STUDENTS, WELCOME TO STI!

Director Johnson Gives Good Advice To Fall Enrollees

By L. V. JOHNSON

Whether you are registering for the first time or are an old student returning, I welcome you to Southern Tech and congratulate you on your wise decision to continue your education in a technical field.

The opportunities for qualified Engineering Technicians in all fields are the brightest in history.

You and Southern Tech are partners in one of the most important jobs of your life—to qualify you, not only to begin, but to advance rapidly in your technical field. The school, for its part, has worked out with industrial leaders a blue print of the education and training needs of your field and has provided a highly qualified faculty and well equipped laboratories to do the job.

Unfortunately education and experience can not be recorded like a speech on a wire recorder. Recording a college education on the brain takes a great deal of hard work, and that is the part you must play on our academic team. Your success—not only in school, but in life—living and job satisfaction will be proportional to the work you do here.

Your life's work will require not

DIRECTOR JOHNSON

only sound technical knowledge and experience, but also the ability to live and work with your fellow man. Learning to do this is an important part of your college education. The student lacking the human relations side of his training is like a flat wheel—he never goes very far.

The school's many extracurricular activities, such as this newspaper, the yearbook, social and honor societies, and a balanced athletic program, provide a much broader college life; and the experiences and friends gained will contribute greatly to a successful future.

Take full advantage of your opportunities here by beginning work on the first day. Most of those who fail the work here do not lack ability. They fail because they be-

(Continued on Page 4)

Students To Learn More About STI In Assembly October 1

For the first time in the history of the Southern Technical Institute, school officials have planned a general assembly of all students—new and returning—and faculty members to be held at the opening of a fall quarter.

This meeting will be held in the Navy theater at 1:00 o'clock on Thursday afternoon, October 1, and all students and teaching personnel are expected to be present.

Chief purpose of the meeting is orientation, Director L. V. Johnson explains. He states that several means will be employed to present to the students as much information about Southern Tech as possible in the time allowed.

Director to Present Faculty

After a welcome by Director Johnson, all members of the faculty will be introduced and the capacities in which they serve will be explained.

Several staff members will speak on subjects which will give the students a much better understanding of the technical institute level of training, reasons for establishing Southern Tech, and what STI has to offer in the way of technical training, activities, and special services. Faculty sponsors of the various clubs, publications, and sports will be introduced and given an opportunity to speak for their activity.

Members of the STI Glee Club will be on hand to enliven the affair with several special selections.

Committee members who have planned the assembly feel that the assembly should help to draw all Southern Tech folks closer together, help to foster more cooperation and unity among all, and generate more enthusiasm and school spirit.

School Expects 425 Students September 28 for Fall Term

200 New Registrants Make Application; 30 States, Nine Countries Represented

Four hundred and twenty-five students were expected to register for work at the Southern Technical Institute during the week of September 28 through October 3, Director L. V. Johnson announces. He also states that this is the school's largest enrollment, surpassing the 403 of the fall, 1949 quarter, and the 413 of the fall, 1950, term.

This figure was arrived at by adding the 225 old students expected

to return to the 200 new students who were anticipated. It is expected that the student body will be about equally divided between veterans on all four GI bills—346, 16, 550, and 894—and non-veterans.

30 States Represented

A study made prior to registration date revealed that the 425 students were coming from 30 states, the District of Columbia, and 9 foreign countries. In the 1953-54 student body will be representatives from Alabama, Arkansas, California, Connecticut, Colorado, Florida, Iowa, Illinois, Kansas, Kentucky, Louisiana, Mississippi, Maine, Minnesota, Massachusetts, Michigan, New York, New Jersey, Nebraska, North Carolina, Oregon, Ohio, Pennsylvania, South Carolina, Tennessee, Texas, Virginia, Washington, Wisconsin, and, of course, Georgia.

Next to Georgia, Florida sends to STI the largest number of students. North Carolina comes second and Alabama third.

Students from Cuba, Costa Rica, Canada, Formosa, Mexico, Peru, Puerto Rico, Thailand, and Venezuela had applied for admission and were expected to join the STI student body.

This same pre-registration study showed that by far the largest number of new applicants preferred Electronics and Communications Technology. Electrical, Mechanical, and Building Construction were the next choices, and about as many students preferred one of these as the other.

Two Co-eds Expected

Two coeds were among the 200 new students expected. Miss Helen Kimbrough of Metter, Georgia, was

(Continued on Page 3)

Jess Ward Leads 13 Seniors Who End Study September 19

Thirteen students, representing five of Southern Tech's eight departments, completed all requirements for graduation on September 19 and joined the 568 other graduates who are now in industry or the Armed Services. Degrees will be awarded those 13 men in June, 1954, exercises.

Jess B. Ward, native of Paintsville, Kentucky, and a member of the Gas Fuel Department, led the class scholastically with the excellent average of 3.81 and will graduate with highest honors. Bruce Muse, Mechanical, was second with a 3.26, and Loren J. Rose, H&AC, was third with 3.20. Three other students qualified for the STI

honor roll by achieving 3.00 or better—Alexander S. Keith, E&C, 3.14; Carl B. Liles, E&C, 3.13; and Charles G. Daniel, E&C, 3.00. (All figures were based upon five quarters of work).

Before they left the STI campus all 13 members of the class had had several job offers each.

Members of the class, arranged by departments, and their home towns, follow:

Building Construction

Frank Alexander, Jr., Brookhaven; Charles Dean Brownlow, Atlanta; Alfred Lee Trogon, Waycross.

Electronics and Communications

Charles Grady Daniel, Savannah; Alex Stone Keith, Jr., Atlanta; Carl Blackwell Liles, Atlanta; Pete Jim Pappas, College Park.

Gas Fuel Technology

Jess Boyd Ward, Paintsville, Ky. Heating and Air Conditioning Loren John Rose, DeSoto.

Mechanical Technology

Juan Estela, Juncon, Puerto Rico; William Edward Furcron, Elberton; David Rudolph Ginn, Brooklet; Bruce Arthur Muse, Carrollton.

Over 200 Order Degree; Others Urged To Do So

Alumni of Southern Tech are once again reminded that they may obtain their Associate in Science degree by sending to the Registrar a check for \$2.50 to pay for handling, engraving, and printing the certificate.

Over 200 alumni have ordered and received the degree, which number, however, is only about two fifths of those entitled to it.

More Democracy, Recreation Promised Thru Dormitory Student Government

By LARRY PARLETT

the dormitory students.

The Dormitory Council shall consist of six members from each dormitory in use. Members are elected by popular vote of dormitory students for a period of two quarters. All students will be eligible to vote except those entering Southern Tech for the first time.

Council, by trial, shall determine the guilt or innocence of students accused of violations, and shall recommend the penalty to the Dean of Students for final action.

Council shall supervise over-all phases of dormitory life.

Members and officers of the Council for the summer quarter were Larry Parlett, president; David P. Jones, vice president; Russell Turner, secretary and treasurer; Delmas Fletcher, senior representative; and Earle Roberts, freshman representative.

The main project of the Council for this summer was the obtaining of a lounge for students in Dormitory 19. The lounge will be the

first in the history of the school for dormitory students. By the beginning of the fall quarter it should be completed.

Persons who have contributed most to the Council in obtaining and fixing up the lounge include Director L. V. Johnson, permission and \$125.00 allotment; Messrs. J. M. Davis and B. T. Tate, Buildings and Grounds repairs; Mrs. L. L. Parlett, for curtain material; Mrs. M. Mavity, many trials and work on curtains; Mrs. Earle A. Clifford, Mrs. Mildred Wilson, Mrs. Gertrude Byrum, and Mrs. L. V. Johnson, for work on curtains. Sincere thanks from all students for this great help.

STI Aids Students In Draft Problems

Registrar L. Y. Bryant, who serves as liaison man between STI students and their draft boards, states that the school will do everything possible and legal to help the student begin, continue, and

Log Adviser Seeks Industrious Staff

By NEEL HOSKINS

The fall quarter finds many new plans being formulated for this year's Technician's Log, STI's yearbook. Mr. George Carroll, the Log's faculty adviser, feels that with the cooperation of the student body, his staff can make this the best edition yet.

The Log will be printed locally for the first time in several years and will not be reproduced by the lithograph process formerly used. This printing should offer much clearer photographs than those in previous editions.

Have Picture Made

All students are urged to have their pictures printed in the Log. (Continued on Page 4)

Values of Varied Activities Program Cited; Students Urged to Participate

Officials of the Southern Technical Institute believe so strongly in the benefits of extracurricular activities that they urge every student to participate in them. These student activities are most helpful in developing good health, the social graces, well-rounded personalities, and dependable leadership. They offer the student wholesome diversion from classroom, shop, and laboratory, and give him opportunities for creative self-expression. They build school spirit, keep it buoyant, and serve to unify administration, instructors, and students into one enthusiastic, loyal group.

Southern Tech, therefore, sponsors intercollegiate and intramural athletic programs, a school paper, an annual, many social events, a glee club, departmental clubs, student government, and other worthwhile student organizations.

Participate Actively

Every student is, furthermore, urged to become not just a joiner, but an active participant in all the extracurricular activities his time will allow without jeopardizing his studies. He will have much fun, make many new friends, profit from the democratic processes at work, and experience the great satisfaction which comes from sharing his

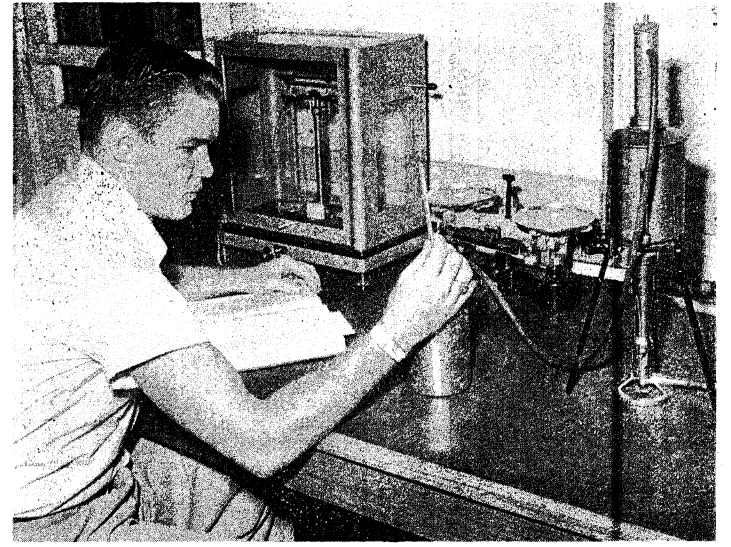

talents and abilities with others. Someone has truthfully said that people are loyal only to those things which they help create, plan, and execute. By giving of one's self through participating in worthwhile school activities, the student is drawn more closely to his organization and thereby to his school. His spirit is enlarged; he forgets self and works for the good of the group. The final outcome is a greater school spirit founded upon genuine enthusiasm, loyalty, unselfishness, and real respect for alma mater.

Graduates Can Help

A keen observer recently wrote that America's Number 1 problem is people, and cited the many, many marital, family, social, economic, and industrial ills which disrupt our country today. He attributed the large majority of these bungled relationships to the inability of people to live and work harmoniously with people, because of their decided lack of knowledge of and ability in human relations.

If the Southern Tech student makes the best of his opportunities while in school, he should be in a position to help correct these ills when he enters his work life. In many of his classes he gains knowledge of people and how to

solve their problems. Through his extracurricular activities, which are laboratories in human relations, he gains wisdom through the application of his knowledge, and thereby prepares himself to render an indispensable service to his employer later—an employer who is willing to pay unlimited salaries for this service to people. Everyone invariably profits — organization, school, student, employer, society. Early in your school career at STI, therefore, align yourself with the activities of your choice, participate enthusiastically, contribute unselfishly, and begin to enjoy the benefits which are sure to come to you.

Southern Tech Students Study Much

183 Enroll for STI Summer Quarter; Many Activities Keep Groups Busy

Several events of interest and importance took place during the summer term at Southern Tech, which editors of *The Technician* think newsworthy and deserve passing on to those who missed that quarter's attendance.

The school enrolled 183 students for the quarter, 31 of whom were new to STI. Veterans outnumbered non-veterans by a count of 119 to 64. Only seven of the 183 dropped out before the end of the quarter. Three courses enrolling the largest number of students were Electronics and Communications, 59; Building Construction, 28; Mechanical, twenty-seven.

* * *

Director, Five Students Appear on TV Program

Five STI students and Director L. V. Johnson presented a live, 30-minute television show over WAGA-TV at 2:30 p.m. Sunday, August 23, over the Exchange Hour.

Students who participated and did a splendid job were Fred Vickers, H. R. Cannon, W. H. Boulieneau, Don Melsted, and Mrs. E. J. Newbury. Mrs. Vickie Griggers

was the moderator, and Mr. Robert Hays was the script writer.

Mr. Johnson and the group discussed Southern Tech, the technical institute level of training, and various phases of life and work on the STI campus.

* * *

STI Students Enjoy Navy Swimming Pool

For the first time in the history of Southern Tech students and faculty members were permitted to share the swimming pool at Lawson with personnel on the Navy base. For about 15 cents a swim students properly identified, STI faculty members, and their families were permitted to use the pool every evening from 7 to 9 and on Friday mornings.

STI folks are most grateful to Navy folks for being permitted to share the pool and enjoy many refreshing, cooling-off dips.

* * *

Staff Members Represent STI at ASEE Meet

Director L. V. Johnson and Messrs. L. Y. Bryant, H. L. Mc-

Clure, and W. R. Halstead, with Mrs. Johnson and Mrs. Halstead, attended the meeting of the American Society for Engineering Education held at the University of Florida, in Gainesville. The group was gone from June 21 through June 25. While there STI staff members participated in meetings held especially for technical institutes, met many members of the ASEE, exchanged ideas with them, and checked STI's progress against that of other similar institutes.

E & C Staff Trains Three AT & T Groups

Members of Southern Tech's Electronics and Communications staff, under the supervision of Mr. W. R. Halstead, department head, this summer trained three different, select groups of American Telephone and Telegraph Company employees in work which helped to qualify them for the FCC second-class radiotelephone commercial operators license.

The first group of these men, 20 in number, began their five-week course on May 5 and closed it on May 28. Seventy-one per cent were successful in passing the examination and securing the license for which they had worked.

100% Pass Exams

A second group of 16 men was in training from June 9 through July 4. After five weeks of study every one of the 16 passed the required examinations and thereby qualified for licenses. Naturally everyone concerned was highly pleased with the 100 per cent achieved.

On July 14 the third group reported to Southern Tech for work. In this class were 15 students. In examinations on August 7 thirteen of the 15, or 87 per cent, proved they possessed the required knowledge which entitled them to the second-class radiotelephone commercial operators license.

Mr. Halstead and his co-workers expressed satisfaction over the results of their teaching, feeling that their efforts had been successful.

Staff Members Ready to Help When Students Meet Trouble

Beginning students, since we of *The Technician* staff have been at Southern Tech longer than you, we know that problems of all kinds are sure to arise. We, therefore, want to toss at you a few timely suggestions which we believe will be helpful.

You should work closely with your course adviser in all matters pertaining to your scholastic work and progress. He will help you plan each term's schedule and advise you about dropping or adding subjects. Through him your mid-term reports will be sent to you. Though he will keep a close check on all work you take, you too should share the responsibility of seeing that all failed subjects and prerequisites are scheduled first, that all required subjects are passed, that point-average and other graduation requirements are met. Get acquainted with him soon and go to him for guidance and counseling.

Names, courses, and locations of these men are:

C. R. Orvold	Building Construction	Bldg. 9, Room 26
C. T. Holladay	Civil Technology	Bldg. 13, Room 7
W. R. Halstead	Electrical, Electronics and Communications	Bldg. 12, Room 5
E. A. Clifford	Gas Fuel Technology	Bldg. 9, Room 8
L. H. Taylor	Heating and Air Conditioning	Bldg. 8, Room 3
H. L. McClure	Industrial Technology	Bldg. 13, Room 18
C. A. Arnston	Mechanical Technology	Bldg. 11, Room 4
Department Heads		
J. J. Defore	Physics	Bldg. 11, Room 8
R. W. Hays	English	Bldg. 24, Room 11
C. V. Maddox	Mathematics	Bldg. 24, Room 12
E. J. Muller	Drawing	Bldg. 9, Room 24
Division Heads		
G. L. Crawford	Technical	Bldg. 11, Room 8
G. L. Carroll	Basic Studies	Bldg. 24, Room 11

If your problem concerns admission, withdrawal, attendance, quarterly or permanent records, transfer credit, point averages, veterans' affairs, Selective Service, transcripts, or report cards, see Registrar Bryant or Mrs. Nyland in Bldg. 24, Rooms 13 and 15. Mr. Bryant is also adviser of *The Technician*, STI's monthly newspaper.

If your problem is of a personal nature, Dean C. V. Maddox, Bldg. 24, Room 12, will be glad to help you. He is also in charge of STI's testing program.

If your troubles are financial ones call on Mrs. Joyce Smith (Bldg. 24, Room 20) or Director L. V. Johnson (Bldg. 24, Room 14).

If you are interested in athletics and desire to try out for varsity sports, Coach C. A. Arnston (Bldg. 11, Room 4) will be glad to enlist you.

Mr. G. L. Carroll (Bldg. 24, Room 11), adviser of the *Technician's Log*, STI's annual, will readily put you to work if you express an interest in yearbooks.

Singers See Mr. Defore

Mr. J. J. Defore is looking for you if you can sing and wish to contribute your talent to his Glee Club.

When the time comes for you to seek employment, Mr. R. L. Wilkinson, placement director, is the man to contact. He is assisted by Mrs. Mildred Wilson (both in Bldg. 24, Room 17).

Mr. William E. Norton, dormitory supervisor, will consult with you about any problems which may arise in the dormitory.

If your health is the question, Drs. Mendenhall, Kerr, and Spitzer are authorized to serve you. Their office is in the Chamblee Clinic, behind Lockhart's Drug Store.

Call upon these people if they can help you stay healthy, happy, occupied, and mentally fit.

Rules, Regulations Undergo Revision; Students Advised

The attention of all students is called to revisions recently made in "Student Rules and Regulations" upon the recommendation and approval of the STI Administrative Council and the entire faculty in general meeting. Important changes are stated below.

Students can no longer put off indefinitely the making up of work missed because of an excused absence. An added regulation requires the student to make arrangements within a week's time to make up work missed.

Another addition makes it possible for the Dean of Students, upon recommendation of the instructor, to assign offenses for excessive class-cutting.

Incompletes Revised

In the future, an incomplete must be removed during the next quarter in which the student is in residence and in which the subject is taught. If it is not, the Registrar is authorized to convert the "I" and the accompanying letter grade into an "F." The subject will then have to be repeated.

Though students may receive a "FF" at mid-term, they are urged to remain in the class and get all that is possible from it.

In every place where 1.5 and 1.7 are used, these averages were changed to 1.50 and 1.70. These changes mean that a student can

not be classified as a senior unless his average is at least 1.495, neither can he qualify for graduation unless he has at least a 1.695. Averages will, hereafter, be carried to three decimal places.

Heretofore, a temporary offense remained on a student's record for four quarters. A revision reduces the number of quarters to three.

Members of the Council and the faculty agreed unanimously that the student should be made responsible for scheduling back subjects, failed subjects, and prerequisites first and seeing that all requirements for graduation are fulfilled.

"Constitution and By-Laws of the Dormitory Student Government" also became an integral, functioning part of "Student Rules and Regulations," though applicable to dormitory students only.

STI PROVIDES STUDENTS CHOICE OF ACTIVITIES

By DAVID P. JONES

Not all of the student's time is taken up in classroom work at Southern Tech. Students have a choice of a variety of activities—social, departmental, athletic, and literary—in which to participate. Following is a list of departmental clubs that invite those interested to take part:

The Alpha Beta Society—for Building Construction students.

The Society of Civil Technicians—for the Civil students.

Electrical Club—for the Electrical students.

Epsilon Club—for the Electronic and Communications group.

Gas Fuel Club—for those who study Gas Fuel.

Heating and Air Conditioning Club—for the Heating and Air Conditioning department.

Iota Tau—for the Industrial boys.

Mechanical Club—for the Mechanical students.

Glee Club—for the "songsters."

Radio Club—for the "hams."

The Technician's Log—a year-book which requires the efforts of a number of students who wish to work on this project.

The Technician—the school paper, published monthly, offers all "news hounds" and other editorially inclined personnel a chance to increase their knowledge of newspaper work.

There are other activities in which the students may be privileged to participate—**Student Council, Dormitory Council, Honor Society**, and others to which he is either elected or appointed.

Athletic Activities

In the athletic field Southern Tech has the following activities, which are either intercollegiate or intramural:

Basketball—intercollegiate and intramural.

Baseball—intercollegiate.

Many Participate in Clubs, Student Government

Full information concerning these clubs may be obtained by attending a meeting of any of them or asking members.

Social Clubs

Southern Tech has, in addition to the departmental clubs, the following social clubs and activities for your consideration:

The Camera Club—for the "shutterbugs."

Touch Football—intramural.

Ping Pong—intramural.

Softball—intramural.

Horseshoe Pitching—intramural.

In all of them the students will find fun and relaxation.

Southern Tech wishes to extend to all new students an invitation to take an active part in all the above activities that their time and scholastic work will permit.

STI, Under Mr. Defore, Makes E & C Movie, Plans Seven More

By IVAN TATUM

LIGHTS! — CAMERA! — ACTION! — Director Jesse Defore starts the cameras rolling! September 2 marked the first shooting date for a series of eight departmental motion pictures which shall be taken periodically. Three weeks of camera work will be spent on each department film. The first film has already been taken and is now being edited; its prospective release date is November 1.

The first film was taken of the Electronics and Communications Department. Mr. James P. Goodwin wrote the script, and Mr. William R. Halstead is the narrator. Both are faculty members in the Electronics Department. The film covers the average student's 18 months of technical training, outlining his work from the day he registers until he graduates. It shows him at work in classes and laboratories. It also portrays dormitory life, extracurricular activities, and all phases of school life.

Mr. Defore Directs

Mr. Jesse Defore, head of the Physics Department, will direct all the film taking and alter the final prints. Mr. Goodwin will be the camera operator and Mr. W. W. Vaughn, an instructor in the Build-

ing Construction Department, will handle the lights and sound.

The primary purpose of these films is to introduce and explain to high-school students and vocational groups what technical institute training consists of. These films will do it more in detail than a speaker can explain with words. The prospective students will actually see what goes on. The movies will be shown to high schools, vocational guidance groups, and counselors by STI's publicity committee.

Each To Be 10 Minutes

Each film will be about 400 feet long and will run about ten minutes. It will be in black and white with a recorded commentary and background music. The recording process will be done with Film-O-Sound method. A magnetic-oxide coating along the edge of the film acts like the tape of the familiar type recorder. A special movie projector, available through the Georgia Tech library, is required to show the film.

Strickland Film Company, of Atlanta, will publish the final print. The second film is scheduled for early spring. This movie will be made in the department from which the next script is submitted.

Honor Society Adds Wentworth Institute Membership Is 107

Bovay Named Head Of Local Chapter

The fourth affiliate chapter of Tau Alpha Pi National Honor Society was chartered at Wentworth Institute, Boston, Massachusetts, on August 30. This chapter is the first in the fourth state to have a chapter, and hence carries the designation, Delta Alpha.

While Mr. Carl Bovay, president of the Alpha Alpha chapter of Tau Alpha Pi at Southern Tech, was at home for the summer in Naugatuck, Conn., which is near Boston, he acted as Installing Officer for the Chartering and Initiating Ceremony. Mr. Bovay's services for chartering were not required, but it greatly added to the impressiveness of the ceremony.

Membership Reaches 20

The newest members admitted to the Alpha Alpha chapter of Tau Alpha Pi at Southern Tech are David R. Ginn, of the Mechanical Department, and Loren J. Rose, of the Heating and Air Conditioning Department. They were initiated on July 31. Both of these members graduated at the end of the summer quarter. With the initiation of these two men, the membership of the Alpha Alpha chapter became twenty with ten active members and ten alumni. The national membership of Tau Alpha Pi is now 107.

The new officers for Alpha Alpha chapter of Tau Alpha Pi this year are

President Carl Bovay
Vice President ... James Metzger
Secretary & Treas., Russell Turner
Public Relations .. Ernest LeDuke

Membership into the Tau Alpha Pi Society is offered to institute students who have achieved an outstanding academic record. The requirements are two consecutive quarters on the honor roll, high character, active participation in extracurricular activities, and a unanimous approval by the membership.

Occasionally Everyone Dances

WARD'S 4.00 UNEQUALLED ON HONOR ROLL OF 38

That man, Jess B. Ward, did it again!

In the spring quarter he led an Honor Roll of 43 superior students with a perfect all-"A", 4.00 average. And in the spring he achieved the same average, the only difference being that the list of superlatives numbered 38.

Really, this Kentucky Gas Fuel specialist is good. His five-quarter average was a 3.81, and if his record over the sixth quarter was up to par, the 3.81 was due for a raise.

Several Stand Out

Several other students, however, made outstanding records. Carl B. Liles (E&C) and Marion F. Maner (E&C) tied for second position with a 3.95. Following them closely were Alex S. Keith (E&R), 3.80; F. Keith Wood (GF), 3.77; and Carl Bovay (GF), 3.71.

All who made 3.00 or above over at least 15 hours and had no failures deserve to be mentioned, however; so here goes:

- Leonard Allison, ET, 3.30; Bobby D. Anderson, GF, 3.18; Carl E. Bovay, GF, 3.71; Charles G. Daniel, E&R, 3.05; Phillips A. Dodd, Mech., 3.15; Charles Englert, GF, 3.00; David R. Ginn, Mech., 3.60; William Givens, ET, 3.00.
- Sheldon Hammond, ET, 3.05; David E. Hamrick, ET, 3.47;

Charles V. Hightower, E&R, 3.52; Obrie W. Joyner, BC, 3.06; Alex S. Keith, E&R, 3.80; Joseph J. Lane, Mech., 3.40; George M. Lawson, Mech., 3.33.

Ernest LeDuke, GF, 3.00; Carl B. Liles, E&R, 3.95; Marion F. Maner, E&R, 3.95; Don Meisted, GF, 3.50; James E. Metzger, E&R, 3.47; Ronald Miller, GF, 3.06; Bruce Muse, Mech., 3.30; Lary Peppers, GF, 3.20; Charles L. Ray, IT, 3.40.

Ernest E. Roberts, BC, 3.18; Loren J. Rose, H&AC, 3.30; Mark W. Sanders, E&R, 3.41; Robert F. Savage, E&R, 3.64; Gerald H. Spikes, E&R, 3.52; Bob Stanley, H&AC, 3.00; Clarence E. Turner, H&AC, 3.15; Russell Turner, Civil, 3.50.

Vincent Villasenor, Mech., 3.52; Jess B. Ward, GF, 4.00; Joe G. Wilburn, Civil, 3.41; Yardy T. Williams, E&R, 3.66; Keith F. Wood, GF, 3.77; Hoke S. Yarbrough, H&AC, 3.10.

STI Expects 425 Students This Term

(Continued from Page One)

one of these. Coming with an excellent record from Metter High School, she was to study Building Construction Technology. Miss Hung Yin Tsai, Chinese native whose home is on Formosa, was to register for Gas Fuel Technology. Plans had been made with Oglethorpe University officials for the two young women to live on the Oglethorpe campus.

The increased enrollment necessitated several additions to the STI teaching staff. All of last year's faculty but Mr. J. A. Natress, head of Industrial Technology, were to return. Two more full-time instructors—Mr. Clark Lambert and Mr. Howard Parrish were to begin their duties in drawing and physics and electronic-electrical subjects, respectively, with the opening of this year's work. Several part-time instructors were to be selected to handle some classes in the basic subjects.

The Calendar

Calendar for the full quarter follows:

- September 28—Registration.
- September 29—Classes begin.
- September 30—Late registration fees apply.
- October 3—Last day for registration.
- Last day for adding a subject to study list.
- October 31—Last day for dropping a subject from study list without penalty.
- November 7—End of deficiency report period.
- November 26-29—Thanksgiving recess.
- December 19—End of term.
- December 20—January 3—Christmas recess.

give notice to his local board that he is eligible and wishes to continue his student deferment status for another year.

4. Inform his local board in writing that he has requested the Registrar to supply the required SSS Form 109 on class standing.

Arthur Jordan, of Savannah, Wins Lockheed Scholarship

Mack Arthur Jordan, native of Savannah and honor graduate from the Savannah High School, has been selected by the STI Scholarship Committee as the recipient of the \$300.00 scholarship awarded Southern Tech by the Lockheed Management Club, of the Lockheed Aircraft Corporation, Marietta Division.

In accordance with conditions of the scholarship, Mr. Jordan was selected upon the basis of initiative, excellent academic record, and management and leadership qualities, determined through participation in extracurricular activities in high school, written recommendations, and personal interview.

Other requirements of the scholarship agreement were that the recipient be a resident of Georgia, that he be selected on a competitive basis, and that he enter the Industrial Technology course at STI in the fall of the 1953-54 academic year. As was also stipulated, the STI Committee set 2.60 as the point average which the recipient must achieve to keep the scholarship.

Southern Tech is one of the three colleges in this area to be chosen to receive an industrial training scholarship. The Lockheed Management Club is sponsoring the scholarship fund at STI, Emory, and Georgia Tech with the hope that it will attract worthy students into industrial training.

Mr. Hoyt McClure, head of STI's Industrial Department, states that this is the first Institute scholarship fund made available to Indus-

trial students and that it should prove a real incentive to them.

STI Aids Students In Draft Problems

(Continued from Page 1)

complete his course of study at Southern Tech.

The present law, he points out, still allows the full-time, regular student a deferment of three academic quarters after he is once enrolled. It also grants to students who are in the upper half of their class scholastically at the end of the first year a second academic year of three quarters in order to finish their course and graduate.

Things which his office will do for students subject to the draft include notifying the draft board that the student has enrolled; appealing for a change of classification, extension of time, or a deferment; supplying the board with Form SSS 109 at the end of their first year; assisting in filling out questionnaires; furnishing information about the College Qualification Test; and helping in any other way called upon.

In return, Mr. Bryant requests the student to—

1. Supply his office with the essential information asked for when he enters STI—his birth date, SSS number, number and address of his local board, etc.
2. Notify him when he is classified and supply him with his SSS number.
3. When his academic year is up,

Coach Arntson Explains STI Athletic Program, Invites All To Participate

By COACH C. A. ("ARNIE") ARNTSON

On behalf of the Athletic Department of Southern Tech I would like to welcome all new students and explain our athletic program.

STI participates in intercollegiate basketball and baseball in the Georgia Junior College Athletic Association. This conference is made up of the following: Young Harris, West Georgia, Middle Georgia, Brewton Parker, Armstrong, South Georgia, Abraham Baldwin, Georgia Southwestern, Gordon Military Academy, and Georgia Military College. This makes a well-balanced conference, which is very seldom dominated by one school for any length of time.

Southern Tech finished as runner-up in the basketball race in 1951-52 and had the best record in the conference for the baseball season of 1953. However, this is another year, and the record made this year will be up to you. I haven't had the opportunity of meeting very many of the new students, but I would like to invite those of you that are interested in trying out for the basketball team to come over to the gym on Hood Avenue on Monday, October 5, at 4:30 p.m. Please bring your own practice equipment, as it is not the policy of the school to furnish these items.

Two Lettermen Back

There are only two varsity lettermen returning plus some men from the "B" team of last year, so the competition for the starting positions should be very keen. After approximately two weeks of practice, the squad will be divided into two groups, varsity and "B" team. The "B" team will play games with some of the high schools in this area and also the "B" teams of some of the schools that the varsity plays. Mr. Joe Rettie, an alumnus of STI and former player, will again be the "B" team coach and will see that the varsity gets some interesting workouts during the scrimmages.

Our baseball record last year was 13 wins and 3 losses, which is the best record Southern Tech has had in this particular sport. Quite a few of last year's team will be back for this year, but there is always room for improvement.

At this writing I am very optimistic over the chances of having excellent seasons in both basket-

Technician Adviser Screams for Help

Plans have been made for the publication of nine issues of *The Technician*, Southern Tech's monthly student newspaper, during the 1953-54 year, Adviser L. Y. Bryant announces.

He added immediately, though, "provided we can get the student help needed to produce the paper." He pointed out that much depends upon how many staff members return for the fall quarter and how many new students can be persuaded to assist on the paper.

Harry Ward, editor-in-chief throughout the winter and spring, and Bob Stanley, reliable sports writer, definitely will not be back for help. Furthermore, the paper had so few members in the spring that its progress was seriously hampered.

Help! Help!

Mr. Bryant issues an urgent invitation for all new students, experienced or inexperienced in newspaper work, who would like to join the staff, to see him immediately. Reporters of all kinds, feature writers, editorialists, cartoonists, columnists, and advertising salesmen are critically needed. He hopes that enough talent will volunteer to help to assure the liveliest, most interesting, most efficiently run school paper STI has ever had.

ball and baseball. Many of the first quarter students have indicated that they are interested in our major sports, and with this interest plus the ability that I know some of you have, we should have an excellent record in intercollegiate sports.

Every student is eligible to receive a Southern Tech Student Activities ticket on enrolling in STI.

You may obtain these tickets from me in Bldg. 11, Room 4. These tickets are not available at the present time, but a notice will be circulated when they are available.

Upon receiving these tickets, you are eligible to attend all functions that are sponsored by Southern Tech at no additional cost to you. However, this does not include functions that are sponsored by campus clubs. If you do not pick up your ticket, you will be charged the regular price of admission; so save yourself some money and call for your tickets when they are ready for distribution.

Many Take Part in Intramurals

Director Muller Emphasizes Values of STI Intramurals

By E. J. MULLER
Director of Intramural Sports

Let me take a few minutes of your time to tell you about the diversified intramural athletic program that we maintain here at Southern Tech.

No one can be a good student unless he is in good health and gets moderate exercise regularly. Here at school you will have to take it upon yourself to do just that, and there is no better way than taking part in our intramural games. Participation will provide a means of relaxation from the mental activity of school work, as well as provide a means of really knowing your fellow students. Many lasting friendships are established on college intramural playing fields.

No Conflict

The program is arranged so that the activities will not conflict with the classes or labs, and since there are never more than two games per week, you will not lose much of your studying time.

Teams are organized by managers selected by the departmental clubs at school. There are opportunities for initiative, and you will have plenty of chances to develop leadership qualities. Be sure to check with the club members of your department to get on any of the teams.

You don't have to be a high school

star; in fact, all those who turn out get to play. Don't feel that you are inadequate in a particular sport—the more men that take part the more fun is had.

You Pay for It

A part of your entrance fee is allotted to intramural sports, so it behooves you to take advantage of them.

The fall quarter is devoted to touch football; the winter to basketball; the spring quarter to tennis, ping pong, and volley ball; and the summer quarter to softball. The department winning each sport will be given "intramural points," and these points will be added up for the year to determine the winner of the intramural trophy. In the past we have had plenty of competition for this trophy.

This is an open invitation to participate in our intramural program—an invitation to get in on some wholesome fun here at school.

Log Adviser Seeks Industrious Staff

(Continued from Page One)

Mr. Carroll points out an interesting reason for each student's having his picture in the yearbook and that is for purposes of identification in future years. Several instances have occurred when prospective employers have called on

the school to evaluate a graduate's qualifications, and the Log was referred to for the student's identification.

The cost to the student of a picture in the yearbook is usually one dollar. This dollar for the photograph is the only extra cost of the yearbook to the student. The student activities fee paid at the beginning of each quarter entitles him to a copy of the yearbook when he has been in school three or more quarters.

The Log is going to need a complete staff of talented workers who are interested in the varied activities involved in producing the yearbook. The editor, the associate editor, and the business manager will be appointed by the Student Activities Committee with the approval of the Log's faculty adviser. The other positions are elective and offer a good opportunity for students to gain experience in journalism.

Students interested in writing, art, photography, or business man-

agement should be watching for the first meeting of the Log's staff. With everyone's help the staff can offer the student body a good yearbook to help them remember this year at Southern Tech.

Director Johnson Welcomes Students

(Continued from Page One)

come members of one of the largest organizations in the world — The Ancient Order of Intenders. There are no dues but it costs you plenty. It's easy to join. You simply start each day with the intention of getting your work done and your homework in on time, but something comes along and you decide to put it off and begin tomorrow — but tomorrow never comes.

Success feeds on things done, not good intentions. Make a study plan and stick to it. Get your work done every day, and you will have little trouble in qualifying for all the wonderful opportunities awaiting Engineering Technicians today.
