Technician Wins First Class Honor Rating of ACP Critics

Collegiate Press Calls Paper 'Excellent'; Director Johnson Praises Thrasher, Staff

The Technician, school paper of the Southern Technical Institute, recently received a national rating of "First Class (Excellent)" in contests conducted by the Associated Collegiate Press, of which The Technician is a member.

Four issues—January through April, 1950—were submitted in May and were analyzed, criticized, and judged on these four principal departments of newspaper production: (1) News Values and Sources, (2) News Writing and Editing, (3) Headlines, Typography and Make-up, and (4) Department Pages and Special Features.

The summarizing statement which the critics used in passing judgment upon The Technician was "a neat, readable and well-organized newspaper. Typography and make-up are excellent."

Thrasher Was Editor

Tom Thrasher was editor-in-chief of The Technician throughout the time covered by the issues which were judged. For him and his staff Mr. L. Y. Bryant, advisor of the paper, had much warm praise.

"Since the paper won the second

highest honor possible in the nation," said Mr. Bryant, "I think our editor and his coworkers have achieved an outstanding success and deserve much credit for their loyalty, efficiency, and hard work."

(Papers entered in the contest were judged as "All-American (Su-
(Continued on Page 3)

Non-Vets Exceed GIs by 14 As STI Enrolls 404

Southern Technical Institute opened its fall quarter with a bang September 25. The old students were somewhat overcome by the number of new faces on the campus registration day. Of the 404 students enrolled this quarter, 159 are new students. Seventy-five are from states other than Georgia.

One coed, Miss Sarah Melton, from Statesboro, dared to compete with 403 male students in technical subjects and enrolled for the Building Construction course.

Non-Vets Exceed GIs

For the first time since STI opened back in '48 the non-veterans outnumbered the veterans, 209 to 195. Heretofore, the STI student body has been composed chiefly of the ex-G.I.s trying to finish their education that was interrupted at the outbreak of World War II.

Twenty-seven of the old students were missing from the campus. They have graduated and gone out to face the industrial world. Many of these have gone into the Armed Forces, some of them for the second time.

With an increase in students and a loss of some of the instructors it was necessary to add to the faculty staff also. Mr. Robert R. Hays replaced Mr. Terrell Greene in the English Department. Mr. Charles R. Freeman has joined the Mechanical Department, succeeding Mr. D. G. Klatt. Mr. Dennard I. McCool is the new instructor in the Industrial Department. In the Physics Department we have Mr. Frank L. Bullard, Jr.

Building Construction Leads

The Building Construction Department boasts the most students this quarter, with 80. Mechanical Technology, with 73, is in second place. Other departments follow in this order: Electronics & Radio,
(Continued on Page 3)

July 25, 1951, Is GI Bill Deadline

The deadline for starting GI Bill courses of education and training for most veterans is less than a year away, July 25, 1951.

Most veterans must be actually in training by the deadline if they want to continue afterwards. VA will consider a veteran to be in training, even though he has temporarily interrupted his course for summer vacation or for other reasons beyond his control; but once he completes or discontinues his program of training after the 1951 date, he may not start another course. Also, he must meet these requirements:

(a) He will be expected to pursue his training "continuously until completion, except for conditions which normally would cause interruption by any student."

(b) He may change his educational objective "only while in training and then for reasons satisfactory to the Administrator."

The July 25, 1951, cut-off date does not apply to veterans discharged after July 25, 1947, who have four years from the date of discharge in which to begin GI Bill training and until July 25, 1956, to complete it.

Some Exceptions

Those who enlisted or re-enlisted under the Armed Forces Voluntary Recruitment Act (between October 6, 1945, and October 5, 1946) have four years from the end of their enlistment or re-enlistment period in which to start training, and nine years from that time in which to complete it.

A new law which permits a veteran to change for the first time from one general field of GI Bill study to another merely by applying for it, will not be in effect after the cut-off date.

Veterans who have started GI Bill studies and interrupt them to go back into active military or naval service will not be bound by the July 25, 1951, cut-off date for returning to training. Instead, they will be allowed to resume their training within a "reasonable period" following their release from active service, even though they get out after the deadline date.

Miss Melton Is Highly Pleased By Her Decision to Attend STI

PROOF SHE'S HERE

Elizabeth Melton, freshman Building Construction student and Southern Tech's only coed, is highly pleased with her decision to follow her studies here at STI. She stated that both the school facilities and the warm reception that she has received from students and faculty members have impressed her most favorably.

Miss Melton's home is in Statesboro, Georgia, and it was there that she finished high school in 1949. During high school she compiled quite a record for herself, both scholastically and in various school activities. Her scholastic average for the four-year period was 94.56, and in addition, she was editor of the yearbook and a member of the girl's basketball team. It was these accomplishments that

Enrollment in Gas Fuel Technology Jumps to 46 Through Scholarships

Mr. Rives Greets Gas Fuel Students

Mr. Fred Rives, President of the Automatic Gas Company of Columbus, Georgia, welcomes to Southern Tech and the Gas Fuel Course (left to right) Lee F. Tinsley, Jr., of Jefferson Town, Ky.; James T. Ewing, of Tupelo, Miss.; Neil A. Dauphinee, of Hyannis, Mass.; and Lawrence L. Parlett, of Mechanicsville, Md.

Two All-'A' Students On List As 31 Make STI Honor Roll

By carrying 15 hours of work and making a 3.0 average or better, 31 students made the Southern Technical Institute honor roll for the summer quarter.

Two men—Walter J. Litaker and Francis L. McRackan—went into an elite group to themselves by scoring all "A's" and consequently a 4.0 average. This was no new achievement for Mr. Litaker, however, since he performed the same scholastic feat in the spring quarter. (These two guys really get their Building Construction and Electronics and Radio pretty well!)

Kalb Repeats All 'A's'

(Henry T. Kalb, Heating and Air Conditioning, also made all "A's" for the third time, but since he carried only 14 hours, his name does not appear on the official roll for the summer.)

The entire list of honor roll students for the summer quarter and their averages follow:

John S. Anderson, 3.17; Maurice Arthington, 3.00; Harry A. Batastini, 3.44; Frank H. Blair, 3.75; Harold H. Brown, 3.33; J. Clark Butterworth, 3.10; Rodney K. Calvert, 3.00.

Harold L. Carey, 3.64; Clyde V. Compton, 3.60; Curtis N. Compton, 3.15; James E. Cowart, 3.31; Frank M. Creel, 3.81; James G. DeVane,

3.35; Hugh M. Edwards, 3.55; C. C. Galbreath, 3.26; William B. Grant, 3.10.

Hubert D. Harrison, 3.63; Walter J. Litaker, 4.00; George D. Millar, 3.00; Charles L. McKenzie, 3.22; Francis L. McRackan, 4.00; Wilbur R. Noles, 3.05; Richard A. Provost, 3.23; Joseph W. Rettie, 3.45.

Joseph H. Smoak, 3.25; John C. Stambaugh, 3.05; Howell T. Stenger, 3.47; Major Summerford, 3.10; Boyce E. Tharpe, 3.11; Thomas I. Thrasher, 3.80; and John R. Walters, 3.30.

Requirements Listed

For the benefit of new students, the requirements for the honor roll are 15 credit hours of work, at least a 3.0 average, and no failures or conduct offenses.

To graduate "with honor," a student must have an overall average of 3.30; and to finish "with highest honor," a student must make a 3.60 average.

Joe Rettie Chosen Editor-in-Chief Of Technician's Log; Work Underway

Joe Rettie, outstanding STI athlete, member of the Industrial Technology Department, and native of Cartersville, was elected editor-in-chief of the 1950-51 yearbook, the Technician's Log, in elections held recently among students interested in working on the annual.

W. B. Grant, honor roll Mechanical Technology student from Chamblee, was chosen associate editor, and D. D. Perkins, of Atlanta, was named business manager.

Six other members of the staff were also selected to carry on the duties which their department or title indicates: W. W. Wall, Circulation; Jesse Bagwell, Photo Editor; Walter J. Litaker, Art Editor; L. H. Cooper, Activities; Larry White, Features; and Dave Hill, Sports.

Selection of editor, associate editor, and business manager is subject to the approval of the Activities Committee.

Mr. G. L. Carroll, adviser of the yearbook, states that everything is just in the planning state, although the printer and the photographer are to be selected at a very early

23 GF Companies Help Finance 33 Students at STI

Enrollment in the Gas Fuel Technology course at the Southern Technical Institute increased this fall from four to 46, Mr. J. D. Sewell, assistant director, announces. Only three more departments in school now have larger enrollments.

This phenomenal increase, Mr. Sewell explained, was brought about by the tremendously increased interest in the course by gas industries all over the country and the scholarships offered by them.

The donors of these scholarships are predominantly Georgia concerns, but on the list are companies in Ohio, Illinois, Louisiana, Indiana, and South Carolina. At the last count 23 companies had pledged all or a part of the funds to take care of an 18-month course in Gas Fuel Technology here at STI.

Donors Named

Names and locations of these firms follow:

Automatic Gas Co. of Columbus, Columbus, Georgia; Gas Equipment Supply Company, Atlanta; Georgia Automatic Gas Co., Atlanta; Georgia LP Gas Association, Griffin; Economy Gas & Appliance Co., Montezuma; Atlanta Gas Light Co., Atlanta; Hopkins Equipment Co., Atlanta; Southern Gas Corporation, Atlanta; Georgia Distributors, Inc., Atlanta; Bastian-Blessing Company, Chicago, Ill.

Parlett Gas Company, Waldorf, Md.; Butane Gas of Mississippi and Alabama, Tupelo, Miss.; The Weatherhead Company, Cleveland, Ohio; Delta Tank Company, Baton Rouge, La.; M. L. Trotter, Columbia, S. C.; Servel, Inc., Evansville, Ind.; Community Gas Company, Tucker; Charles S. Martin, Inc., Atlanta.

Rumbold & Company, Atlanta; Horne-Wilson, Inc., Atlanta; Noland & Company, Atlanta; Service Gas & Electric Company, Jesup;

(Continued on Page 4)

date and actual work begun on the book in a very short time.

Other students are invited to join the staff and help produce STI's third Technician's Log.

Mr. Sewell Attends Gas Fuel Meeting

Mr. John D. Sewell, Assistant Director of the Southern Technical Institute, spent the week of October 1 through 7 in Atlantic City, N. J., where he attended the National Convention of manufacturers of gas and gas appliances and equipment.

Mr. Sewell had the pleasure of seeing huge, expensive displays of gas utilizing equipment, set up in the largest covered auditorium in the world by all the leading manufacturers in the United States.

Most important, however, from the Southern Tech standpoint, were the meetings which Mr. Sewell attended and the many interviews, formal and informal, he held with gas fuel representatives from all over the United States.

Mr. Sewell states that he was

Technician Wins Coveted Honor; Pardon Us If We Brag a Bit

Editors of The Technician cannot help feeling proud of the First Class (Excellent) national honor rating which recently came to the STI school paper from the Associated Collegiate Press.

The honor is a meaningful, prized one, because it came from an esteemed organization and was the next to the highest possible. Only All-American (Superior) was better, a distinction very difficult to attain. Considering the fact that very few members of The Technician staff had ever had journalistic training or experience before,

the award takes on added significance.

The Associated Collegiate Press's stamp of approval upon our journalistic efforts is an authoritative indication that editors of The Technician are practicing sound principles of journalism and are producing a meritorious piece of work.

Though the paper has at times been criticized severely by its readers—and what paper hasn't!—we honestly believe that most Southern Tech students will join us in rejoicing over the distinction which has come to our school and our paper.

Communists Careful to 'Overlook' Vital Features of American Way

Pravda, the Communist party newspaper, recently berated Russian teachers for not properly presenting to children the advantages of the socialist system and for "passing over in silence the priority of inventions by Russian scientists." The Advertising Council of America added a few suggestions of their own for bringing up young Communists.

Dear Soviet Teachers:

We note that you have been discreetly silent on some aspects of the Communist system. And that you have been urged by Pravda to fill your students with "profound contempt" for the admiration given to ours.

May we respectfully suggest a few more things that you'd better keep quiet about if you want the young Russians to grow up convinced Communists.

Don't tell them that in America the opportunity for advancement is unlimited—that here a man can work where he pleases and change his job when he pleases, and that he has the right to organize and bargain collectively.

Don't say anything about the competitive system, with rewards for initiative and enterprise in free markets—the same system which has produced a standard of living about ten times higher than yours.

Don't mention that here people

can own things and manage their own businesses . . . and invest money in new undertakings.

Don't breathe a word about the American urge to invent better machines—and more productive ways to use them.

Don't refer to a dynamic way of life that keeps on turning out more and better goods—keeps on lowering costs and raising wages, with shorter working hours.

In other words, don't give them any of the facts about what happens when free people, governing themselves and spurred by ambition, go all-out to build a new kind of country—different from any the world has ever seen.

We don't say our way is perfect—far from it. We still have our ups and downs of prices and jobs. But we know what's wrong and we're free to do something about it. Change is our middle name. **AND IN THE LONG RUN, OUR SYSTEM ALWAYS CHANGES FOR THE BETTER.**

John Q. Public, U. S. A.
—Wolf Magazine of Letters

To these sentiments The Technician adds "Amen!" and "Bravo!" and hopes that through printing such statements all of us will become more keenly aware of the strengths of our own country and the weaknesses of others.

Messrs. Bullard, Freeman, McCool, And Hays Added to STI Faculty

Four new instructors joined the teaching staff of Southern Tech when the school began its eleventh quarter of operation on September 25. In keeping with the Institute's policy of providing instructors with industrial know-how and teaching skill, these men were selected because of their excellent scholastic background, their teaching ability, and their industrial experience.

To help all STI to know them better, The Technician gives a brief sketch of each.

Mr. Frank L. Bullard, Jr., of Maben, Ga., holds the Bachelor of Science and Master of Science

building implements field. Before accepting the teaching position here, he was an instructor at Virginia Polytechnic Institute. Mr. Bullard teaches physics and civil engineering.

Mr. Charles R. Freeman, of Menomonee, Wisconsin, received his Bachelor of Science degree at the University of Minnesota and his Master's Degree from Stout Institute. He has published a thesis on educational methods in teaching college freshmen and was formerly employed in the aluminum and steel farming industries. Mr. Freeman teaches machine shop prac-

CLUB ROUNDUP

Thanksgiving Dance by Mechs Enlivens Campus Club Plans

NOTICE! NOTICE! NOTICE!

All "music lovers," "hep-cats," and "gone guys" are cordially invited to attend the annual Mech Club Thanksgiving dance. This dance will be held at Southern Tech Gym on November 17, at 9:00 P.M. For \$1.25 you can spend an entertaining three hours dancing to the music of Graham Jackson's orchestra with your wife or girl friend. Plenty of refreshments will be available, and everyone should have a good time.

The proceeds of this dance will be used to further interest in the Mechanical Technology Department.

DEPARTMENTAL CLUB MEETINGS

A committee from the Student Council met recently with representatives of the various departmental club meetings. The main object of this meeting was to establish a set time on a certain day for each club to meet so that there would be no conflicts with other clubs' meeting times.

Campus News Quirks

A new fad has hit the University of Nebraska campus. Instead of being pinnates, it is strictly the latest thing in love affairs for a couple to be "cuffmates."

To become "cuffed" the only thing a fellow needs to have is a pair of dime-store police handcuffs which he and his girl may sport together.

STI Graduates Highly Praised By Wright Company Official

Several of Southern Tech's department heads recently wrote industries in which they knew STI graduates were employed and requested information concerning the quality of work these graduates were doing and the progress they were making in their jobs.

Among the letters received in answer to the request was the following one to Mr. Frank Stovall, head of the Electronics and Radio department, from the Wright Machinery Company, Durham, N. C.

September 19, 1950

Mr. Frank A. Stovall, Head
Electronics & Radio Department
Southern Technical Institute
Chamblee, Georgia

Dear Mr. Stovall:

The writer has visited your campus on two occasions and has inspected your facilities for training technicians in the various courses offered. We are frank to say that

After a lengthy discussion the representatives decided that the departmental clubs should meet on the second and fourth Tuesdays of each month at 1:00 P.M. This will leave the first and third Tuesdays open for such organizations as Tau Alpha Pi Honorary Society, Monogram Club, Camera Club, etc.

GAS FUEL CLUB

The Gas Fuel Technology Department, which was, before the fall quarter, a mere seedling, has now blossomed into full flower. Enrollment within the department has increased about five hundred per cent, and this enrollment warranted the organization of the Gas Fuel Club.

The club was organized to promote interest in the Gas Fuel Department, to promote participation in activities and athletics, and to provide an informal meeting place for members of the department.

Officers of the club are Hugh Edwards, president; Chet Brownagle, vice president; Eddie Gause and Dan Goldson, public relations officer.

Mr. Fred Lewis, who is very active in student affairs, is the very able and qualified faculty advisor.

ALPHA BETA SOCIETY

The Alpha Beta Society, which is the official club for the Building Construction Department, is engaged in a program to better its club room facilities. The job of repainting the lounge is now in progress, and a promotional scheme for installing a number of pieces

(Continued on Page 3)

offer are very thorough and your graduates should obtain all the knowledge necessary for them to carry on in their chosen field.

As you know we have employed four of your graduates in Electronics and these men have done an excellent job for us. They are well trained and have a superior knowledge in the technical field at which they are working. We have recently tried to hire other of your graduates but have been unable to secure them due to the fact that they had accepted jobs other places.

With kindest regards and best wishes for the continued success of your institution.

Yours very truly,
WRIGHT MACHINERY COMPANY

B.B. Mangum, Personnel Director

Four Students Enjoy Benefit Coca-Cola Co. Scholarships

Four Southern Technical Institute students are now enjoying the benefits of four \$225.00 scholarships provided by the William Pratt Heath—Coca-Cola Company Scholarship Fund and awarded to them by STI officials prior to the opening of school on September 25.

These four fortunate winners are Miss Sarah Melton, native of Statesboro and Southern Tech's only coed; Wilbur R. Noles, of Aragon; Frank H. Blair, of Macon; and Luther H. Cooper, of Monroe.

Invitations to apply for the scholarships were extended to all qualified students who attended STI during the summer quarter and by letter to those who did not attend but who were on the rolls and qualified.

To qualify, a student has to be in school, rank high scholastically, and have at least three remaining quarters to attend before graduation.

CLUB NEWS ROUNDUP

(Continued from Page 2)
of modernistic furniture is now in the drawing-board stage.

This society has recently changed its key design to a more appropriate one, symbolizing the modern spirit of architecture and construction.

HEATING & AIR CONDITIONING CLUB

Plans are now underway for a big party for the members of the club. To make this party a success, every member is urged to attend the next meeting of the club on October 17. Heating & Air Conditioning students who desire to become members of this club should contact Secretary McDowell or President McKenzie at the club lounge in Building 8 as soon as possible.

RADIO CLUB

The Radio Club is sponsoring an organization drive to increase its membership. This is open to all students who have a genuine interest in radio.

The following new officers have been installed—president, Clark Butterworth; vice president, Bill Spaeth; and secretary, R. G. Appling.

Non-Vets Exceed Vets; 404 Enroll

(Continued from Page 1)
59; Electrical, 46; Gas Fuel Technology, 46; Industrial Technology, 42; Heating & Air Conditioning, 33; and Civil Technology, 25.

Because of the fast-growing Gas Fuel industry in the southeast and its interest in Southern Tech, the Gas Fuel department has the greatest percentage of increase. There are 46 enrolled in the Gas Fuel Department. Thirty-three of these are on scholarships paid by Gas Fuel companies in this and surrounding areas. Thirty of these scholarships were awarded to Georgia boys, the other three going to out-of-state students.

ation. A winner who is now taking advantage of a scholarship is eligible for another if he meets all requirements.

Mr. J. D. Sewell, Assistant Director, states that there will be two of these \$225.00 William Pratt Heath—Coca-Cola Scholarships available each year to deserving students who can satisfactorily meet the requirements.

Mr. Sewell Attends Gas Fuel Meeting

(Continued from Page 1)

permitted a number of opportunities to acquaint many gas men with the details of Gas Fuel Technology Course at Southern Tech and to hear criticisms and appraisals of the course by men who knew it well.

One of the most meaningful statements he heard was made by Mr. C. J. McAllister, vice-president of the Parlett Gas Co., Waldorf, Md., and a member of the Board of Directors of the LP Gas Association, who said, "The Gas Fuel course at the Southern Technical Institute is one of the most outstanding accomplishments which the industry has achieved in recent years."

This one and others like them, Mr. Sewell says, reassured him that the Gas Fuel course offered by Southern Tech is one of the finest in the nation and offers to students taking it one of the best futures that they could plan.

Miss Melton Likes Southern Tech

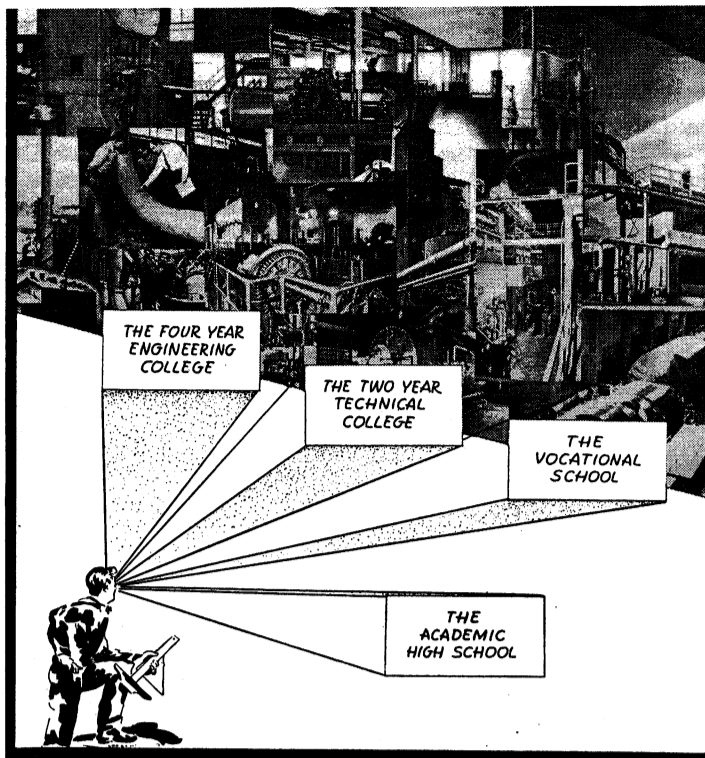

(Continued from Page 1)

won for her the Darley-Waters-Poindexter Cup as the school's most outstanding student.

Following her graduation from high school, Miss Melton entered Georgia Teachers College there in Statesboro, where she attended for one year. Again she was at the top of her class, but, she decided, the type work for which she was studying wasn't to her liking. This decision, she states, was made upon reading an article in The Atlanta Journal concerning Barbara Hudson, STI's first coed, and the type work for which she, Miss Hudson, was studying.

It was not until later, however, that the opportunity presented itself that was to enable Miss Melton to fulfill her desire to attend Southern Tech. It came in the form of an announcement on the Teachers College bulletin board stating that certain scholarships to Southern Tech were being offered by the Coca-Cola Company. Miss Melton immediately applied for the scholarship and was accepted.

Miss Melton is living with relatives near here while attending school, and, upon graduation, she expects to remain in the Atlanta area.

GEORGIA TRAINS FOR INDUSTRY

Education Journal Features Work of 3 Staff Members

The September issue of the Georgia Education Journal featured the work of three Southern Technical Institute staff members.

The above design is a reproduction of the cover of the Journal. It was conceived, composed and drawn, and photographed by Messrs. C. R. Orvold and E. J. Muller, of the STI Building Construction Department, and Mr. J. D. Sewell, Assistant Director, all of whom spent many hours working out the details and perfecting the design.

The creation portrays graphically the part which Georgia schools play in preparing young men and women for industry. In fact, the Journal's theme for the

coming year is "Georgia Schools Train for Industry."

On pages 11 and 12 of the Georgia Education Journal is an article by Mr. Sewell, which introduces the year's theme and gives an over-all picture of the vital service that Georgia's different types of schools perform in training skilled personnel to carry on the many varied industries in our state. STI's part is fully explained, and many pictures show Southern Tech students and staff members at work in shops, labs, and classrooms.

Other articles treating a special type of training and service will appear in the Journal in the next few months.

Miss Miller to Write Magazine Article on STI for McGraw-Hill

Miss Jeanne Miller, an authority on technical institutes and editor of the McGraw-Hill publication, Technical Education News, spent Monday, October 9, here collecting information for a feature article which she will write for her magazine on the Southern Technical Institute.

Director Johnson and Miss Miller spent the morning visiting all shops and labs, seeing every phase of STI at work, and talking with department heads. In the afternoon Miss Miller interviewed division heads and went over all courses and subjects. Before she left Mr. J. D. Sewell, assistant director, supplied her with many pictures.

The article on STI will appear in an early issue of Technical Education News.

Technician Wins Coveted Honor

(Continued from Page 1)

perior," "First Class (Excellent)," "Second Class (Good)," "Third Class (Fair)," or "Fourth Class (No honors)," depending upon their quality.)

Director L. V. Johnson was also proud of the rating which The Technician won, as the following letter to Mr. Bryant and the staff attests:

Gentlemen:

I have read with a great deal of satisfaction the fine record you have made in the scoring of the Associated Collegiate Press, and it is very gratifying to know that we are rated in the Excellent First Class category.

I sincerely feel that the "Technician" is a very fine publication and is a wonderful representative of our school. I have had a great many compliments on it since it began. Knowing that its fine record is the direct results of the excellent work being done by you and members of the "Technician" Staff, I wish to extend to them my sincere appreciation and thanks and best wishes for the future.

With your permission I would like to forward the scorebook through channels to the Board of Regents asking them to return it for your files.

Sincerely yours,

L. V. Johnson, Director
Southern Technical Institute

Hornets Schedule 23 Games; Open With UNC Frosh Dec. 1

Wealth of Player Material Expected To Furnish Plenty of Fast Action

Southern Tech's basketball team this year will have one of the most colorful schedules in the history of the school. To get things off to a roaring start, they will travel to Chapel Hill, N. C., on December 1 to play the University of North Carolina Frosh.

On the following night they will hop over to Raleigh, N. C., to meet the North Carolina State Frosh. Here they will participate in the preliminary game for the Loyola-N. C. State contest. Twelve and a half thousand people are expected to be present for the dedication of N. C. State's new coliseum, and that will probably be the largest crowd that a Southern Tech team will ever have the privilege of appearing before.

The following week the Hornets will play their first home game on

December 6 with Oglethorpe University and then settle down for the remainder of the 23-game schedule, which is composed of the leading junior colleges in the South.

Basketball practice got into full swing on Monday, October 9, and Coach Frank Johnson reports that a surprisingly large number of boys are out for practice. Candidates will be divided into a freshman squad and a varsity squad, and each team will have a schedule which will provide the fans with plenty of good, fast basketball for the preliminary games as well as the varsity games.

Since most of the student athletic passes have been issued, there should be no excuse why the cheering sections should not be overrun with STI spectators. Plenty of fast, full-of-action basketball awaits you.

Intercollegiate Basketball Schedule, 1950-51

The schedules for the freshman and the varsity teams appear below:

FRESHMAN SCHEDULE

Nov. 28 Tucker High at Tucker
Dec. 8 Atlanta Christian College "B" (H)
Jan. 8 Atlanta Christian College "B" (H)
Jan. 26 Chamblee High at Chamblee
Feb. 3 Chamblee High (H)
* Clarkston High
* Avondale High
* Northside High
* North Fulton High
* O'Keefe High

* Dates to be announced.

VARSITY SCHEDULE

Dec. 1 Univ. of N. C. Frosh at Chapel Hill
Dec. 2 N. C. State Frosh at Raleigh
Dec. 6 Oglethorpe University (H)
Dec. 8 Atlanta Christian College (H)
Dec. 9 Atlanta Naval Air Station at Chamblee

Jan. 6 Georgia Southwestern College at Americus
Jan. 8 Atlanta Christian College (H)
Jan. 12 Young Harris College (H)
Jan. 13 Brewton-Parker Institute (H)
Jan. 15 Gordon Military College at Barnesville
Jan. 18 Oglethorpe University at Oglethorpe
Jan. 20 Young Harris College at Young Harris
Jan. 25 Columbia Theological Seminary (H)
Jan. 29 Middle Georgia College (H)
Jan. 31 Georgia Military Academy at College Park
Feb. 1 Columbia Theological Seminary at Decatur
Feb. 12 Gordon Military College (H)
Feb. 15 West Georgia College (H)
Feb. 16 Georgia Southwestern College (H)
Feb. 19 Georgia Military Academy (H)
Feb. 22 West Georgia College at Carrollton
Feb. 24 Georgia Tech Frosh at Tech
Feb. 28 through Mar. 3 Second Annual Georgia College Invitation Tournament at Southern Tech Gym.

Covering the Campus

with John Vanko

First item on the agenda at the beginning of the quarter was election of club officers and initiation of new members. This matter having been disposed of, treasurers are now busily engaged in relentless pursuit of recalcitrant dues—owing members. Big Deals are brewing and cash is of the essence. To repeat, cash is of the essence.

Seniors (anyone over 21) let's face it; you're all washed up. Especially veterans who have been exposed to the nasty ol' world and the facts of life and become corrupted by them. Your presence may be considered a contaminating influence by dotting parents who, understandably, feel apprehensive about entrusting their pride-and-joy to your care. As a result of your examples, some freshmen have already taken to carrying matches and using the men's room. Heaven help them if they ever find out about women.

One lone member has been initiated into Tau Alpha Pi this quarter—Major Summerford of the Hot Air department. Membership in the Honor Society is rapidly declining and with the graduation of

than lower the standards of minimum requirements (two quarters of "B" average), it would be better to let the society dissolve.

23 GF Companies Help Finance 33

and Central Georgia Gas Company, Statesboro.

Thirty-four students accepted these donors' offers of schooling and enrolled at STI during the last week of September.

Many additions and improvements made necessary in the Gas Fuel labs by this influx of students are now being made. Much new equipment is also being installed. STI is again grateful to the gas companies for about \$30,000 worth of this.

Publicity Needed

The biggest trouble now, Mr. Sewell thinks, is getting publicity for the Gas Fuel course at STI. Only a few schools, he says, have courses such as this one, and it is necessary to convince the students of possibilities in this field. In some instances the Gas Industry is finding it essential to play a dual role, supplying both funds and

THE SPORTS FRONT

With Hugh Edwards

There may be a school in the junior college circles that boasts more potential power on the hardwood than Southern Tech, but at the present time the secret has not been divulged. Southern Tech is now the proud owner of some of the best high school talent that is possible to assemble in one group. Many of these potential stars attained fame at some of the leading high schools in the country and some of the others won honors at smaller high schools, but when you put all of them on one team it is bound to be a good one.

HODGES, CAREY PROMISING

Two of the most promising candidates for the basketball team are Bubber Hodges and Fred Carey. Bubber was captain of Savannah High's AA Tournament finalists and was selected as one of the All-State guards for the State of Georgia. He turned in an amazing performance in the North-South All-Star game held at Georgia Tech a few weeks ago and was named one of the outstanding players of the game.

Fred won his honors at Atlanta's own O'Keefe High. He was selected to play on the North team in the North-South tilt and won the praise of all who saw the game. Oddly enough, these two men were bitter opponents a few weeks ago, but now they will pool their talent to help make Southern Tech one of the outstanding contenders for the championship this year.

MORE POWER, TOO!

Besides these two members of the North-South All-Star game, there are many others who are not too far down the ladder in sports fame. From O'Keefe High comes Jimmy Perry, a teammate of Fred Carey and one of the outstanding centers in the Atlanta area. He is six feet, four inches tall and is expected to give many fine performances during his stay at Southern Tech.

Roosevelt High can be given credit for developing Charlie McDaniel into a fine ball player. Charlie was a forward on the Roosevelt squad and is a man to watch if you're on the opposing team.

College Park High lost a well-rounded athlete when Chet Brown-agle graduated. Chet was named All-Metropolitan end at the close of last year's football season and was a member of the City Doubles Tennis Championship Team. Besides these honors, he is also an accomplished basketball player.

DEKALB COUNTY REPRESENT-ED!

Leaders in all phases of the gas industries and manufacturing have approved this course of study as a step forward in their vast educational program.

two more promising athletes. They are Jerry Upchurch, a runner and a passer that would be an asset to any football team, and Larry Ramos, a member of Avondale's versatile forward wall. Tucker High comes forth with Allen Driskell, a four-letter man, and Wendell Melton, all-county basketball guard.

From Druid Hills High STI got Jimmy Maxey and Bill Tye. Jimmy was a star basketball player, and is an excellent high jumper and pole vaulter. He won the Georgia-Alabama Pole Vaulting Championship with a height of eleven feet, eight inches. Bill is an accomplished weight man and is very proficient with the javelin, discus, and shot put.

With all this talent, Southern Tech is bound to be near the top when the final scores are announced for any type of athletic event.

Council Reserves Hour Weekly For Clubs, Assemblies

Plans Being Worked Out For School-Wide Schedule To Minimize Conflicts

The STI Administrative Council voted recently to set aside each quarter one hour a week to be used by clubs, other organizations, and the whole student body for their meetings. The time this quarter is from 1 to 2 o'clock on Tuesday afternoons.

Student Council has been assigned the task of working out a school-wide schedule for all meetings to be held at the designated time, so that confusions and conflicts can be reduced to a minimum. A committee, with Mr. C. V. Maddox, Dean, is now working on such a schedule, which *The Technician* hopes will be ready to publish in its next issue.

The Administrative Council's original plan called for three assemblies a quarter, two to be conducted by students and one to be planned for by the STI administration and faculty.
