Dean Pearson Resigns as Architecture Head

By Marc Pruitt
Ask Wes

President Cheshier accepted Dr. P. David Pearson's resignation as Dean and a member of the faculty in the School of Architecture effective September 30, 1992. Dr. Pearson will be on annual leave from the end of Summer quarter until the 30th of September.

Although Dr. Pearson will remain as Dean during the Summer quarter, Vice President Travis will be working directly with him and the faculty of the School of Architecture to provide a smooth transition to Fall quarter.

Dr. Travis will also work with the faculty this summer to develop the best plan for the operation of the School of Architecture during the search for a new Dean.

Meanwhile, the School of Architecture Advisory Committee Members plan to stay aggressively on track for NAAB accreditation and, in the interim, candidacy status.

The resignation was evidently not a result of problems with accreditation. According to President Cheshier, the root of the problem was a "philosophical mismatch between the Dean and the faculty."

The week which the accreditation team visited Southern Tech only served to draw attention to the problem. The team stated that their findings were that the faculty felt themselves to be stifled, restricted, and even intimidated.

Many concerns were also voiced by AET students over the handling of AET phase-out and a general lack of concern for the AET program on the part of the Dean.

Now the new concern among many architecture students is how the Dean's departure will effect the schedule for accreditation.

Currently, the Architecture Department is deficient in five of the twelve criteria of the NAAB.

President Cheshier feels that the school will be able to respond to those five issues by the time the NAAB board meets in June and

candidacy will be granted on schedule. A permanent Dean will be required for the accreditation, but is not required for candidacy.

No matter how things work out, 1994 is the earliest that the school can be accredited.

As of now, no acting Dean for the Architecture department has been selected, but Professor Dub Newman has been assisting in overseeing the AET and Environmental Development programs.

Whomever is selected as acting Dean will not be eligible for selection as Dean, as they would have an unfair advantage over other candidates.

When asked about the future of the School of Architecture, president Cheshier stated "Nothing has changed regarding our goals, budgets or hiring practices... no program here depends on one individual."

The President also felt that more emphasis will be placed on the AET and EDF programs this Fall due to the past problems.

See King Pearson atop his mighty throne of cardboard. Lo how the mighty have fallen. Hopefully, the next person in charge of the school of arkytorture will discover that there is more to being in charge than giving orders. Photo by Bill Finnick.

Kashmira Mody Mops Up At Student Awards

By Bill Finnick
I am not a crook

Southern Tech's brightest and best were honored at the 1992 Student Awards Ceremony held in the Lecture Hall of the W. Clair Harris Apparel-Textile building June 2.

Kashmira Mody was the big winner grabbing three awards. She won the AT&T Bell Laboratories EET award, the Georgia Consortium award in recognition of International Student Leadership and the

Elizabeth and Calvin Hays award for the outstanding student of the year. She said they were, "a very deeply appreciated honor."

Orren Williams of the MET department was recognized as the SGA's outstanding faculty member and Barbara Haire, the Campus Nurse, was named the SGA's outstanding staff member.

Esther M. Jenkins and Ellen S. Ferguson each collected two awards. Esther won the Frank Johnson Scholarship award and the Wall

Street Journal Achievement award. She was duly noted for the preparation she went through before starting the IET program, she got a math degree from Georgia Tech.

Ellen received the Chancellors Academic Recognition award and the Lockheed-Georgia Chapter of National Management Association Most Outstanding Graduating Senior. She received her award from a fellow awardee, Steven M. Cobb, who received the W. Harrison Merrill Foundation outstanding student award.

Other awardees were:

•Audrey Maria Aguilar - American Apparel Manufacturing Association student of the year.

•Harry T. Vernon - American Association of Mechanical Engineers, Atlanta Senior Section Ben C. Sparks Memorial Award.

•Randy Shipman and Ron Zepp - Applied Computer Science Department outstanding computer science student.

•Mark Adam Grizzle - Society of Manufacturing Engineering, Atlanta Chapter outstanding student in MET.

•Charles L. Bythewood - Society of Manufacturing Engineering, Atlanta Chapter manufacturing project award.

•Gary L. Jennings - Society of

Manufacturing Engineering, Atlanta Chapter automation project award.

•Robert Charles Biggs - AT&T Bell Laboratories Mechanical Engineering technology award.

•Guy Richard Smith and Anthony M. Panzarella - Instrument Society of America, Atlanta Section electrical controls outstanding student award.

•William R. Cook and Lili Varzi - W. Harrison Merrill Foundation outstanding student award.

•Mark Anderson Eley - Amston Memorial outstanding MET student.

•Adrian Scott Manley - Industrial Distribution Association outstanding Industrial Distribution student.

•Karen Lisa Barton - Ziegler Tools, Inc. outstanding Technical Sales student award.

•Andrea LaTonya Mingo - NEDA Education Foundation scholarship.

•Britt Clinton and Carol Lynn Vaughn - Hub Inc. scholarship award.

•Todd Milford - Burch-Lowe, Inc. W. W. Burch memorial scholarship.

•Bill Finnick - SGA member of the year.

SGA Passes \$300 Thousand Budget For '92-'93

By Jack Silver
Getting Short

The Student Government Association (SGA) passed a Student Activities Budget of \$300,000 for fiscal year 1993 at their May 19 meeting. The budget is an increase of \$45,500 (17.87%) over last year's budget and was approved at the meeting of the Student Life committee on May 28.

The budget still has not yet been approved by President Chesier. The budget will take effect beginning summer quarter.

The Student Activities Budget is made up from the Activity Fees paid by students and is allocated each spring by the SGA. The budget pays for such things as student organizations; CAB videos, concerts and lectures; as well as allocations to various student chapters of professional organizations on campus such as American Society for Quality Control and the American Society of Civil Engineers.

The increase in the budget was caused by a hike in the amount students pay in Activities Fees each quarter, not by additional enrollment. This increase was instituted to help pay for the expanded expenses brought about by the Student Center enlargement.

The budget process begins with

Dean Charles E. Smith, the Vice-President of Student Affairs, estimating how much Student Activities Fee revenue there will be next year. The estimate of funds is based upon expected enrollment as well as other factors.

Then organizations recognized by the SGA put in requests for funding and for what reason the money is needed. The budget committee of the SGA examines the requests submitted by the organizations and makes a recommendation to the entire SGA about how the funds ought to be allocated.

Organizations which are unhappy with recommendations of the budget committee may appeal to the full SGA, which then votes upon the budget recommended by the committee, after which it is voted upon by the Student Life Committee of the Faculty Senate.

If the expected funds do not materialize then budgets may be cut during the course of the year, unless other sources can be found. Many organizations supplement their allocations through their own fund raising activities, which helps to make up shortfalls if the budget must be cut.

While some organizations invariably feel short-changed by the outcome of the budget process, the

objective is to provide the widest possible array of services to the greatest number of students, with specialty groups coming later.

The largest allocations were for Student Center operations and Intramural sports, receiving \$102,000 and \$58,000 respectively. A close third was the Campus Activities Board, which received \$52,500.

A number of organizations which received funds last year did not receive any in the new budget. Among these were the Bathtub Racing Association, the Association of Computing Machinery, the Constructor's Guild, the Diplomats, Sigma Lambda Chi, the Pep band, and the Intra-Fraternity Council.

Three organizations which did not receive funding last year were added this year, Georgia Society of Professional Engineers (\$600), National Society of Black Engineers (\$1700), and Tau Alpha Pi (\$700).

Advising Center Reorganized

By Kimberly Davenport
Staff Writer

The Southern Tech Advising Center, now called the Academic Services Office, will no longer advise students prior to registration. It's primary concern will be the profes-

sional development of faculty, and it will be directed by Ms. Barbara Anderson.

The Academic Services Office's responsibilities will include mandated testing, which includes the Entrance and Regent's Exams; organization of faculty advisor training; retention efforts and related programs; assistance to faculty with SCT 101 programs; and organization of personnel outgrowth activities.

Dr. Nadella will also work di-

rectly with the new office in planning the activities required by the Regents of the University System of Georgia. These activities relate to both general and specific educational aspects.

Students, do not be alarmed. There will still be pre-registration advisement in the department of your major. Undeclared and general studies will be advised by the Arts and Sciences Department, and Developmental Studies by the Developmental Studies Department.

For People on the Move

Alien³ Is The Most Alien Of The Entire Series

By Westly Hetrick
Don't Ask

Alien³ is a Twentieth Century Fox production starring Sigourney Weaver and Charles Dutton, and directed by David Fincher. Rated R.

Alien³ is being hailed as "the most alien of the Alien series," and with good reason. Not only is this movie wildly different in its tone than the first two, it's wildly different from most anything else Hollywood generally puts out.

The first movie was the classic horror movie where you knew almost everyone would buy it, but it still made you jump. Not a whole lot seemed to happen. The fun was discovering how gruesome the alien was and who would survive. The neatest part was that the woman survived, since they're usually the first to go in this style movie.

The second was an action-adventure/war movie. Warrant Officer Ripley and the Space Marines defend the settlers from the army of aliens. Just move the setting to Oklahoma, replace Sigourney Weaver with John Wayne, and sub-

stitute Indians for aliens and this movie could have come out thirty years ago.

This movie is more like some tragic opera. Basically things start badly and get more depressing as the movie progresses. No happy ending here. I like to think of it as the Passion Play of the series.

The movie starts with the ship from the second movie crashing onto Fiorina 161, a backwater, lice-infested planet in the middle of nowhere, where convicts were formerly used to mine the planet. After the ever present "Company" that owns everything in these movies decides to leave, some of the convicts decide to stay and devote themselves to religion. Kind of an industrial monastery.

When the ship is first found, the only alien the convicts can see is Ripley. These men were all convicted for crimes against women, and none of them have been tempted by the presence of a woman for years. They don't even want to look at her, much less listen to her warnings.

Anyway, she lands, the alien starts munching, convicts start lis-

In this scene from *Alien³* the alien screams "Shut that curtain! Can't you see I'm taking a *@\$\$& shower! This #@\$* slime just wont come off! Oh, and where the hell are my eyes?"

tening, and the process of surviving begins again. Except this time, they don't have a lot to fight with. Just axes, torches, molten lead, and some flammable toxic waste.

Frankly, this movie isn't for everyone. Personally, I liked it though. It's kind of refreshing to see a movie every once and a while that is completely different than what you expected. Which is unusual. Hollywood has this unbelievable

dislike for unhappy endings. If they could rewrite that whole Romeo and Juliet thing with R & J just moving to the suburbs and raising 2.5 kids and a dog and driving a wood paneled station wagon, they would. They don't realize that the story loses its kick without the unpleasant parts.

It would have been easy for the people who made this movie to make a carbon copy of one of the first two

movies forever. But they went out on a limb and decided to bring things to a close. As Sigourney Weaver points out, Ripley's string of bad luck was getting hard to believe. How many times could they thaw her out, have her fight the alien, then put her in cold storage again. A good story has a beginning, a middle, and an end. Well, this is the end, and the story turns out to have an unhappy ending.

Math Stinger

By Dr. Joel C. Fowler
Assistant Professor of Mathematics

The counting problems of the last two issues have been solved. The first concerned the number of ways that a 2 by 30 rectangle can be covered with supply of 30 1x2 dominoes each one of which covers exactly two adjacent squares of the rectangle. The second was the same question for a 3x30 rectangle covered by 30 1x3 dominoes. The answers are 1346269 and 58425 respectively. The only correct answers to these puzzles were received from Alan Gabrielli in Continuing Education. The second pair of counting problems concerned a 6 by 6 grid of city blocks. The first was to determine how many different routes are there to the southeast corner of the grid if you may only move east and south along streets? The second was to determine how many of these routes pass through the intersection that is in the exact center of the grid? The answers are 924 and 400. Correct answers were received from Leo Kent in ECET and Alan Gabrielli in Continuing Education.

A new puzzle is as follows. Suppose that a surgeon wears gloves every time he operates to protect himself and his patients. When a pair is worn the surfaces that were in contact with the patient are contaminated while the surfaces against the surgeon's hands are still usable. Is it possible for the surgeon to operate on 3 people if he only has two pair of gloves? If so, how? If not, why not? A second question is to determine the maximum number of people that can be operated on with 5 pairs of gloves. Your solution to this puzzle should include not only how many, but also why that is the most and how the operations should be carried out. Answers should be sent to Joel Fowler in the Mathematics Department. Correct answers and the names of the first to find them will be printed in the next issue of *The Sting*.

Encino Man Not as Bad as it Looks

By Bill Finnick
tbd

Encino Man, a typical California-style comedy of high schoolers wanting to be popular, starring Sean Astin and Pauly Shore.

A power dweeb digs a back yard pool so he can have the coolest post-prom party, and win the girl of his dreams. His pre-disco, '70s throw back friend watches as he works to fulfill his dream.

And the particular twist to this version of ordinary guys coming out on top is the discovery of an ice age cave man.

Did you know that besides earthquakes California suffers from receding glacier activity?

Only in California could a 20 word vocabulary, outrageous clothing, and crude manners be a hit. Link, the missing one, is an instant smash with the witless woman-to-be. He simultaneously outrages the Neanderthal jock-types these woman drool over.

Sean Astin is the hemorrhoidal twit that will do anything to be popular. By the end of the movie you want to choke him, and all the other whiners in the world.

Pauly Shore, on the other hand, plays the hippie wanna-be excellently. Nicknamed 'Stoney' his ability to communicate with the caveman is the brighter part of the movie. The food group, amusement park, and scooter trip scenes are what will make this PG Hollywood Pictures Company release worth seeing in video, matinee, or dollar theater.

On par with Wayne's World only in a different age bracket, time zone and zip code.

And yes, people really rode psychedelic scooters in bleached bell-bottom jeans while listening to Edgar Winter's Frankenstein in 1973, or at least my friends did in Hollywood, Fl. The real Hollywood.

"Taking a systematic and tentative approach to important career decisions is a process to which more persons would better treat themselves."

ASK THE PSYCHOLOGIST

In this column, Dr. Michael Slavit, Director of Counseling, will answer questions about issues of emotional, behavioral, or social interest. This column is not intended as a substitute for seeking help from a qualified professional. (SCT students, faculty, and staff are eligible for service at the Counseling Center). And, Dr. Slavit's comments do not necessarily reflect the views of *The Sting*. Send your questions to Dr. Slavit c/o *The Sting*.

Q: "I'm not sure I'm at the right college. I think I may want to be an industrial engineering technologist, specifically apparel or textile. But sometimes I think I want to be a teacher, and then I think I should be at another Georgia college, like Kennesaw. At this point I just don't know which direction to take. Do you think I should transfer?"

Signed, Rob

A: First of all, Rob, your career choice can best be thought of as the final common outcome of your self-exploration in the areas of your values, goals, interests, and skills. This exploration may take awhile.

In the meantime, you apparently have two tentative choices: industrial engineering technology and education. It seems to me that a good strategy for you to follow would be not to transfer at this time, but rather to concentrate most of your current course effort on the core. Any college in Georgia will require you to take a healthy load of core courses. So, you could take perhaps two courses each of the next two quarters in areas such as English, math, history, psychology, philosophy, and foreign language. For your third, you could take an industrial engineering course. In this way you could get the exposure to IET which would help you to become familiar enough with it to make your decision. And, while remaining at Southern Tech you would have easy access to both students and faculty who could help you to become as fully informed as possible about IET majors and the careers they lead to.

If you ultimately decide to transfer so as to pursue a career in education, your core course credits will transfer with you, so you will have lost nothing. Taking a systematic and tentative approach to important career decisions is a process to which more persons would best treat themselves.

A final note: At the Counseling Center, we can help you sort out your career concerns, as well as many other personal, social, and educational issues. Our service is confidential.

SEX!!!

Have you written any good short stories, taken any interesting pictures or have some cool artwork you want published???

Then the **LOG** needs you!!!

We at the **LOG** are looking for really excellent stuff for the creative section of the yearbook. Just bring it by the **LOG** office, located upstairs in the student center next to the big screen TV, and we might use it or not, just depends on the quality. All submissions need to be in no later than July 1, 1992. Remember it's better than bad it's good!!!

Beach Party: CAB Does It One More Time!

by Mirhonda Studevart
Staff Writer

On Thursday, May 21st, Southern Tech held its annual Beach Party. Spectators and participants alike agreed that the Beach Party was "absolutely wonderful." The event began at 4:00 in the afternoon and lasted until after midnight.

The M.C. and gracious host of the way-cool Beach Party was none other than comedian David Christiansen. He came out with a lot of zany, ad-lib jokes in which many of the audience members were victims. According to several Beach Partiers, merely existing in the audience, without Christiansen drawing attention to you was a major feat.

The Tacky Tourist contest was short-lived, but entertaining. A few of Southern Tech's gracious students dressed in their not-so finest.

The Mr. Macho Contest was judged based on the level of audience arousing, female hysteria. Chad, Southern Tech's local mondo super-bod, won the contest. Not far behind his sexy tracks was the ever-lovable Stan who awed the crowd with a tremendous impression of the rolling Hawaiian shore, doing a stomach roll that was truly magnificent.

The Ms. Beach Party featured some very nearly nude centerfold

look-alikes...NOT! Actually, there was only one brave, beautiful lady made a bid for the Ms. Beach Party title. She did not compete however, due to lack of competition. Maybe by this time next year, the female population of Southern Tech will give the male population something to look forward to.

Shortly before the food was served, David Christiansen came out again with a second helping of his witty satire and close-to-real impressions of several famed "Saturday Night Live" characters. The menu served was perfect for the great outdoors: barbecue-style chicken, with huge helpings of baked beans and potato salad. In addition, potato chips and Southern Tech well-loved cookies were also served. Standing in the serving line, the crowd was beginning to get hyped up. This is either due to the festive mood of the Beach Party, the starving student's prospect of actually eating, or anticipation of the Laser Karaoke contest.

The Laser Karaoke contest is NOT lip sync, it is real sync, that is, the participants actually sing. In addition, the lyrics of the songs are run on a video screen which only the contest participant can see. It's pretty hard to mess up on the lyrics of a song when they are right in front of the contest participant. Andrea Gra-

ham won the contest by performing "The Greatest Love of All." She had the majority of the audience either singing with her, or humming under their breath. Campus rapmasters Carl Lewis and James Meeks performed a rap song "Check the Rhymes" and captured a close second. The Lewis-Meeks win was happily welcomed by the pair. James gave a heartfelt thanks expressing his joy over the fact that he had FINALLY won a contest here at Southern Tech. The most memorable participants however were a group called the Norton Wild Posse who dressed in adorable costumes and performed a choreographed version of "New York, New York."

After all of the events were over, the party was just beginning. The Wild Video Dance Party truly fulfilled its description. One student described the phenomenon as a "hyped-up party with lots of swinging beats, dude." Rap music and House (Club) music were the major beats of the evening. Every once in a while the DJ would play a rock song with a driving beat, or either a rock ballad in an effort to "mix up the color and get some Caucasians on the floor." Most people, black and white, agreed that the music was very dance-able and that the DJ did an excellent job of keeping the dance momentum high. As a matter of fact, days later students

This is Beach Party '92. Wubba wubba wubba, hip tiddle wingo. Photo by Tony P.

complained of sore muscles due to extensive dancing. During the Wild Video Dance Party a number of prizes were given out to the best dancers and to individuals that could name certain videos by the title and artist. Headphones and loud neon green Beach Party T-shirts were distributed to the winners.

In conclusion, everyone agreed

that the Beach Party was "a lot of fun" "just damn wonderful," and "just the thing to let off some steam before the intense work of finals." In addition, "I'm going to be in that contest next year" was repeated more than once. That only means that the Beach Party will only get better from here. One student deemed the Beach Party "the event of the year."

Go to Cafe Hot Wing Before the Beach Party

By Westly Hetrick
Don't Ask

This week's restaurant review is somewhere I personally had eaten often but had never thought to review. The place is Cafe Hot Wing, located on the square in Marietta, between the Liberty National Church and Insurance Co. and Charades.

First off, the food. Obviously, they have hot wings, and they are available in mild, medium, and hot. The lunch special is twelve hot wings, celery, and blue cheese for \$2.88. Frankly, the hot wings are good, but not great. They're hot, and relatively cheap, but really aren't overwhelmingly good. But lest you think that this is all they offer, I'll continue my gastronomic journey into other lunch fare.

Cafe Hot Wing also serves

sandwiches, priced between three and four bucks. The reuben is served with rice and some cheese-n-zucchini creation. This sandwich was described to me as being above average, not exactly a stirring testimonial, but still, not bad. The chicken filet and steak and cheese fare less well. These are both sandwiches that are difficult to do poorly. And unsurprisingly, Cafe Hot Wing does them satisfactorily. No more, no less. Also available are baskets of onion rings (\$1.20) and french fries (\$0.89). The same statement applies to both of these. Not bad, but nothing to write home about.

Frankly, the best I can say about any of this food is that it is mundane. No, I didn't say it was bad, merely I was trying to get across the fact that it was just, well, boring. Prices were average. Service was good.

So why have I been there several times. Beer. Frankly, if the part of the meal you're looking forward to most is the beer, then Cafe Hot Wings is pretty good. They have reasonably priced bottles of domestic and imported, and pitchers are only five dollars.

This is hardly enough to carry an entire restaurant. Well wait, there's more. Remember, they're conveniently located, so you can go out on Friday, with a DD of course, and put on a good base coat for the evening. Plus, they have Creative Loafing. So, lets put Friday night in order. Go there with a group, get satisfactorily shellacked, and find a good show in the Loaf, and prepare to make your next stop.

OK, this is possibly the most entertaining part about Cafe Hot Wing. Keep your mouth shut about

this, and prevent anyone who doesn't know about it from going to the bathroom until they have a good buzz going. Then time them to see how long it takes them to get back. See, the thing is, Cafe Hot Wing is located

in a corner of what used to be Charades, a teen night club. The bathroom is located in the far end, upstairs, in the other corner. Basically, if you really have to go, it seems like a three day trek.

International Student Information

Summer Travel F-1 Students

F-1 Students planning to travel outside the United States this summer will need the following documents to re-enter the U.S.: a valid passport with a current F-1 visa stamp and an I-20 ID with appropriate signature on the back. If your visa stamp is expired, you must obtain a new I-20AB from the International Student Advisor in order to apply for a new visa at the U.S. Consulate abroad prior to re-entry into the United States. Call 528-7226 for an appointment with Ms. Charlotte Janis.

J-1 Students and Scholar

For temporary departure and re-entry into the United States, you will need a valid passport (valid for at least six months beyond your stay), a current visa and the pink copy of your IAP-66 with appropriate signature on the back. If your visa stamp is expired, you must obtain a new IAP-66 to apply for a new J visa at a U.S. Consulate abroad.

PRACTICAL TRAINING FOR GRADUATES

International Students graduating this May or August are eligible for up to 12 months of authorized employment in their field of study. To apply for practical training, please obtain a letter from your academic advisor indicating your expected graduation date or, the date you actually complete your program of study. Bring the letter, your passport and I-20 ID to the International Student Advisor to complete the forms for an application for post-completion practical training. The fee is \$60. The application period for practical training is up to 90 days prior and 30 days after graduation or completion of studies. Once application has been made to INS, it is usually 8-10 weeks before employment authorization is granted.

F-1 students may not engage in practical training employment until an EAD has been issued.

ATTENTION DORM RESIDENTS!!!

Moving out? Changing Rooms?

Have to vacate soon?

Call CKI's "DORM BUSTERS" at: 499-2559

We will move your junk for you.

"...To Forgive Divine."

By Ed Hardy
SGA President

College is very different from high school. I don't think you can find very many people who will disagree with that statement. A college student must be much more responsible.

Unfortunately, many people have trouble making the transition. And they wind up paying the price for it for years.

When I first went to college, I was still pretty immature. My first year here I had some personal problems that seemed far more important than they really were. As a result, I failed some classes.

After I grew up some, I re-took those classes, and made A's in them.

This was years ago, and those bad grades are still hurting my GPA. As a result, I don't think my GPA is a reflection of what I have learned in college.

There has been a great deal of talk lately among students, faculty and administrators about instituting a policy here at Southern Tech that could help students like myself. I am referring to a "forgiveness policy."

One form of this forgiveness policy, if enacted, would mean that if a student fails a class and then re-takes it and passes it, the F would not be reflected in the student's GPA, but would still appear on his transcript.

Let me give you an example of how this policy can affect someone's GPA. Currently my GPA is 2.82. If I remove those classes I have failed and retaken, my GPA jumps to 3.00. That might not sound like much, but I have spent the last three years trying to make up for those classes I failed all those years ago.

Naturally, there will have to be limitations placed on this policy to prevent a student from, for example, taking a class 10 times until he passes it and not having it affect his GPA. I think a person should only have one chance to re-take a class and make a better grade. And you should only be allowed to replace failing and near-failing grades. Re-taking a class to replace a C is a little silly.

This is the form of the policy that I prefer. There is at least one other being considered.

Under the other policy only those classes taken your Junior and Senior years would be calculated in your GPA. The idea behind this policy is that most

peoples' core grades are much lower than their major grades, and a majority of core classes are taken during the first two years in college, so a person's GPA would be made up mostly of grades earned in their major classes.

Personally, I don't like this one. It seems almost too forgiving.

Most students are in favor of instituting some kind of forgiveness policy because it can help their GPAs. Most administrators are in favor of a policy because they will have to fail out fewer students, and students are the source of their revenue.

But there has been some resistance to the policy among faculty members, especially in the School of Technology. I think their objection to it is that a very liberal forgiveness policy will make Southern Tech too easy.

Personally, I think proper restraints on the policy will allow it to help good students look better to prospective employers, not a method for allowing incompetent people to graduate from here.

According to William Rezak, Dean of the School of Technology, most colleges in Georgia already have a forgiveness policy. So I don't think having one is going to make Southern Tech look bad. On the contrary, I think it will allow our graduates to be more competitive in the very tough job market.

There was such resistance to this issue in the School of Technology that the whole idea was put on hold. The purpose of this editorial is to get the idea stirred up again. And now that I am President of the Student Government Association and a member of the Student Life Committee, an advisory body to the Faculty Senate, I am going to do everything in my power to get a forgiveness policy instituted.

But I need your help. If you are a student, let your professors know that you are in favor of a forgiveness policy. A good way is to write a letter to *The Sting* telling the entire campus how you feel. Remember, I'm trying to do this for all of us.

If you are a professor or administrator, think carefully about the ideas that I have expressed in this editorial. How you feel about this issue is very important. And please help us in any way you can.

"To err is human, to forgive divine." I think it is time Southern Tech aspired to a little divinity.

Hayden's Farewell

By Hayden Wakeling
F*** Greek Go British

After my disappearance from the last issue, Bill, *The Sting's* own Commander-in-Chief, asked me to finish off writing for *The Sting* with a review of my year spent at the Southern College of Technology.

After going through my belongings I managed to come up with the following:

September 19, 1991, the big adventure was to begin. Flying over on Continental Airlines I must presume was taken as an ideal choice by the firm that booked my ticket but the fact they have now gone into receivership signifies my feelings upon the decision and does not help the fact that I still have to return home on a Continental plane.

We arrived late that September night so it was not till the next day that we could examine the local sights. Now back in Leicester we had been given the image of being near to Marietta Square, by near I mean two

minutes walk, and it came as a bit of a shock to find the 120 loop at the entrance of the college and not much else.

It took two days for the tourist inside me to burst out, and visiting Downtown Atlanta was first on the list. After being back a few times to Underground I still think that it is a pretty cool place to shop and it is a shame that during the riots a lot of it was destroyed.

Apart from starting classes, not much happened for the next two weeks until the beginning of October when yours truly hit the American Airways. I must have made a startling debut as the next day I went to a *Sting* party where I was to meet two of Southern Tech's gentler people, Gareth and Dave. Gareth's genuine concern for Poppa was one of the highlights of the night.

The kind people at the radio station also decide that they should introduce me to an American band playing in Atlanta. The band was one of the top college acts and would probably not get into the top 40. The

The Sting is published bimonthly for the students, faculty and staff of the Southern College of Technology. *The Sting* is an official publication of the Southern College of Technology. The ideas expressed herein are those of the editor or of the individual authors, and do not necessarily reflect the views of students, faculty or staff of Southern Tech or the University System of Georgia.

ADVERTISING INFORMATION

The local advertising rate of *The Sting* is five dollars per column inch for ads smaller than a quarter-page, and four dollars per column inch for all others. Ads for service and professional organizations on campus are free, but a run-date is not guaranteed. To guarantee one, ad rates are one half the local advertising rate. Advertisements must be submitted by the deadline printed on the front page. To reserve space or for more information, contact *The Sting* at (404) 528-7310.

LETTERS TO THE EDITOR

The Sting welcomes letters praising or criticizing editorial policies or opinions. Letters should be typed or neatly printed, double spaced and should not exceed three hundred words. Letters must include a name and address or phone number for verification purposes, but names will be withheld on request. *Unsigned letters will not be printed.* *The Sting* reserves the right to edit letters for style, content or size. All letters are run on a space-available basis. Please send all letters to Bill Finnick, *The Sting*, Southern Tech, South Marietta Parkway, Marietta GA 30060-2896, or to *The Sting*, Campus Mail, or drop them in the box beside our office door, top floor of the Student Center by the big screen TV.

ORGANIZATION ARTICLES

Articles written by organizations to inform the campus of activities and events are welcome. Articles must be submitted by the deadline on the front page and typed on a 3.5 inch computer disc. Please limit articles to two hundred words. All such articles are subject to editing for style or content, and are run on a space-available basis.

JOINING THE STING

Any student paying Activity Fees is eligible to join *The Sting*. We prefer women who have passed English 111. Come to our meetings Thursdays at Noon, in the *Sting* office beside the big screen TV, upstairs in the Student Center, or call 528-7310. *The Sting* is printed slightly larger than it actually is.

band? Nirvana. Other acts I have seen while I have been here include PiL, BAD II, Mighty Mighty Bosstones and finally the Cure over the past weekend.

Christmas in the USA I cannot report on because I flew home, but I made it back to welcome in the New year on foreign soil. (Well, its foreign to me!!)

January was the start of my career with *The Sting*. My first article on the Olympics was written about the time I started back swimming.

February was also a cool month as I managed to get trade passes into the third Super Show which displays all upcoming sporting goods. I also went to New Orleans for Mardi Gras and if you want to know how that went read the article I wrote about it.

Since then I have visited McCluskey Middle school to give a talk on England, flew down to Fort Lauderdale, seen the Braves actually win, rafted down the Chattahoochee River and witnessed the sad side of America in the Rodney King riots.

Overall, I have enjoyed my stay here and I am at least staying for the summer and hope to return at a later date. Maybe 1996. Thanks to anyone who knows me for making me feel welcome and I hope everyone at Southern Tech understood at least one of my articles. Bye!

Hey! What's up dudes. I'll tell you what's up. We have just had a great time over the last few weeks. We had our formal, Roseball, two weeks ago. It was most excellent. We had all of Cohutta Lodge to ourselves. It was great we were able to party until the wee hours of Saturday and Sunday mornings. There were many interesting things that went on if you were there. If you weren't there than you missed it and I'm not going to tell you. I have one question. Where did all the goldfish come from. We also had our Luau party with the Sigma Pi's. It started

at about 12:00 in the afternoon and finished around 3:00. It was a great party. We had a small pool for belly flop contest, and a new and improved volleyball court. On that same weekend we had a toll road for P.U.S.H. We raised over \$900.00 for P.U.S.H. that brings our total for the year up to over \$2000.00.

Congratulations goes out to Elmo who just turned 21 and Kevin Norton who won greek man of the year. I would also like to congratulate all the brothers who won awards at Roseball. I just want to say thank you to all the brothers for my awards. It is something that I will never forget.

The up coming events that we have planed are the Blow out party which will be held on June 5. We will also have a formal meeting on Sunday June 7. Other than finals there isn't a whole lot going on. Well I'm outta here. See ya.

Archie's phrase from the past is "She's plowed".

By John Newberry
The Fraternity of Honest Friendship

Welcome to the next addition of the sting and yes we do have an article this time. We have really been busy this past month and we have had loads of fun.

It all started Saturday May 2nd at Red Top Mountain State Park, where we had our 17th annual White Rose Formal. Everyone saw lots of deer and drank lots of beer. We had a great time and really look forward to next year.

On the weekend of May 15-17 we were all over the state. We played in the College State Softball Tournament at the Softball Country Club. We defeated the University of Georgia by a score of 16-15, and then lost to Georgia Southern and Georgia Tech by scores of 18-6 and 7-6 respectively (we should have beaten Tech). Simultaneously we were in the process of raising money for the Leukemia society by selling cokes, hotdogs, and candy at the Chamblee Antique Festival. Hey

Wes, look out for that Yo-Yo ball!!

On May 21st, we had a killer time during (not at) the Beach Party. I know no one saw us, but we were over at Ashley Mill Apartments having one helluva time trying to get to the bottom of a big metal barrel. No wonder class attendance was so sparse!

We have had elections of officers for the 1992-93 year and they are as follows: President-Mike "Granny" Minor, Vice President-Brian "Bear" Holland, Secretary-John Newberry, Treasurer-Billy "Mango" Nix, Risk Manager-Michael Tanner, Fraternity Educator-"MC Doug-E" Doug Ralston, Rush Chairman-Sean Philyaw, Ritualist-Chris Owens, Education Chairman-Kevin "Nut" Leftwich, Social Director-Alan Rountree, and Alumni Correspondent-Andy Jackson.

I'd like to thank Tal Martin for letting us use his facilities at Lake Hartwell, and all other fraternities be booted and spurred, prepared, forewarned, and precautioned: Lambda Chi is going to dog Greek Week!!

We're looking forward to the chapter retreat this summer and coming back this fall and (necessary cliche' coming up) KICKING SOME A_!! I hope everyone has a great summer. See ya!

TKE

By the Teke Tracker
Histor #338

Once again our secret undercover special agent has infiltrated the unknown and has this report:thump, thump, thump, (helicopter sounds in the background from high above the Spring Wing Ding) "I'm sitting here high atop the world's largest backyard iron-ore smelter.

I'm watching what must be several thousand "half-naked" (translated from Crow talk it means "wearing really small swim suits") people playing volleyball and listening to the tunes of D.J.E.Z. Curly. People are having fun everywhere. Wow folks its Smokey the Bear. And those must be his friends Ranger Rick and BooBoo Bear. And there's Barney Fithe. Watch out folks I think he has the bullet. Well I'm on my way home now.....Hey, what are those lights up ahead? Is that Barney? Sorry I've gotta go and practice my eye movement exercises.

The brothers of Tau Kappa Epsilon would like to wish the following people Happy Birthday for the month of June: Charlie Ruyle, Gary Frantz, Leah Seats, Paige Payne, and Shannon Barrineau.

About Greek Week: we would

like to congratulate the participants and the planners for a great show. At this point we still have the raft race to go. May the force be with us. When we're done we can still use ours for one hell of a cooler. Some suggestions for next year's events might include the Highway obstacle course and the 50 yard hurl.

Thanks to everyone who helped make banners and plan Greek Week and the Spring Wing Ding.

Thanks again to those who gave blood this quarter.

Get Ready for the Summer time festivities and Alumni Softball.

Quote for the week: "Do you know how to drive a stick?" - Author's name withheld.... I won't tell if you don't.

"Seeking the vision that only the dreamer can follow."

Tekes Raise Hell!

ISA

International Students Association

By Hayden Wakeling
Foreign Affairs Correspondent

Hello to all International students. The big event this week is the ISA party to be held on Thursday 4th of June, speak to Jimmy our beloved President for details that I

have forgotten because I left the flyer behind in my room and Bill (Slave Driver) the Editor of this fine and upstanding paper called The Sting will not let me go and get it.

Talking of Mr. Prez the ISA elections have just taken place this week and full results should be announced at the party, Good Luck to all candidates.

On the 28th of June Atlanta against Aids are doing a concert at the Fox Theatre called Heart Strings'. The good news is that it is FREE for all International students. 'Heart Strings' tickets can be ob-

tained from Charlotte Janis at the Advising Centre.

As many of you might know the ten English Students from Leicester Polytechnic will be returning soon to the Motherland. We hope you dont miss us too much and that you will also welcome ten more lucky people who will arrive Fall quarter.

Thats about it for now so I will finish my last article for the ISA with the wish that everybody enjoys their summer where ever they may be.

Bye and I'll be back.

ΑΔΠ

By Lalee

Congrats to Kim Cornwell!, as Greek Woman of the year. You are #1 in our hearts as well as some others.

To Angi and Beth, way to go ladies!! SGA's new FEMALE representatives. I know you will roar your voice in the affairs of Southern Tech.

All our rowdy friends came out to the beach party. Has anyone seen Tracy? Hats off (but ears plugged) to Melman, Christy, and K.O. for an interesting rendition of Hank. On the note, Christy, it is a singing

contest not a laughing contest. Hey Bubba, what brand of O.J. do you buy and where can I get some? By the way, Lalee and Melman sure do miss their cups! K.O. if you go on vacation please let someone else pack for you. Hey K.C., do you know what was in the coffee cup?, I do!!!! Someone please help Melman, she has fallen and can't get up. It was a wild and crazy night we all don't want to forget, it is just does anyone remember in the first place?

To all the greek guys at SCT, WE LOVE YA!!! Hope you all enjoyed the ice cream. A special thanks to TKE, Pi Kap, and Sig Pi for great Memorial Day weekend parties!

ADPi kicked butt in Greek Week, Way to go Pi's!!! Angi

don't forget that basketball try-outs are in the fall. Did you check out the banner, what a piece of art, are you sure you guys did not attend the Art Institute of Atlanta? Hey Leslie, "run, stupid %\$*#@, run!! And to the captain of our ship, Wendy, we're glad you didn't have to go down with it. Thanks to Michael, Wendy, and Tracey for construction of our ADPi barge. The chug without puking award goes to Christy. I lost it just watching her. That girl can chug 'em down. Anyone care to arm wrestle . . . leg wrestle . . . or wrestle period?! Heave ho, they all fall down. Remember, BYOB when partying with Sigma Nu. Oh, yeah. One last thing. To IFC, it is called Greek Week, not FRAT Week!!!

Athletes Recognized at STAA Banquet

By Bill Finnick
TTTTAABL

The annual Southern Tech Athletic Association's Sports Award Banquet was held Tuesday, June 2 at the Baptist Student Union. The program started with a welcome by Fred Hartfield, the outgoing STAA President, who spoke about being an individual and a member of a team.

Dr. Harris T. Travis, Vice President of Academic Affairs followed with the invocation that was prefaced by the devilish situation on campus.

After the meal, the first award presented was to Coach Charles W. Lumsden, the Head Baseball Coach. Athletic Director George L. Perides

presented Coach Lumsden with a plaque recognizing his 550 career win. A lovely silhouette of a basketball player is at the head of the plaque but Charlie laughed it off by pointing out that at least he was dribbling left-handed.

Coach Lumsden then recognized his players with certificates and plaques recognizing their accomplishments. The outstanding 1992 baseball players were:

- Arnie Correll - Player of the Week, NIAI District 25.
- Keith Davis - Captain, All District and Best Hitter.
- Tommy Wilson - Best Relief Pitcher.
- Gil Ward - Best Defensive Player.
- Jeff Battles - Best Pitcher.

Mickey Eidson, Mickey Harper and Greg Stewart were named to the All-District Academic Team. Stan Burton, one of the captains on the team, was recognized for the way he hates to lose.

Before the basketball awards Head Basketball Coach Perides made a special presentation to outgoing Assistant Coach Tyrone Dean.

Besides the plaque recognizing his contributions to Southern Tech over fourteen years, Tyrone received a standing ovation from everyone present.

The outstanding basketball players for 1992 were:

- Maurice Dickerson - Most Improved.
- Melvin Smith - Hustle Award.

- Jesse Usher - Best Offence.
- Kieth Willis - Best Defense.

Coach Perides also recognized the help of a new volunteer assistant Wayne Collett. This year the Runnin Hornets were ranked sixth overall in defense in the nation which George claimed to be the lowest in over ten years.

As Coach Lee M. Tucker put it, "The tennis team has finally arrived, we get to go last at the banquet."

The tennis team finished second in the district and Coach Perides presented Coach Tucker with the district runner up plaque.

Coach Tucker announced that next years district tournament will be held at Southern Tech. He also recognized the outstanding tennis

players this year who were:

- Chris Hebbard - Most Valuable Player.
- Scott Jordan - Outstanding Freshman.

Next on the agenda were the special awards.

Tommy Wilson won the Hudson Award for exemplifying what all collegiate athletes should be.

Adam Sanderson received the David E. Summers Award for academic excellence.

The coaches and Fred Hartfield then presented awards to the many people who make athletics better at Southern Tech. Fred Hartfield then closed the banquet which will be one of his last duties as the President of STAA.

ΣΝ and ΑΔΠ Win Greek Week '92

By Bill Finnick
Jumpiree

Sigma Nu and Alpha Delta Pi were the two big winners in Southern Tech's Greek Week held here last week.

Sigma Pi placed second and Tau Kappa Epsilon finished third in the fraternity division. Gamma Phi Beta was second in the sorority division.

The games held from May 26 through 30 provide the Greek organizations on campus a chance to compete against each other in athletic events similar to the Olympic Games.

The first events scored were done weeks in advance. Sigma Pi received three points for the T-shirt design used for the event and lead all others in the raffle which earned money to sponsor the games.

The first full day of the games saw the Sigma Nu's take a commanding lead they never relinquished. They won all the events Tuesday, which were: banner, free-throw, three-point shoot out and the volleyball tournament.

Sigma Pi held on to second place with a second place finish in the banner and three-point competitions. After day one the standings were: Sigma Nu 26, Sigma Pi 17, Tau Kappa Epsilon 9, Lambda Chi Alpha 7, Pi Kappa Phi and Sigma Phi Epsilon both had 5.

In the Sorority Division Alpha Delta Pi won all four events the first day and held a 13-7 lead over Gamma Phi Beta.

On day two Sigma Nu and Alpha Delta Pi continued their routes in the respective divisions. Lambda Chi Alpha narrowly edged Sigma Nu in the Obstacle Course with a total time of 2:01.06 to 2:02.46. Sigma Pi came in third with a time of 2:03.45. Windy Harper ensured an Alpha Delta Pi victory with a time twelve seconds faster than any other woman, leading her team to a 2:54.17 to 3:01.11 victory.

On day three Tau Kappa Epsilon was the big winner with thirteen points earned from winning the tire throw and 3 leg race while placing second in the tug-o-war. Alpha Delta Pi mathematically eliminated Gamma Phi Beta when they took three of four events this day.

In probably the best tug-o-war ever at SCT Sigma Pi and Pi Kappa Phi pulled for nearly four minutes with Sigma Pi the eventual winner. Sigma Pi was spent from the effort and Tau Kappa Epsilon had a rather easy pull to enter the finals against the Sigma Nu team who had beat Lambda Chi Alpha in the bye bracket.

Going into the last day, Lambda Chi Alpha and Tau Kappa

Epsilon were the only groups with a chance to win something running 22-27 respectively. After Lambda Chi Alpha won the Softball tournament, eliminating Tau Kappa Epsilon enroute, the score was tied at 27.

At lake Allatoona the ΑΔΠs had the only tube craft while the ΤΚΕs sported a mono-hull twin outrigger design that was extremely fast but hard to control. ΑΧΑ, ΣΝ and ΠΚΦ used the standard twin cat configuration with variations to the hulls. ΑΧΑ used a shallow draft design while ΣΝ went with a more traditional canoe design. ΠΚΦ had the only armed craft sporting a 93mm water balloon launcher.

The ΤΚΕ craft after getting tangled in the ΣΝ and ΠΚΦ entries still managed to reach the far shore first, but landed far away from the objectives. ΑΧΑ and ΣΝ were close behind in reaching the far shore. On the return trip the ΤΚΕ craft was well ahead until the finish when they overpowered the right flank and skirted the shore line. ΣΝ took the shortest route and won by several seconds. ΤΚΕs second place finish was good enough to wrap-up third overall.

While everyone patiently waited for the ΑΔΠs to finish the ΠΚΦs gave the crowd a gunnery exhibition of tree burst ballooning. When the ΑΔΠs landed the trophies were handed out, Stan Burton, IFC

V.P., was thanked for organizing the event and the cheers cheered.

The judges this year were Kelly Hewitt, Vicki Langston, Ed Hardy,

Wes Hetrick and Bill Finnick who enjoyed the events immensely, except for when Christi spit Krystals on Bill.

SOCIETY OF WOMEN ENGINEERS

The Society of Women Engineers (SWE) is a non-profit, educational service organization.

OBJECTIVES OF SWE

- information to young women, their parents, counselors, and the general public on the qualifications and achievements of women engineers and the opportunities open to them
- assistance to women engineers in readying themselves for a return to active work after temporary retirement
- information on women in engineering
- to encourage women engineers to attain high levels of education and professional achievement.
- SWE ALSO OFFERS SCHOLARSHIPS AND INCENTIVE GRANTS.

ELIGIBILITY

Any person who meets one of the following requirements is eligible for the grade of Student Member if such a person:

1. is pursuing an undergraduate course of study in engineering or a field related to engineering in a recognized college or university and is carrying at least half the courses required of a full-time student
2. is a full-time graduate student in a field and institution meeting the requirements of Article III, Section I g(I)
3. is a full-time student in an ABET accredited four year school of engineering technology

DUES

Dues of \$10.00 are applied to the SWE fiscal year July 1 to June 30. Dues from each student member helps to defray the per member expense of the SWE publication U.S. Women Engineer. In addition, 20% of the student dues are retained by the Student Section as a rebate to be used for general expenses. TO BECOME A MEMBER

1. Submit a completed application form and a check for the total dues made out to SWE.
2. Attend all meetings of the Southern Tech Student section of the SWE.

CONTACT: PAM FRINZI @ 528-7246 OR 528-7460

A Special Note of Thanks

To all my friends at Southern Tech:

I would like to express my heartfelt thanks and appreciation for your generosity and thoughtfulness. Your support and prayers during my hospital stay made me feel as though I wasn't alone. Having friends and family like you make the difference. Thank you.

Judy Emory
