THE ENGINEERING TECHNICIAN

Vol. XVII

Southern Technical Institute, Marietta, Georgia, October 29, 1964

No. 2

Photos by Bob Bailey

Coed posing on campus are (Left to Right) Miss Ginger Cameron, Miss Lucia Nelson, Miss Sterling Marsh and Miss Ana Marie Vegas.

Coed Enrollment Increases 400 Per Cent

During this fall quarter the Southern Tech male student can certainly say that "going to STI is getting more interesting every day," because the enrollment of female students for classes at Southern Tech has increased a momentous 400 per cent—from one coed to five—over the enrollment of a year ago.

Although the coed population is still rather sparse — in view of the fact it represents one half of one percent of the total STI enrollment — no one has reported any male students complaining. In fact, the coeds received official commendation from Registrar L. Y. Bryant, who stated, "Girls have every reason to consider engineering technology as a career. That's the field where they can best compete with men on their own terms." Bryant also stated that he hoped the increase in the number of coeds would signal the start of a long-term trend.

The lone returning coed this fall, after surviving last year as the only coed in attendance at STI, is Miss Lucia Nelson, a twenty-year-old blonde from Woodbine, Georgia. Miss Nelson is an Industrial Management major.

Miss Ana Marie Vegas, attend-

ing Southern Tech as a freshman coed, hails from Peru. This twenty - one - year - old coed has enrolled in the Industrial Management Option. Upon completion of the two years here at Southern Tech, she plans to work in the field of personnel management.

Miss Sterling Marsh arrived at STI this quarter by way of Georgia Tech, where she was enrolled for one quarter. Miss Marsh is nineteen and a 5 ft. 2 in. blonde from Atlanta. She is enrolled in the Architecture Department.

While only a part-time Southern Tech student, Miss Ginger Cameron, from Marietta, is still classified as an STI coed because she has enrolled for a course in physics. To her, the physics course is a prerequisite for her studies in pharmacy. She is taking other courses at the University of Georgia Extension.

Mrs. Virginia Brown, also a part-time STI student, is from Hollywood, California. Although Mrs. Brown was not available for comment, the Registrar's Office personnel indicated that she was considering full-time work in later quarters. Mrs. Brown is majoring in the Architectural Department.

The parking lot on a normal, crowded day.

New Plan For Parking Lot Submitted To Georgia Tech

A plan to create more parking space in the Southern Tech student parking lot has been submitted to Georgia Tech by two STI professors, C. T. Holladay and R. L. Myatt.

Although the specific details of the plan were not released by the two members of the Civil Depart-

ment, they indicated that the plan might well increase the parking space to accommodate more than 150 extra automobiles.

They stated that if Georgia Tech approved the plan, they would attempt to put it into effect as soon as possible.

Goldwater Wins Landslide Victory In Student Poll

Senator Barry Goldwater won a landslide victory over Lyndon B. Johnson by a nearly 3 to 1 margin in the Engineering Technician Presidential straw balloting. Out of the 314 votes that were polled, Goldwater had 205 votes to Johnson's 78. Thirty-one voters were undecided.

The straw ballot, given to students at designated places on campus on October 12 and 14 at 11:00 a.m., represented the first time in the history of Southern Tech that the newspaper staff had ever polled student opinion concerning Presidential candidates.

The newspaper staff, while polling nearly a third of the student body, made considerable effort to ascertain that the balloting be valid. Only students in classrooms and in the library were asked to complete the ballot. Any other ballots turned in to the staff were not counted. One vote was thrown out because a student wrote in a candidate not on the list; there was no space given for write-in voting on the ballot.

The ballot was also designed to indicate how many of the students were registered voters: 234 students stated that they were. The total for Goldwater from the tabulated registered-voter ballots was 153 votes. Johnson received 61 votes. The undecided vote was 20 on the registered-voter ballots.

Students also wrote in on the ballots what state in which they claimed residence. Although all the students casting ballots did not complete this question, enough students did to indicate that Georgia residents voting in the poll upheld the nearly 3 to 1 Goldwater margin. Goldwater took 181 Georgia-student votes to Johnson's 65. Out-of-state students favored Goldwater by a 2 to 1 margin.

The voters designated on the ballots what they believed to be the three most important issues in the 1964 campaign. The Goldwater supporters said that civil rights, states rights, and the battle against communism were the most important issues, in that order. They also stated that the curbing of the power of the Supreme Court and charges of government corruption were next in importance.

Students favoring Johnson listed civil rights, the battle against communism, and the use of nuclear weapons as the most important campaign issues. They included states rights and foreign aid as next in importance, respectively.

Other issues listed on the ballot were Viet Nam, Cuba, recognition of Red China, the Poverty Program, Medicare, federal aid to states, crime, farm programs, and fiscal and monetary government policies.

Campus Scenes

A turtle, painted white with black STI letters on its back, crawling around in classroom.

Student, after three weeks in class, realizing that he had enrolled for another class instead of the one he was in.

Faculty member getting finger caught in blinking headlight eyelid of new 1965 Riviera.

Epsilon Pi Chi members Mike Landy, Ed McGowin, and LeRoy Wray advertising campus-wide dance.

Halloween Dance Set October 30 In Marietta

Departmental clubs Epsilon Pi Chi, Alpha Mu Sigma, Alpha Beta Sigma, Iota Tau, and Sigma Chi Tau have announced that they will jointly sponsor a Halloween Dance for Southern Tech students. The new campus-wide event will occur Friday, October 30, at the National Guard Armory in Marietta.

The dance will feature the band Arthur Connley and The Corvettes. This band, which has made several recordings, will provide the music from 8:00 p.m. to 12:00 p.m.

According to Mike Landy, Epsilon Pi Chi member, tickets for the dance may be purchased from any sponsoring club member. Tickets bought on campus before the dance sell for \$3.00 drag or stag. Tickets at the dance will cost \$3.50.

The sponsoring clubs will provide refreshments for student purchase at the dance. They will also provide tables and chairs.

Landy stated that he expected at least three hundred couples to attend the dance. The National Guard Armory has the capacity for considerably more persons than this.

Several of the club members stated that a dance of this type is very expensive and that they hoped for a large turn-out of students.

The idea to organize the dance, according to Landy, came from several of the Epsilon Pi Chi members after they had read an editorial in *The Engineering Technician* which chided campus clubs for perennial laziness in sponsoring student activities.

Board of Regents Rules No Social Frats for STI

In a recent memorandum from Dean C. V. Maddox, Dean of Students, to the campus departmental clubs and their faculty advisers, Dean Maddox stated that word had come from the Board of Regents of the University System of Georgia that social fraternities cannot be tolerated in the two-year branches of the University System.

The Dean stated that, while there seemed to be no objection to departmental or professional type clubs existing on the two-year college campuses, no national or local level social fraternities could be organized.

According to Dean Maddox, this statement from the Board of Regents will result in the Southern Tech departmental clubs' reverting to their original purpose — as professional type organizations. This requires that the clubs hold two or more programs per quarter on subjects in the field of their department. Sample programs might consist of lectures, films, demonstrations, and the like, stated Dean Maddox.

In a further statement on regulations, the Board of Regents indicated that the membership of a club will not be limited strictly to the department. However, a student shall not be able to belong to more than one departmental club.

Members of one of the campus department clubs indicated to the newspaper staff that the memorandum had caused considerable concern among the clubs on campus, especially those clubs who had

entertained thoughts of becoming a part of a national fraternity. The students stated that the only thing left to do, if the club wanted to become a social fraternity, was to move off campus and organize there.

Student Wedding Is Hot Affair

Southern Tech student George Reeves had a big day Sunday, October 18: he married Miss Suzanne Swanson of Palmetto, Georgia.

But as if the occasion were not momentous enough, fate evidently had bigger plans for George. The church caught on fire just before the ceremony began.

The customary seating of the mothers was completed and the arrival of the bride and groom was imminent when smoke began to pour from the church air conditioning vents. The organ stopped playing; the electric lights went off; and the crowd of people surged out of the church.

When the fire department arrived, they put out a sizable fire in the air conditioning motor in the basement of the church.

The ceremony finally was completed after a delay of an hour. But again, more happenings were in store for George: he was arrested immediately after the ceremony. But that is another story.

Staff Comments

THE ENGINEERING TECHNICIAN NEEDS YOUR HELP

The Engineering Technician staff is not yet filled. We cannot possibly cover the areas of student activity that must be covered without an adequate number of staff members. Hundreds of student and faculty hours go into a single issue of this newspaper, and we believe that these hours need to be spread out a little. Frankly, we believe that we need a little more support from the student body in the form of volunteers for staff positions. We cannot become a top-notch newspaper otherwise.

SEE THE PLACEMENT OFFICE FOR PART-TIME WORK

Do you need a part-time job? Do you have a talent for doing specific types of work? If you can answer yes to either of these questions, go by the Placement Office in the Administration Building and register with Mr. Paul Smith, the Placement Director, or Mrs. Armenta Simmons, the Assistant Placement Director.

The services of the Placement Office are not just for graduating seniors. According to Mr. Smith, the Placement Office receives calls almost every day for part-time jobs for students still in Southern Tech.

Just outside the Placement Office door is a bulletin board that has a listing of part-time job openings for Southern Tech students. Go by the Placement Office and read the bulletin board. You might find a job you can qualify for.

NO LETTERS TO THE EDITOR YET

We are beginning to believe that Southern Tech students are too dull to write a letter to the editor. Do you have any opinions about Southern Tech, Southern Tech students, or any issue? If you do have an opinion, which you should all have, write a letter to the editor and let your opinions be known.

Having a letter to the editor printed in the Technician is one of the best ways for you to express your opinions at Southern Tech. What good are your opinions if you keep them to yourself?

THE WHY-NOT OF INTRAMURAL FOOTBALL

Several students mentioned recently that they wondered why Southern Tech did not have intramural football anymore. The Engineering Technician staff looked into the matter and came up with these answers.

The cost of such an intramural program was high during the years of its existence. The cost mainly was the result of injuries to students. Southern Tech carries no such insurance to cover these injuries; thus, the money must come from an already slim budget.

The second reason for not having intramural football was that there was no place to play. Larry Bell facilities have been taken up during the fall.

Coach Lockhart stated that he hoped to have a combination baseball and football field included in the gymnasium plans. If such a field is developed, Coach Lockhart believes that football might again be established on an intramural basis.

CLASS BELLS MUST BE FOR THE HARD-OF-HEARING

Last year we made a plea for the Building and Grounds people to soften the ringing of the class bells. Evidently we were not taken seriously. But we were dead serious; the bells really do make our ears hurt. It is ridiculous to keep them so loud, since no useful purpose is served by doing so and since they are presently a nuisance.

CLASS TIME TAKEN UP FOR PRESIDENTIAL POLL

The newspaper staff thanks members of the faculty who took a small amount of time from their classes to pass out ballots for our Presidential poll. We also thank the students who took part in it: they represented nearly a third of the student body.

The Year of the Chicken Yard

Or Let's Raise The Voting Age To 101

By a. d. monishment

Chickens are ridiculous. And also dumb. Remember when you used to stand above the chicken yard with a piece of bread tied to a piece of string and swing the bread in oscillating half-arcs about a foot above their heads? Remember how they all ran pell-mell on their yellow-stick legs after the bread, yo-yoing forward and backward, forward and backward? Like little feathered idiots, they were. They ate anything — from chewing gum to B-B's. Whatever they were tossed, they ate . . . and with obvious pleasure and enthusiasm.

I hadn't thought of that old chicken yard and the chickens in it until this year — when I saw a lot of people running around just like those chickens. Only in this case, the people weren't picking up B-B's; they were snatching up half-truths, exaggerations, and falsehoods and swallowing them whole. I hope this like-a-chicken disease is only caught by people during election years. The country can't stand much of it.

The top-dog roosters of both political parties are making fools out of the populace. Gullible people are tenaciously swooping down upon such illogical generalizations as

these: "Put prayer back in the schools . . . The man with the 'trigger finger' . . . A vote for him is a vote for socialism . . . One only needs to examine these statements to see that a wise man was not their creator.

In reality, prayer was NOT totally banned from schools as the statement indicates; Goldwater will NOT run, nor even walk slowly, to the nearest push-button bomb release; Johnson will NOT establish a socialist government.

For what I've seen around here, this is the kind of ill-informed rut the student-voters are in. Talk, Talk, Talk, but nobody thinks. If the young man, of all people, is not willing to examine all of the issues before he begins to crow about this man or that man, then he should not be allowed to vote. Or at least he should shut his beak.

The head roosters ARE dangling absurdities for the voters to run after, and the ill-informed are winging ahead of the rest.

But there must be those who enjoy being ridiculous. Perhaps they should practice saying, "Gullible, Gullible, Gullible," again and again, and they'll soon become the most popular and the most stylish creatures in the whole smelly chicken yard.

POLITICAL FORUM

Goldwater Versus Johnson

By Jim Lloyd

My vote will go to the man who I know will work for and in the best interest of the people of America. This man is Senator Barry Goldwater.

There are many reasons why I feel Senator Goldwater should be the next President of the United States.

First, Barry Goldwater stands by his convictions. Throughout his years of service he has voted for various civil rights measures that have been up before the Senate. Yes, Barry Goldwater believes in equality. But, when President Johnson tried to push this year's Civil Rights Bill down the throats of the American people, Barry Goldwater stood against him. Some observers will say that this action could cost Barry Goldwater the election. Senator Goldwater said that he knew this, but the people of America come before his own political ambitions. Senator Goldwater does not believe that the Federal Government has any right to dictate to a private businessman. Neither do I! On the other side, Lyndon Johnson voted against civil rights almost 80% of the time when he was a Senator. In fact, the only times Johnson voted for it were the times when it would not have any effect on Texas. Now, when Johnson needs the Negro vote, he is all for the most liberal Civil Rights Bill since Reconstruction Days.

Bobby Baker?

One man whose activities were finally uncovered is Bobby Baker, the man who became a multi-millionaire as Secretary of the Majority in the Senate. Throughout the years of Johnson's terms in the Senate, Bobby Baker was known as "Little Lyndon" and "Johnson's Protege." But when confronted with Baker's activities Johnson said "Bobby who?" Really Mr. Johnson, the American public is not that ignorant.

Your Vote Counts Cast It Nov. 3

By George Neville

Every four years, we as citizens of the United States, get a chance to vote and elect a president and vice president and other public officials to guide the United States for the next four years. Voting is one of the freedoms we have in our democracy. When you vote, you are taking part in our government.

In the United States we live in a country with a form of government called a democracy. One meaning found in the dictionary of the word democracy is, ". . . government by the people."

Voting is what makes our government a "government by the people." The RIGHT to vote, which every qualified citizen who registers has, does NOT make our government a government by the people. If you register to vote and do not vote, you are not exercising your right, nor are you fulfilling your responsibility as a citizen. Only by voting do you make our democracy a government by the people. Only when you have voted, do you fulfill your responsibility to yourself, your neighbor, and your country.

The basis on which our democracy rests is in the participation of the citizen in our government. The more citizens who take part in our democratic right to vote, the stronger our nation will be.

You say: Why should I vote? My one vote won't make a difference with so many thousand of other votes. In a senatorial race in New Jersey one time, the winning candidate won by only twelve votes. In the Georgia primary, held last September, five votes decided the winner of the DeKalb County Sheriff's race.

Go to the polls and vote this November 3; it is your responsibility. You might not get another chance to vote if you do not vote now.

Another issue facing the people is the National Budget. If the spending of the present administration persists, the United States of America will go bankrupt. This is not only possible but very probable. We cannot keep buying friends when we need the money here in the United States so much more. Its absurd. Mr. Goldwater is for helping only the nations who want to help themselves. Mr. Johnson's Poverty Program is a farce. One minute he is crying for the people to help the poor, most of whom were put out of work due to industry being shut down in their area. The next minute he embraces the very cause of the poverty, namely the unions. The government must take some of the strength away from the unions and give it back to the workers. Give the workers a choice: Give them the "right to work" law that is needed to keep a firm hand on the corrupt unions throughout the nation.

Foreign Policy

The last big issue is our Foreign Policy. Our men are dying every day in Viet Nam but the present administration is doing nothing to help them. We must also do something about Cuba. We bungled the Bay of Pigs invasion. We cannot keep bungling when Communists are only 90 miles from the U. S. Coast. Other nations are turning from us every week. France and Great Britain are not the good allies that they once were. Our flag is being torn down and spat upon in South America and Panama. Pakistan and India are turning to Red China. And now that Red China has an A-bomb, we must recognize it as such and not call it a simple bomb. With the destructive power of an A-bomb, there is no such thing as a simple A-bomb.

Also with Khrushchev out of the way, the Communists can get together again. With two powers of Russia's and Red China's size, we cannot afford to keep losing friends. We must not back down.

Yes, Senator Barry Goldwater will get my vote, and he should get YOURS. The United States of America needs Barry Goldwater as its President.

BSU To Attend State Convention

By John Temples

Students who are members of the Baptist Student Union on this and other campuses are eagerly anticipating the state BSU Convention, October 30-November 1 at the Rock Eagle 4-H Club Camp at Elberton.

The BSU has always strived to provide a spiritual respite from academic life as well as social and recreational enrichment. These aims will be in evidence at the state convention . . . which has as its theme "When Students Worship God." Georgia pastors who have special training and ability in the leadership of worship are featured in this year's program. Recreation and fellowship will also be an integral part of the program, as STI students who attended last year's convention will testify.

Registration is made through the local BSU on forms which will be provided. See John Temples, BSU President, or Larry Holmes for detailed information.

By George Neville

Lyndon B. Johnson worked his way through Southwest State Teachers College before becoming a school teacher in rural Texas. He was a secretary for a Texas congressman and was also National Youth Administrator for Texas before he was a member of the Congress of the United States.

In 1937 he was elected to the House of Representatives from Texas. After serving eleven years in the House, he was sent to the United States Senate by the people of Texas. He was chosen by his colleagues as minority leader and later majority leader of the Senate. He led the Senate in a path of responsible and constructive statesmanship for the eight years that he was majority leader.

He was chairman of the National Aeronautics and Space Council, The President's Committee on Equal Employment Opportunity, and the Peace Corps Advisory Council from January 20, 1961, to November 22, 1963. He was a working member of the National Security Council during this time. He made the office of Vice President a new instrument of national achievement.

Last November 22, a time of grief and heartbreak for the nation, Lyndon Johnson had strength and courage when he assumed the leadership of the nation.

Lyndon Johnson has spent most of his life in the service of his country.

Drop In Unemployment

Under the Democratic Administration of the late John F. Kennedy and Lyndon B. Johnson, the unemployment rate has dropped 25 per cent since early 1961. Four million more people are working today than at the start of 1961. The number of major areas plagued by large unemployment has been reduced by almost two-thirds.

The factory worker can now buy 9 per cent more with his weekly paycheck than he could at the end of 1960. Twenty-four million workers are benefiting from the increase in the minimum wage from \$1.00 to \$1.25 an hour, which was enacted as law during the Democratic Administration.

The Tax Cut

The \$11.5 billion tax cut, which was the biggest in history, also came about during Lyndon Johnson's administration. This reduction in taxes is providing American workers \$25 million more a day in take-home pay.

President Lyndon B. Johnson is working toward helping 35 million Americans to share in the countries' growing prosperity through his War on Poverty Program. Johnson's program for the future includes greater emphasis on youth employment to meet the needs of more than a million new job seekers in the labor market each year.

Lyndon Johnson is for all American citizens having equal rights, regardless of race, color or creed. The Civil Rights Bill, which he fought for, and which became law during his administration, is proof of his belief in civil rights.

I am going to vote for Lyndon B. Johnson because I agree with his policies and ideas just listed. I am going to vote for Lyndon Johnson because, as can be seen in his record, he is working for the American citizen, and he is looking toward and working for our future.

Antique Auto Club

Organized On Campus

An antique auto club is in the process of being organized on the Southern Tech campus. According to John Thompson, one of the members, membership is open to all STI students who have an interest in antique automobiles.

Thompson stated that a car is classified as an antique when it is twenty years old or older. One of the activities planned by the new club for next spring is a motorcade through Atlanta to Stone Mountain demonstrating antique cars that can be driven on the road.

The club plans to meet on campus on Monday nights at 7:30. The meeting hour is to be announced later.

Civic Loans Granted To Six STI Students

Financial assistance in the form of Civic City Scholarship loans have been granted to six Southern Tech students according to Mr. W. J. Glenn, counselor.

Those chosen for the scholarship-loans must have maintained good grades through at least two quarters at Southern Tech, and have the need for financial aid. The six students under the civic club plan are Clyde Roberts, Valdosta, Marietta Rotary Club; De Ron Larisey, Sylva, A.S.T.M.E.; Earnest L. Trussel, Atlanta, Marietta Kiwanis Club; Kelon L. Hobbs, Thomasville, Marietta Lions Club; George H. Chandler, Athens, Marietta Lions Club; and Walter D. McTire, Savannah, Marietta Pilot Club.

STI Enrollment Up This Quarter

The Registrar's Office has announced that the enrollment has risen slightly since the fall quarter, 1963. The current count of students is 995, compared with last fall's 991. This count includes only full-time day students.

Besides the full-time students, 185 students are taking part-time work in classes offered in the evening. Southern Tech teaches all courses required in six of its eleven degrees in evening classes.

Smoke Grenade Thrown In Dorm

On the evening of September 31, a smoke bomb was thrown into one of the Southern Tech dormitory apartments. According to the fire department men, who were immediately called to the scene along with the Marietta Police, there was little damage to the building, except for a few stains on the apartment walls.

The apartment was occupied at the time by student Xavier De La Guardia.

Photo by Bob Bailey

Students checking Placement Office Bulletin Board for part-time job offers.

Placement Office Offers Part-time Job Possibilities

To leave the Southern Tech campus and to report to a late afternoon and evening part-time job is not unusual for many of Southern Tech's students. Burdened with the same study hours as the non-working students, these students trudge off to work and then, hours later, plod home to work more hours beneath the light-bulb in order to keep the pace and, eventually, to graduate.

Because there are always such college men — those who want to work and need to work — the Southern Tech Placement Office is continually on guard for part-time job possibilities for the Southern Tech man.

According to Placement Director Paul Smith, who is beginning his first fall quarter with the STI administrative staff, several telephone calls come into his office each week from employers seeking part-time employees. Smith also stated that many of these calls are for students with specialized training and experience, but that many of the employers in the area call about routine jobs too.

Some of the sample jobs that are often open in the Marietta and At-

lanta areas are filling station attendants, grocery store workers, yard workers, painters, surveyors, motel clerks, sales clerks in department stores, drafters, and truck loaders.

Mrs. Armenta Simmons, who for several years was Acting-Placement Director and now is Assistant Placement Director, maintains a bulletin board with all of the local part-time job offers which come through the Placement Office on it. The bulletin board is just outside the Placement Office in the Administration Building.

According to Mrs. Simmons, students should check this bulletin board every week or so if they want to secure part-time work. She is planning to maintain departmental bulletin boards so that these job offers will be noticed by more students, especially those jobs pertaining to specific student training.

The Placement Office, known by most graduating seniors for its efforts in their behalf in securing full-time positions, is also going to stress this part-time job aspect in quarters to come, according to Placement Director Smith.

Coach Lockhart Appraises STI Basketball Squad

Coach Harry Lockhart is pleased about the prospects for the 1964-65 STI basketball team. According to Coach Lockhart, this year's team is potentially one of the best teams he has coached at Southern Tech in the past several years.

This season, four returning lettermen and twelve freshmen will try out for the team. One of the four lettermen is Robert Jordan, a 6'3" forward, who led the Georgia Junior College circuit in scoring last season. Jordan was also chosen to be on the All-State team last season.

The other lettermen are forward Ray Thompson 6'3", guard Dan Burge 6'0", and guard Donnie Marlow 6'0". Jim Vaughn, a 6'3" senior, will also be playing officially on the team this season for the first time.

The freshmen trying out for the team this season include Fred Smith, a 6'3" guard who was on last year's class AAA high school State Champion basketball team from R. L. Osborne.

Other freshmen trying out for this year's squad are the following:

- Walter Anderson 6'0"
- Don Morris 6'1"
- Dick Waters 6'3"

- Ron Hardy 6'4"
- Rick McLarty 6'5"
- Ray Arp 6'3"
- Jim Nunn 6'1"
- Harry Dickson 6'1"
- Jerry Parker 5'11"
- Wayne Stewart 5'11"
- Willard Byres 6'0"

Some of the tougher teams the Green Hornets will play this season include the Georgia Tech Freshmen (Dec. 5 in Atlanta), Young Harris College (Jan. 12 here and Feb. 17 at Young Harris), Abraham Baldwin College (Jan. 29 in Tifton), and Brewton Parker College (Jan. 15 in Mt. Vernon). All of these games are conference games except the Georgia Tech Freshmen game.

Lockhart also stated that from a spectator's point of view this season should be a very interesting one.

Learning about a European buffet.

25,000 EUROPEAN JOBS

Grand Duchy of Luxembourg—25,000 jobs in Europe are available to students desiring to spend a summer abroad but could not otherwise afford it. Monthly wages range to \$300 and jobs include resort, office, child care, factory, farm and shipboard work. \$250 travel grants will be given to the first 5000 applicants. Job and travel grant applications and full details are available in a 36-page illustrated booklet which students may obtain by sending \$2 (for the booklet and airmail postage) to Dept. O, American Student Information Service, 22 Ave. de la Liberte, Luxembourg City, Grand Duchy of Luxembourg.

Young Harris Coach Belittles Own Squad

The coach of Southern Tech's long-standing court enemies says "This year I'm building character. Tell your Coach Lockhart that." Thus said Luke Rushton, coach of the Young Harris Mountain Lion quintet in a recent interview.

Rushton, interviewed on his home campus, October 8, by a *Technician* reporter, tut-tutted modestly when reminded of his win-loss tally. Young Harris has won 27 of 30 court duels played with STI since 1948. But Rushton says this season may be different.

"I lost three good boys by transfers," said Rushton. "Four of my five starters are freshmen. I do have Fitzsimmons, and he looks good. But otherwise we're starting green."

The Mountain Lion coach also expressed his hopes that STI would not sneak in Christmas-season practice sessions. Junior College Association does not prohibit such practices, but Rushton implied that Southern Tech really should let its squad go home for the holidays. And he pledged that Young Harris would do the same.

STI and Young Harris will meet twice this season.

The first game, January 12, will be in the Larry Bell Gymnasium in Marietta.

Intrasquad Game Monday; Halftime Show: Shrine Clowns

The Southern Tech Hornets will play an intrasquad game Monday night, November 2 at Larry Bell Auditorium as a preview for the 1964-1965 season. The squad will be divided into teams of about equal strength and ability for this game. An added attraction will be a half-time show presented by the Kennesaw Shrine Club clowns.

According to several people who

have seen the clowns perform at other events, this half-time show alone should be worth the price of admission.

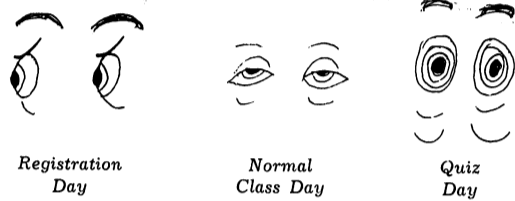

The proceeds of the game and show will go to the Southern Tech Booster Club. Admission will be 50¢ for students and \$1.00 for adults with all Booster Club members being admitted free by presenting their membership cards.

STI B-TEAM SCHEDULE

Date	Team	Time and Place
Nov. 10	John Marshall B-Team	(6:30 p.m.) Norcross
Nov. 13	South Cobb High School	(6:00 p.m.) Home
Nov. 17	John Marshall B-Team	(6:00 p.m.) Home
Dec. 14	Osborne High School	(8:00 p.m.) Osborne
Dec. 11	South Cobb High School	(8:00 p.m.) South Cobb
Jan. 8	Osborne High School	(6:00 p.m.) Home
Feb. 13	Sprayberry High School	(8:00 p.m.) Sprayberry

Monthly Math Problem

Bill and John both like to gamble. One day when they are flipping a penny and choosing heads or tails to see who wins, John becomes disturbed because Bill wins most of the time.

Bill then explains to John a new way to gamble with pennies. Bill is to flip only one penny, but John will flip two pennies. If John's pennies land with more heads showing than Bill's, John wins. John agrees because he figures that he has a better chance of winning using two pennies than Bill has with one. The problem is this: (1) Does John have a better chance of winning? (2) What are John's chances of winning over Bill this this new way?

The student with the first correct answer mailed to Box 8028 will receive the \$1.00 prize for this month's problem. Students should give answers to the nearest one per cent. Please indicate the date and time of mailing.

Ed. note: Student problems for the math problem will be accepted this year. Students entries should include the following:

- (1) Your name and STI Box number.
- (2) Statement of the problem.
- (3) The answer to the problem.
- (4) A brief explanation of how you obtained the answer.

Please mail your entry to Box 8028 or contact George Neville in Room 267.
