The Campus Roamer

By JIM PLEMMONS

-Finals-

Life on the college campus takes on a new complexion at this time of season. The gaiety of the holiday spirit fills the air, and the pace of the student's walk, talk, and academic activity increases. The crisp, wintry atmosphere is invigorating as the student anxiously awaits the end of the fall quarter. There seems to be better attendance in the classrooms along with increased interest in the student's studies. Less dating and fewer social activities occur off the campus as the student finds himself preparing for the inevitable final exam. The instructor at this same time finds that he must crowd three weeks of material into one very short week. He too must prepare for final exams.

When final exams are mentioned to a student a groan usually results. Thoughts run through the mind such as, "Why should there be finals, and why are they necessary?"

Final exams are necessary in order to test the student's mastery of his studies. These examinations are not designed to fail anyone or to call upon anyone's ability to memorize. Instead, they are designed to find out how much a student has learned and to see if the student can advance with a minimum amount of difficulty. Of course, a certain amount of memorization must be used, but this falls short of the objective of a final examination. The student who relies upon memorizing formulas, certain phrases, or particular numbers usually finds himself very much confused during finals. On the other hand, the student who has truly analyzed a formula, or associated a phrase with the person who said it, or learned the meaning of a particular number will have little trouble passing a final exam. The final exam reveals the depth of a person's thinking and is not intended to be a memory test. When a person has learned something, he should ask himself, "Have I learned it or have I memorized it?" If he has memorized it, it will be forgotten. If he has learned it, the mind will automatically record it to memory.

The instructor is also under test during final exams. This is where he sees the quality of his teaching ability. If the instructor has taught well, the results of the final exams will tell him so. The end result of his teachings will not be revealed until some future date—perhaps the following quarter or perhaps not until his student goes into industry. If his teaching ability has been inadequate, the student will make a poor reputation for the school. Conversely, if the instructor has taught well, and the student has learned well, the school's reputation will be enhanced.

The final exam unveils many things, but most important it analyzes a student's progress. This is not to say that a final exam is the only method for analyzing progress but instead a very effective and proven method. If a colleges teaches a person to think, which is the basic goal of all colleges, and final exams reveal one's ability to think then they

New Buildings Occupied By Faculty And Students

By EMORY CALDWELL

Eight new buildings are now occupied by faculty and students at Southern Technical Institute. The method of acceptance is unique, in that the interior has been accepted, while the exterior has not. Time of complete acceptance is indefinite.

The contractor's workmen will probably be around for six to eight months more, according to the Director, Mr. H. L. McClure. The buildings will be accepted by STI following inspection by the Architect and the Regents Engineer-Inspector, who will compile a list of defects upon which acceptance of the buildings will be based.

The first buildings to be occupied were the Administration Building on September 27 and the Classroom Building on September 28. The Classroom Building houses the Basic Studies, Industrial Technology, and

Textile Departments. The Lab Building, Building Three, which also contains the Library, Book Store and Grill, was third to be occupied, followed on October 11 by the Building Six Group, containing the Gas Fuel, Heating and Air Conditioning and the Mechanical Technology Department. Last to be occupied were Building Four, Electrical Technology; and Building Five, containing the Civil and Building Construction Technology Departments.

Mr. McClure explained that the new buildings have done much for faculty and student morale. He says that the extensive utilization of glass has done much to cheer up classrooms and create an atmosphere for study. "The buildings are new, permanent, well built and something in which we can take pride," said Mr. McClure.

Lions Club Plans To Sponsor Scholarship

The Marietta, Georgia, Lions Club has planned to help a deserving student to earn his technical-college degree. Through a Lions scholarship loan, just announced by the Marietta Lions Club, a promising student will be able to attend Southern Technical Institute of Marietta.

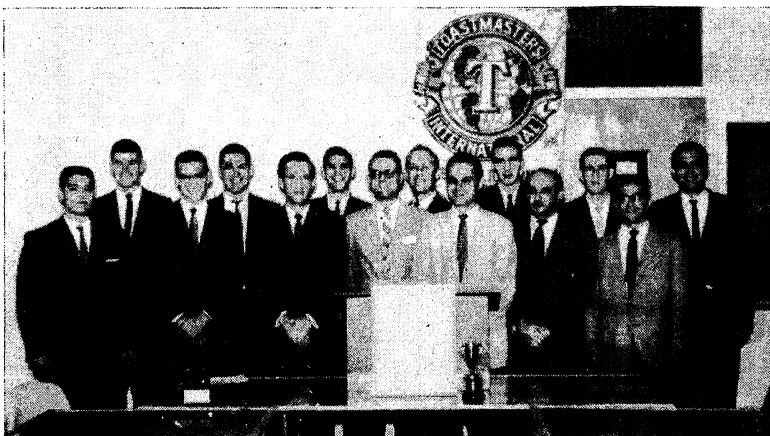

Lions President Tommy Brown stated that the scholarship-loan will amount to \$300, to be payable in three quarterly installments. This amount will pay the recipient's matriculation, student activity, and medical fees at Southern Tech.

Brown said that applicants for the scholarship loan must have grades

in the upper twenty-five percent of their Southern Tech class. They must have completed at least three quarters of their six-quarter associate in science programs.

Applicants will be screened by the Southern Tech Faculty Scholarship Committee. Final choice of the recipient rests with the Lions Club Scholarship Committee, headed by Larry Graham. There are no restrictions as to home town, but the applicant must be a resident of either the Southern Tech dormitories or of Southern Tech's neighboring community.

Toastmasters Raise Flag Higher On New Campus

MEMBERS OF TOASTMASTERS CLUB—Front row, left to right, L. W. Clay, O. W. Whattey, M. D. Beville, R. L. May, G. E. Gunzelman, C. A. Rojas, S. Robledo. Second row, left to right, W. J. Noble, Jr., D. H. Cobb, president, R. A. Walker, E. H. Walker, C. W. Reavis, J. M. Sams, T. D. C. Cohen. (Photo by Harry Smith)

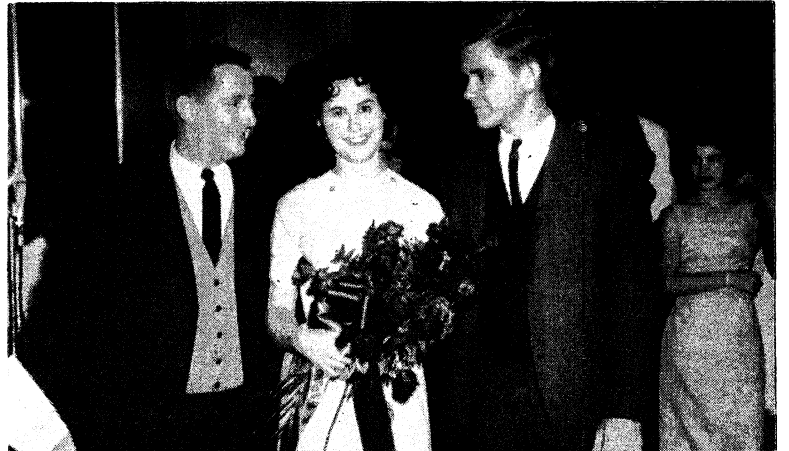

Southern Tech Toastmasters held their last meeting of the fall quarter November 29. The Toastmaster for the evening was Charles Reavis. The duty of the Toastmaster parallels that of a Master of Ceremonies in that he introduces each member who takes part on the program.

The entertaining and developing portion of the program began with Joe Noble, the Topic Master, who called on members to tell of unusual events in their lives. Each one called on to participate was required talk for a minimum of 2½ minutes and maximum of 3 minutes.

During the business meeting the members of the Toastmasters Club voted to have the flag pole, which

by the Toastmasters, moved to Marietta and to increase its height by 20 feet. The flag pole is to be erected by the Physical Plant Department of STI within two weeks. A presentation ceremony will be held soon after it is erected.

Bob May, Melvin Sams, Tommy Cohen, and Roy Walker gave prepared speeches which were evaluated by assigned club members. Bob gave his fourth speech which stressed the use of the hands. Melvin and Roy gave their second which required the speaker to show enthusiasm and appeal for action. Tommy, who has been a Toastmaster for a number of quarters, gave his fifth, a vocal variety speech. After

Miss Pat O'Hara, Sweetheart of Iota Tau, receives her red roses from John Hadley (left), master of ceremonies of the IT dance; and Dick Herren, Iota Tau president. (Photo by R. W. Hays)

IOTA TAU Sweetheart Is Honored At Annual Dance

The daughter of an Air Force Colonel has become the "Sweetheart" of an S.T.I. fraternity. Miss Pat O'Hara, daughter of Lt. Col. and Mrs. R. K. O'Hara, has been selected as the 1961 Sweetheart of Iota Tau, professional fraternity in industrial technology at Southern Technical Institute.

Miss O'Hara, 17, was selected by Iota Tau members as their sweetheart at the Christmas Dance held in the Marietta Country Club on December 1. She was escorted to the dance by Jimmy Green, freshman in electronics technology at Southern Tech, from Troy, Ala.

Since her father is stationed with the U. S. Air Force at Dobbins Air Force Base, Miss O'Hara is now a resident of Marietta. However, she

has lived with her parents at various duty assignments all the way from The Philippines to England. Her hobbies are swimming and dancing.

The dance was held at the Marietta Country Club. Music for the dance was provided by Kid Miller's orchestra from 9:00 until 1:00. The announcement of Miss O'Hara's selection as sweetheart came during intermission. She was presented a spray of red roses and invited to preside over the intermission drawing of prizes.

Miss O'Hara is the granddaughter of Mr. and Mrs. John F. Battle, of Augusta. Her parents, Lt. Col. and Mrs. R. K. O'Hara, live on Moon Street in Marietta.

48 Graduate In December Registration Day Jan. 2;

Returning students and an expected 60 new freshmen will be greeted by the new Campus at the beginning of 1962. Registration date for the Winter Quarter has been officially set for Tuesday, January 2.

There will be 48 students graduating in December among them will be John Pressas. John was chosen "Student of the Month" for his outstanding scholastic record. He is an Air Force veteran, married, has a two year old daughter, and was graduated from West Virginia's Gap Mills High School in 1955. John's major is Electrical Technology, and he is an active member of the IRE and Tau Alpha Pi.

Director McClure Extends Greetings

I join the STI faculty and staff in wishing you the very best for Christmas and New Year.

May you have Godspeed and safe conduct to your homes, enjoy the Holiday season to the fullest, and return with renewed incentive for the winter quarter.

H. L. McClure, Director

is entitled to wear the Toastmaster pin.

Present officers of Southern Tech Toastmasters are: David Cobb, president; Robert May, educational vice president; Atilana Rojas, administrative vice president; Joe Noble, secretary; Roy Walker, treasurer; and Gordon Gunzelman, sergeant-at-arms. Professor Albert Steinkamp is

Counseling At Southern Tech

Since the beginning of this quarter Southern Tech has been most fortunate in having on its staff Mr. William Glenn. Mr. Glenn holds a master's degree in counseling and guidance, and he has had experience in teaching as well. Students should find in Mr. Glenn the very help this editorial suggests.

The position of the counselor in all schools is relatively new. It is true that all administrative personnel and members of the teaching staff are engaged in counseling processes, but the counselor is that faculty member who is trained and experienced in helping the student gain a more hopeful idea of himself and orient himself to his environment.

As one develops, conditions often become complex and various inner conflicts take place. These conditions may block a person's efforts toward self-realization and bring problems. Since each person has a different problem, he must work out his salvation in his own unique way. Within himself, he has the capacity to make his life more complete and satisfying.

The job of the counselor is to discuss the problem with the student, examine the situation, and suggest pertinent alternatives. The counselor does not dictate nor does he give out the solution to the predicament. The final decision is made by the student.

The counselor may take a number of roles in dealing with students. To some, he is the friend to whom they take their troubles. The counselor hears from his students that they are failing subjects, homestick, discouraged, or very unhappy. They find that often just talking things over is very helpful. To others, he is the academic advisor. They would like to change courses, get help in subjects in which they are weak, or receive information on vocations. Some students come to the counselor when the need for financial aid arises. He may arrange for scholarships, loans or work assistance. The counselor may be called upon to deal with students with serious problems which constitute major blocks to their environmental orientation. Some of these contacts are of short duration while others may be over a long period of time.

In short, the job of the counselor is to help the student achieve a better idea of his capabilities and potentialities and to assist him in bringing about a better relationship with the world around him.

Toastmasters at Southern Tech

Toastmasters International is an organization of clubs throughout the world. The clubs are basically organizations of business men who are doing something about their feeling of inadequacy in talking to groups of people. The STI Toastmasters Club of Chamblee, Georgia, received its charter No. 1754 in the winter quarter of 1954. The records were appropriately changed to read Marietta, Georgia, this year. This club is a campus wide organization. It owes allegiance to no department at STI. Its original members came from all departments on the campus and today Club 1754 is pleased and proud of its members from the BC, IT, MT, ET as well as other departments.

The original Southern Tech Club consisted of 23 members. "Bill" Penyon was the first President and George W. Lawson (now head of the IT Department) was an active charter member and co-worker who helped make it a success. Professor Al Steinkamp who was also a charter member of the first Toastmasters Club at Lockheed, Marietta, assisted and became the faculty counselor for Club 1754, a position he still holds today.

The fundamental purposes of the Toastmasters Clubs are 1, the improvement of the oral expression of thought of its members, 2, to develop their ability to appear effectively before audiences, 3, to develop the habit of analytical listening, 4, to provide instruction and experience in chairmanship and parliamentary procedure.

The membership of Toastmasters has been dynamic and consequently so is the club. The first US flag to fly over the STI campus was presented to the school by Toastmaster Club 1754. The first flag pole to be erected on the campus came through the financial as well as organizational effort of Toastmasters. When the new 50 star flag came into being Toastmasters had anticipated its coming and had one on order for STI. The old flag pole has been brought to the new campus, but it must be made bigger and better for our modern campus. Toastmasters have their shoulder to the wheel on this project and are financing the elongation and erecting of a flag pole that the school can be pleased with.

Both on and off the campus Toastmasters have been active and competitive in the development of better students. In competition with other Toastmasters Clubs whose members are business men in the Atlanta area, Club 1754 (1) won the outstanding award for our area based on membership. (2) won a trophy cup from the Christopher Toastmasters Club for best speech. (3) won the cup and award for the best speaker in the Atlanta area and sent our student, Bobby Strickland, to the Southeastern District competition, where he was runner up.

We give great credit and our sincere thanks to those clubs in the Atlanta area who have sent us their speakers and who have been so kind and considerate of our members and our organization.

Welcome Freshmen

The veteran freshmen of Southern Tech extend a generous welcome to all first quarter Freshman. The veteran Freshmen have been impressed by your scholastic potential and your attitude toward Southern Tech. The Freshmen Class encourages you to be active and aggressive in supporting Southern Tech in order to make it a Campus you will be proud of.

Alumni Corner

By Armenta Simmons

Placement Office To Help Undergraduates

The Southern Tech placement office has announced that it will be finding part-time jobs for students as well as for graduates. Mrs. Armenta Simmons, new placement director for Southern Technical Institute, has stated that her office will now serve students even before they graduate.

"We of course are still devoting most of our time to arranging interviews with students who are near graduation," Mrs. Simmons stated. "But we are finding that increasing numbers of students wish part-time work to supplement their savings or veteran allotments. As long as part-time work does not interfere with their education, the placement office will help these students locate jobs."

Mrs. Simmons pointed out that in the past the placement office had functioned informally as a clearing house for part-time work. Now, she said, the placement office is actively seeking employers who want college boys to work part time while they go to Southern Tech.

"Employment interviewers rush to the campus to hire graduating seniors. In a year we will have perhaps two hundred different organizations seeking our graduates. How-

ever," Mrs. Simmons said, "many times a student must have supplemental income to enable him to stay in school, even though Southern Tech, as a state college, has very low fees."

Alumni To Meet Twice On Dec. 9

The Alumni Association of Southern Technical Institute, representing nearly twenty-five hundred graduates of Southern Tech, will hold two meetings on December 9. The first meeting, a preliminary assembly, will be held on the new Marietta campus of the college. Atlanta alumni will meet at 9:15. All alumni will be invited to inspect the new \$2 million campus, from 10 o'clock until 1 o'clock.

On the night of December 9 the Alumni Association will hold its annual dinner meeting at the Dinkler-Plaza in Atlanta. The meeting will begin at 7:30 for a dinner, followed by the 1961 business meeting.

Richard Bagley is president of the National Alumni Association. Lester Sheppard is president of the Atlanta chapter.

Clubs To Select Sponsors For Log

The Log staff has been pleased with the interest taken by the various clubs and organizations regarding the 1962 beauty contest. The beauty section of the Technician's Log has always been one of the chief sections admired and enjoyed by the students.

Any student who wishes to enter his girl friend or wife as a contestant must submit an 8x10 picture to the yearbook staff or to R. C. Smith, Associate Editor. Pictures chosen by the judges will run in the next edition of the yearbook, and the winner will be crowned "Miss Southern Tech of 1962." Judging of the contest will take place at the Valentine Dance in February of 1962. J. T. Plemmons, editor for the yearbook, pointed out that the staff expects wide participation for this year's beauty contest. This contest should have the widest appeal and a large number of submissions. Naturally, each student thinks his wife or sweetheart should win, so the decision will be difficult.

Speakers' Bureau Organized At STI

Southern Tech. has recently organized a speakers' bureau to centralize speaking performances of its faculty and staff. The organization of the speakers' bureau followed requests from civic clubs and professional groups to learn about technical education.

G. L. Carroll, dean of Southern Tech's Basic Studies Division, will coordinate the college's speakers. According to Dean Carroll, "Many professional groups have been wanting to know more about technical education, especially since the first sputnik warned us of our potential enemy's technological progress. We want to bring to all interested groups the message of technical manpower needs."

Dean Carroll stressed that the speakers' bureau would not remove the faculty and staff members from their regular duties as educators. "Most of the meetings to which we have been bringing the message of technical education are held at night.

"An 8x10 picture, preferably black and white, must be submitted with the girl's name, address, and the name of her sponsor not later than January 15. In order to win, the girl must be present at the time of judging," said Editor J. T. Plemmons.

A.S.T.M.E.

The A.S.T.M.E. elected new officers to fill vacancies in the executive council as follows: vice chairman, Rick Celedon; second vice chairman, Everette Cook. The other officers are Jerry Austit, chairman; Jack Dickey, treasurer; Louise Lindle, secretary. A tour of the Lockheed Plant and a steak supper are in the planning stages.

New Buildings

(Continued from Page 1)

The department heads agree that there is no comparison between the old and new buildings. Mr. J. P. Goodwin, Acting Head of Electrical Technology, stated, "We now have all the possibilities for a growing school." Mr. C. R. Orvold, Head of Building Construction Technology, praised the uniform heating system and improved atmosphere of the new Building Five.

Mr. C. T. Holladay, Head of Civil Technology, also situated in Building Five, stated, "I appreciate the better-arranged lab space, as well as facilities for photographic equipment with a dark room and a water sewerage display." Mr. W. L. Thomas, Head of the Gas Fuel Department, said that he finds the better arranged labs, larger and brighter class rooms, as well as the increased office space of Building Six a great asset.

Mr. L. H. Taylor, Head of Heating and Air Conditioning Technology, also in Building Six, called the adequate lighting and hot water, which he had done without for thirteen years, "a vast improvement over the buildings at Chamblee." Mr. C. A. Arnston, Head of Mechanical Technology, stated that he especially appreciates three features of Building Six. These are good lighting, cement floors for the machines, and more floor space. Mr. Arnston recalled the posts which he

ALUMNI NEWS

Don't forget the sneak-preview Open House on December 9 from 10:00 'til 1:00 o'clock. Also, make plans to attend the Annual Banquet that night at the Dinkler Plaza. It's loads of fun . . . so make every effort to attend.

Let me remind you in the Atlanta area that the Atlanta Chapter meets every third Tuesday of the month. Call Southern Tech Placement Office, 422-1800, just before that time and I'll be glad to tell you where and what time. The new officers urge you to attend.

CLASS OF '54: Blake Thomas (E&C), who is with Smith Kline & French Laboratories, was the guest speaker at Seminar on November 30. He gave a most interesting talk on results of a medical revolution in the discovery of many of our miracle drugs. It was good of you to come out and deliver this talk, Blake.

CLASS OF '55: Don Burkhalter (Ind. T.) writes that he is employed by Kurt Salmon Associates, Inc., in Waco, Texas. He is real happy with his job. Sorry to hear that you and your wife can't make the banquet. Don, Bubber and Joni will really miss you.

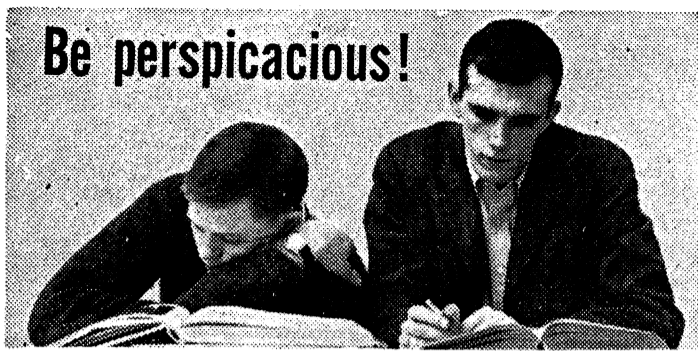

CLASS OF '58: Tommy Payne (Mech. T.) dropped by the office to pay his alumni dues and of course to see the new school. He is with Reynolds Metal Company in Richmond, Virginia.

CLASS OF '59: Bobby Mathis (BC) wrote Mrs. Wilson from Anchorage, Kentucky, where he is working with Kentucky Rural Electric Co-op Corp. (Allelectric Homes, Inc.) I'm opening Mrs. Wilson's mail, Bobby, so you might as well write to me. Bobby has purchased a home and is real happy in his new location. Of course he has moved his family up there. A. L. Venable, Jr. (Civil) was a passerby. He is now with MacDougald Construction Company in Atlanta.

CLASS OF '60: James Irvin (E&C) called. He was on a short vacation from Vitro. Robert Trimyer (E&C) wrote to Mrs. Wilson. He is now attending Georgia Tech. Howard Hawthorne (Mech. T.) also wrote to Mrs. Wilson. His letter contained very sad news—about his friend, Fred Slappy (Mech. T.) having been killed in a motorcycle accident. Fred was in the Air Force and was at home on his way from Lowry A. F. B. to Orlando. If any of Fred's friends, would like to write to the family, the address is Mr. and Mrs. T. W. Slappy, Route No. 2, Sylvester, Georgia.

CLASS OF '61: Charles G. Clark (Mech. T.) dropped by to tell me that he is going into service, and he will be stationed at Fort Gordon. Louis R. Beck (Ind. T.) writes that he is going to join Uncle Sam's forces by invitation. He was recently promoted to Production Co-ordinator for The Wurlitzer Company in Corinth, Mississippi. Thank you, Louis, for your good wishes in my new job, and I'd like to offer congratulations to you (on your promotion)!

Mrs. Wilson is fine. Incidentally, she plans to attend the Annual Banquet and Dance. Of course, it wouldn't be the same without her. So, we'll see you there.

Be perspicacious!

Not this: a student who studies drowsily no matter how much sleep he gets.

This! Perspicacious... sharp! NoDoz keeps you awake and alert—safely!

If you find studying sometimes soporific (and who doesn't?) the word to remember is *NoDoz*. NoDoz alerts you with a safe and accurate amount of caffeine—the same refreshing stimulant in coffee and tea. Yet non-habit-forming NoDoz is faster, handier, more reliable. So to keep perspicacious during study and exams—and while driving, too—always keep NoDoz in proximity.

The safe stay awake tablet—available everywhere. Another fine product of Grove Laboratories.

**Armstrong, Truett
McConnell Defeated**

The Southern Tech Green Hornets defeated a tough Armstrong team, 77-75, at Larry Bell Gym on November 17. Armstrong outscored the Hornets, 39-24, in the first half, but the determined Hornets came to life in the second half. Jack Claggett led the home town boys with 21 points followed by Hazelrigs with 19 and Bullard with 14.

With Truett McConnell it was the same tune with the volume turned up. The Hornets tallied 49 points to Truett's 35 in the first half. Truett rallied in the second half, but the damage had been done. The final score: Truett McConnell 88, Southern Tech 93. Big Jim Bullard shot for 32 points; Alvin Hazelrigs ranked second with 20.

Cross Country Second In State

Saturday, December 2, Southern Tech's cross country team traveled to Emory-at-Oxford for the Georgia Junior College Cross Country Championship. There were four colleges represented: Emory-at-Oxford, Southern Tech, Abraham Baldwin Agricultural College (ABAC), and Reinhart Jr. College.

The course was run on paved and dirt roads, and was three miles in length. The meet was won by ABAC with 31 points, STI finished with 46 points, Emory-at-Oxford third with 48 points and Reinhart last. Two trophies were given: One for the winning team, and one for the individual winner. The individual trophy was won by a boy from Emory-at-Oxford with the time of 15:13.

Six boys represented STI and placed as follows: Geoff Richardson, third; Harold Callaway, (Captain), eighth; Rodney Hutchinson, ninth;

Tony Laurito, tenth; Monty Burch, sixteenth; and Charles McDougald, seventeenth.

All but one boy will return next year and after one year of experience, they should be hard to beat. This was Coach Martin's first job at coaching a cross country team and, due to the military, he will not be with the team next year. It was due to his hard work and constant effort that brought the team through its first season.

Financially, that is! If you find yourself in a predicament where saving seems next to impossible, you'd be wise to get a head start on the future with a guaranteed savings plan—one with protection features, too!

Beginning your life insurance program now gives you the advantage of lower premiums. We'll be glad to talk with you about a variety of plans from which you can choose. Your plan can be tailored to your individual needs.

Marlboro

campus favorite in all 50 states!

*...It's a top seller at colleges from U.S.C. to Yale
...and 1st in the Flip-Top box in every single state*

If you think you're seeing more Marlboro men lately, you're right. More than 25,000 smokers all over the country are switching to Marlboro every month!

You'll know why when you try them.

Marlboro is the filter cigarette with the unfiltered taste. The secret of the flavor is the famous Marlboro recipe from Richmond, Virginia... and the pure white Selectrate filter that goes with it.

Try Marlboro and judge for yourself. On or off campus, you get a lot to like.
