faculty

Dr. Charles A. Stevens, associate academic dean at Southern Technical Institute in Marietta, has been named Title IX Coordinator for the college.

Title IX applies to discrimination in education on the basis of sex in areas as housing, admissions, athletics, financial aid, etc. Dr. Stevens will be responsible for the self-evaluation of rules that now exist in all these areas on the campus. From the self-evaluation, recommendations will be made to the Dean of Southern Tech and the Board of Regents.

Dr. Stevens, who joined the STI faculty in 1974 as the associate academic dean, is also the affirmative action officer at the college.

OVERVIEW

Three members of the Georgia Senate Higher Education Committee visited Southern Technical Institute in Marietta, Saturday, October 11.

State senators Sam Doss, chairman of the committee, James W. Tysinger and Mell Traylor spent two hours at the college in discussion with administration officials and also toured three of the colleges academic departments.

Dr. Joseph M. Pettit, president of Southern Tech / Ga. Tech, officially greeted the senators in the Dean's Conference Room of the college.

STI's chief administrative officer, Dean Walter O. Carlson, gave the solons a brief overview of the college, its curriculum, facilities, faculty, staff, student body, entrance requirements and placement opportunities.

Associate Dean H. L. McClure, gave the senators a report on STI's Fire Science Technology program, and the Ga. Fire Academy, which recently moved its headquarters from Ga. Tech to the Southern Tech campus. McClure pointed out that a 16-acre fire academy complex is presently under construction on the campus. It will include a high rise drill tower, fire test laboratory, impound lake, pumper drafting facility, access roads and water system. Each year the Ga. Fire Academy hosts the State Fire School for professional and volunteer firemen throughout the state. Fire Science Technology programs are offered on the STI campus and by the college's FST faculty on other campuses around the state.

Carolyn Namie, head of Southern Tech's Continuing Education Office, briefed the senators on short courses the college was presenting for the community, the state and industry.

AD MANAGER'S POSITION NOW OPEN!

ENTAILS FROM ZERO TO SIX HOURS

PER WEEK. PERSONAL MONETARY PRO-

EDITORS NOTE

We would like to sincerely extend our apologies to the clubs and fraternities (especially Sigma Pi) whose articles have not been published in this issue, due to a lack of better organization on our part.

Keep your faith; we're slowly getting it together.

(con't)

The three senators were given a brief tour of the campus where they visited Southern Tech's Electrical, Architectural, Civil and Apparel departments. Students and faculty were on hand to give the solons a view of their respective departments, course offerings and student projects. Southern Tech's Electrical department registered a 37% increase in enrollment this fall, making it the largest department at the college. The Apparel department, which recently obtained the W. Clair Harris Chair, the first in the 27-year history of STI, is the only apparel program in the state. Apparel is Georgia's largest industry.

SGA

The auto service shop is now open for use by STI students, faculty, and staff, with students having first priority. The hours of operation (at this writing) are:

Tuesday: 3:00 - 5:00
Thursday: 3:00 - 5:00
Friday: 3:00 - 9:00
Saturday: 10:00 - 5:00

The hours of operation may change depending on the extent of usage and the availability of supervisory personnel.

The shop is provided for YOUR use, so please feel free to take advantage of it!

IMPORTANT!

On Thursday, Oct. 30th, a campus referendum will be held for the purpose of either confirming or overturning a decision by the SGA to purchase jackets with the SGA logo on them for the SGA members. The approximate cost for the jackets would be \$400.

SIGMA PI

Sigma Pi meets every Thursday at twelve noon in room 601.

STUDENT CENTER

Unknown to most of the students at Southern Tech is the fact there is an already-built student center facility at Georgia Tech that we at STI can take full advantage of. The facilities now available include the use of the bowling lanes, pool tables, snooker tables, or three-cushion billiard tables for a nominal fee. The other facilities offered without charge (except for materials or general admission price) are the craft area, theater, music, browsing room, art gallery, meeting rooms, ballroom, conference rooms, dining rooms, and cafeteria.

TKE

Tau Kappa Epsilon has two contending football teams participating in intramurals this quarter. Twentyfour fraters and associate members are playing. Team #1, quarter-backed by Mike Peppers has a 2-1 record, Team #2 lead by Quarterback, Tom Kiely also has a 2-1 record.

Both teams are coached by Mike Mobley.

Xi Chi chapter elected Mary Deadwyler and Natalie Salgado as new little sisters. Pam Kent was elected sweetheart. She was our original littel sister.

The chapter is planning a car wash to be held from 1:00 - 6:00. We will be raffling off 100 gals. of gas, November 6, 1975, at the rock.

TKE welcomes our seven new associate members. We are instigating a new member policy this quarter. New members may pledge the chapter at any time and after completion of specific tasks the associate members are installed. All interested students are welcome at the meetings, Thursday in room 358, or come by the Frat house.

LETTERS

Editor —

In writing to you, I am going to express my feelings and perhaps others on the subject of covered walkways on the Southern Tech campus. This is a much needed item on the list of improvements for Southern Tech.

Covered walkways will be an addition in the near future (I hope) to our campus. These walkways are needed to protect students walking from building to building. For instance, there is no way to get from building 200 to the library on a rainy day without getting sopping wet. Also, to go from the library to the snack-bar is surely impossible without getting wet. As far as going from the library to the snack-bar there isn't even a good sidewalk to walk on. Maybe this is something we should take into account, also.

At my previous school, Dekalb College, they had ample covered walkways. Believe me, the students really appreciated these when it was raining or sleeting outside. Also, walkways greatly enhanced the appearance of the school. They made it look more dignified and surely gave the impression that it was a classy school.

For the administration to care enough about the students to build the covered walkways shows that the administration cared about its students. I wonder sometimes if Southern Tech's administration cares more about giving out parking tickets than they do about the convenience of their students walking from building to building.

Covered walkways are a much needed item on our Southern Tech campus. I suggest that all of the money collected from parking tickets might some day be channeled back into our school in the form of covered walkways.

Sincerely yours,
John Carmichael

Editor —

October 17, 1975

Having been thoroughly drenched this morning while attempting to reach the library, I find myself wondering why we do not have a covered walkway to this important facility. Considering the obvious benefits of such a walkway during rainy weather such as today I am sure that a project to build a walkway would surely be modest when compared to the cost of the new student union building and could possibly be financed through a student or club activity.

Sincerely,
John M. Terrell

ROYAL ENTERTAINMENT

Concerts: The music to be performed by the Atlanta Symphony Orchestra this week ranges from moody and morose Overture to King Lear by Hector Berlioz to Ravel's jazzy 1930's Concerto in G major for piano and Orchestra. The concerts will be held Oct. 30, 31, and Nov. 1 at 8:30 p.m. in Symphony Hall. For information call 892-2414. Student tickets are \$3.00, sold one-half hour before performance.

Presentation

The American Society of Civil Engineers student organization at Southern Technical Institute presented the STI Library recently with a photocopy of a survey done by Lt. Robert E. Lee in 1837. This was one of Lee's first assignments out of West Point.

The program included as guest speaker STI's own English department head and researcher in the history of American technology, Dr. Robert Fishcher. He talked about the importance of Civil Engineering throughout history, its relationship and importance to our everyday lives, and its position in the total engineering profession.

The presentation was made by A.S.C.E. student organization president Chip Langlois, to Mr. John Pattillo, head of STI's Library, for a permanent position in the Southern Tech Library for all to see and enjoy.

The A.S.C.E. is a relatively new organization on campus with approximately 80 members. According to Langlois, this presentation, along with a bridge building exhibition, guest speakers, and other campus activities show the tremendous interest and enthusiasm generated in the civil department by the A.S.C.E. for the benefit of Southern Tech.
