of you!

To Beth- Thanks for making my job easier. Even though you had to be QB sometimes I think that everyone understood. And thanks for helping me complete my thoughts!

To Heather- Thanks for getting the AR under control. Good Luck next

year, and don't hesitate to call.

To Wendy- Thanks for being you. Thanks for all of your work with the Alpha's. I hope you're back Fall Quarter.

To Stacy- Thanks for spending 16 hours in a car with me. And for all of the hard work with all of the new programs.

To Leslie- Boy have you and I been through it! Best of Luck with Panhellenic- you'll be fantastic.

To Christy- You will be great with the Alpha Members, I wish you tons o' luck.

To K.C.- You did a tremendous job with Social 2 down 1 to go. Good luck with Membership Selection.

To Jess- Thanks for being an understanding little.

To Kimberly and Melanie- Best of luck to you both. Just remember if you don't know—ASK!

To all of the other Sisters- Thanks for all of the support and for learning to decipher my "Somebody Make a Motion" look.

Thanks Vicki, Kelly, Barry, and all of the Building Managers for answering questions, comments and complaints.

Thanks to *The Sting* for letting me go on like this.

Best of luck to my Sisters, Past, Present, and Future, next year.

Loyally in Alpha Delta Pi,
Shanna

BSU

Baptist Student Union

By James A. Hicks II

Hopefully you all haven't missed my Nobel Prize articles because of some technical difficulties. Well if you have, let me recap you on the B.S.U. agenda.

March 7th was the day of our Volleyball Mission Drive. It was a great day for volleying and hope next years Drive will be even more successful.

April 3rd is the deadline for registering for the Spring Conference at Rock Eagle, G.A. The fee is forty dollars and that includes a place to stay, entertainment, and the wonderful Rock Eagle food (NOT). I had to get at least one Wayne's World saying in this article.

Anyway, our regular schedule is as follows. TNT (Thursday Night Together) at 7:30 and our regular Tuesday luncheons with free food for the masses. Hope to see you down here soon.

A little reminder; next quarter there will be a pool and a ping-pong tournament. So come on down soon before it passes and have a day!!

TKE

By the Teke Tracker
Histor #338

With a very active undergraduate program and a strong Alumni association, Xi Chi chapter of Tau Kappa Epsilon Fraternity has been a leading fraternity at Southern Tech for over 19 years. On February 24, 1992, Xi Chi chapter celebrated its 19th Anniversary !!! TKE sponsors an Annual Basketball Run for Cystic Fibrosis, the school's quarterly blood drive, participates in the Marietta City's Clean and Beautiful Adopt-a-Highway Program, where each sponsor adopts a 1 mile stretch of roadway. TKE is currently the largest fraternity on campus with over 50 active members. (Hell Yeah!)

We said in the previous issue we'd let you know how RCB turned out so here it is: This year's 19th annual Red Carnation Ball was held on February 15th. A large number of Alumni were there (some of them more there than others). Elvis visited too (some of us wish he hadn't). Some of the night's awards included:

Tommy Crumley Award, Russ Bagwell Top Teke, Chris Kittrell Top Alumni, Tommy Miles Gerald Taylor #19 was presented a Jersey commemorating the 19th RCB

By Lance Richardson
"Swing!"

February 28- March 1, 1992 marked the dates of the 33rd annual Georgia District Circle K Convention in Augusta, Georgia. SCT CKI sent 6 members and we raised hell. We made many new friends and learned about our impact on the district level. Friday night there was a mixed drink contest, a talent show (more like a lack of talent show), and an auction where I was bought by two girls from Dalton. On Saturday, there were several workshops, a luncheon, the President's Recognition Banquet, a dance, and the

Anthony's of a third party (by far the best informal social which lasted until 3am). On Sunday, Tony Perez was elected divisional lieutenant governor and there was a farewell luncheon.

Our Circle K won seven awards. Conor Key and John Wynn won the John C. Thompson Distinguished Member Award, Tony Perez won the Outstanding Vice-Presidents Award, and Jack Montfort won the Outstanding Treasurer's Award. Scott Dickey won the Outstanding District Officer Award. Finally, our club won the Interclub Award

Overall, the convention was ruled by Emory. However, we did win more awards than the other clubs. CKI will be having a membership drive next quarter; look for us. CKI also has three good service projects lined up for next quarter and several interclubs, one to an all girl college. I would also like to welcome our newest members Bob Magroine and Chuck U Farley.

ORGANIZATION BULLETIN
from **THE LOG**
Deadline for inclusion in the 1992 Edition is Friday, April 3
Feel Free to attend the last LOG meeting of the Quarter Noon Wednesday, March 11 Ballroom C-Student Center

By Crush
Crush Δo #132

Hey everyone! I'm back yet again. This is the first article I'm writing by myself so, please be patient with me!

The first thing I'd like to do is wish a happy birthday to all those Gamma Phi's who were born in March: our alumnae, Heidi Brown, Shelly Eckers, and Kathy Graham; our pledge, Staci Holsomback (we love you and we miss you!); and last but not least, our sisters, Jeanna Grissom, Heather Ramker, and Jill Wooldridge. I hope ya'll have a

great b'day!!

For those of you who didn't know, we had our sisterhood/song retreat on March 6th and 7th. Everyone had a blast even though we didn't exactly get much sleep. I'd like to thank Heather MacLaughlan for all the work she did for the retreat. It was fabulous!!

Next quarter is looking great already. We have an awesome rush schedule and we hope to get some really special girls. Thanks go to Jules for all the work she's done to pull it all together. We didn't really mean to complain so much!

Well, that's all I have to say for now. Have an AWESOME SPRING BREAK and remember to keep it safe. See ya'll next quarter!

NSBE

Mirhonda Studevart
Public Relations Chair

Happy Fifth Anniversary to us!! Winter quarter marks the fifth year of having the National Society of Black Engineers on the campus of Southern Tech. Since Winter of 1987 The National Society of Black Engineers continues to grow on the campus, state-wide and national levels. What started here as a dozen students has grown into an organization of well over sixty members. In the past five years Southern Tech students have traveled everywhere from Cincinnati to Los Angeles to National Conferences. Our

chapter has competed for and won several awards including Chapter Member of the Year, 4.0 and 3.0 awards, (which would explain our Chapter with the Highest GPA award) and a Regional Oratorical Contest winner. In addition, one of our members has effectively served on the Regional Executive Board for several years. The Southern Tech Society of Black Engineers has a lot to be proud of. Our most recent honor is that of Dargenae Gibson, February's STSBE Member of the Month. We thank Dargenae for her continuous work and tireless effort. The Southern Tech Society of Black Engineers is an organization that must continue to move forward. We've accomplished so much in the past, and with participation and enthusiasm we can only look forward to an even brighter future.

and his activeness. Now, officially that sums it up in a nut shell, unofficially.....

Our secret agent had this to say: Who in the hell saw flying saucers on the 3rd floor? Sloppy stayed sober. Who in the world started date swap '92? Security.... We haven't been making any noise; it must have been the guy down the hall. Where in the hell are you Billy Earl? I've found my thrill..... Last one into the hot tub please siphon me a beer! What in the hell did I just drink? Is all the beer gone? What about the 1/2 gal.... that too?

In the news, remember these dates: March 13th, Social with GfB

Tentative for Spring:
April 3-5th.....Chapter Retreat
May 1-3rd.....Beach Trip to P.C.
16th.....Spring Wing Ding
26-30th.....Greek Week

The trip to P.C. is gearing up. You'll never know how much fun it is until..... you wake up with someone that is uglier than you went to bed

with.

Top 10 reasons to go to P.C. with TKE:

1. Tekes like to have fun
2. The chicks dig us (most of them do)
3. One monster of a party!
4. To get a tan.
5. To get a ripped bod.
6. 'Cause your mom won't let you
7. So you won't burn gas sitting in traffic....
8. you'll burn it on the way down at 100 MPH!
9. so you won't have to consume large quantities of alcohol
.....all by yourself

10. Tekes Raise Hell!

And if you're still wondering who the most hell raising, beer drinking, fun loving fraternity is.....it's the same as it ever was.

Tekes Raise Hell! Rush Teke . Hell Yeah! And according to one famous philosopher "..... We're on our way to the top Nothing can stop us from reaching what is already within our grasp."

Baseball Starts Spring with 5-4 Record

By Tony Wiggins
Staff Writer

On Sunday, February 15, the 1992 Southern Tech Baseball Team opened the season with a big win over Division II Georgia College in Milledgeville.

The game was scoreless after nine innings but the Hornets scored five runs in the top of the tenth inning to take a 5-0 victory. Jeff Battles and Tommy Wilson combined for the shutout.

The following weekend the Hornets dropped a double header at Brewton-Parker losing 4-3 and 9-0.

SCT split a double header with visiting Tri-State University from Angola, Indiana.

The Hornets then won a district doubleheader against LaGrange College by the scores of 9-1 and 6-2.

Jeff Battles and Chuck Daniels combined for the win in the first game while Chris Cady and Tommy Wilson handled the second game. Brad Lurie had three RBI (runs batted in) hits in the first game, while Brett House had the winning hit with a three-run double in the seventh inning of the second game.

On Wednesday, March 4, the Hornets split two games with Piedmont College, winning the first game 9-5 and losing the second game 6-4. Clinton Shook took the win and Jeff Battles suffered the loss.

The Hornets hosted Minnesota-Duluth in a double header Friday, March 6, and returned Saturday to play Georgia State University.

The Southern Tech Hornets are 5-4 overall and 3-3 in the district.

Hey, batter, batter, batter, batter, batter, batter, batter, batter, batter, batter...SWING!!! -Photo by Snowball

At a recent game, a Hornets player thinks, "Man, I've GOT to get this hand looked at. Soon." -Photo by Psycho Dave
